AEROSPACE MEDICINE AND BIOLOGY

A CONTINUING BIBLIOGRAPHY WITH INDEXES

(Supplement 201)

A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in December 1979 in

- *Scientific and Technical Aerospace Reports (STAR)*
- *International Aerospace Abstracts (IAA).*

NASA Scientific and Technical Information Branch 1980
National Aeronautics and Space Administration
Washington, DC

NASA SP-7011 and its supplements are available from the National Technical Information Service (NTIS). Questions on the availability of the predecessor publications, Aerospace Medicine and Biology (Volumes I - XI) should be directed to NTIS.

This Supplement is available from the National Technical Information Service (NTIS), Springfield, Virginia 22161, at the price code E03 ($6.25 domestic; $12.50 foreign).

INTRODUCTION

This Supplement to *Aerospace Medicine and Biology* (NASA SP-7011) lists 191 reports, articles and other documents announced during December 1979 in *Scientific and Technical Aerospace Reports (STAR)* or in *International Aerospace Abstracts (IAA)*. The first issue of the bibliography was published in July 1964; since that time, monthly supplements have been issued.

In its subject coverage, *Aerospace Medicine and Biology* concentrates on the biological, physiological, psychological, and environmental effects to which man is subjected during and following simulated or actual flight in the earth's atmosphere or in interplanetary space. References describing similar effects of biological organisms of lower order are also included. Such related topics as sanitary problems, pharmacology, toxicology, safety and survival, life support systems, exobiology, and personnel factors receive appropriate attention. In general, emphasis is placed on applied research, but references to fundamental studies and theoretical principles related to experimental development also qualify for inclusion.

Each entry in the bibliography consists of a bibliographic citation accompanied in most cases by an abstract. The listing of the entries is arranged in two major sections: *IAA Entries* and *STAR Entries*, in that order. The citations, and abstracts when available, are reproduced exactly as they appeared originally in *IAA* or *STAR*, including the original accession numbers from the respective announcement journals. This procedure, which saves time and money, accounts for the slight variation in citation appearances.

Two indexes -- subject and personal author -- are included.

An annual index will be prepared at the end of the calendar year covering all documents listed in the 1979 Supplements.

AVAILABILITY OF CITED PUBLICATIONS

IAA ENTRIES (A79-10000 Series)

All publications abstracted in this Section are available from the Technical Information Service, American Institute of Aeronautics and Astronautics, Inc. (AIAA), as follows: Paper copies of accessions are available at $6.00 per document up to a maximum of 20 pages. The charge for each additional page is $0.25. Microfiche (1) of documents announced in *IAA* are available at the rate of $2.50 per microfiche on demand, and at the rate of $1.10 per microfiche for standing orders for all *IAA* microfiche. The price for the *IAA* microfiche by category is available at the rate of $1.25 per microfiche plus a $1.00 service charge per category per issue. Microfiche of all the current AIAA Meeting Papers are available on a standing order basis at the rate of $1.35 per microfiche.

Minimum air-mail postage to foreign countries is $1.00 and all foreign orders are shipped on payment of pro-forma invoices.

All inquiries and requests should be addressed to AIAA Technical Information Service. Please refer to the accession number when requesting publications.

STAR ENTRIES (N79-10000 Series)

One or more sources from which a document announced in *STAR* is available to the public is ordinarily given on the last line of the citation. The most commonly indicated sources and their acronyms or abbreviations are listed below. If the publication is available from a source other than those listed, the publisher and his address will be displayed on the availability line or in combination with the corporate source line.

Avail: NTIS. Sold by the National Technical Information Service. Prices for hard copy (HC) and microfiche (MF) are indicated by a price code followed by the letters HC or MF in the *STAR* citation. Current values for the price codes are given in the tables on page vii.

Documents on microfiche are designated by a pound sign (#) following the accession number. The pound sign is used without regard to the source or quality of the microfiche.

Initially distributed microfiche under the NTIS SRIM (Selected Research in Microfiche) is available at greatly reduced unit prices. For this service and for information concerning subscription to NASA printed reports, consult the NTIS Subscription Section, Springfield, Va. 22161.

NOTE ON ORDERING DOCUMENTS: When ordering NASA publications (those followed by the * symbol), use the N accession number. NASA patent applications (only the specifications are offered) should be ordered by the US-Patent-Appl-SN number. Non-NASA publications (no asterisk) should be ordered by the AD, PB, or other *report* number shown on the last line of the citation, not by the N accession number. It is also advisable to cite the title and other bibliographic identification.

Avail: SOD (or GPO). Sold by the Superintendent of Documents, U.S. Government Printing Office, in hard copy. The current price and order number are given following the availability line. (NTIS will fill microfiche requests, at the standard $3.00 price, for those documents identified by a # symbol.)

---

(1) A microfiche is a transparent sheet of film, 105 by 148 mm in size, containing as many as 60 to 98 pages of information reduced to micro images (not to exceed 26:1 reduction).

Avail: NASA Public Document Rooms. Documents so indicated may be examined at or purchased from the National Aeronautics and Space Administration, Public Documents Room (Room 126), 600 Independence Ave., S.W., Washington, D.C. 20546, or public document rooms located at each of the NASA research centers, the NASA Space Technology Laboratories, and the NASA Pasadena Office at the Jet Propulsion Laboratory.

Avail: DOE Depository Libraries. Organizations in U.S. cities and abroad that maintain collections of Department of Energy reports, usually in microfiche form, are listed in *Energy Research Abstracts*. Services available from the DOE and its depositories are described in a booklet, *DOE Technical Information Center - Its Functions and Services* (TID-4660), which may be obtained without charge from the DOE Technical Information Center.

Avail: Univ. Microfilms. Documents so indicated are dissertations selected from *Dissertation Abstracts* and are sold by University Microfilms as xerographic copy (HC) and microfilm. All requests should cite the author and the Order Number as they appear in the citation.

Avail: USGS. Originals of many reports from the U.S. Geological Survey, which may contain color illustrations, or otherwise may not have the quality of illustrations preserved in the microfiche or facsimile reproduction, may be examined by the public at the libraries of the USGS field offices whose addresses are listed in this introduction. The libraries may be queried concerning the availability of specific documents and the possible utilization of local copying services, such as color reproduction.

Avail: HMSO. Publications of Her Majesty's Stationery Office are sold in the U.S. by Pendragon House, Inc. (PHI), Redwood City, California. The U.S. price (including a service and mailing charge) is given, or a conversion table may be obtained from PHI.

Avail: BLL (formerly NLL): British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. Photocopies available from this organization at the price shown. (If none is given, inquiry should be addressed to the BLL.)

Avail: Fachinformationszentrum, Karlsruhe. Sold by the Fachinformationszentrum Energie, Physik, Mathematik GMBH, Eggenstein Leopoldshafen, Federal Republic of Germany, at the price shown in deutschmarks (DM).

Avail: Issuing Activity, or Corporate Author, or no indication of availability. Inquiries as to the availability of these documents should be addressed to the organization shown in the citation as the corporate author of the document.

Avail: U.S. Patent and Trademark Office. Sold by Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, at the standard price of 50 cents each, postage free.

Other availabilities: If the publication is available from a source other than the above, the publisher and his address will be displayed entirely on the availability line or in combination with the corporate author line.

SUBSCRIPTION AVAILABILITY

This publication is available on subscription from the National Technical Information Service (NTIS). The annual subscription rate for the monthly supplements, excluding the annual cumulative index, is $50.00 domestic; $100.00 foreign. All questions relating to the subscriptions should be referred to NTIS.

GENERALIZED ENVIRONMENTAL CONTROL AND LIFE SUPPORT SYSTEM COMPUTER PROGRAM (G1894), PHASE 3 Final Report

R. E. McEnulty Sep. 1978 23 p refs

(Contract NAS9-14877)

(NASA-CR-151836; MDC-G7699) Avail: NTIS HC A02/MF A01 CSCL 06K

The work performed during Phase 3 of the Generalized Environmental Control Life Support System (ECLSS) Computer Program is reported. Phase 3 of this program covered the period from December 1977 to September 1978. The computerized simulation of the Shuttle Orbiter ECLSS was upgraded in the following areas: (1) the payload loop of the Shuttle simulation was completely recoded and checked out; (2) the Shuttle simulation water and freon loop initialization logic was simplified to permit easier program input for the user; (3) the computerized simulation was modified to accept the WASP subroutine, which is a subroutine to evaluate thermal properties of water and freon; (4) the 1108 operating system was upgraded by LEC; (5) the Shuttle simulation was modified to permit failure cases which simulate zero component flow values; and (6) the Shuttle SEPS version was modified and secure files were setup on the 1108 and 1110 systems to permit simulation runs to be made from remote terminals. A79-12869 * Studies on the erythron and the ferrokinetic responses in beagles adapted to hypergravity. D. A. Beckman, J. W. Evans (California, University, Davis, Calif.), and J. Oyama (NASA, Ames Research Center, Biomedical Research Div., Moffett Field; California, University, Davis, Calif.). *Aviation, Space, and Environmental Medicine*, vol. 49, Nov. 1978, p. 1331-1336. 23 refs. Grant No. NCA2-OR180-505.

Red cell survival, ferrokinetics, and hematologic parameters were investigated in beagle dogs exposed to chronic hypergravity (2.6 Gx). Ineffective erythropoiesis, red cell mass, plasma volume, and Cr-51-elution were significantly increased; maximum Fe-59 incorporation was decreased; and there was no change in the mean erythrocyte life span following autologous injection of Cr-51-labeled red cells and Fe-59-labeled transferrin. Red cell count, F(cells), total body hemoglobin (Hb), susceptability to osmotic lysis, and differential reticulocyte count were increased. White blood cell count, venous blood %Hb, mean cell volume, mean cell Hb, mean cell Hb concentration, and serum iron were decreased. No changes were observed for body mass, mg Fe per g Hb, iron binding capacity, percent saturation of iron carrying capacity, or the electrophoretic mobility of purified Hb. This study indicated that chronic exposure to hypergravity induced changes in red cell size, volume, total mass, and membrane permeability. (Author)

AEROSPACE MEDICINE AND BIOLOGY

A Continuing Bibliography (Suppl. 201)

JANUARY 1980

IAA ENTRIES

A79-51026 **Noninvasive cardiovascular measurements.** Edited by H. A. Miller, E. V. Schmidt, and D. C. Harrison (Stanford University, Stanford, Calif.). Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers (SPIE Proceedings. Volume 167), 1978. 232 p.

A collection of papers is presented regarding recent advances of prime importance in noninvasive cardiovascular measurement techniques. Five problem areas are discussed: (1) quantitative radiography; (2) computerized and contrast angiography (nuclear and computerized tomographic imaging, intravenous contrast angiography); (3) noninvasive blood pressure measurement and monitoring; (4) ultrasonography (echocardiography, blood flow); and (5) magnetocardiography. The authors of each section in this book review the most important advances in their fields, and project those new areas which are most promising for continued research. S.D.

A79-51027 * **Aerospace highlights and potential medical applications.** C. A. Syvertson (NASA, Ames Research Center, Moffett Field, Calif.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 1-10.

An attempt is made to provide an overview of activities going on in NASA from aeronautics to manned space flight, to exploration of other planets. Some of the spin-offs of NASA research related to the medical profession are described. The discussion focuses on the Space Shuttle, the unmanned spacecraft Seasat program, the exploration of other planets in the solar system, a water-cooled helmet, and some breakthroughs in medical diagnostic instrumentation. S.D.

A79-51028 **Computer quantitation of angiocardiographic images.** P. H. Heintzen, R. Brennecke, and J. H. Buersch (Kiel, Neue Universität, Kiel, West Germany). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 17-20. 10 refs.

A new technique for computerized videoangiocardiography is described which minimizes the disadvantages of contrast material and provides maximum structural and/or functional information from angiocardiograms for a given amount of contrast regardless of the site and mode of injection. This improvement is achieved by summing up instantaneous contrast angiocardiographic pictures in a continuous or heart-phase-related mode, and subtracting the corresponding nonspecific background obtained from X-ray pictures taken in real time prior to or following contrast injection. Digital filtering and histogram modification techniques are used to enhance the contrast and reduce the 'noise'. Typical results are presented. S.D.

A79-51029 **Clinical usefulness of radiopaque markers in left ventricular function.** G. T. Meester, P. W. Serruys, P. G. Hugenholtz (Rotterdam, Erasmus Universiteit, Rotterdam, Netherlands), and R. W. Brower (Interuniversitary Cardiological Institute, Amsterdam, Netherlands). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 21-26. 28 refs.

When coronary blood flow is restored after a successful coronary bypass surgery, improvement of local wall motion can be expected. However, this result is not clearly present in the available present-day extensive and somewhat conflicting literature. This is partly due to extraneous factors such as peri-operative infarctions, graft closure, the effect of concomitant medical treatment, and the methodology involved. The paper reviews some of these factors and discusses alternative approaches. Attention is given to an approach suitable for the quantitation of local wall motion through the use of implanted epicardial radiopaque markers. Relevant experimental results are presented. Also discussed is the automatic detection of ventricular contours in angiocardiograms. S.D.

A79-51030 * **Computer quantitation of coronary angiograms.** D. C. Ledbetter, R. H. Selzer (California Institute of Technology, Jet Propulsion Laboratory, Pasadena, Calif.), R. M. Gordon (Informatics, Inc., Palo Alto, Calif.), D. H. Blankenhorn (Southern California, University, Los Angeles, Calif.), and M. E. Sanmarco (Rancho Los Amigos Hospital, Downey, Calif.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 27-36. 5 refs.

A computer technique is being developed at the Jet Propulsion Laboratory to automate the measurement of coronary stenosis. A Vanguard 35mm film transport is optically coupled to a Spatial Data System vidicon/digitizer which in turn is controlled by a DEC PDP 11/55 computer. Programs have been developed to track the edges of the arterial shadow, to locate normal and atherosclerotic vessel sections and to measure percent stenosis. Multiple frame analysis techniques are being investigated that involve on the one hand, averaging stenosis measurements from adjacent frames, and on the other hand, averaging adjacent frame images directly and then measuring stenosis from the averaged image. For the latter case, geometric transformations are used to force registration of vessel images whose spatial orientation changes. (Author)

A79-51031 **Computerized positron emission tomography /PET/ for the assessment of myocardial integrity.** M. M. Ter-Pogossian (Washington University, St. Louis, Mo.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 43-48. 14 refs.

Myocardial integrity is an important parameter in the diagnosis, therapy, and general understanding of cardiac disease. The paper describes the operating principles and capabilities of a new noninvasive technique, called the computerized positron emission tomography (PET), for the in vivo assessment of myocardial integrity.

This technique, a nuclear medicine imaging procedure, yields transverse tomographic images of the heart, which reflect the distribution of a previously administered positron-emitting radionuclide.The images are produced with a very high spatial resolution as compared to more conventional nuclear medicine procedures, and they provide highly quantitative information on the distribution of the radionuclide. The combined use of PET and cyclotron-produced short-lived positron-emitting radionuclides permits the in vivo regional noninvasive assessment of myocardial metabolism, which is perhaps the most important parameter of myocardial integrity. S.D.

A79-51032 **Current status of cardiovascular imaging by transmission computed tomography.** W. R. Brody (Stanford University, Stanford, Calif.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 49-55. 20 refs. Research supported by the Santa Clara County Heart Association.

Although the technological advances in transmission computed tomography (CT) have been dramatic, cardiovascular applications of CT are currently limited by inadequate temporal resolution to resolve moving structures (e.g., the myocardium), difficulties in timing the scan exposure to coincide with maximum contrast enhancement of vascular structures and cardiac chambers, and limited field of view perpendicular to the axial plane. The modes of cardiac CT operation are reviewed: static (single scan), dynamic (multiple scans in rapid succession), gated and rapid (scans less than 500 msec). Modest improvements in gated and dynamic scanning are expected with existing technology and optimization of reconstruction algorithms. Future advances in CT technology should be directed toward the development of rapid scanning systems for imaging the myocardium and toward higher resolution scanners for imaging vascular structures. (Author)

A79-51033 **The development of a digital video subtraction system for intravenous angiography.** T. W. Ovitt, M. P. Capp, H. D. Fisher, M. M. Frost, S. Nudelman, H. Roehrig (Arizona, University, Tucson, Ariz.), and J. L. Lebel (Arizona, University, Tucson, Ariz.; Colorado State University, Fort Collins, Colo.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 61-65.

A system is under development for a relatively noninvasive technique for the assessment of atherosclerosis. The principle of this method is digital video X-ray subtraction for the visualization of arterial structures after the intravenous injection of contrast media. The prototype unit for the development of video subtraction techniques has been assembled and preliminary testing has started. Results so far in dogs have shown good visualization of the heart, carotid arteries and renal arteries. (Author)

A79-51034 * **Iodine imaging using spectral analysis.** A. Macovski (Stanford University, Stanford, Calif.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 67-75. 7 refs. NSF Grant No. ENG-76-05529; Contract No. NAS5-23522.

Existing radiographic imaging systems provide images which represent an integration or averaging over the energy spectrum. In order to provide noninvasive angiography it is necessary to image the relatively small amounts of iodine which are available following an intravenous administration. This is accomplished by making use of the special spectral characteristics of iodine. Two methods will be presented. One involves a special grating for encoding the iodine information in the form of a fine line pattern. This is subsequently decoded to provide images of iodinated structures which are otherwise almost invisible. The second method utilizes a scanned X-ray beam which is rapidly switched in the high energy region. In this region, iodine experiences significant variations in the attenuation coefficient while bone and soft tissue do not. An efficient and accurate X-ray detector can be used with scanned X-ray beams. This provides a high degree of sensitivity enabling the visualization of small vessels containing relatively dilute iodine. (Author)

A79-51035 **Real-time computerized fluoroscopic cardiac imaging.** R. A. Kruger, C. A. Mistretta, T. L. Houk, S. J. Riederer, C. G. Shaw, D. L. Ergun, D. Carbone, W. Kubal, A. Crummy, and W. Zwiebel (Wisconsin, University, Madison, Wis.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 77-82. 7 refs.

A computerized fluoroscopy system employing several time and energy subtraction algorithms has permitted good visualization of the cardiovascular system using peripheral intravenous iodine injections of about 1 cm cu/kg. Image contrast improvements of 8-16 over conventional fluoroscopy are common. Several canine and human imaging studies are described including visualization of myocardial infarctions as regions of anomalous image grey shade. The system employs a standard image intensified fluoroscopy system and a specially constructed real-time image processor. Quasi-monoenergetic X-ray beams formed by filtration deliver typical doses of 400 mR/sec in adult human cardiac exams. (Author)

A79-51036 **A study of noninvasive blood pressure measurement techniques.** C. S. Weaver, J. S. Eckerley, P. M. Newgard, C. T. Warnke (SRI International, Menlo Park, Calif.), J. B. Angell, S. C. Terry, and J. Robinson (Stanford University, Stanford, Calif.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 89-105. 10 refs. Grant No. NIH-HL-17604.

Some results of a study of techniques for the noninvasive and ambulatory measurement of blood pressure are presented. A method for computer processing ambulatory or stress test data to determine blood pressure is described. It appears that good accuracies can be obtained with ambulatory patients during normal ranges of physical activities and perhaps during treadmill tests. The development and testing of a new transducer for the noninvasive beat-by-beat measurement of blood pressure is described. The transducer outputs are similar to intra-arterial waveforms that are obtained by catheter, and it is expected that the transducer will be used in the operating room, the ICU, and the CCU. (Author)

A79-51037 **Analyses for noninvasive monitoring of arterial blood pressure by /I/ phono cuff-sphygmomanometry, for discrete measurements and /II/ arterial ultrasonic imaging, for continuous measurements.** D. N. Ghista (Michigan Technological University, Houghton, Mich.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 107-120. 7 refs.

A79-51038 **A new noninvasive technique for cardiac pressure measurement. II - Scattering from encapsulated bubbles.** D. Z. Anderson, M. O. Scully, and W. C. Speed (Arizona, University, Tucson, Ariz.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 121-127.

A recent paper by Fairbank and Scully (1977) has reported a new technique for noninvasive measurement of cardiac pressure by using tiny air bubbles. The present paper investigates experimentally the utility of pressure-sensitive coated (Dow and Sephadex) spheres to the problem of remote pressure sensing. The experiments are performed in both the low bubble density (single scattering) and high density (multiple scattering) limits using both Dow and Sephadex spheres. The experiments described demonstrate the pressure sensitivity of the amplitude and frequency responses for both types of spheres. The viability of this encapsulated-bubble scheme as applied to remote cardiac pressure measurements is demonstrated. S.D.

A79-51039 * **Signal processing in ultrasound.** D. H. Le Croissette (California Institute of Technology, Jet Propulsion Laboratory, Pasadena, Calif.) and P. M. Gammell (Southern California, University, Los Angeles, Calif.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 135-141. 7 refs. Contract No. NAS7-100.

Signal is the term used to denote the characteristic in the time or frequency domain of the probing energy of the system. Processing of this signal in diagnostic ultrasound occurs as the signal travels through the ultrasonic and electrical sections of the apparatus. The paper discusses current signal processing methods, postreception processing, display devices, real-time imaging, and quantitative measurements in noninvasive cardiology. The possibility of using deconvolution in a single transducer system is examined, and some future developments using digital techniques are outlined. S.D.

A79-51040 **Clinical applications of new echocardiographic techniques.** R. L. Popp (Stanford University, Stanford, Calif.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 143-150. 20 refs.

The paper reviews the method of two-dimensional echocardiographic imaging for clinical purposes, and attempts to differentiate those proven applications from the ones considered to need further definition and investigation. Capabilities of M-mode and two-dimensional echocardiography are compared. The two-dimensional echocardiographic system provides both M-mode information and two-dimensional display. This technique has been shown to be accurate for quantitation of the size of cardiac valves, segmental left ventricular wall motion abnormalities, complex congenital heart malformations, and the presence of intracardiac masses and of pericardial fluid surrounding the heart. In particular, the technique is suitable for identifying the orientation and location of myocardial segments to be sampled for tissue signature analysis for noninvasive characterization of the histology of the heart. S.D.

A79-51041 **Cardiac blood flow measurement - A component of the comprehensive cardiac examination.** D. W. Baker (Washington, University, Seattle, Wash.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 155-159. 15 refs. Grant No. NIH-HL-07293.

The resolution and sensitivity of ultrasonic techniques provide the potential for many types of cardiac blood flow detection and analysis. The paper discusses the need for the clinical flow measurements, specific measurements, instrumentation factors in quantitation, a systems approach to flow measurement, and data displays. A real-time computer-based ultrasound system with specialized display is under development. The availability of advanced, large-scale, digital integrated circuits and large memories makes it relatively inexpensive to collect, process, and display the large bodies of data required to utilize more blood-flow information in the diagnostic process. S.D.

A79-51042 **Quantitative flow estimation with transcutaneous Doppler ultrasound.** C. F. Hottinger, L. Gerzberg, J. D. Meindl, W. R. Brody, T. S. Nelsen (Stanford University, Stanford, Calif.), and W. C. Haase. In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 161-168. 17 refs. Grant No. NIH-NIGMS-17940.

The paper outlines an approach known as the attenuation-compensated volume flow meter (ACVF), which avoids the need for direct calculations of the vessel size, and assures measurement of flow normal to a sample surface using pulsed Doppler ultrasound. The transducer configuration and block diagram of the ACVF are schematically presented and described. The approach allows estimation of volume flow without precise determination of the Doppler angle, vessel size, or details of the velocity profile. The approach thus overcomes several of the major obstacles hindering transcutaneous quantitation of blood flow. This simplification arises through the close correspondence of the measurement method to the formal definition of flow. S.D.

A79-51043 * **Biomagnetic instrumentation and measurement.** E. J. Iufer (NASA, Ames Research Center, Moffett Field, Calif.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 175-180. 16 refs.

The instruments and techniques of biomagnetic measurement have progressed greatly in the past 15 years and are now of a quality appropriate to clinical applications. The paper reports on recent developments in the design and application of SQUID (Superconducting Quantum Interference Device) magnetometers to biomagnetic measurement. The discussion covers biomagnetic field levels, magnetocardiography, magnetic susceptibility plethysmography, ambient noise and sensor types, principles of operation of a SQUID magnetometer, and laboratory techniques. Of the many promising applications of noninvasive biomagnetic measurement, magnetocardiography is the most advanced and the most likely to find clinical application in the near future. S.D.

A79-51044 **Clinical magnetocardiography.** J. P. Wikswo, Jr. (Vanderbilt University, Nashville, Tenn.). In: Noninvasive cardiovascular measurements. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1978, p. 181-193. 40 refs.

The paper outlines the theoretical basis of magnetocardiography (MCG) to elucidate the basic differences between the ECG and MCG. MCG instrumentation and various methods of recording, displaying and analyzing the MCG are described. The current clinical experience with MCG is discussed, and the rationale for the various clinical applications is summarized. There are currently four areas where MCG might prove clinically useful: (1) to complement ECG diagnosis, (2) to screen large numbers of people for cardiac electrical abnormalities, (3) to measure noninvasively the electrical activity of the Bundle of His, and (4) to detect infarct-related injury currents. The identification of those areas where magnetocardiography offers the most promise as a clinical tool is under way. S.D.

A79-51045 **Non-invasive information on the P-R segment of the cardiac cycle - An assessment of the clinical potential of the electric and magnetic methods.** D. Farrell, J. Tripp, and R. Norgren (Case Western Reserve University, Cleveland, Ohio). In: Noninvasive cardiovascular measurements. A79-51098 * # **Advanced transport operation effects on pilot scan patterns.** R. L. Harris, Sr. and R. W. Mixon (NASA, Langley Research Center, Hampton, Va.). *Human Factors Society, Annual Meeting, Boston, Mass., Oct. 30-Nov. 1, 1979, Paper.* 6 p. 11 refs.

Long straight-in and close-in, curved, descending instrument approaches were made in NASA's fixed-base Terminal Configured Vehicle simulator. The pilot either manually controlled the simulator or monitored the automatic system control of the simulated aircraft during the approach. Tests were performed with or without the display of traffic. The results indicate that the pilots' use of the Electronic Horizontal Situation Indicator (EHSI) increased appreciably for the close-in, curved, descending approach compared to the conventional straight-in approach. When operating as a monitor of the autopilot system, the pilot scanned around more with less attention devoted to the Electronic Attitude Direction Indicator (EADI). The pilots preferred the manual mode because it kept them in the control loop. The addition of displayed traffic to the EHSI increased the pilots' use of the EHSI with a corresponding reduction in his use of the EADI. Also, the pilot's pupil diameter increased during the landing flare indicating a higher stress level even though the tests were conducted in a fixed-base simulator. (Author)

A79-51112 **Application of an isolated heart model to investigate blood-oxygen delivery.** P. W. Rand, C. V. Nelson, E. H. Lacombe, N. D. Barker, and L. A. Pirone (Maine Medical Center, Portland, Me.). *American Journal of Physiology,* vol. 237, Sept. 1979, p. H348-H352. 13 refs. Research supported by the John A. Hartford Foundation.

Application of a blood-perfused isolated rabbit heart model providing metabolic, functional, and vectorcardiographic measurements is presented. The model avoided compensatory hemodynamic responses which limited interpretation of hemoglobin-oxygen affinity modifications, and fixed-flow perfusions of unchanged or affinity-modified red blood cell suspensions were performed to assess the benefits of high affinity during hypoxic hypoxia and of low affinity during posthypoxic recovery. High myocardial oxygen consumption (MVo2) was associated with high-affinity blood during mild hypoxia and low-affinity blood during posthypoxic recovery. Ventricular function, vectorcardiographic patterns, and lactate levels were affected by hypoxia and ischemia, but not by level of affinity, and the relevance of these observations to the therapeutic potential of hemoglobin-oxygen affinity modification is discussed. A.T.

A79-51113 # **The effect of normobaric hyperoxia on brain and liver tissue respiration in albino rats with different resistances to hypoxia (Vliianie normobaricheskoi giperoksii na tkanevoe dykhanie mosga i pecheni belykh krys s razlichnoi ustoichivost'iu k gipoksii).** A. A79-51115 # **The effect of the reduction of inspired gas density on external respiration (O vliianii snizheniia plotnosti vdykhaemoi gazovoi smesi na vneshnee dykhanie).** E. V. Rozova and M. M. Seredenko (Akademiia Nauk Ukrainskoi SSR, Institut Fiziologii, Kiev, Ukrainian SSR). *Fiziologicheskii Zhurnal* (Kiev), vol. 25, July-Aug. 1979, p. 445-447. 14 refs. In Russian.

The effects of gas mixtures of various densities and normal and elevated oxygen concentrations on external respiration and gas exchange in humans is investigated. Subjects breathed atmospheric air as well as 21% O2-79% He, 40% O2-60% N2 and 40% O2-60% He mixtures for 15 min and ventilatory and gas exchange responses were monitored. Breathing of the normoxic oxygen-helium mixture is found to lead to a decrease in respiratory volume and the ratio between alveolar ventilation and respiratory volume relative to air breathing, indicating a decrease in the ability of the respiratory system to supply oxygen. An increase in the dead volume and decreases in oxygen consumption, carbon dioxide evolution and arterial oxygen pressure are also noted. The inhalation of hyperoxic oxygen-helium mixtures is found to lead to decreases in the alveolar ventilation/respiratory volume ratio and CO2 evolution, and a less marked increase in oxygen consumption as compared with the effects of a hyperoxic oxygen-nitrogen mixture. Current understandings of the role of lung surfactants in respiratory physiology are reviewed. The functions of lung surfactants in maintaining the elasticity of the lung, lowering gas-liquid interfacial tensions, stabilizing alveolus dimensions and regulating gas exchange are discussed and the structure of surfactant layers is outlined. Means of sampling and purifying surfactants are presented, and the role of surfactants in lung pathology is considered. Attention is also given to the effects of hypoxia and hyperoxia on the synthesis, reabsorption and surface activity of lung surfactants.

A79-51174 **The visual cortex of normal and deprived monkeys.** D. H. Hubel (Harvard University, Boston, Mass.). *American Scientist,* vol. 67, Sept.-Oct. 1979, p. 532-543. 26 refs.

The paper reviews studies on the part of the brain that is concerned with vision. Attention is focused on the visual cortex of monkeys with normal vision and those deprived of the use of one or both eyes. The discussion covers the striate cortex and its functions; functional architecture; geometry of ocular dominance columns; physiological effects of visual deprivation; timing of deprivation effects; effects of closure on critical architecture; dominance columns in newborn monkeys; and some comments on normal and abnormal brains. The results described involve the visual pathway only, and probably a relatively peripheral part of it. They provide insight into some of the functions of the brain. S.D.

A79-51327 # **Reciprocal interaction between the photopic and scotopic systems of the visual analyzer in man (O retsiproknom vzaimodeistvii mezhdu fotopicheskoi i skotopicheskoi sistemami zritel'nogo analizatora cheloveka).** V. A. Il'ianok (Akademiia Nauk SSSR, Institut Vysshei Nervnoi Deiatel'nosti i Neirofiziologii, Moscow, USSR). In: Sensory perception systems (Sensornye sistemy). Leningrad, Izdatel'stvo Nauka, 1979, p. 40-53. 90 refs. In Russian.

A review is presented of available literature on the reciprocal interaction between the rod and cone systems of the visual analyzer in man. A description is given of this interaction in the electrical activity of different areas of the cerebral cortex during the redistribution of brightness in the field of vision. Mechanisms responsible for the occurrence of inhibitory processes, their dependence on the various parameters of light stimuli, and the role of these processes in regulating the functions of all visual-analyzer levels are examined. Practical recommendations are made as to the optimization of the brightness distribution in the field of vision. S.D.

A79-51328 # **Effect of adaptation level on certain visual functions in man (Vliianie urovnia adaptatsii na nekotorye zritel'nye funktsii cheloveka).** V. M. Kamenkovich (Akademiia Nauk SSSR, Institut Vysshei Nervnoi Deiatel'nosti i Neirofiziologii, Moscow, USSR). In: Sensory perception systems (Sensornye sistemy). Leningrad, Izdatel'stvo Nauka, 1979, p. 53-61. 50 refs. In Russian.

The paper presents a review of literature data on the effect of adaptation level on simple visual functions, viz., visual acuity and contrast sensitivity. Also presented are results of investigations into the adaptive changes in the threshold time for recognition of simple and complex visual images under conditions of varying and constant contrast. S.D.

A79-51698 * **Minute tubular forms in soil.** L. E. Casida, Jr. and K.-C. Liu (Pennsylvania State University, University Park, Pa.). *Canadian Journal of Microbiology,* vol. 25, no. 6, 1979, p. 722-729. 16 refs. Grant No. NGR-39-009-180.

Large numbers of long, straight, flattened structures were observed during an electron-microscope study of bacteriophage in aqueous extracts. These structures were called tubules and ranged in width from 10 to 50 nm. Materials and methods were discussed relative to extraction of tubules from soil, electron microscopy, quantitation of tubules in filtrate suspension, tests performed on tubules, plaque formation, and nutrient amendments. It is found that all of the tubules recovered from soil are broken at one or both ends. They are present in surface soils but not in a subsurface sample. Their numbers decrease during bacterial multiplication in soil or broth-containing soil. The tubules appear to be composed of protein that could be disintegrated to liberate nonprotein fibers. A possible clue to the nature of the tubules is their apparent relation to soil bacteria. S.D.

A79-51701 * **Attachment to autoclaved soil of bacterial cells from pure cultures of soil isolates.** D. L. Balkwill and L. E. Casida, Jr. (Pennsylvania State University, University Park, Pa.). *Applied and Environmental Microbiology,* vol. 37, May 1979, p. 1031-1037. 32 refs. Grant No. NGR-39-009-180.

A study to determine whether the firmness of microbial attachment that occurred for the overall bacterial population in natural unaltered soil could be duplicated for selected bacterial soil isolates introduced into autoclaved soil is presented. Pure cultures of Arthrobacter globiformis and four fresh isolates were incubated individually in autoclaved soil in the presence and absence of glucose. The attachment attained by the soil isolates duplicated that of the overall bacterial population that resides in unaltered, unamended soil. Electron microscopy indicated that all attached cells produced extracellular polysaccharide slimes in the autoclaved soil, and that these materials appeared to connect the cells to surrounding soil debris. The actual role of polysaccharides in attachment was not clear, however, because at least one of these organisms possessed extracellular slime during the period when it had not yet attached to the soil. A.T.

A79-52022 **Frequency and amplitude analysis of the EMG during exercise on the bicycle ergometer.** J. S. Petrofsky (St. Louis University, St. Louis, Mo.). *European Journal of Applied Physiology,* vol. 41, no. 1, 1979, p. 1-15. 38 refs. U.S. Department of Health, Education, and Welfare Contract No. HSM-099-71-21; Grant No. AF-AFOSR-72-2362.

Experiments were conducted in which the amplitude and frequency of the EMG were recorded from the quadriceps muscle in three male subjects during work on a bicycle ergometer. The objective was to examine the relationship of the center frequency and rms amplitude to the oxygen cost and fatigue in muscle during dynamic exercise. The results indicate that the EMG is a complex waveform, being influenced not only by fatigue, but to even a larger extent in many cases, by the temperature of the exercising muscles. Although muscular fatigue caused an increase in the rms amplitude and a decrease in the center frequency, the increase in muscle temperature opposed these changes by reducing the rms amplitude and increasing the center frequency. S.D.

A79-52023 **Plasma aldosterone, renin activity, and cortisol responses to heat exposure in sodium depleted and repleted subjects.** M. Follenius, G. Brandenberger, B. Reinhardt, and M. Simeoni (CNRS, Centre d'Etudes Bioclimatiques, Strasbourg, France). *European Journal of Applied Physiology,* vol. 41, no. 1, 1979, p. 41-50. 27 refs.

A79-52024 **Time course of O2-pulse during various tests of aerobic power.** R. A. Wiswell and H. A. de Vries (Southern California, University, Los Angeles, Calif.). *European Journal of Applied Physiology,* vol. 41, no. 4, 1979, p. 221-231. 17 refs.

An experimental study was conducted to (1) test the hypothesis proposed by Balke (1954) that O2-pulse typically reaches a maximum before V(O2) max by observing the time course of O2-pulse throughout maximal exercise stress; (2) compare bicycle ergometer and treadmill exercise with respect to the elicited O2-pulse time course as well as to the V(O2)max and HR; (3) discern those physiologic variables which might predispose an individual to reach a peak O2-pulse at submaximal work load if this phenomenon is not universal; and (4) evaluate the use of O2-pulse at submaximal levels of exercise to predict V(O2)max. The results show that the use of maximal O2-pulse rather than V(O2)max offers no significant advantage. O2-pulse during submaximal exercise appears to provide a good indication of cardiorespiratory fitness. S.D.

A79-52025 **Electrophysiological correlates of local muscular fatigue effects upon human visual reaction time.** G. A. Wood (Western Australia, University, Nedlands, Australia). *European Journal of Applied Physiology,* vol. 41, no. 4, 1979, p. 247-257. 18 refs.

A79-52055 **Manual landings in Category 3 conditions.** A. D. Brown and D. J. Gurney (Royal Aircraft Establishment, Bedford, Hants., England). *Aeronautical Journal,* vol. 83, Aug. 1979, p. 296-305. 9 refs.

Two aircraft were used for flight trials in accordance with the program involving flying in Category 3 fog conditions. The pilot techniques used and the problems encountered in manual landing are discussed. The trial progressed from simulation studies and aircraft performance measurements to actual flight trials in fog. At the start of the program, while experience was being gained, weather minima were imposed based partly on earlier trial results and partly on an improved knowledge of fog characteristics. As data were obtained and crew procedures refined, the minima were progressively reduced so that the limiting visual conditions for manual landings could be established. V.T.

A79-52276 **Pilot performance during simulated approaches and landings made with various computer-generated visual glidepath indicators.** M. F. Lewis and H. W. Mertens (FAA, Civil Aeromedical Institute, Oklahoma City, Okla.). *Aviation, Space, and Environmental Medicine,* vol. 50, Oct. 1979, p. 991-1002. 16 refs.

The paper presents the effectiveness of four different visual glidepath indicator systems, in terms of pilot performance, under conditions where the stimulus environment is severely reduced. These are the 2-bar, 3-bar, T-bar visual approach slope indicators (VASI) and the precision approach path indicator (PAPI) systems which have involved subjective pilot assessments rather than performance measures. 24 pilots were selected for testing, with at least a 20/30 acuity between 30 and 40 inches, employing an aircraft simulator that was connected to an analog-to-digital converter. The tests were simulated with downwind and upwind light bars for the 2-bar system, while a third was added upwind of the second for the 3-bar system. The T-bar employed a partially nonvisible wingbar, where the upwind position lights increased with deviation above the optimum glidepath to form an inverted T. It was determined that with varying approaches and landing systems, discrepancies in landing consistency did occur. C.F.W.

A79-52277 **Effect of fiber and dye degradation products /FDP/ on burn wound healing.** F. S. Knox, III, T. L. Wachtel, G. R. Mc-Cahan, Jr., and S. C. Knapp (U.S. Army, Aeromedical Research Laboratory, Fort Rucker, Ala.). *Aviation, Space, and Environmental Medicine,* vol. 50, Oct. 1979, p. 1007-1015. 12 refs.

Upon exposure to the thermal environment of an aircraft fire, many fire retardant fabrics off-gas fiber and dye degradation products (FDP). Condensation of these products on human skin raises questions concerning possible deleterious effects on burn wound healing. A porcine bioassay was used to study the physiological effects of FDP. Selected areas of living skin, protected by dyed aromatic polyamides and polybenzimidazole fabrics, were exposed to a thermal source adjusted to simulate a postcrash JP-4 fuel fire. Burn sites contaminated with FDP were evaluated by clinical observation and histological techniques. Healing of the burn wound was followed by recording time to begin epithelialization, time to closure of an open wound, and the amount and type of cicatrix formation. The experiment showed that each fabric has unique off-gasing products. The greatest amount of FDP was deposited on the skin when the skin was covered by a single layer of shell fabric separated by a 6.35-mm air gap. The presence of an intervening cotton T-shirt decreased the amount of FDP deposited on the skin. No evidence is found that FDP caused alterations in wound healing. (Author)

A79-52278 **Bimodal relationship of human tremor and shivering on introduction to cold exposure.** M. F. Schneider and J. D. Brooke (Guelph, University, Guelph, Ontario, Canada). *Aviation, Space, and Environmental Medicine,* vol. 50, Oct. 1979, p. 1016-1019. 18 refs. Research supported by the National Research Council of Canada and World Sugar Research Organization.

A79-52279 **Comparison of physiological effects of head-down tilting and immersion on the human body.** E. B. Shulzhenko, V. E. Panfilov, K. I. Gogolev, and E. A. Aleksandrova (Ministerstvo Zdravookhraneniia SSSR, Institut Mediko-Biologicheskikh Problem, Moscow, USSR). *Aviation, Space, and Environmental Medicine,* vol. 50, Oct. 1979, p. 1020-1022.

The effects on water balance and blood composition of two procedures used to simulate an acute stage of weightlessness adaptation, head-down tilting and water immersion, are compared. Healthy male subjects were exposed to seven days of either head-down tilting at 6 deg or support-free, dry immersion in water, and water consumption, diuresis, hematocrit, total blood protein and blood protein fractions were monitored. More pronounced changes in water balance, hematocrit, plasma volume and blood protein, albumin and globulin contents observed during immersion indicate that immersion produces a greater effect on the human body, to which it takes longer to adapt and which more closely reproduces the effects of weightlessness adaptation. A.L.W.

A79-52280 **Bioassay of thermal protection afforded by candidate flight suit fabrics.** F. S. Knox, III, T. L. Wachtel, and G. R. McCahan, Jr. (U.S. Army, Aeromedical Research Laboratory, Fort Rucker, Ala.). *Aviation, Space, and Environmental Medicine,* vol. 50, Oct. 1979, p. 1023-1030. 25 refs.

Four thermally protective flight suit fabrics designed to protect the aviator from the thermal environment of a post-crash fire were tested by porcine bioassay to determine their mitigating effects on skin burning. A JP-4 fueled furnace with a mean heat flux of 3.07 cal/sq cm per sec was used as a heat source to study the protective properties of 4.8-oz. twill weave Nomex aramide, 4.5-oz. stabilized twill weave polybenzimidazole, 4.8-oz. plain weave experimental high-temperature polymer (HT4) and 4.8-oz. plain weave Nomex aramide on a porcine model of human skin. Results of statistical analyses of clinical and microscopic data indicate that all fabrics tested provide essentially the same degree of thermal protection, although HT4 is slightly better in attenuating heat flux. When used with a cotton T-shirt or an air gap, however, protection was improved for all fabrics and in all configurations. It is suggested that the improvement of flight suits can be achieved by the redesign of current uniforms and fabrics to include multiple layers. A.L.W.

A79-52281 **Similarity in the number of lifespan heartbeats among non-hibernating homeothermic animals.** S. D. Livingstone and L. A. Kuehn (Defence and Civil Institute of Environmental Medicine, Downsview, Ontario, Canada). *Aviation, Space, and Environmental Medicine,* vol. 50, Oct. 1979, p. 1037-1039.

A79-52282 **Cold water survival suits for aircrew.** G. R. White (Department of Defence, Aeronautical Research Laboratories, Melbourne, Australia) and N. J. Roth (Royal Australian Air Force, Institute of Aviation Medicine, Point Cook, Australia). *Aviation, Space, and Environmental Medicine,* vol. 50, Oct. 1979, p. 1040-1045. 11 refs.

Laboratory and sea trials were used to compare the effectiveness of three aircrew exposure garments - the British Mark 10, the United States CWU 21/P, and the Canadian U.VIC. Thermofloat jacket. The first two are waterproof coveralls, whereas the third is a neoprene-lined jacket designed on the basis of the 'wet suit' concept. Rectal and skin temperatures, electrocardiograms and other variables were measured while subjects, wearing the suits, were immersed in water at temperatures of 70 C and 10.5 C. The three garments were found to be similar in the degree of thermal protection provided, but the Thermofloat jacket appeared superior in other ways and has the greater potential for development. A previously unreported observation was a marked reduction in core cooling rate after the expected linear fall in core temperature. This has possible implications in the conduct of research in this field. (Author)

A79-52283 **Passive resistive torques about long bone axes of major human joints.** A. E. Engin (Ohio State University, Columbus, Ohio). *Aviation, Space, and Environmental Medicine,* vol. 50, Oct. 1979, p. 1052-1057. 11 refs. USAF-supported research.

Multisegmented total-human-body models play an important role in studies such as vehicle crash victim simulation, pilot ejection and flailing. Proper biomechanical description of the major articulating joints of these mathematical models require passive resistive torque data for the rotational motions of the body segments about their long bone axes. The paper presents a research program which was developed to collect such data at the shoulder, hip, knee, elbow, and ankle joints. The research was conducted, with some obvious limitations, on live human subjects by means of specially designed experimental apparatus. The numerical results are presented for three subjects for the passive resistive torques about the long bone axes of the major articulating joints. It is concluded that the maximum tolerable passive resistive torques associated with the long bones of the lower extremities are more than twice the ones associated with the long bones of the upper extremities. (Author)

A79-52284 **Ultrastructural development of the vestibular system under conditions of simulated weightlessness.** J. Neubert (Deutsche Forschungs- und Versuchsanstalt für Luft- und Raumfahrt, Institut für Flugmedizin, Bad Godesberg, West Germany). *Aviation, Space, and Environmental Medicine,* vol. 50, Oct. 1979, p. 1058-1061. 12 refs.

Electronmicroscopy was used to track the development of the gravity system of frog embryos and larvae which have bred for 5, 7, and 10 d after egg fertilization under conditions of simulated weightlessness on the fast-running horizontal clinostat. Although no differences in the morphologic structure of the organ between test and control animals could be found up to 7 d of development, there is a significant accumulation of vacuoles in sensory epithelia of frog larvae developing for 10 d (stage 17) in simulated zero G. (Author)

A79-52285 **Medical barofunction testing of aviators with otorhinolaryngologic disease.** J. C. Emery, D. E. Furry, E. J. Sacks (U.S. Naval Aerospace Medical Center, Aerospace Medical Institute, Pensacola, Fla.), A. S. Kapadia, and M. H. Smolensky (Texas, University, Houston, Tex.). *Aviation, Space, and Environmental Medicine*, vol. 50, Oct. 1979, p. 1062-1066. 19 refs.

Forty aviators with otorhinolaryngologic pathology, previously considered physically disqualified for flight status, were tested in the hypobaric chamber to evaluate tolerance to rapid barometric pressure changes. Testing consisted of three sequential trials in the low-pressure chamber (LPC) at rates of 1,524 m/min ascent and descent. The first trial was to 1,524 m, the second to 3,048 m, and the third to 5,486 m. Failure consisted of any symptoms (pain) or physical findings of barotrauma (aerosinusities or aerootitis media). Results revealed a 22.5% failure rate. The findings indicate this type of 'Medical Barofunction Test' is a practical adjunct to the clinical evaluation of the aviator. The profile is safe and free from serious dysbaric episodes experienced above 7,620 m. Follow-up studies revealed the incidence of false negatives to be only 8% by the LPC test. The findings are not significantly different from the medical disqualification rate of a normal student aviator comparison group. (Author)

A79-52286 **Technique for simulating G-induced tunnel vision.** J. E. Whinnery (USAF, School of Aerospace Medicine, Brooks AFB, Tex.). *Aviation, Space, and Environmental Medicine,* vol. 50, Oct. 1979, p. 1076.

A simple technique is described which helps subjects gain an understanding of the endpoint used to terminate exposure to centrifuge stress during training procedures on the human centrifuge. The technique involves manual induction of increased intraocular pressure which, in turn, causes a decrease in retinal perfusion followed by greyout and tunnel vision. (Author)

A79-52326 **The influence of low frequency vibration on pilot performance /as measured in a fixed base simulator/.** A. M. Stave (United Technologies Corp., Sikorsky Aircraft Div., Stratford, Conn.). *Ergonomics,* vol. 22, July 1979, p. 823-835. 11 refs. Grant No. DAAJ01-72-C-0634.

The results of a two-year study on the effects of low-frequency vibration on pilot performance are described. Data on the effects of low-frequency vibration are collected while pilots fly a helicopter simulator and accomplish navigation, approach, hover, and slung load handling tasks. Performance is measured in terms of flight path and altitude deviations from desired values. Times required to perform load pick-up and drop-off as well as load placement accuracy are also measured. The simulator used is a fixed base device which makes use of analog and digital computers. It is found that the vibration stimuli used do not degrade performance, which tends to improve with increased stress. It is hypothesized that this trend is due to motivation, i.e., as subjects feel the onset of fatigue they compensate by working harder and thus tend to improve their performance. Poor scores (about 6% of the observations) are attributed to lapses in the pilot's ability to respond to display cues. S.D.

A79-52327 **Mechanisms of the effects of vibration frequency, level and duration on continuous manual control performance.** C. H. Lewis and M. J. Griffin (Southampton, University, Southampton, England). *Ergonomics,* vol. 22, July 1979, p. 855-890. 28 refs. Research supported by the Ministry of Defence (Procurement Executive).

Three experiments are carried out to assess the effects of vibration frequency, level, and duration on a zero-order pursuit tracking task. It is found that the primary effects of vibration on the performance of a single-axis zero-order pursuit tracking task are increases in tracking error variance, due to vibration-induced control activity and increased operator-generated noise or remnant. The hypothesis proposed by Lewis and Griffin (1976) is supported only for vibration frequencies above 10 Hz. Perceptual and motor sources are suggested for the increased remnant. Prolonged continuous performance of the simple pursuit tracking task during both static and vibration conditions resulted in large increases in response lags and suppression of coherent responses, which are related to diminished levels of arousal. S.D.

A79-52475 # **Some neurochemical characteristics of rats after space flight in the Cosmos-936 satellite (Nekotorye neirokhimicheskie kharakteristiki krys posle kosmicheskogo poleta v iskusstvennom sputnike 'Kosmos-936').** O. G. Gazenko, N. N. Demin, A. N. Panov, D. A. Rashevskaia, N. L. Rubinskaia, and R. A. Tigranian (Ministerstvo Zdravookhraneniia SSSR, Institut Mediko-Biologicheskikh Problem, Moscow, USSR). *Akademiia Nauk SSSR, Doklady*, vol. 247, no. 2, 1979, p. 510-512. In Russian.

Results are presented for a biochemical study of samples concerning the cerebellar tissue as well as the frontal, temporal and occipital areas of the cerebral cortex in male Vistar-SPF rats following a 20-day space flight in the Cosmos-936 satellite. A preliminary conclusion is that the observed neurochemical changes in space flight are the result of a passive inhibition of the functional activity of the cerebral cortex (in the presence of stimulus deficiency) rather than the result of stress factors. Twenty-five days after landing, the observed deviations had vanished. S.D.

A79-52539 **Orientation relative to the retina determines perceptual organization.** B. Gillam and D. McGrath (New York, State University, New York, N.Y.). *Perception and Psychophysics*, vol. 26, no. 3, Sept. 1979, p. 177-181. 12 refs. NSF Grant No. B043254; Grant No. NIH-30840.

Two experiments are reported which show that perceptual unit formation, as measured by Gillam's method of using common reversals of ambiguous lines as an index of their coherence, depends strongly on the orientation of the configuration. Measurements under conditions of 90 deg head and body tilt show that the critical orientation is retinal, not physical. The results are discussed in relation to other findings and to possible explanations. (Author)

A79-52540 **Target redundancy in visual search - Do repetitions of the target within the display impair processing.** C. W. Eriksen and B. A. Eriksen (Illinois, University, Urbana, Ill.). *Perception and Psychophysics,* vol. 26, no. 3, Sept. 1979, p. 195-205. 20 refs. Grant No. PHS-MH-01206.

The effects of the repetition of a visual target within a display on input processing are investigated in order to test the predictions of Estes' (1972, 1974) interactive channels model and those of the continuous flow model of Ericksen and Schultz (1979) of visual search. Subjects were asked to discriminate between two sets of visual target stimuli surrounded by noise of different degrees of similarity, spacing and perceptual segregation in a response competition paradigm. Response times measured showed no impairment when noise was identical with the stimulus, thus favoring the continuous flow model and competition among internal recognition responses, rather than the interactive channels model which predicts a longer response time when noise and target stimuli are identical. A second experiment performed to assess any facilitating effect of redundancy by varying the type or spacing of noise stimuli confirms the above results, however, it provides no evidence of facilitation. A.L.W.

A79-52541 **Upper-velocity threshold for detection of movement.** J. R. Johnstone (Western Australia, University, Nedlands, Australia) and L. A. Riggs (Brown University, Providence, R.I.). *Optics Letters,* vol. 4, Oct. 1979, p. 309, 310.

The maximum velocity with which an object can move and be seen to be moving was measured as a function of its luminance. Object movements greater than 1000 deg/sec can readily be detected as movement. Saccadic eye movements should therefore produce sensations of visual movement. The absence of such sensations indicates that correct evaluation of the resulting visual input requires some other mechanism. (Author)

A79-52691 **Visual motion perception by intelligent systems.** W. Scacchi (California, University, Irvine, Calif.). In: Conference on Pattern Recognition and Image Processing, Chicago, Ill., August 6-8, 1979, Proceedings. New York, Institute of Electrical and Electronics Engineers, Inc., 1979, p. 646-652. 44 refs. Research supported by the Hughes Aircraft Co.

The focus of this study is to develop an understanding of the state of the art in visual motion perception by intelligent systems. We examine diverse theoretical and empirical approaches to visual motion analysis, perception, and understanding. We survey the literature applicable to visual motion perception as discussed in scene analysis techniques, hardware-based vision systems, computer animation, artificial intelligence techniques, and human motion perception. We focus primarily on issues of observed object and image sequence description, representation, and perceptual control strategies. We next introduce two concepts in visual motion perception: motion vantage perspective and object motion coherence. We then suggest the emerging trends, problem areas, and alternative directions for research in visual motion perception by intelligent systems. (Author)

A79-52696 * # **Man and machine design for space flight.** A. J. Louviere (NASA, Johnson Space Center, Spacecraft Design Div., Houston, Tex.). *American Association for the Advancement of Science, Annual Meeting, Houston, Tex., Jan. 3-8, 1979, Paper.* 4 p.

The factors involved in creating effective designs for living and working in a weightless environment are discussed. Among the areas covered are special provisions for eating and drinking, a special shower nozzle to remove soap, electric shavers designed for vacuum containment of the clippings, and the need for restraint systems at the crew's workstations. Attention is given to the fact that the crewmen assume a neutral body posture in weightlessness which is an important consideration in designing displays, controls, and windows. It is concluded that the incorporation of the change in body posture and the requirement for restraint into future designs will greatly facilitate the crewman's task in the weightless environment. M.E.P.

A79-52878 **Protection standards for microwave and radiofrequency radiations.** F. Harlen (National Radiological Protection Board, Harwell, Oxon, England) In: Conference on Electromagnetic Compatibility, Guildford, Surrey, England, April 4-7, 1978, Proceedings. London, Institution of Electronic and Radio Engineers, 1978, p. 23-29. 17 refs.

The exposure limit standards for microwave and radiofrequency radiations are examined. The safe number adopted by the U.S. and West European standards is 100 W/sq m. The premise of the safe number is that the principle bioeffects are thermal, but the supportive biological work was concentrated in a limited range of microwave frequencies, so that the differences between Western standards are in the frequency ranges and the formulae for intermittent exposures. Current research shows that the VHF region may contain the most hazardous frequencies, and that people may be working in the near field at these frequencies. The concept of power density then becomes meaningless and it is necessary to consider the separate contributions of the E and H fields. The East European standards are generally more restrictive, and are based on subjective epidemiological studies of people working with microwaves and on behavioral effects in laboratory animals, while the Western approach is based on demonstrable injury. A.T.

A79-52894 **The metabolic demand and oxygen supply of the heart - Physiologic and clinical considerations.** K. T. Webber and J. S. Janicki (Pennsylvania, University, Philadelphia, Pa.). *American Journal of Cardiology*, vol. 44, Oct. 1, 1979, p. 722-729. 36 refs. Grants No. NIH-HL-17441; No. NIH-HL-18749; No. NIH-HL-808805.

A79-52895 **Temporal relation between onset of cell anoxia and ischemic contractile failure.** W. R. Harden, III, C. H. Barlow, M. B. Simson, and A. H. Harken (Pennsylvania, University, Philadelphia, Pa.). *American Journal of Cardiology*, vol. 44, Oct. 1, 1979, p. 741-746. 18 refs. Grant No. NIH-1-R01-HL-22315.

A79-53000 * **Energy transduction in Halobacterium halobium.** J. K. Lanyi (NASA, Ames Research Center, Moffett Field, Calif.). In: Membrane proteins in energy transduction. New York, Marcel Dekker, Inc., 1979, p. 451-483. 147 refs.

The properties and functions of the light-energy-transducing purple membrane of Halobacterium halobium are reviewed. Consideration is given to the protein structure and composition of the membrane and the photochemistry of the protein-retinal complex known as bacteriorhodopsin. The role of bacteriorhodpsin in establishing and maintaining an electrochemical (H(+)) gradient is examined, and interactions of this gradient with Na(+) and K(+) gradients, the light-induced transport of amino acids and the light-induced phosphorylation of ADP are considered. Bacteriorhodopsin and the respiratory chain are discussed as alternative sources of energy for the maintenance of the H(+) gradient. Advantages of the Halobacterium purple membrane system for studies of membrane energetics and the confirmation of the chemiosmotic hypothesis are also noted. A.L.W.

A79-53065 # **Tremometry as a method of evaluating the functional state of the nervous system of a pilot (Tremometriia kak metod otsenki funktsional'nogo sostoianiia nervnoi sistemy letchika).** A. N. Kol'tsov, Iu. A. Kukushkin, V. A. Varfolomeev, and V. Ia. Koliagin. *Voenno-Meditsinskii Zhurnal*, July 1979, p. 50-52. In Russian.

The dynamics of muscle tremors in pilots during various flight phases and in other operators subject to conditions of high physiological and emotional stress are investigated by means of contact and contactless coordinometers. Contact measurements reveal that prior to a flight, tremor frequency is greater in the first 15 sec of a test than in the last 15 sec, while during flight tremor frequencies tend to equalize, indicating that the dominance of the fundamental oscillations can be used as a criterion of fatigue. Measurements made by a contactless coordinometer with a capacitance probe reveal oscillations of 6 to 12 Hz superimposed on a carrier frequency of 0.8 to 3 Hz, which vary inversely in frequency as flight stress increases. Increases in oscillation amplitude are also found to be indicative of fatigue, while the high-frequency oscillations are attributed to levels of physiological and emotional stress. A.L.W.

A79-53066 # **The role of lesser circulation hemodynamic changes in pulmonary gas exchange (Rol' izmenenii gemodinamiki v malom kruge krovoobrashcheniia v legochnom gazoobmene).** E. S. Lebedeva, L. N. Danilov, S. A. Aganezov, and G. M. Laskin (Vsesoiuznyi Nauchno-Issledovatel'skii Institut Pul'monologii; I Leningradskii Meditsinskii Institut, Leningrad, USSR). *Fiziologicheskii Zhurnal SSSR*, vol. 65, June 1979, p. 881-886. 20 refs. In Russian.

The influence of changes in the hemodynamics of pulmonary circulation on gas exchange in the lungs is evaluated. Intravenous serotonin injections were administered to healthy dogs in order to increase intravascular pressure and the volume of pulmonary circulation. It is observed that hemodynamic changes are accompanied by increases in circulating pulmonary blood volume, lung diffusivity, arterial oxygen content and arterial oxygen saturation. It is concluded that these hemodynamic factors act to open up latent pulmonary vascular regions and thus more evenly distribute ventilation capabilities, leading to enhanced gas exchange, conceivably in response to pulmonary gas exchange disturbances. A.L.W.

A79-53067 # **A cinematographic technique for investigating some aspects of visual recognition (Kinematograficheskii metod issledovaniia nekotorykh aspektov zritel'nogo opoznaniia).** Iu. I. Levkovich (Akademiia Nauk SSSR, Institut Fiziologii, Leningrad, USSR). *Fiziologicheskii Zhurnal SSSR*, vol. 65, July 1979, p. 1075-1078. In Russian.

A79-53068 # **Continuous long-duration recording of the heart rate by means of a noncontact technique (Nepreryvnaia**

dlitel'naia registratsiia chastoty serdechnykh sokrashchenii beskontaktnym metodom). A. I. Belich (Akademiia Nauk SSSR, Institut Evoliutsionnoi Fiziologii i Biokhimii, Leningrad, USSR). *Fiziologicheskii Zhurnal SSSR*, vol. 65, July 1979, p. 1079-1082. 5 refs. In Russian.

A79-53096 **A spherical representation of a human body for visualizing movement.** N. I. Badler, J. O'Rourke (Pennsylvania, University, Philadelphia, Pa.), and H. Toltzis (Gould, Inc., Cleveland, Ohio). *IEEE, Proceedings,* vol. 67, Oct. 1979, p. 1397-1403. 33 refs. NSF Grants No. ENG-75-10535; No. MCS-76-19464; Contract No. N00014-78-C-0102.

A three-dimensional human body model for displaying body movements on a computer graphics display is described. The surface of the body model is formed from overlapping spheres, yielding a realistically formed and shaded body image on a raster graphics display. An experimental model consisting of 310 spheres is articulated with 19 joints and 20 body segments. The properties of this model include joints which do not deform during movement, simple hidden surface removal, and efficient collision and contact detection. The model may also be placed in a planar polygon environment. Applications in crash simulation and human movement simulation are indicated. (Author)

A79-53163 **Nonlinear perception of infrared radiation in the 800-1355 nm range with human eye.** V. G. Dmitriev, V. N. Emel'ianov, M. A. Kashintsev, V. V. Kulikov, A. A. Solov'ev, M. F. Stel'makh, and O. B. Cherednichenko. *(Kvantovaia Elektronika /Moscow/,* vol. 6, Apr. 1979, p. 803-810.) *Soviet Journal of Quantum Electronics,* vol. 9, Apr. 1979, p. 475-479. 12 refs. Translation.

The present experimental study of the IR optical susceptibility of the human eye showed that in the 800 to 1355 micron range, IR radiation appears as visible radiation at a wavelength close to the second harmonic. The spectral sensitivity curve for IR radiation is spiky with the envelope maximum located at 1113 microns. The mechanism of nonlinear optical susceptibility to IR radiation appears to be localized in the retina nerves. V.P.

A79-53211 # **Role of n-aminobenzoic acid in repairing UV and gamma radiation damage (Rol' n-aminobenzoinoi kisloty v reparatsii povrezhdenii, indutsirovannykh u.-f. i gamma-izlucheniiami).** I. A. Rapoport, S. V. Vasil'eva, and L. S. Davnichenko (Akademiia Nauk SSSR, Institut Khimicheskoi Fiziki, Moscow, USSR). *Akademiia Nauk SSSR, Doklady,* vol. 247, no. 1, 1979, p. 231-234. 11 refs. In Russian.

Results are presented of an experimental study of an Escherichia coli strain characterized by the activity of certain enzymatic systems involved in the repairing of DNA damage caused by UV and gamma radiation in the presence of n-aminobenzoic acid, PAB, known as a vitamin (coenzyme). Mutagenic and 'reparagenic' activities are discussed. Particular attention is given to the function of PAB as a damage-repairing agent. S.D.

A79-53285 **Development of adaptation to hypodynamics on rat and its readaptability to ambulatory life.** H. Saiki, M. Nakaya, M. Sudoh, and M. Abe (Jikei University School of Medicine, Tokyo, Japan). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-76.* 8 p. 5 refs.

This paper examines ease of readaptation of rats to the normal ambulatory life after hypodynamic exposure. A comparison of readaptability was made after 3, 5, and 10 week simulated exposures made by suspension technique expressed as the speed of recovery to the normal K(+) excretion level. Blood pressure, resting metabolic rate, and body weight were measured daily, and the urinary excretion rate of K(+) in the daily total urine was measured continuously. It was concluded that: (1) recovery is more readily accomplished when released from hypokinetic exposure after 10 weeks than after 5 weeks, and after 5 weeks than after 3 weeks exposure; (2) characteristic fluctuations in blood pressure, resting metabolic rate, and body weight occurred corresponding to hypodynamic exposure periods and time after return to normodynamic life; (3) during the 6th to 10th week of hypodynamic exposure two subjects suffered urinary bleeding and ischuria every few days accompanied by abnormal changes of blood pressure, resting metabolic rate, and body weight. A.T.

A79-53286 * **Early cardiovascular adaptation to zero gravity simulated by head-down tilt.** C. G. Blomqvist, J. V. Nixon, R. L. Johnson, Jr., and J. H. Mitchell (Texas, University, Dallas, Tex.). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-77.* 13 p. 32 refs. Research supported by the Harry S. Moss Heart Fund; Grants No. NsG-9026; No. NIH-HL-06296; No. NIH-5-M01-II-00633.

The early cardiovascular adaptation to zero gravity, simulated by head-down tilt at 5 deg, was studied in a series of 10 normal young men. The validity of the model was confirmed by comparing the results with data from Apollo and Skylab flights. Tilt produced a significant central fluid shift with a transient increase in central venous pressure, later followed by an increase in left ventricular size without changes in cardiac output, arterial pressure, or contractile state. The hemodynamic changes were transient with a nearly complete return to the control state within 6 h. The adaptation included a diuresis and a decrease in blood volume, associated with ADH, renin, and aldosterone inhibition. (Author)

A79-53287 **Ultrastructural development of the vestibular system of frog larvae in 0g simulation.** J. Neubert (Deutsche Forschungs- und Versuchsanstalt für Luft- und Raumfahrt, Institut für Flugmedizin, Bonn, West Germany). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-78.* 9 p. 10 refs.

The vestibular apparatus of 10 frog larvae exposed to weightlessness simulation till stage 15, 17, and 22 respectively was investigated by electron microscopy. Till stage 15 no significant changes in morphology of the gravity sensory system could be found. A stay under weightlessness simulation till stage 17 and 22 is followed by significant alterations in sensory epithelia and also in the otolith membrane. Large vacuols were concentrated in the region where an otolith membrance covers the hair cells but not in the rim zones of the epithelia with undifferentiated cells. The quantity of otoconia in the otolith membrane of simulated tadpoles seems to be diminished. The results are compared with data from flown experiments and some concordance was noted. (Author)

A79-53288 **Male and female characteristics in vestibular testing - A step toward the selection of the best participants for space flight.** G. Aust, J. R. Hordinsky, B. Schmelzer (Deutsche Forschungs- und Versuchsanstalt für Luft- und Raumfahrt, Institut für Flugmedizin, Bonn, West Germany). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-80.* 13 p. 28 refs.

The responses of male and female test subjects who are motion sickness sensitive and resistant to vestibular tests are compared in order to evaluate sex differences in space flight suitability. Forty-two females and 44 males were subjected to a rotary motion sickness provocation test, a bithermal caloric test, a rotatory intensity damping test, a vestibular-spinal stepping test, pendular and unidirectional eye tracking tests and a test of caloric responsiveness under lower body negative pressure. Significant differences in vestibular nystagmus reaction were observed between males and females, indicating different operative nervous and psychological factors, however greater differences were observed between male and female groups designated motion sickness resistant and motion sickness sensitive on the basis of answers to a questionnaire. It is recommended that space flight selection procedures should seek to identify candidates with potential motion sickness sensitivity by vestibular tests and motion sickness histories. A.L.W.

A79-53289 **Preliminary selection of candidates for space flights.** S. Baranski, Z. Gierowski, and K. Klukowski (Wojskowy Instytut Medycyny Lotniczej, Warsaw, Poland). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-83.* 6 p. 6 refs.

Physiological and psychological aspects of Polish cosmonaut candidate selection are discussed. The physical training program undergone by groups of potential candidates is outlined and increases in physical fitness attained are illustrated graphically. Tests of tolerance to simulated flight conditions (acceleration, hypoxia, pressure and altitude) as well as cardiorespiratory efficiency, visual acuity, vestibular organ sensitivity, perceptual, intellectual and psychomotor abilities and personality are indicated, and criteria for the selection of the candidates chosen on the basis of the test results are discussed. Advantages of the training program in the evaluation of medical and psychological factors, particularly vestibular and vasomotor responses, are pointed out. A.L.W.

A79-53290 **A new application of LBNP to measure orthostatic tolerance before and after O-G simulation /water immersion/.** J. R. Hordinsky, U. Gebhardt, H. J. Borger, and J. Birk (Deutsche Forschungs- und Versuchsanstalt für Luft- und Raumfahrt, Institut für Flugmedizin, Bonn, West Germany). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-87.* 16 p. 21 refs.

The absolute orthostatic tolerances and orthostatic tolerances after periods of weightlessness simulation of male and female subjects are measured by means of lower body negative pressure (LBNP) tests. Subjects were exposed to increasing levels of LBNP until the onset of syncope or a prescribed set of symptoms as an isolated test, and before and after exposure to six hours of bed rest or water immersion. Mean tolerance times are found not to differ significantly between males and females, to correlate slightly with certain physiological factors, and not to depend on smoking history, exercise history, time of day, type of LBNP endpoint and contraceptive pill usage. Decreases in LBNP tolerance were observed after bed rest and water immersion in males and females. Tolerance levels attained are compatible with those obtained with males in other investigations, and indicate that responses to -50 mm Hg LBNP do not allow the prediction of absolute tolerance levels. A.L.W.

A79-53291 * **Bioinstrumentation for evaluation of workload in payload specialists - Results of ASSESS II.** H. M. Wegmann, R. Herrmann (Deutsche Forschungs- und Versuchsanstalt für Luft- und Raumfahrt, Institut für Flugmedizin, Bonn, West Germany), and C. M. Winget (NASA, Ames Research Center, Biomedical Research Div., Moffett Field, Calif.). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-88.* 12 p. 6 refs.

Results of the medical experiment on payload specialist workloads conducted as part of the ASSESS II airborne simulation of Spacelab conditions are reported. Subjects were fitted with temperature probes and ECG, EEG and EOG electrodes, and hormone and electrolyte excretion was monitored in order to evaluate the changes in circadian rhythms, sleep patterns and stress responses brought about by mission schedules over the ten days of the experiment. Internal dissociations of circadian rhythms, sleep disturbances and increased stress levels were observed, especially during the first three days of the experiment, indicating a considerable workload to be imposed upon the payload specialists. An intensive premission simulation is suggested as a means of estimating overall workloads and allowing payload specialist adaptation to mission conditions. The bioinstrumentation which was developed and applied to the airborne laboratory is concluded to be a practical and reliable tool in the assessment of payload specialist workloads. A.L.W.

A79-53293 **Evolution of space suit technology.** W. Elkins (Acurex Corp., Aerospace Systems Div., Mountain View, Calif.). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-92.* 13 p. 10 refs.

The paper defines the evolution of hard/hybrid technology, how it is being utilized in the Shuttle suit, and predictions for its application in future space suit designs. The discussion focuses on soft suit technology, hard suit and hybrid suit development, as well as high-pressure suit development. The Shuttle extravehicular maneuvering unit (EMU) represents a combination of the two distinct technologies. It employs typical soft suit technology in the sewn restraint and bladder layers of the arms, glove, waist, lower torso, legs and boots. The EMU also contains multiple sealed bearing joint elements, a rolling convolute single wall laminate shoulder joint element, hard structure upper torso, rigid torso closure, torso sealed bearing, and modular sizing; these elements are derived from hard/hybrid suit technologies. Certain details of future development of space suit technology are mentioned, including in-orbit resizing of the space suit to fit successive shifts of space workers, and quick in-orbit change out of pressure suit components. S.D.

A79-53294 * **Food and waste management biotechnology for the space shuttle.** R. W. Murray, J. D. Schelkopf, S. R. Hunt (General Electric Co., Philadelphia, Pa.), and R. L. Sauer (NASA, Johnson Space Center, Houston, Tex.). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-93.* 12 p.

Space-crew facilities for preparation, eating, personal hygiene and waste management are contained in one small area of the Shuttle Orbiter Mid-Deck, all the functional systems being interconnected. The paper discusses three major systems: (1) the Galley, which includes the personal hygiene station and food packages; (2) the Waste Collector, which includes provisions for male and female users, urine, feces and emesis collection in both a normal and contigency mode of operation; and (3) Biowaste Monitoring, which includes mass measurement and sampling. The technology improvement continues by assuring that the Orbiter systems have sufficient design flexibility to permit later improvements in operation and in function. S.D.

A79-53295 **Thoughts about man-machine interrelations in space flights applied to Spacelab missions.** P. Stampfl (Deutsche Forschungs- und Versuchsanstalt für Luft- und Raumfahrt, Bereich für Projektträgerschaften, Cologne, West Germany). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-95.* 17 p.

The paper discusses certain aspects of man-machine interface as related to manned Spacelab missions. The constraints on the human side and on the hardware side, which determine the man-machine interface, are identified and discussed. Specific rules for the days of launch and landing are given in terms of sleep times and lengths. Kinds of activities to be carried out during Spacelab missions are determined experimentally, where timeline is the sequency of activities during a manned space-flight mission. Valuable recommendations are given to prospective experimenters for successful accomplishment of Spacelab missions. Timeline analysis for Spacelab 1 and available Skylab experience have highlighted the possible role of man in space research activities. S.D.

A79-53296 **Equipment for surgical interventions and childbirth in weightlessness.** H. G. Mutke. *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-97.* 5 p.

A very lightweight, transparent plastic sack is developed which can contain all necessary instruments and free-floating liquids for surgical interventions and animal experiments in future (manned) Space Shuttle missions. This equipment can be attached to the affected crew member or used for experiments in such a way that the area to be treated is closed off from the environment. This operation sack can be inflated with a foot-operated electrical pump so that the experimenter and his assistants can operate within the sack without obstruction through long-sleeved plastic gloves under sterile conditions. Other details are also described. Since operations, experiments and even, for example, childbirths, can only take place when special precautionary measures have been taken to prevent contamination of the spacecraft by blood or other liquids or secretions, such equipment is indispensable for future Spacelab missions and larger platforms. S.D.

A79-53297 **Selection, training, and health care of working specialists for Shuttle/Spacelab and future space station missions.** G. L. Murphy (McDonnell Douglas Astronautics Co., Huntington Beach, Calif.) and A. Kubozono (National Space Development Agency of Japan, Office of Space Shuttle Utilization, Tokyo, Japan). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-99.* 25 p. 10 refs. (MDAC-WD-2976)

The purpose of this paper is to describe selection procedures and criteria for Shuttle payload specialists, to relate these procedures and criteria to the clinical selection of working specialists for future space stations, and to provide useful proposals for selection of space station working specialists. The paper describes selection, training, and health care requirements imposed by NASA, processes used in selection of payload specialists for Spacelab 1, and planning by the Japanese for selection of payload specialists for Japanese Shuttle/Spacelab flights, and extrapolates these experiences to the requirements for selection of working specialists for advanced space stations. (Author)

A79-53424 * **Considerations associated with the introduction of female crewmembers in spacecraft and space stations.** J. W. Brown (NASA, Johnson Space Center, Houston, Tex.). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-A-22.* 18 p. 15 refs.

This paper examines considerations of inclusion of female crewmembers in spacecraft and space stations. The anthropometric and physiological differences between males and females as related to spaceflight such as body dimensions, muscle strength characteristics, body posture, reach, and physiological differences are discussed. Crew provisions including inflight garments, hair style, cosmetics, personal hygiene, waste management, and personal privacy are described. Impacts on hardware design and crew performance, examples of effects on Orbiter systems, data on females and their performance under conditions analogous to spaceflight, and earth-based simulation experience are examined. It is concluded that no major problems have been found which would preclude females from space, and in the future the novelty of mixed crews will significantly decrease. A.T.

A79-53425 **Communication problems of international crews.** V. Remek (Czechoslovak Academy of Sciences, Czechoslovak Committee Interkosmos, Prague, Czechoslovakia). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-A-23.* 13 p. 18 refs.

Problems in verbal communication with and among members of international space crews are discussed, emphasizing operational experience in the Intercosmos program. The space communication environment is examined, noting the complexity of communication circuits and the need for precision in technical directives. Means of communication optimization are suggested, including increasing the depth and extent of term standardization, and crew training for different levels of communication. Consideration is given to the linguistic arrangements made for the Apollo-Soyuz Test Project, and the problems within the Intercosmos program are distinguished, stressing the importance of a good knowledge of the Russian language. Communication aspects of the Soviet-Czechoslovak mission are considered, and the disturbance to the verbal behavior of the Czech participant in the mission is analyzed. A.L.W.

A79-53426 **Psychological training - One of the most important factors of enhancing the safety of space flights.** G. T. Beregovoi, I. V. Davydov, N. V. Krylova, and I. B. Solov'eva (Academy of Sciences, Institute of Psychology, Moscow, USSR). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-A-24.* 5 p.

The role of psychological training in enhancing cosmonaut preparedness for normal and emergency spacecraft operations is discussed. The use of such real-life emotiogenic situations as flying an aircraft or parachuting to teach an operator to concentrate on his performance under unusual, stressful situations is explained. Consideration is also given to environmental training courses designed to give cosmonauts confidence in dealing with unexpected landing environments, and the effectiveness of this training approach is illustrated by examples of successfully executed emergency landings in extreme or hazardous environments. A.L.W.

A79-53447 **The biomedical implications of extended duration zero-g extravehicular activities.** A. H. Bellenkes (Delaware, University, Newark, Del.). *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22, 1979, Paper 79-ST-06.* 13 p. 24 refs.

The in-orbit construction of large space structures will require the use of lengthy extravehicular activities (EVAs) primarily in the assembly and maintenance phases. There are preliminary estimates that complete construction of, for example, a solar power satellite will require nearly a year, perhaps longer during the initial stages of the SPS program. After presenting a brief historical survey of past EVA programs and procedures, the paper addresses the biomedical variables which may be encountered by astronauts working for very long periods of time in the weightless environment. Furthermore, possible designs for extended duration life support systems are discussed with emphasis placed on the areas of basic biomedical conditioning, in-orbit living facilities, typical EVA workloads, and other related variables. Finally, current and proposed mission designs are discussed in terms of present technologies. (Author)

A79-53486 **Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/.** A. S. Barer, M. I. Vackar, O. G. Gazenko, L. G. Golovkin, V. P. Zinchenko, G. I. Severin, S. N. Filipenkov, and V. V. Chigolev. *International Astronautical Federation, International Astronautical Congress, 30th, Munich, West Germany, Sept. 17-22 1979, Paper.* 7 p.

Measurements of changes in Salyut 6 cosmonaut physiological parameters and life-support system parameters during two occasions of EVA are reported. Excursions from the Salyut 6 orbital space station were performed for 88 and 125 minutes, with total stay times of 220 and 240 minutes, respectively, in a new semirigid liquid-cooled space suit with an integrated self-contained life support system. Pulse rate and respiratory rate telemetry data were found to be adequate to the work performed during the EVAs, and to be in general related to energy cost levels, which were determined from measurements of body temperature, suit temperature and respiratory functions. Ratios of energy cost levels to heat removal rates indicate that the life support system generally provided sufficient thermal conditioning during all phases of EVA, despite reported short-term sensations of local overcooling or overheating. A.L.W.

A79-53516 **Lightweight helmet-mounted eye movement measurement system.** J. A. Barnes (U.S. Army, Human Engineering Laboratory, Aberdeen Proving Ground, Md.). In: Electro-Optics/Laser Conference and Exposition, Boston, Mass., September 19-21, 1978, Proceedings. Chicago, Industrial and Scientific Conference Management, Inc., 1978, p. 343-347.

A helmet-mounted optical system has been developed for determining aircrewman's fixation points and paths of eye movement between fixation points. The optical system components are an optical head, a CID video camera, a video recorder, a monitor/receiver, a video transmitter, and a coupling lens. Consideration is given to the design and performance of the system. B.J.

A79-53531 **Theoretical foundations of cardiovascular processes.** Edited by D. N. Ghista (Michigan Technological University, Houghton, Mich.), E. Van Vollenhoven, W.-J. Yang (Michigan, University, Ann Arbor, Mich.), and H. Reul. Basel, S. Karger AG (Advances in Cardiovascular Physics. Volume 1), 1979. 192 p. $58.75.

The theory and governing equations of the electrical and magnetic processes, solid and fluid mechanics, and transport mechanisms of the cardiovascular system are presented. Attention is given to the electrical activity and magnetic field of the heart, thus providing the biophysical basis of electro- and magnetocardiography. The governing equations and models describing the constitutive properties of blood and the vasculature, and blood flow in the cardiovascular system are treated. Equations are presented for the mechanics and thermodynamics of biotransport processes, and heat transfer processes in thermoregulation and circulation measurement are examined. A.L.W.

A79-53532 **Fundamentals of electrical processes in the electrophysiology of the heart.** R. Plonsey (Case Western Reserve University, Cleveland, Ohio). In: Theoretical foundations of cardiovascular processes. Basel, S. Karger AG, 1979, p. 1-28. 22 refs. Grants No. NIH-HL-10417; No. NIH-HL-17931.

This chapter constitutes the biophysical basis for quantitative electrocardiography. It develops the fundamental equations of electricity which are applicable in study of the electrophysiology of the heart. Measurements which reveal some of the character of cardiac electrophysiology are described and the results are discussed. (Author)

A79-53533 **The theory of the magnetocardiogram.** J. H. Tripp (Case Western Reserve University, Cleveland, Ohio). In: Theoretical foundations of cardiovascular processes. Basel, S. Karger AG, 1979, p. 29-46. 38 refs. Grant No. NIH-RR-07113-09.

The formal theory of the magnetic field surrounding the heart is developed by treating the heart as a distributed current dipole source immersed in an inhomogeneous conducting medium. Equations governing the electric potential and the magnetic field are derived, following which a multipole expansion of the magnetic vector potential is used to obtain expressions for the dipole moments. These moments are then compared with the electric and magnetic heart vectors and it is shown how a lead field theory can be developed to yield expressions enabling these heart vectors to be measured directly. Some actual theoretical investigations which have made use of the formalism are then summarized. Finally, consideration is given to the potential practical importance of and future outlook for magnetocardiology. (Author)

A79-53534 **Basic biomechanics equations for cardiovascular flow.** T.-K. Hung (Pittsburgh, University, Pittsburgh, Pa.), G. Bugliarello (New York, Polytechnic Institute, New York, N.Y.), and C. E. Quevedo (Escuela Politécnica Nacional; Universidad Central del Ecuador, Quito, Ecuador). In: Theoretical foundations of cardiovascular processes. Basel, S. Karger AG, 1979, p. 47-101. 32 refs.

The basic equations of mass, momentum and energy transfer for biological flow processes are derived along with the equations of motion of the flexible blood vessel boundaries. For Newtonian fluids, the Navier-Stokes equations are simplified for linear flow processes as well as for one-dimensional analyses. A generalized Bernoulli's theorem is introduced to include the effects of the flexible boundary and of the unsteadiness of flow on energy balance. Electrical analog, hydraulic impedance and Windkessel theory are introduced along with non-linear analysis for flow and pressure pulses. (Author)

A79-53535 **Equations on biotransport mechanisms.** W.-J. Yang (Michigan, University, Ann Arbor, Mich.). In: Theoretical foundations of cardiovascular processes. Basel, S. Karger AG, 1979, p. 102-127. 6 refs.

The paper deals with the principles and laws which govern the transformation of energy and the transfer of energy and matter within a system or between the system and its environment. Important concepts in equilibrium thermodynamics and transport phenomena are outlined. Attention is given to the first and second laws of thermodynamics, free energy and its changes, reaction equilibrium constant, transfer potentials, some laws of physicochemical behavior, transport fluxes and principles of conservation of properties. Basic equations governing the physical, chemical and electrical behavior during material transformation are included. S.D.

A79-53536 **Bio-heat transfer processes, for human thermoregulatory and circulatory characteristics measurements.** U. Dinnar (Technion - Israel Institute of Technology, Haifa, Israel). In: Theoretical foundations of cardiovascular processes. Basel, S. Karger AG, 1979, p. 128-179. 40 refs.

Life is a continuous process of energy exchange between the body and the environment. This exchange of energy is carried out in different forms and its task is to maintain a fairly constant core temperature inside the body. The paper reviews various bioheat transfer processes: metabolism and other internal heat production, evaporation, conduction, convection, radiation and the work produced by the body. These items are discussed separately and then combined to form a gross model of the thermoregulatory system. Also discussed are measurement techniques, based on heat transfer principles, relative to velocity measurements, cardiac output measurement by thermodilution, local thermodilution for single blood vessels, and medical thermography. Further applications are mentioned, including the application of heat transfer in the study of skin burns, heat transfer in cryosurgery, and heat therapy. S.D.

A79-54091 **The retinal resolving power measured by laser interference fringes.** B. Rassow (University Eye Hospital, Hamburg, West Germany). In: European Electro-Optics Conference, 4th, Utrecht, Netherlands, October 10-13, 1978, Proceedings. Bellingham, Wash., Society of Photo-Optical Instrumentation Engineers, 1979, p. 154-157.

A small device developed and constructed for daily routine eye measurements in hospital is described. The laser beam of a helium-neon laser is reflected from both surfaces of a glass plate. The two bundles created by this reflection are focused in the nodal plane of the eye examined. Interference fringes in the overlapping area are independent of the optics of the eye. Observing the fringes means that the resolving power of the retina-brain system is sufficient for this frequency. Variation of the line frequency is done by changing the glass plates. Glass plates of different thickness give different distances of the two light points in the pupil of the eye. A small distance corresponds to low and a greater distance to high frequency. V.T.

A79-54251 **Optokinetic reactions in man elicited by localized retinal motion stimuli.** M. F. W. Dubois and H. Collewijn (Rotterdam, Erasmus Universiteit, Rotterdam, Netherlands). *Vision Research*, vol. 19, no. 10, 1979, p. 1105-1115. 25 refs. Research supported by the Foundation for Medical Research.

A79-54252 **Changes in critical duration during dark-adaptation.** S. Montellese, L. T. Sharpe, and J. L. Brown (Rochester, University, Rochester, N.Y.). *Vision Research*, vol. 19, no. 10, 1979, p. 1147-1153. 48 refs. Contract No. N14-76-C-0189; Grant No. NIH-EY-00680.

Critical duration was measured using a 10 min test spot, located 5 deg from the fovea, in the nasal visual field. Subjects (N=2) were pre-adapted to a luminance of 2.3 L (23,000 td) for 10 min. Data were then collected at 250 and 500 msec, 1, 2, 4, 7, and 10 sec of dark-adaptation. For each of these times, stimulus duration ranged from 9.5 to 152 msec and temporal summation capability was calculated from resulting threshold determinations. Within the first 10 sec of dark-adaptation, critical duration increased from 30 to 80 msec, with approx. 75% of the change occurring within the first 2 sec for both observers. These results show that increases in temporal summation capability contribute to lowering of threshold primarily during the very early stages of dark-adaptation. (Author)

A79-54253 **A comparison of oculomotor and motion parallax cues of egocentric distance.** W. C. Gogel and J. D. Tietz (California, University, Santa Barbara, Calif.). *Vision Research,* vol. 19, no. 10, 1979, p. 1161-1170. 12 refs. NSF Grant No. BNS-77-16620.

Using the head motion procedure, the apparent distance of a point of light in an otherwise dark visual field was measured under conditions in which oculomotor cues (accommodation, convergence) and absolute motion parallax were varied together and separately. It was concluded that absolute motion parallax is almost as effective a cue to distance as are oculomotor cues from monocular observation, but is not as effective as oculomotor cues from binocular observation. Evidence was also presented that the null adjustment method, used in conjunction with the head motion procedure, provides an unbiased measure of apparent distance. (Author)

A79-54254 **Eye torsion in response to a tilted visual stimulus.** D. R. Goodenough, E. Sigman, P. K. Oltman, J. Rosso, and H. Mertz (Educational Testing Service, Princeton, N. J.). *Vision Research,* vol. 19, no. 10, 1979, p. 1177-1179. 12 refs. Grant No. NIH-MH-21989.

The induction of vestibular-controlled eye torsion by a tilted stationary visual stimulus is examined. Torsional eye responses to the rod-and-frame display, in which a vertical rod is viewed inside a frame when both are tilted, both are vertical or the rod is vertical and the frame is tilted (rod and frame illusion), were recorded photographically. Eye orientation is found to follow the tilt of the stimulus, changing on the average by 0.29 deg in response to a stimulus tilt of 28 deg. The discrepancy between the present results and the negative results obtained by Howard and Templeton (1964) is explained by the retinal eccentricity of the present stimulus. It is also concluded that, although eye torsion may contribute to the rod and frame illusion, the magnitude of the torsional response appears to be too small to account entirely for the illusory effects of the tilted frame on rod orientation. A.L.W.

A79-54266 **Evidence for increased intrathoracic fluid volume in man at high altitude.** J. J. Jaeger, J. T. Sylvester, A. Cymerman, J. J. Berberich, J. C. Denniston, and J. T. Maher (U.S. Army, Research Institute of Environmental Medicine, Natick, Mass.). *Journal of Applied Physiology: Respiratory, Environmental and Exercise Physiology,* vol. 47, Oct. 1979, p. 670-676. 34 refs.

To determine if subclinical pulmonary edema occurs commonly at high altitude, 25 soldiers participated in two consecutive 72-h field exercises, the first at low altitude (200-875 m) and the second at high altitude (3,000-4,300 m). Various aspects of ventilatory function and pulmonary mechanics were measured at 0, 36, and 72 h of each exercise. Based on physical examination and chest radiographs there was no evidence of pulmonary edema at high altitude. There was, however, an immediate and sustained decrease in vital capacity and transthoracic electrical impedance as well as a clockwise rotation of the transpulmonary pressure-volume curve. In contrast, closing capacity and residual volume did not change immediately upon arrival at high altitude but did increase later during the exposure. These observations are consistent with an abrupt increase in thoracic intravascular fluid volume upon arrival at high altitude followed by a more gradual increase in extravascular fluid volume in the peribronchial spaces of dependent lung regions. (Author)

A79-54267 **Metabolic adrenergic changes during submaximal exercise and in the recovery period in man.** J. M. Pequignot, L. Peyrin, M. H. Mayet, and R. Flandrois (CNRS, Laboratoire de Physiologie; Lyon I, Université, Lyon, France). *Journal of Applied Physiology: Respiratory, Environmental and Exercise Physiology,* vol. 47, Oct. 1979, p. 701-705. 31 refs.

A79-54268 **Influence of skin temperature on sweating and aerobic performance during severe work.** C. T. M. Davies (Medical Research Council, Environmental Physiology Unit, London, England). *Journal of Applied Physiology: Respiratory, Environmental and Exercise Physiology,* vol. 47, Oct. 1979, p. 770-777. 27 refs.

A79-54269 * **Radiographic comparison of human lung shape during normal gravity and weightlessness.** D. B. Michels, P. J. Friedman, and J. B. West (California, University, La Jolla, Calif.). *Journal of Applied Physiology: Respiratory, Environmental and Exercise Physiology,* vol. 47, Oct. 1979, p. 851-857. 20 refs. Grant No. NGL-05-009-109.

Chest radiographs in five seated normal volunteers at 1 G and 0 G were made with a view toward comparing human lung shape during normal gravity and weightlessness. Lung shape was assessed by measuring lung heights and widths in upper, middle and lower lung regions. No significant differences were found between any of the 1-G and 0-G measurements, although there was a slight tendency for the lung to become shorter and wider at 0 G. The evidence that gravity causes regional differences in ventilation by direct action on the lung is consistent with the theoretical analysis of West and Matthews (1972). S.D.

MICROBIOLOGICAL EVALUATION OF THE MOBILE BIOLOGICAL ISOLATOR SYSTEM
Daniel M. Taylor, Frank Morelli, William Neiderheiser, and Wallace M. Tratz 1 Jul. 1979 61 p refs
(Contract NAS7-100)
(NASA-CR-162293; JPL-Pub-79-48) Avail: NTIS HC A04/MF A01 CSCL 06C

Evaluations on critical components of the mobile biological isolation system were performed. High efficiency particulate air filter efficiency and suit integrity were found to withstand repeated ethylene oxide (ETO) sterilizations. The minimum ETO sterilization time required to inactivate all contaminant organisms was established at four hours. Two days of aerating at 120 F was found to dissipate all harmful ETO residuals from the suit. Donning and doffing procedures were clarified and written specifically for isolation rooms. Author

MECHANISMS OF OXYGEN TOXICITY AT THE CELLULAR LEVEL Annual Status Report, Jan. 1978
Olen R. Brown, Laurie Foudin, Fred Yein, Patti Gilliland, Richard Seither, and Doris Song 1 Jan. 1978 16 p refs
(Contract N00014-76-C-0328; NR Proj. 204-020)
(AD-A070026; Rept-32) Avail: NTIS HC A02/MF A01 CSCL 06/20

Oxygen at elevated pressures is toxic for life forms from microbes to man. Growth is inhibited in Escherichia coli and results primarily from poisoning of specific enzymes in the following biosynthetic pathways branched-chain and aromatic amino acids, NAD-niacin, phosphoribosylpyrosphosphate PRPP and reverse glycolysis. Inhibition of amino acid biosynthesis indirectly stops protein synthesis and induces 'stringency' production of pp-guainine-pp, a powerful inhibitor of metabolic processes which accounts for inhibition in metabolic processes where there is no observed enzymatic poisoning. Inhibitions in the PRPP, NAD-niacin, and reverse glycolysis pathways are significant to bacterial and perhps to human oxygen toxicity where products of the pathways protect. Author (GRA)

ESTIMATION OF RATE CONSTANTS IN THE MICHAELIS-MENTEN MODEL
J. S. Rustagi and Joanne Yang Mar. 1979 18 p refs
(Contract N00014-78-C-0543)
(AD-A070360; TR-177) Avail: NTIS HC A02/MF A01 CSCL 12/1

Nonlinear models leading to the Michaelis-Menten scheme result from the study compartment systems as well as in other contexts. Using difference equation approach, rate constants are estimated in some simple models. Simulation methods are used to derive the distributions of these estimates. It is shown that the assumptions of normality of errors leads to the normal distribution of the estimated rate constants. Author (GRA)

OXYGEN DELIVERY IN THE HYPOXIC PERFUSED HEART: RELATION TO FUNCTIONAL AND METABOLIC CHANGES Ph.D. Thesis
Charles Steenbergen 1979 261 p
Avail: Univ. Microfilms Order No. 7919520

It is recognized that the distribution of oxygen delivery is markedly altered by local vascular changes in the absence of any physical impediment to flow, and that local vascular control mechanisms result in decreased coronary perfusion into small areas of tissue. The contribution of these mechanisms to ischemia induced changes in contractility and metabolism is assessed utilizing NADH fluorescence photography. Results indicate (1) during ischemia, there is a parallel decline in effluent pH, intracellular pH, and pressure development; (2) the negative inotropic effect of ischemia is primarily due to acid accumulation despite the presence of relatively nonfunctioning, anoxic cells; and (3) decreased intracellular pH in the aerobic tissue does not substantially diminish high energy phosphate reserves, while in the anoxic tissue, high energy phosphate levels decline rapidly. Dissert. Abstr.

REFINEMENT AND VALIDATION OF A THREE-DIMENSIONAL HEAD-SPIN MODEL Final Report, 1 Jan. 1976 - 31 Dec. 1977
T. Belytschko and E. Privitzer Wright-Patterson AFB, Ohio AMRL Aug. 1978 162 p refs
(Contract F33615-76-C-0506)
(AD-A062502; AMRL-TR-78-7) Avail: NTIS HC A07/MF A01 CSCL 06/16

Four models of varying orders of complexity were developed, ranging from a complex model with 252 degrees of freedom to a vary simplified model with 32 degrees of freedom. Comparisons of the impedance curves of the models with experimentally developed curves show good agreement, both in the magnitudes and locations of peaks. Furthermore, by varying the components of the model it was shown that the primary peaks in the impedance curve in the 5 to 7 Hz range result from a combination of buttock-seat resonance, the flexural response of the spine and visceral resonance. Analogous head-spin models were developed for the chimpanzee, baboon, and rhesus monkey. Impedance curves are presented for these models and show significant differences in character from that of the human spine models. Model studies are presented for ejection loading and for pre-ejection alignment by an inertial reel. The influence of various parameters, such as head position and the restraint system properties, were studied. Author

EFFECTS OF ACUTE NOISE TRAUMATA ON WHOLE-NERVE AND SINGLE-UNIT ACTIVITY
G. F. Smoorenburg and E. vanHeusden 1978 12 p refs
Presented at 15th Workshop on Inner Ear Biol., Seefeld, Austria, Sep. 1978
(IZF-1978-23; TDCK-71654) Avail: NTIS HC A02/MF A01

Some preliminary results of a research program on the effects of noise traumata on cochlear functioning are given. Measurements reported include the latency of the whole-nerve (compound) action potential (AP), the selectivity of frequency-tuning curves (e.g. the Q10-values) measured for the AP (with a forward-masking technique) and for single units in the antero-ventral cochlear nucleus, the degree of phase-locking of the action potentials of these units to the stimulus waveform, and the phase of the stimulus waveform to which these potentials are locked. The noise traumata were induced during the experiments. Results show that the AP latency increases after inducement of a noise trauma if the stimulus is presented at the same sound pressure level as before the trauma. An effect of the noise trauma on Q10 values, although small, can be measured. Neither the AP latency data nor the response times calculated from single-unit data suggest that a decrease in the sharpness of tuning found after inducement of noise trauma is accompanied by a decrease of cochlear response times. Significant progress has been made in the development of automated speech understanding systems for application to naval aviation systems. One advantage that is anticipated for speech over conventional man-machine interfaces is that speech could function as an independent channel for the control of systems. The experiment reported in this paper represents an initial effort to investigate the assumption that an automatic speech understanding system will provide a parallel channel for the performance of an information processing task currently with a visual/manual control task. The experiment required human subjects to time-share a digital information processing task and a continuous compensatory tracking task. Independent variables in the design were task loading (single- vs. dual-task conditions), stimulus presentation modality for the digital task (auditory vs. visual), and response modality for the digital task (voice vs. keyboard). Data from 16 subjects were analyzed. The results indicated that the combination of visual stimulus modality and voice response provided optimum joint-task performance. No combination of stimulus and response modalities resulted in equivalent single- and dual-task performance. Future experiments should be designed to investigate the joint-task performance space for tasks that are more representative of the information processing performance requirements of specific systems. However, the interpretability of the results of such research will depend upon the solution of methodological problems, such as how to control or account for subjects' speed-accuracy tradeoff strategies and the priorities they place upon the concurrent tasks. PILOT PERFORMANCE IN SIMULATED AERIAL REFUELING AS A FUNCTION OF TANKER MODEL COMPLEXITY AND VISUAL DISPLAY FIELD-OF-VIEW Final Report, Oct. 1977 - Feb. 1978
Robert R. Woodruff, Thomas M. Longridge, Jr., Philip A. Irish, III, and Richard T. Jeffreys May 1979 25 p refs
(AF Proj. 1123)
(AD-A070231; AFHRL-TR-78-98) Avail: NTIS HC A02/MF A01 CSCL 05/9

This research was conducted in the Advanced Simulator for Pilot Training (ASPT) to determine Computer Image Generation (CIG) complexity and field-of-view (FOV) requirements for aerial refueling (AR). The adequacy of three detail levels and five FOVs was assessed. Aircraft simulated, in addition to the KC-135 tanker, were the A-10, F-4, B-52, and F/FB-111. Twelve experienced pilots (three per aircraft) served as subjects. Performance measures included elapsed time to criterion, number of disconnects and aircraft control profile. An assessment of FOV position employed for takeoff/landing versus AR was also made. A-10 and F-4 pilots found the visual FOV position employed for simulated takeoff/landing must be raised approximately 12 degrees to accomplish AR. B-52 and F-111 pilots found AR could be satisfactorily performed using the same FOV position employed for takeoff/landing. Performance measures clearly indicated that AR performance varies as a function of both FOV size and tanker detail level. The larger the FOV, the better the performance. Similarly, the more detailed the tanker model, the better the performance. GRA

A COMPARISON OF VERBAL AND VISUAL IMAGERY LEARNING STATEGIES: THEIR IMPORTANCE FOR INSTRUMENTAL TECHNOLOGY Final Report, Jan. 1976 Dec. 1978
Forrest R. Ratliff, James A. Earles, James D. Ratliff, and Dale Wissman 1 Dec. 1978 214 p refs
(Grant AF-AFOSR-2973-76; AF Proj. 2313)
(AD-A069983; AFOSR-79-0673TR) Avail: NTIS HC A10/MF A01 CSCL 05/10

Two learning experiments were conducted to compare verbal and imagery based encoding techniques. Experiment 1 was conducted under rigorously controlled conditions comparing four encoding methods, and Experiment 2 compared the imagery matrix and eclectic verbal encoding in a classroom environment. The results showed the imagery matrix to be superior to all other methods and imagery based methods were superior over all to verbally mediated methods. The imagery matrix is suitable for use in an instructional technology. Author (GRA)

PERFORMANCE AND WORKLOAD ANALYSIS OF INFLIGHT HELICOPTER MISSIONS
P. H. Wewerinke 10 Apr. 1979 34 p refs Presented at 13th Ann. Conf. on Manual Control, Cambridge, Mass., 15-17 Jun. 1979 Sponsored by Res. Branch of the Directorate of Mat. Air RNLAF
(NLR-MP-77013-U) Avail: NTIS HC A03/MF A01

The potentials of an optimal control model for predicting the characteristics of realistic operational helicopter missions were assessed. The theoretical and experimental results indicate that the optimal control model succesfully predicts the best attainable (rather than the average) performance of a group of well-trained, highly motivated subjects. Furthermore, the model allows a description of inter-subject variability. The control effort model predictions are supported by subjective ratings. The model provides a meaningful representation of pilot workload relative to complex control tasks. Author (ESA)

A THEORETICAL AND EXPERIMENTAL ANALYSIS OF THE OUTSIDE WORLD PERCEPTION PROCESS
P. H. Wewerinke 15 Jun. 1978 23 p refs Presented at 14th Ann. Conf. on Manual Control, Los Angeles, 25-27 Apr. 1978
(NLR-MP-78020-U) Avail: NTIS HC A02/MF A01

The outside scene is often an important source of information for manual control tasks. Important examples of this are car driving and aircraft control. The modeling for this visual scene perception process on the basis of linear perspective geometry and the relative motion cues is discussed. Model predictions, utilizing psychophysical threshold data from baseline experiments and literature on a variety of visual approach tasks, are compared with experimental data. Both the performance and workload results illustrate that the model provides a meaningful description of the outside world perception process, with a useful predictive capability. Author (ESA)

SHALIT PERCEPTUAL ORGANIZATION AND REDUCTION QUESTIONNAIRE (SPORQ). REPORT 2: CHARACTERISTICS AND RELIABILITY
Ben Shalit May 1979 73 p refs
(FOA-C-55031-H6) Avail: NTIS HC A04/MF A01

The characteristics and reliability of the Shalit Perceptual Organization and Reduction Questionnaire are examined. The population to which the test was applied consisted of three main groups: national servicemen-conscripts (N = 201), professional soldiers (N = 383), and civilians (N = 145). Each of these were further subdivided into four groups representing various types of occupations or units. The distributions of their scores (structural - quantitative and content - qualitative) are analyzed and discussed. An analysis of structure and interrelationships between the elements of the test was made and a mapping sentence formulated. Test scoring reliability and test-retest reliability was also investigated. The test was shown to have good overall scoring and retest reliabilities, ranging from .70 to .98 and from .56 to .98, respectively. Author (ESA)

THE USE OF ARTIFICIAL SIGNALS DURING SONAR-WATCH
W. A. Wagenaar and A. F. Sanders 1978 7 p
(IZF-1978-25; TDCK-71719) Avail: NTIS HC A02/MF A01

The detection of submarines using CW 610 sonar on board Van Speyk class frigates was evaluated and found to be less than optimal. This loss in detection efficiency is attributed to degradation in operator's vigilance. As a possible solution to the vigilance problem operators were required to monitor the screen only for a short period of time (20 to 30 minutes) after which they either relaxed, or worked on something else, for the same length of time. However, laboratory experiments show that if the rest period is also rather unstimulating alertness is not improved. As an alternative, the frequent presentation of artificial signals, or echoes (without the operator knowing when or where such a signal will occur) was tried and knowledge of results about the detection of these artifical signals was provided to him. Results show that real signals are detected better under such circumstances and, moreover, that lapses of attention are counteracted. Author (ESA)

CAR DRIVING AS A CYBERNETIC TASK
G. J. Blaauw 1979 71 p refs In DUTCH; ENGLISH summary
(IZF-1979-6; TDCK-71982) Avail: NTIS HC A04/MF A01

The possibilities of cybernetics in analyzing driver's behavior quantitatively are evaluated. Several task analyses of driving are surveyed. The results of this survey are used systematically in presenting the available cybernetic models of driving. The cybernetic models of driving are grouped with respect to the number of input signals (as related to driver's search) and to the implementation of future information of signals (as related to driver's prediction). Models are described for lateral control as well as longitudinal control (car following). Models are not yet available for combinations of driving tasks. The representation consists of an estimated value and an uncertainty around the estimate for each state. Both values for all states initiate (1) an increase in attention to any state for which the uncertainty becomes too high, and (2) the execution of control actions. This model structure permits an analysis of the multivariable driving task in terms of supervisory control. As a result, driver's internal criterion can be determined in relation to driving experience, among other things. Author (ESA)

EFFECTS OF AMPHETAMINE ON RESPONSE SELECTION AND RESPONSE EXECUTION PROCESSES IN CHOICE REACTION TASKS
H. W. Frowein 1979 27 p refs Sponsored by Found. for Med. Res. FUNGO
(IZF-1978-8; TDCK-71983) Avail: NTIS HC A03/MF A01

Two experiments to investigate the effect of an amphetamine derivative (phentermine HCL) on different stages in the reaction process were carried out. Experiment 1 showed that amphetamine shortened the reaction time, but this effect was additive with the effects of relative signal frequency and stimulus-response compatibility, which suggests that the amphetamine effect on the reaction time cannot be attributed to a specific effect on the response selection stage. Experiment 2 showed that amphetamine shortened the movement time in a target-aiming task. This effect was greater for longer movements but independant of target width, which suggests that amphetamine specifically affects the motor processes involved in the execution of aiming responses, but that the visual feedback processes during the movements were not affected by amphetamine. In addition, Experiment 2 showed an effect of amphetamine on the reaction time which was interpreted in terms of an amphetamine effect on the preparatory motor processes proceeding the aiming response. These findings are consistent with findings in the literature suggesting effects of amphetamine in motor tasks rather than in cognitive and perceptual tasks. Author (ESA)

APPLICATION OF A STRUCTURED DECISION PROCESS FOR PROPER INCLUSION OF HUMAN RESOURCES IN THE DESIGN OF A POWER UNIT SUPPORT STAND Interim Technical Report, 1 Sep. 1977 - 30 Sep. 1978
Benjamin Ostrofsky Sep. 1978 67 p refs
(Contract F49620-77-C-0116; AF Proj. 2313)
(AD-A069978; AFOSR-79-0689TR) Avail: NTIS HC A04/MF A01 CSCL 01/5

A structured design process was applied to the design of the F-16 Aircraft Emergency Power Unit (EPU) Service Stand. Explicit steps in the accomplishment of a set of candidate systems, development of a multi-attribute criteria function along with the attendant parameters and their feasible ranges, and the ordinal ranking of the candidate systems in order of preference were accomplished. An exploration of the design space was made to identify the parameter values which would yield the maximum theoretic value of the criteria for this design space and the results compared with the highest ranked candidate system. During the design of the Service Stand, no unusual emphasis on human factors was made with the design engineers, but the results indicate strong acceptance of human factors and human resource limitations when the problem definition is adequately structured for the designers. HC A02/MF A01 CSCL 14/2

An investigation of both the power drive system and the control system for high G-onset rates in a human centrifuge was carried out. Although the analysis was general, much of it specifically considered the A/F 37V-1 centrifuge at Brooks AFB. It is shown that an electric drive system, and gondola passenger control of G forces results in a system capable of simulating aerial combat maneuvers. The drive system consists of an SCR control of the A.C. line voltage applied to D.C. motors. The control system provides for cockpit stick control of the centrifuge's angular velocity and angular acceleration. GRA

COMBINED DISCRETE NETWORK: CONTINUOUS CONTROL MODELING OF MAN-MACHINE SYSTEMS Ph.D. Thesis
Deborah J. Seifert Mar. 1979 204 p refs
(AF Proj. 2313)
(AD-A071574; AMRL-TR-79-34) Avail: NTIS
HC A10/MF A01 CSCL 05/8

The role of the human operator in control systems is evolving towards that of a supervisor who plans sequences, and monitors and away from strictly tracking. New modeling approaches and techniques are required to realistically represent and examine these new system configurations and resulting performance issues. This dissertation study proposed an alternate modeling approach comprised of discrete network models in combination with elements of an open-loop optimal control model formulation. The feasibility of employing this combined modeling approach was demonstrated through its application to the DAIS (Digital Avionics Information System) system in which pilot duties involve information retrieval and cognitive processing tasks in addition to flight control. TENTATIVE EVALUATION OF ANNOYANCE CAUSED BY NOISE FROM GUNFIRE
G. F. Smoorenburg 1978 52 p refs In DUTCH; ENGLISH summary
(IZF-1978-21; TDCK-71624) Avail: NTIS HC A04/MF A01

Based on an extensive survey of the pertinent literature a method was developed to determine the annoyance that may be expected from noise due to gunfire. This method may be applied to noise from both small and heavy firearms, and also to sonic booms. The annoyance to be expected is derived from the difference between the rating sound level and the noise criterion. The rating sound level is determined by the number of shots per day and the sound levels of the respective shots measured with the A-weighting and the impulse characteristic. Application of the impulse characteristic is based on properties of the hearing organ in the perception of short sounds. If the sound impulses contain a lot of low-frequency energy (heavy firearms, explosions, or sonic booms) the peak level of the sound impulse must be measured with linear frequency weighing. The rating sound level is determined by the lin. peak-level if this level exceeds the A. imp-level by more than 10 dB.

COMPOSITION OF CEREBRAL FLUIDS IN GOATS ADAPTED TO HIGH ALTITUDE
V. Fencl, R. A. Gabel, and C. Wolfe 23 Jan. 1979 32 p refs
(DA Proj. 3A1-61101-A-910)
(AD-A070142; USARIEM-M-6/79) Avail: NTIS
HC A03/MF A01 CSCL 06/16

The ionic composition of cerebral ISF was explored in 6 unanesthetized goats at sea level (SL) and again after 5 days at simulated high altitude (HA) of 4300 m, by measuring net transependymal fluxes of HCO3 ion, Cl ion and lactate during ventriculo-cisternal perfusions with lactate-free artificial CSF with various (HCO3 ion) and (Cl ion): concentration of an ion in cerebral ISF is indicated by concentration of that ion in the inflowing perfusate, that produces zero flux. We conclude that, at SL, (HCO3 ion) and (Cl ion) in CSF were the same as in cerebral ISF, which is in agreement with previously published findings. In goats adapted to HA, (Cl ion) in cerebral ISF remained equal to (Cl ion) in CSF, while (HCO3 ion) in cerebral ISF was demonstrably lower, and (lactate) presumably higher, than in CSF. The fluid surrounding the central chemoreceptors appears to be more acidic in goats acclimatized to HA than at SL, in spite of the alkalosis in cisternal CSF. This may contribute to ventilatory acclimatization to HA. Author (GRA)

IMMUNOBIOLOGICAL REACTIVITY OF THE BODY UNDER HYPERBARIC AND HYPOBARIC CONDITIONS
A. S. Kaplanskiy *In its* Space Biol. and Aerospace Med., No. 4, 1979 (JPRS-74330) 9 Oct. 1979 p 1-7 refs Transl. into ENGLISH from Kosm. Biol. i Aviakosm. Med. (Moscow), no. 4, 1979 p 3-7
Copyright. Avail: NTIS HC A07/MF A01

Data existing in the literature concerning the effects of hyperbaric and hypobaric gas mixtures on resistance to infections and immunobiological reactivity of the body are surveyed. Despite contradictory results obtained by different researchers, the exposure of man and animals to hyperbaric conditions in isolated chambers is associated with an increase in morbidity rate and the aggravation of infectious and inflammatory processes. The increased incidence of infectious diseases is apparently due to the depression of nonspecific resistance of the body as well as to the adverse hygienic conditions in pressure chambers. There is also reason to believe that impairment of immunity under hyperbaric conditions occurs as a result of the development of stress, the etiology of which is not clear, although overcooling of the body could be a factor. The limited number of studies dealing with the effects of hypobarism on resistance to infection, and the contradiction of the published data, preclude the derivation of any conclusions at present. Fluid-electrolyte metabolism was studied in two cosmonauts before and after completion of a 63-day orbital flight. Post flight weight losses of 5.6% and 3.5% were attributed to body dehydration. Both men showed a trend for an increased renal excretion of potassium, magnesium, and calcium as compared to their food intake, with increases being more expressed the day after the water load application. Possible causes of the changes and the pattern of recovery of fluid-electrolyte metabolism after a prolonged space flight are discussed. A.R.H.

EFFECTS ON LIPID METABOLISM IN MAN OF SOME FACTORS THAT SIMULATE SPACE FLIGHT CONDITIONS

V. P. Bychkov, A. G. Kasatkina, and O. S. Khokhlova *In its* Space Biol. and Aerospace Med., No. 4, 1979 (JPRS-74330) 9 Oct. 1979 p 28-34 refs Transl. into ENGLISH from Kosm. Biol. i Aviakosm. Med. (Moscow), no. 4, 1979 p 28-34

Copyright. Avail: NTIS HC A07/MF A01

Studies of the effects of space flight simulation factors on lipid metabolism show that space diets developed for space flights of different duration (dehydrated foodstuffs alone or in combination with foods preserved by other methods) do not product noticeable changes in lipid metabolism. Nevertheless, other factors, i.e. hypokinesia, intake of nerobol during hypokinesia, an altered work-rest cycle, an increased carbon monoxide concentration (up to 15 mg/cu m) influenced lipid metabolism. ELECTROLYTE COMPOSITION OF RAT BLOOD PLASMA AND SKELETAL MUSCLES AFTER FLIGHT ABOARD THE COSMOS-690 BIOSATELLITE

V. P. Nesterov and R. A. Tigranyan *In its* Space Biol. and Aerospace Med., No. 4, 1979 (JPRS-74330) 9 Oct. 1979 p 35-39 refs Transl. into ENGLISH from Kosm. Biol. i Aviakosm. Med. (Moscow), no. 4, 1979 p 35-39

Copyright. Avail: NTIS HC A07/MF A01

Measurements of Na(+), K(+), Mg2(+) and Ca2(+) concentrations in the functionally different muscles (soleus, plantaris, diaphragm muscles) and plasma of the rats flown for 20.5 days aboard the biosatellite Cosmos-690 did not show any significant changes as compared with the controls. At the same time a decrease of the K(+)/Na(+) ratio and a similar shift of Mg2(+) and Ca2(+) concentrations in plasma of irradiated rats as compared with these of non-irradiated animals demonstrated that the combined effects of space flight factors and gamma-irradiation influenced the system of ionic homeostasis in the blood. In the animals sacrificed on the R + 1 day the K(+)/Na(+) ratio in the soleus muscle changed in favor of Na(+) and in the plantaris muscle in favor of K(+), and remained essentially unchanged in the diaphragm. Comparison of the flight experiments with the ground-based controls show that ion changes occur because of ionizing radiation rather than weightlessness. Author

Before and after 5-day bed rest in the head-down position (at an angle of -4.5 deg), the healthy male test subjects were exposed to selective catheterization with blood samples withdrawn from different compartments of the cardiovascular system. The content of glucose, insulin, lactic acid and Beta-lipoproteins was measured. After bed rest the systemic circulation, mixed arterial and venous blood, showed a trend for a decrease of carbohydrate metabolism and an increase of the content of Beta-lipoproteins. Transcapillary metabolism in different organs, first of all, in the brain and liver altered significantly. The liver began to release glucose and ceased to utilize lactic acid whereas the brain increased substantially its release of Beta-lipoproteins. The data obtained were analyzed using a model of carbohydrate metabolism to control and artificial pancreas. Author

SIGNIFICANCE OF THE VIBRATION COMPONENT TO THE DELETERIOUS EFFECT OF IMPACT ACCELERATIONS

G. P. Mirolyubov, V. A. Elivanov, and G. P. Stupakov *In its* Space Biol. and Aerospace Med., No. 4, 1979 (JPRS-74330) 9 Oct. 1979 p 71-76 refs Transl. into ENGLISH from Kosm. Biol. i Aviakosm. Med. (Moscow), no. 4, 1979 p 51-54

Copyright. Avail: NTIS HC A07/MF A01

Animal experiments demonstrated that damped oscillations of the support construction induced by impact accelerations enhanced their damaging effect on dogs. Within the frequency range tested (from 20 to 178 Hz) the threshold of lesions of the lungs, heart and liver decreased and reached 34% at a frequency of 85 Hz. The level of liver lesions was inversely proportional to the frequency of the support oscillations. Lesions of the lungs and the heart were more expressed at 85 Hz and decreased with an increase or a decrease of the oscillation frequency. At a frequency of 130-176 Hz the effect of the vibration component was not seen. Author

The hypokinetic effect on the nystagmic reaction and illusory sensations upon caloric and galvanic stimulations of the labyrinths was studied on six test subjects (professional gymnasts). Under normal conditions the sportsmen predominantly showed the nystagmic response to the caloric irritation of the left labyrinth. A 10-day hypokinetic exposure produced a noticeable decrease of the above asymmetric nystagmic reaction to the caloric irritation of both labyrinths. Simultaneously an enhancement of illusory sensations and a decrease of their thresholds in response to the direct current labyrinthine stimulation were noted. The above changes can be attributed to the hypokinesia-induced decline of mechanisms of vestibular adaptation of sportsmen. Author

On the dogs with a Thiry-Pavlov fistula (an isolated loop of the small intestine) the effect of 30-min acceleration on the absorption of thiamine-bromide, riboflavine, pyridoxine-hydrochloride and ascorbic acid as well as on the gastric juice secretion was studied. It was demonstrated that back-to-forth linear acceleration increased vitamin B1 absorption, decreased vitamins B2 and B6 and ascorbic acid absorption, and altered secretion of gastric juice. Author

ULTRASTRUCTURE OF LYMPH NODES OF DOGS EXPOSED TO LONG-TERM EXTERNAL GAMMA RADIATION

V. V. Shikhodyrov, L. A. Bespalova, and V. S. Romanov *In its* Space Biol. and Aerospace Med., No. 4, 1979 (JPRS-74330) 9 Oct. 1979 p 89-93 refs Transl. into ENGLISH from Kosm. Biol. i Aviakosm. Med. (Moscow), no. 4, 1979 p 62-66

Copyright. Avail: NTIS HC A07/MF A01

An electron microscopy study of lymph nodes of dogs exposed to chronic gamma-irradiation during 6 years (with a total dose of 125 rad/year) was performed. The exposure induced changes in the cell composition of the paracortical regions due to a decrease of the count of small lymphocytes and a predominant increase of young blast cells with an altered ultrastucture. Chronic gamma-irradiation led to an increase of the number of plasma cells and emergence of intermediate cell forms due to plasmatization of lymphocytes and reticular cells. G.Y.

EVALUATION OF OXIDIZABILITY OF AIR IN CLOSED AREAS

L. A. Mokhov, L. D. Karpova, and N. Ya. Shuinova *In its* Space Biol. and Aerospace Med., No. 4, 1979 (JPRS-74330) 9 Oct. 1979 p 109-112 refs Transl. into ENGLISH from Kosm. Biol. i Aviakosm. Med. (Moscow), no. 4, 1979 p 76-78

Copyright. Avail: NTIS HC A07/MF A01

Acetic acid, aldehydees, as well as a number of other organic substances, are the natural products of human vital functions, and they are released into the environment with exhaled air, sweat, urine, excrements, etc. In the air of a small, closed area, these organic compounds as a whole could induce discomfort, associated with a number of unpleasant sensations (odor, nausea, vertigo, headache, etc.). Heretofore, air oxidability was determined according to the organic impurities capable of oxidation to acetic acid or acetaldhyde, and as a result a number of compounds were overlooked. For this reason, when making a sanitary chemical evaluation of air in closed areas of a limited size, if possible, organic impurities to carbon dioxide must be oxidized. The influence of duration of reaction, acidity of medium, heating conditions and use of catalysts on the reaction of oxidation of ethanol were tested. G.Y.

EFFECT OF HYDROSTATIC FACTOR ON ORTHOSTATIC STABILITY AND PHYSICAL FITNESS OF MAN DURING 60-DAY ANTIORTHOSTATIC HYPOKINESIA

O. D. Anashkin, Z. K. Trushinskiy, F. V. Reva, and T. P. Shatunina *In its* Space Biol. and Aerospace Med., No. 4, 1979 (JPRS-74330) 9 Oct. 1979 p 113-115 refs Transl. into ENGLISH from Kosm. Biol. i Aviakosm. Med. (Moscow), no. 4, 1979 p 78-80

Copyright. Avail: NTIS HC A07/MF A01

Six essentially healthy male volunteers participated in the studies (age ranged from 19 to 37). Three subjects (control group) were kept on strict bed rest in antiorthostatic (head down) position, with the head of the bed tilted -4.5 deg down, for 60 days. The other three subjects spent 2 hours/day in sitting position (1 hour after breakfast and 1 hour after lunch-dinner), and the remaining 22 hours were spent in the anteriorthostatic position. Heart rates and arterial pressures were recorded and physical fitness was evaluated. G.Y.

EFFECT OF IMPACT ACCELERATIONS ON CHEMICAL RESISTANCE OF RAT ERYTHROCYTES

Ye. Ye. Simonov *In its* Space Biol. and Aerospace Med., No. 4, 1979 (JPRS-74330) 9 Oct. 1979 p 121-124 refs Transl. into ENGLISH from Kosm. Biol. i Aviakosm. Med. (Moscow), no. 4, 1979 p 83-85

Copyright. Avail: NTIS HC A07/MF A01

Experiments were conducted on 36 male albino rats weighing 150-180 g, which were divided into three equal groups. The 1st group was exposed to landing impact accelerations of 410 + or - 50 units at a collision rate of 10 m/s; the 2d group was exposed to accelerations of 760 + or - 50 units at the same collision rate. The accelerations were in the back--chest direction. Blood was taken for tests from the tail before the experiment, then 1, 2 and 3 days after it. Chemical resistance of erythrocytes was determined by a modified method of acid erythrograms. Concurrently, determination was made of total erythrocyte count and hemoglobin content thereof. G.Y.

METHODS FOR LOCALIZATION OF ELECTRICAL SOURCES IN THE HUMAN BRAIN AND APPLICATIONS TO THE VISUAL SYSTEM Ph.D. Thesis
Terrance Michael Darcey 1979 320 p
Avail: Univ. Microfilms Order No. 7920351

Multichannel human visual evoked scalp potential (VESP) recording was combined with results from electric field theory and the methods of nonlinear parameter estimation to see if it was possible to infer the general spatio-temporal course of brain excitation in the processing of a visual stimulus. Various models of the head and underlying sources were tested. Forty Channel VESP measurements were made to briefly appearing checkerboard patterns placed in various areas of the visual field. These data were analyzed in terms of underlying equivalent sources in the brain. The measured potential distributions showed a radical dependence of VESP topography on stimulus locus and indicated that these VESP's are probably volume-conducted field effects arising from a small number of fairly localized sources in the brain. Dissert. Abstr.

ACOUSTIC ATTITUDE ORIENTATION Ph.D. Thesis
Bjorn Jay Matz 1979 138 p
Avail: Univ. Microfilms Order No. 7920790

The phenomenon of acoustical tracking in a multi-axis task was investigated in order to determine whether man's audio system can discriminate or resolve two axes of simultaneous acoustic inputs sufficiently well to acoustically track at least as well as his visual system can track visually. The specific task for this investigation was flying an airplane. The results show that in almost all cases, flying using acoustical instrumentation is as good, or better than, flying with visual instrumentation under the first three out of four turbulence levels tested. At the fourth level of turbulence (severe), the results of individual parameters are mixed, but flying with visual instrumentation is slightly better than flying with acoustical instrumentation, but the result is not statistically significant. Dissert. Abstr.

A NONLINEAR MAPPING APPROACH TO DISCRIMINATION OF SLEEP STAGES FROM THE HUMAN ELECTROENCEPHALOGRAM Ph.D. Thesis
Roderick Pruett 1979 138 p
Avail: Univ. Microfilms Order No. 7919622

New nonlinear analysis techniques were developed for the discrimination of seven sleep stages from the eight lead human electroencephalogram (EEG). The EEG was preprocessed using Period Analysis. Then, appropriate descriptive measures were derived such that discriminant analysis techniques were able to automatically obtain appropriate classifications of sleep EEG samples. Cluster analysis was used to study the similarities and dissimilarities of sleep EEG samples. A nonlinear dimension reduction algorithm was then used to create a two dimensional (2 D) representation of the multi-dimensional (40 D) data set. Dissert. Abstr.

EFFECTS OF CONGENER AND NONCONGENER ALCOHOLIC BEVERAGES ON A CLINICAL ATAXIA TEST BATTERY
David J. Schroeder (Veterans Administration Hospital, Topeka, Kansas) and William E. Collins Jan. 1979 19 p refs
(AD-A069375; FAA-AM-79-9) Avail: NTIS HC A02/MF A01 CSCL 06/20

The performance of normally 'heavy' and normally 'light' young male drinkers on an ataxia test battery before and after drinking either a high congener (bourbon) or low congener (vodka) alcoholic beverage was investigated. To assess possible long term effects of alcohol, testing was conducted 1, 3, 5, 9, 24, and 32 hours after drinking. With the exception of one walking test that showed inferior performance 1 hour after drinking and recovery thereafter, the measures of the ataxia test battery were about equally affected, showing decrements from 1 to 3 hours after drinking and a return to a normal plateau by the fifth postdrinking hour. Normally heavy drinkers tended to display less ataxia following drinking than did normally light drinkers. Comparisons of the low and high congener beverages failed to reveal any significant differential effects. There were also no indications of any significant impairment on ataxia tests during the hangover period. R.E.S.

LABORATORY PERFORMANCE DURING ACUTE INTOXICATION AND HANGOVER
William E. Collins and W. Dean Chiles Feb. 1979 30 p refs
(AD-A069373; FAA-AM-79-7) Avail: NTIS HC A03/MF A01 CSCL 06/16

Eleven private pilots (7 men and 4 women) were recruited and trained on the multiple task performance battery (MTPB), static and dynamic tracking of a localizer/glide slope instrument, a speech intelligibility test (single words with a background of aircraft noise), and use of the intoxilyzer. The experiment comprised four test sessions (vodka, bourbon, placebo, and control sessions) held at weekly intervals. Results showed clear deleterious effects of alcohol on the MTPB and the tracking tasks immediately following drinking. During the morning (hangover) tests, scores on the MTPB and on the static and dynamic tracking tasks showed small circadian effects (scores were better) without impairment due to the alcohol. Speech perception scores were unaffected by alcohol; scores were always best in the evening and poorest in the morning. There were no congener effects. These results thus offer no evidence contrary to the 'eight hour rule'. Author

DEVELOPMENT OF ELECTROPHYSIOLOGICAL INDICES OF NEUROLOGICAL TOXICITY FOR ORGANOPHOSPHATE PESTICIDES AND DEPRESSANT DRUGS
A. M. Revzin May 1979 18 p refs
(AD-A070299; FAA-AM-79-15) Avail: NTIS HC A02/MF A01 CSCL 06/20

The effects of certain drugs and environmental pollutants on brain mechanisms controlling these visual reflexes were investigated using single nerve cell recordings in animal model systems. Most agents studied deleteriously affected reflex functions at extremely low doses. This was especially true for organophosphate pesticides, related cholinergic compounds, and ethyl alcohol. Some drugs, such as imipramine and amphetamine, seemed to have little deleterious effect. Overall, the results suggest that some drugs and environmental pollutants can impair visual functions at doses not normally considered hazardous, and thus indicate the need for extreme caution in evaluating the safety margins of such materials in aviation medicine. R.E.S.

(NASA-TM-75372) Avail: NTIS HC A04/MF A01 CSCL 06P

Investigation involving patients with injuries in the visual nervous system are discussed. This led to the identification of the epithelial ganglion of the retina as a frequency filter. Threshold curves of the injured visual organs were compared with threshold curves obtained with a control group as a basis for identification. A model which considers the epithelial ganglion as a homogeneous cell layer in which adjacent neurons interact is discussed. It is shown the behavior of the cells against alternating exciting currents can be explained. R.E.S.

CONTRIBUTION TO THE THEORY OF PHOTOPIC VISION: RETINAL PHENOMENA

H. Calvet Sep. 1979 13 p Transl. into ENGLISH from Sci. Tech. (Paris), 15 Oct. 1974 p 13-17 Original language document announced as A75-17025 Transl. by Kanner (Leo) Associates, Redwood City, Calif.
(Contract NASw-3199)
(NASA-TM-75507) Avail: NTIS HC A02/MF A01 CSCL 06P

Principles of thermodynamics are applied to the study of the ultramicroscopic anatomy of the inner eye. Concepts introduced and discussed include: the retina as a three-dimensional sensor, light signals as coherent beams in relation to the dimensions of retinal pigments, pigment effects topographed by the conjugated antennas effect, visualizing lights, the autotropic function of hemoglobin and some cytochromes, and reversible structural arrangements during photopic adaptation. A paleoecological diagram is presented which traces the evolution of scotopic vision (primitive system) to photopic vision (secondary system) through the emergence of structures sensitive to the intensity, temperature, and wavelengths of the visible range. MEASUREMENTS IN THE LASER IRRADIATED EYE Final Report, 1 Apr. 1977 - 31 Mar. 1978

Ashley J. Welch and Larry D. Forster 15 Nov. 1978 78 p refs
(Grant AF-AFOSR-3314-77; AF Proj. 2312)
(AD-A069842; AFOSR-79-0672TR) Avail: NTIS HC A05/MF A01 CSCL 06/18

The work involves the fabrication and use of a small fiber optic probe to measure (1) the transmission of the ocular media which is the ratio of the total light intensity reaching the retina to the total light intensity incident on the cornea, and (2) the cross-sectional intensity profile of a minimally small image. Information concerning the resolution of the eye is derived from the small image measurements. The transmission of the ocular media, measured on a limited number of animals, compares well with some of the best previously reported data. The transmission was measured via a 600 micron diameter fiber optic probe which collected all the light from a 200 micron diameter irradiating laser beam. Three lasers, providing seven wavelengths, were employed. The minimal images measured in the monkey eye were larger than values reported from subjective acuity tests or by diffraction theory. Some of this poor quality could be attributed to experimental error, but perhaps the most significant factor affecting eye quality was the fact that the neural controls for blinking, tearing, and micro-accommodation, which aid the eye in forming a retinal image, were inactive in the anesthetized animal. STUDIES OF METABOLISM, FUNCTION AND MECHANISM OF DESTRUCTION OF RED CELLS Final Report, 1 Jul. 1973 - 31 Mar. 1978

Marshall A. Lichtman, Robert I. Weed, Paul L. LaCelle, and Jules Cohen Apr. 1978 44 p refs
(Contract DADA17-73-C-3135)
(AD-A070240) Avail: NTIS HC A03/MF A01 CSCL 06/16

We have studied the effects of propranolol on hemoglobin-oxygen affinity and red cell shape, both in vitro and in vivo. We have also examined the effects of hemodialysis on red cell organic phosphates and on oxygen-binding to hemoglobin. Studies were conducted on the role of blood pH alterations in the elevation of red cell 2,3-DPG and decrease in hemoglobin-oxygen affinity observed in subjects with hypoproliferative anemia. Studies of the interactions of anemia, red cell ATP concentration and changes in plasma inorganic phosphate have been conducted. The interrelationships of red cell magnesium concentration and ATP concentration on hemoglobin oxygen binding have been performed. We have studied patients with acute myocardial infarction and have found that whole blood oxygen consumption remains constant despite a nearly three-fold variation in arterial oxygen flow rate. We calculated that a reduction in hemoglobin oxygen affinity could explain about one-third of the increased extraction of oxygen required to maintain oxygen consumption. Other, probably, tissue compensating mechanisms must account for the remaining adaptation. We have studied water soluble radiographic contrast materials and have found them to produce a significant alteration in the distribution of irons across the red cell membrane. GRA

THE RELATIONSHIP BETWEEN AEROBIC FITNESS AND CARDIOVASCULAR RISK FACTORS IN THE CANADIAN FORCES
T. E. Brown, W. S. Myles, and C. L. Allen Mar. 1979 18 p refs
(AD-A069865; DCIEM-TR-79X11) Avail: NTIS HC A02/MF A01 CSCL 06/14

Aerobic fitness and the incidence of risk factors related to cardiovascular disease (CVD) were compared for 1595 Canadian servicemen 20-50 years of age. Aerobic power (V02 max) was predicted from heart rates during submaximal exercise performed on a bicycle ergometer. The risk factors, body fat, serum cholesterol, serum triglycerides and blood pressure were measured by standard procedures. Smoking histories were obtained by questionnaire. A positive relationship was demonstrated between V02 max and all of the CVD risk factors examined. This relationship was most significant among those over 40 years of age, the age group most at risk from CVD. The validity of this and other studies relating aerobic fitness to susceptibility to CVD is discussed. GRA

ANALYTICAL MODELLING OF LOAD-DEFLECTION BEHAVIOR OF INTERVERTEBRAL DISCS SUBJECTED TO AXIAL COMPRESSION Final Research Report, 1 Apr. 1971 - 31 May 1979
Marshall L. Burns May 1979 26 p refs
(Contract AF-AFOSR-3578-78; AF Proj. 2312)
(AD-A071019; AFOSR-79-0795TR) Avail: NTIS HC A03/MF A01 CSCL 06/16

The analytical modelling of creep response phenomena of intervertebral discs subjected to a constant axial compressive load is attempted by using Kelvin-solid models. A mathematical analysis scheme is proposed for unique model identification wherein exact parameter solutions are developed for the one-Kelvin-unit model, the three-parameter-solid model, and the two-Kelvin-unit model. In addition, a method is presented by which the associated Young's moduli and viscosity coefficients for an identified model are obtainable. Most importantly, unique parameter values are obtained for the three-parameter-solid by utilizing exact model parameter solutions on experimental strain, E (t), data. This particular model is observed to yield theoretical strain, E (t)cal, values that are within an average error of 3.48% of the experimentally measured values, E (t)exp, for different intervertebral discs. Further, mechanical properties of the intervertebral discs are obtained by using the values of the three-parameter-solid model parameters to calculate the associated Young's moduli and viscosity coefficient. The appropriate applications, data limitations, and possible generalizations of this exact analysis scheme are fully discussed, along with suggestions for future investigatory efforts. GRA

(UR-3490-1561; Conf-790627-3) Avail: NTIS HC A02/MF A01

The absorbed energy required to cause deleterious changes in body functions of experimental animals were determined through quantitative evaluation and comparison of the many experiments which have been conducted. The results of animal experiments were then extrapolated to the exposure conditions of man. Data obtained on dogs, rabbits, and rats exposed to 2880 MHz and 1280 MHz, pulsed and 200 MHz CW were reevaluated in the light of more recent concepts related to specific absorption rates. DOE

FEASIBILITY OF AN EPIDEMIOLOGICAL STUDY OF WORKERS OCCUPATIONALLY EXPOSED TO HIGH VOLTAGE ELECTRIC FIELDS IN THE ELECTRIC POWER INDUSTRY Final Report
H. M. D. Utidjian Mar. 1979 31 p refs
(EPRI Proj. TPS 76-639)
(EPRI-EA-1020) Avail: NTIS HC A03/MF A01

This feasibility study was conducted for the Electric Power Research Institute to investigate the practicality of an epidemiological study on workers occupationally exposed to high voltage electric fields. Identification of a target population to be studied, examination of the various epidemiologic methods which could be undertaken, and cost estimates were the objectives. As an initial step to address these issues, a sample questionnaire was sent to several utility companies. Tentative recommendations regarding possible approaches and specific cost estimates and time projections were stated. DOE

EFFECTS ON POPULATIONS OF EXPOSURE TO LOW LEVELS OF IONIZING RADIATION: IMPLICATIONS FOR NUCLEAR ENERGY AND MEDICAL RADIATION The 1979 Report of the Advisory Committee on the Biological Effects of Ionizing Radiation (the BEIR Report)
J. I. Fabrikant Apr. 1979 46 p refs Presented at Symp. on Known Effects of Low Level Radiation Exposure, Pittsburgh, Penn., 25 Apr. 1979 Sponsored in part by EPA
(Contract W-7405-eng-48)
(LBL-9084; Conf-790474-1) Avail: NTIS HC A04/MF A01

The following aspects of the 1979 BEIR report are described: societal decision-making; nuclear energy needs and medical care services; epidemiological and experimental studies; public acceptance; concept of risks to health; risk estimates and cost-benefit analysis; and comparison of risks. Other topics discussed are as follows: need for advisory committees on radiation; value of the BEIR report; health effects of low levels of ionizing radiation; determination of radiation risk estimates; and quantitation of radio-induced cancer risk estimates. DOE

N79-33834# California Univ., Berkeley. Lawrence Berkeley Lab.
HEALTH EFFECTS OF LOW-LEVEL IONIZING RADIATION
J. I. Fabrikant Apr. 1979 10 p
(Contract W-7405-eng-48)
(LBL-9018) Avail: NTIS HC A02/MF A01

Possible hazards to health of persons exposed to low level ionizing radiation are discussed; specifically, effects following exposure to x-rays and to gamma rays from radioactive sources, since these are the ionizing radiations most often encountered in medicine and in industry. There are a number of biological effects of ionizing radiations, but the three most important health effects are: carcinogenic, teratogenic and genetic. Conclusions on the health effects are presented. R.E.S.

INFLUENCE OF LIGHT ADAPTATION ON DARK ADAPTATION TIME FOR PATTERN RECOGNITION TASKS [EINFLUSS DER ART DER HELLADAPTATION AUF DEN DUNKELADAPTATIONSVERLAUF BEI FORMERKENNUNGSAUFGABEN]
E. Schubert Sep. 1977 62 p refs In GERMAN
(FB-31) Avail: NTIS HC A04/MF A01; Forschungsinst. fuer Anthropotech., Meckenheim, West Ger. DM 10

Night vision parameters such as acuity, adaptation, and accomodation were investigated. Physiological aspects of night vision together with eye/telescope interaction characteristics were studied. The effects of color, relative foreground/background illumination levels, and brightness levels, as well as choice of subjects (ships officers) for these experiments are discussed. Experimental setups used to simulate real conditions are described and results are graphically reported. Author (ESA)

ULTRASONIC TISSUE CHARACTERIZATION II
Melvin Linzer Apr. 1979 346 p refs Presented at Intern. Symp. on Ultrasonic Tissue Characterization, 2d, Gaithersburg, Md., 13-15 Jun. 1977 Sponsored in part by NSF and NIH

(PB-296356/9; NBS-SP-525; LC-79-600026) Avail: NTIS HC A15/MF A01 CSCL 06E

The Second International Symposium on Ultrasonic Imaging and Tissue Characterization was held at the National Bureau of Standards on June 13-15, 1977. The meeting was cosponsored by the National Bureau of Standards, the National Science Foundation, and the National Institutes of Health. This volume contains extended and reviewed papers based on 43 of the 53 talks presented at the symposium. Topics covered include techniques for measurement of ultrasonic tissue parameters, the dependence of tissue properties on physical and biological variables (e.g., ultrasonic frequency, temperature), mechanisms of ultrasonic tissue interactions, propagation through bone and skull, tumor Doppler signatures, computerized tomography, signal processing and pattern recognition, and tissue phantoms. A survey of velocity and attenuation data in mammalian tissue is included. GRA

A SURVEY OF APPLIED PSYCHOLOGICAL SERVICES' MODELS OF THE HUMAN OPERATOR

Arthur I. Siegel and J. Jay Wolf *In* NASA. Langley Res. Center Models of Human Operators in Vision Dependent Tasks Oct. 1979 p 1-18 refs

Avail: NTIS HC A05/MF A01 CSCL 05H

A historical perspective is presented in terms of the major features and status of two families of computer simulation models in which the human operator plays the primary role. Both task oriented and message oriented models are included. Two other recent efforts are summarized which deal with visual information processing. They involve not whole model development but a family of subroutines customized to add the human aspects to existing models. A global diagram of the generalized model development/validation process is presented and related to 15 criteria for model evaluation. Author

SAINT: A COMBINED SIMULATION LANGUAGE FOR MODELING MAN-MACHINE SYSTEMS

Deborah J. Seifert *In* NASA. Langley Res. Center Models of Human Operators in Vision Dependent Tasks Oct. 1979 p 49-60 refs

Avail: NTIS HC A05/MF A01 CSCL 05H

SAINT (Systems Analysis of Integrated Networks of Tasks) is a network modeling and simulation technique for design and analysis of complex man machine systems. SAINT provides the conceptual framework for representing systems that consist of discrete task elements, continuous state variables, and interactions between them. It also provides a mechanism for combining human performance models and dynamic system behaviors in a single modeling structure. The SAINT technique is described and applications of the SAINT are discussed. R.E.S.

ANALYSIS OF VISUAL ESTIMATION OF SYSTEM STATE FROM ARBITRARY DISPLAYS

Patrick A. Gainer *In its* Models of Human Operators in Vision Dependent Tasks Oct. 1979 p 61-82 refs

Avail: NTIS HC A05/MF A01 CSCL 05H

A method is presented for implementing the state estimator of the manual control model when the system output is a visual display of arbitrary form; that is, the display may be pictorial, including real world, or made up of dials and pointers. The method is used to provide error criteria for a look-point controller that appears to be capable of modeling human scanning behavior. This model, if combined with a model of the control process, should be useful in predicting effects of changes in displays on performance of flight tasks. Author

UNDERGRADUATE PILOT TRAINING: VISUAL DISCRIMINATION PRETRAINING FOR LAND TASK Final Report, Jul. 1976 - Jun. 1978

Bernell J. Edwards, Douglas Weyer, and Bruce A. Smith AFSC Feb. 1979 40 p refs

(AF Proj. 1123)

(AD-A068141; AFHRL-TR-78-78) Avail: NTIS HC A03/MF A01 CSCL 05/9

The utility of training task-relevant visual discrimination skills as prerequisite behaviors for subsequently taught landing skills was investigated in this study. A multi-media training package was developed and used to impart visual skills to student pilots prior to their training on the flightline in landing procedures in the T-37 aircraft. The transfer of the visual discrimination skills of the landing field environment was assessed by measuring students' landing skills in the Advanced Simulator for Pilot Training and in the T-37 aircraft. Results showed that pretrained and non-pretrained student group performances on most measures were not significantly different. In several specific parameters of performance, non-pretrained groups performed significantly better in the aircraft transfer tests as rated by instructor pilots. GRA

THE CAUSES OF DECREMENTS IN AIRCREW PERFORMANCE PHYSIOLOGICAL CHANGES PRODUCED BY VIBRATION AND OTHER ENVIRONMENTAL STRESSES AND RESPONSE OF THE CARDIOVASCULAR SYSTEM TO VIBRATION AND COMBINED STRESS Final Report, 1973 - 1978
Charles F. Knapp, J. M. Evans, and D. R. Randall 20 Sep. 1978 148 p refs
(Contract F44620-74-C-0012; AF Proj. 2312)
(AD-A069952; AFOSR-79-0676TR) Avail: NTIS HC A07/MF A01 CSCL 06/5

The goal of this program is the understanding of cardiovascular responses to whole body, low frequency, sinusoidal acceleration loading of the intact physiological system. Our efforts in the early phase of the program were limited to investigating cardiovascular responses to high frequency whole body acceleration (2-30Hz), but more recently have been extended to the domain between sustained and time-varying acceleration of less than 1 Hz. Results from the early phase indicated that whole-body acceleration in the 2-3Hz range produced an exercise-type response that was directly dependent on the force level applied. Mean heart rate, stroke volume, cardiac output and whole body oxygen consumption were found to be linearly dependent on the peak net force delivered to each animal. Results from the later phase of this study indicated that whole body acceleration in the .005 to 0.25 Hz range included a resonance-type phenomenon in which the neural regulatory systems appeared to be unable to regulate arterial pressure in the middle portion of this frequency range. DEVELOPMENT OF AN OBJECTIVE GRADING SYSTEM ALONG WITH PROCEDURES AND AIDS FOR ITS EFFECTIVE IMPLEMENTATION IN FLIGHT Research Note, 15 Nov. 1977 - 14 Nov. 1978
Jerry M. Childs May 1979 49 p refs
(Contract DAHC19-77-C-0008; DA Proj. 2Q7-63743-A-772)
(AD-A071106; FTR-09-79; ARI-RN-79-18) Avail: NTIS HC A03/MF A01 CSCL 05/9

This report contains a description of the characteristics and tests of two alternative inflight scoring procedures. These procedures were designed to meet the requirements of (1) minimal data collection, and (2) objective scores for Initial Entry Rotary Wing (IERW) student performance on Basic Instrument maneuvers. The procedures were criterion-referenced, employing different performance criteria, sampling techniques, and scoring algorithms. They were subjected to tests in the UH-1 simulator to assess the potential value of various characteristics within each procedure for meeting the requirements. Results of the tests provided general indications of those characteristics which best discriminated proficiency within and among students across training days. GRA

A SYSTEM FOR STERILIZING OBJECTS Patent Application
Coleman J. Bryan, Edward E. Wright, and Clyde V. Moyers, inventors (to NASA) Filed 8 Jun. 1979 12 p
(NASA-Case-KSC-11085-1; US-Patent-Appl-SN-046739) Avail: NTIS HC A02/MF A01 CSCL 06K

A system for producing a stream of humidified sterilizing gas for sterilizing objects such as the water systems in space vehicles is described. The system includes a source of sterilant gas which is fed to a mixing chamber having inlet and outlet ports. Water is carried in the mixing chamber, with the level of the water only partially filling the mixing chamber, to provide an empty space adjacent the top of the chamber. A heater is provided for heating the water in the chamber producing a humidified atmosphere. The sterilant gas is fed through an arcuate shaped tubular member connected to the inlet port of the mixing chamber to produce a vortex type of flow in the sterilant gas being humidified. A tubular member extends from the mixing chamber to supply the humidified sterilant gas to the object to be sterilized. Scrubbers are provided for removing the sterilant gas after use. NASA

WORKLOAD AND THE CERTIFICATION OF HELICOPTERS FOR IFR OPERATION Final Report, Jul. 1978 - Jun. 1979
A. G. DeLucien, D. L. Green, S. W. Jordan, and J. J. Traybar Jun. 1979 127 p refs
(Contract DOT-FA77WA-3966)
(AD-A072758; FAA-RD-79-64; PAR-508-78-3) Avail: NTIS HC A07/MF A01 CSCL 01/3

A review of publications pertaining to workload definitions and evaluation, applicable to instrument flight rules (IFR) helicopter operations was accomplished. The role of aircrew workload in the IFR certification process was identified and a rationale was developed to allow determination of that portion of a pilot's attention and effort available for aircraft control. Performance objectives for required maneuvers were delineated and the interdependence of performance and workload was identified. Workload/performance implications for single and dual pilot IFR operations are reviewed. A series of flight maneuver patterns for use as IFR certification assessment tools was developed. A flying qualities workload evaluation scheme is offered for use in the FAA certification process for IFR approval of helicopters. R.E.S.

THE ROLE OF COGNITIVE SWITCHING IN HEAD-UP DISPLAYS
Edith Fischer May 1979 49 p refs
(Grant NsG-2269)
(NASA-CR-3137; A-7776; HUD-5) Avail: NTIS HC A03/MF A01 CSCL 01D

The pilot's ability to accurately extract information from either one or both of two superimposed sources of information was determined. Static, aerial, color 35 mm slides of external runway environments and slides of corresponding static head-up display (HUD) symbology were used as the sources. A three channel tachistoscope was utilized to show either the HUD alone, the scene alone, or the two slides superimposed. Cognitive performance of the pilots was assessed by determining the percentage of correct answers given to two HUD related questions, two scene related questions, or one HUD and one scene related question. OPTIMAL METHODS FOR PHYSIOLOGIC RESEARCH ON CLOTHING

Ralph F. Goldman 19 Jun. 1978 8 p
(DA Proj. 3E7-62777-A-845)
(AD-A071855; USARIEM-M-32/78) Avail: NTIS HC A02/MF A01 CSCL 06/17

Comfort is a 'state of contented well being' which depends on the interaction between three factors: (a) the environment, (b) the clothing worn and (c) the body's response to them. Physical, physiological and psychological factors must all be involved in clothing designed for comfort in any environment. Failure to include all three elements in studies of such clothing has frequently led to an unacceptable product. GRA

[IAF PAPER 79-95] A79-53295

Communication problems of international crews
[IAF PAPER 79-A-23] A79-53425

ASTRONAUT TRAINING
Selection, training, and health care of working specialists for Shuttle/Spacelab and future space station missions
[IAF PAPER 79-99] A79-53297

Psychological training - One of the most important factors of enhancing the safety of space flights
[IAF PAPER 79-A-24] A79-53426

ASTRONAUTS
Male and female characteristics in vestibular testing - A step toward the selection of the best participants for space flight
[IAF PAPER 79-80] A79-53288

Considerations associated with the introduction of female crewmembers in spacecraft and space stations
[IAF PAPER 79-A-22] A79-53424

ATAXIA
Effects of congener and noncongener alcoholic beverages on a clinical ataxia test battery
[AD-A069375] N79-33819

AUDIOMETRY
Automatic audiometry in the practice of flight-personnel examination
A79-51084

AUDITORY PERCEPTION
Effects of acute noise traumata on whole-nerve and single-unit activity
[IZF-1978-23] N79-32829

AUTOCLAVES
  A system for sterilizing objects --- such as water systems on the space shuttle using ethylene oxide
  [NASA-CASE-KSC-11085-1] N79-33848
AUTOMATIC TEST EQUIPMENT
  Automatic audiometry in the practice of flight-personnel examination
  A79-51084
AUTOMOBILES
  Car driving as a cybernetic task
  [IZF-1979-6] N79-32838
AVIONICS
  Manual landings in Category 3 conditions
  A79-52055
AXIAL COMPRESSION LOADS
  Analytical modelling of load-deflection behavior of intervertebral discs subjected to axial compression
  [AD-A071019] N79-33830

B

BACTERIA
  Minute tubular forms in soil
  A79-51698
  Attachment to autoclaved soil of bacterial cells from pure cultures of soil isolates
  A79-51701
BACTERIOLOGY
  Energy transduction in Halobacterium halobium
  A79-53000
BED REST
  Effect of brief head-down position on parameters of carbohydrate metabolism and beta lipoprotein content of blood
  N79-33797
BIBLIOGRAPHIES
  Hypothermia. A bibliography with abstracts
  [NTIS/PS-79/0533/4] N79-32830
  Hyperbaric oxygenation. A bibliography with abstracts
  [NTIS/PS-79/0744/7] N79-33837
  Human memory. A bibliography with abstracts
  [NTIS/PS-79/0640/7] N79-33847
  Publications of the planetary biology program for 1978: A special bibliography
  [NASA-TM-80745] N79-33854
BIOASSAY
  Clinical usefulness of radiopaque markers in left ventricular function
  A79-51029
  A new noninvasive technique for cardiac pressure measurement. II Scattering from encapsulated bubbles
  A79-51038
  Bioassay of thermal protection afforded by candidate flight suit fabrics
  A79-52280
  Influence of pressure chamber conditions on adrenocortical function in man (according to results of assaying blood plasma 11-hydroxycorticosteroids)
  N79-33798
BIOASTRONAUTICS
  Ultrastructural development of the vestibular system under conditions of simulated weightlessness
  A79-52284
  Development of adaptation to hypodynamics on rat and its readaptability to ambulatory life
  [IAF PAPER 79-76] A79-53285
  Early cardiovascular adaptation to zero gravity simulated by head-down tilt
  [IAF PAPER 79-77] A79-53286
  Ultrastructural development of the vestibular system of frog larvae in 0g simulation
  [IAF PAPER 79-78] A79-53287
  Equipment for surgical interventions and childbirth in weightlessness
  [IAF PAPER 79-97] A79-53296
BIOCHEMISTRY
  Mechanisms of oxygen toxicity at the cellular level
  [AD-A070026] N79-32823
BIODYNAMICS
  Effect of hypoxia on mechanical properties of hyperthyroid cat papillary muscle
  A79-51111
  Passive resistive torques about long bone axes of major human joints
  A79-52283
  A spherical representation of a human body for visualizing movement
  A79-53096
  Theoretical foundations of cardiovascular processes --- Book
  A79-53531
  Basic biomechanics equations for cardiovascular flow
  A79-53534
  Equations on biotransport mechanisms
  A79-53535
  Refinement and validation of a three-dimensional head-spin model
  [AD-A062502] N79-32826
BIOELECTRICITY
  Distinctions of influence of the reticular formation of the midbrain on the heart and respiration with exposure to centripetal accelerations
  N79-33800
  Methods for localization of electrical sources in the human brain and applications to the visual system
  N79-33815
  Development of electrophysiological indices of neurological toxicity for organosphate pesticides and depressant drugs
  [AD-A070299] N79-33821
  Experimental and theoretical investigations concerning a frequency filter behavior of the human retina regarding electric pulse currents
  [NASA-TM-75372] N79-33822
BIOENGINEERING
  Refinement and validation of a three-dimensional head-spin model
  [AD-A062502] N79-32826
BIOGEOCHEMISTRY
  Publications of the planetary biology program for 1978: A special bibliography
  [NASA-TM-80745] N79-33854
BIOINSTRUMENTATION
  Tremometry as a method of evaluating the functional state of the nervous system of a pilot
  A79-53065
  Continuous long-duration recording of the heart rate by means of a noncontact technique
  A79-53068
  Bioinstrumentation for evaluation of workload in payload specialists - Results of ASSESS II
  [IAF PAPER 79-88] A79-53291
  Publications of the planetary biology program for 1978: A special bibliography
  [NASA-TM-80745] N79-33854
BIOLOGICAL EFFECTS
  Protection standards for microwave and radiofrequency radiations
  A79-52878
  Methods for studying and criteria for evaluating the biological effects of electric fields of industrial frequency
  [CONF-780541-1] N79-32827
  Immunobiological reactivity of the body under hyperbaric and hypobaric conditions
  N79-33790
  Biological effects of nonionizing electromagnetic radiation, volume 3, number 4
  [AD-A070242] N79-33826
  Metabolic and physical scaling in microwave/radiofrequency bioeffects studies
  [UR-3490-1561] N79-33831
  Feasibility of an epidemiological study of workers occupationally exposed to high voltage electric fields in the electric power industry
  [EPRI-EA-1020] N79-33832
  Effects on populations of exposure to low levels of ionizing radiation: Implications for nuclear energy and medical radiation
  [LBL-9084] N79-33833

BIOLOGICAL EVOLUTION
Publications of the planetary biology program for 1978: A special bibliography
[NASA-TM-80745] N79-33854

BIOLOGY
Some of the problems involved in planning biological experiments
N79-33805

BIOMAGNETISM
Biomagnetic instrumentation and measurement
A79-51043
Clinical magnetocardiography
A79-51044

BIOMETRICS
Theoretical foundations of cardiovascular processes --- Book
A79-53531
Methods for localization of electrical sources in the human brain and applications to the visual system
N79-33815

BIONICS
A spherical representation of a human body for visualizing movement
A79-53096
Bio-heat transfer processes, for human thermoregulatory and circulatory characteristics measurements
A79-53536
Refinement and validation of a three-dimensional head-spin model
[AD-A062502] N79-32826

BIOPHYSICS
The effect of microwave fields on muscle oxygen pressure and temperature in animals previously adapted to hypoxia
A79-51116
Theoretical foundations of cardiovascular processes --- Book
A79-53531
The theory of the magnetocardiogram
A79-53533
Fundamental biophysical aspects of decompression sickness
[AD-A069998] N79-33827

BIOSATELLITES
Electrolyte composition of rat blood plasma and skeletal muscles after flight aboard the Cosmos-690 biosatellite
N79-33795

BIOSYNTHESIS
Intensity of DNA synthesis in animal organs after flight aboard the Cosmos-782 biosatellite
N79-33796

BIOTECHNOLOGY
Food and waste management biotechnology for the space shuttle
[IAF PAPER 79-93] A79-53294

BIRTH
Equipment for surgical interventions and childbirth in weightlessness
[IAF PAPER 79-97] A79-53296

BLOOD
Effect of brief head-down position on parameters of carbohydrate metabolism and beta lipoprotein content of blood
N79-33797

BLOOD CIRCULATION
Application of an isolated heart model to investigate blood-oxygen delivery
A79-51112
The role of lesser circulation hemodynamic changes in pulmonary gas exchange
A79-53066
Bio-heat transfer processes, for human thermoregulatory and circulatory characteristics measurements
A79-53536

BLOOD COAGULATION
Blood coagulation and tissular factors of blood clotting in heparinized rabbits submitted to hypokinesia
N79-33813

BLOOD FLOW
Clinical usefulness of radiopaque markers in left ventricular function
A79-51029
Cardiac blood flow measurement - A component of the comprehensive cardiac examination
A79-51041
Quantitative flow estimation with transcutaneous Doppler ultrasound
A79-51042
Application of an isolated heart model to investigate blood-oxygen delivery
A79-51112
Oxygen delivery in the hypoxic perfused heart: Relation to functional and metabolic changes
N79-32825

BLOOD PLASMA
Plasma aldosterone, renin activity, and cortisol responses to heat exposure in sodium depleted and repleted subjects
A79-52023
Electrolyte composition of rat blood plasma and skeletal muscles after flight aboard the Cosmos-690 biosatellite
N79-33795
Influence of pressure chamber conditions on adrenocortical function in man (according to results of assaying blood plasma 11-hydroxycorticosteroids)
N79-33798

BLOOD PRESSURE
Noninvasive cardiovascular measurements --- Book
A79-51026
A study of noninvasive blood pressure measurement techniques
A79-51036
Analyses for noninvasive monitoring of arterial blood pressure by /I/ phono cuff-sphygmomanometry, for discrete measurements and /II/ arterial ultrasonic imaging, for continuous measurements
A79-51037
A new noninvasive technique for cardiac pressure measurement. II Scattering from encapsulated bubbles
A79-51038
Cardiac blood flow measurement - A component of the comprehensive cardiac examination
A79-51041

BLOOD VESSELS
Iodine imaging using spectral analysis --- radiography for visualization of small blood vessels
A79-51034
Quantitative flow estimation with transcutaneous Doppler ultrasound
A79-51042

BLOOD VOLUME
Early cardiovascular adaptation to zero gravity simulated by head-down tilt
[IAF PAPER 79-77] A79-53286

BODY FLUIDS
Evidence for increased intrathoracic fluid volume in man at high altitude
A79-54266
Composition of cerebral fluids in goats adapted to high altitude
[AD-A070142] N79-33788
Fluid-electrolyte metabolism in the crew of Salyut-4
N79-33792

BODY TEMPERATURE
Bio-heat transfer processes, for human thermoregulatory and circulatory characteristics measurements
A79-53536
Hypothermia. A bibliography with abstracts
[NTIS/PS-79/0533/4] N79-32830

BONES
Passive resistive torques about long bone axes of major human joints
A79-52283

BRAIN
The effect of normobaric hyperoxia on brain and liver tissue respiration in albino rats with different resistances to hypoxia
A79-51113
Some neurochemical characteristics of rats after space flight in the Cosmos-936 satellite
A79-52475
Composition of cerebral fluids in goats adapted to high altitude
[AD-A070142] N79-33788

Distinctions of influence of the reticular formation of the midbrain on the heart and respiration with exposure to centripetal accelerations
N79-33800
Methods for localization of electrical sources in the human brain and applications to the visual system
N79-33815

BURNS (INJURIES)
Effect of fiber and dye degradation products /FDP/ on burn wound healing
A79-52277

C

CALORIC STIMULI
Effect of restricted activity on vestibular function
N79-33802

CARBOHYDRATE METABOLISM
Effect of brief head-down position on parameters of carbohydrate metabolism and beta lipoprotein content of blood
N79-33797

CARDIAC VENTRICLES
Clinical usefulness of radiopaque markers in left ventricular function
A79-51029
Temporal relation between onset of cell anoxia and ischemic contractile failure
A79-52895

CARDIOGRAPHY
Real-time computerized fluoroscopic cardiac imaging
A79-51035

CARDIOLOGY
Noninvasive cardiovascular measurements --- Book
A79-51026
Computer quantitation of angiocardiographic images
A79-51028
Computer quantitation of coronary angiograms
A79-51030
Clinical applications of new echocardiographic techniques
A79-51040
Biomagnetic instrumentation and measurement
A79-51043
Clinical magnetocardiography
A79-51044
Application of an isolated heart model to investigate blood-oxygen delivery
A79-51112
Possibilities and perspectives of tetrapolar transthoracic impedance rheophethysmography in noninvasive studies of hemo- and cardiodynamics
A79-51118
The metabolic demand and oxygen supply of the heart - Physiologic and clinical considerations
A79-52894
Temporal relation between onset of cell anoxia and ischemic contractile failure
A79-52895

CARDIOVASCULAR SYSTEM
Noninvasive cardiovascular measurements --- Book
A79-51026
Current status of cardiovascular imaging by transmission computed tomography
A79-51032
A new noninvasive technique for cardiac pressure measurement. II Scattering from encapsulated bubbles
A79-51038
Clinical applications of new echocardiographic techniques
A79-51040
Cardiac blood flow measurement - A component of the comprehensive cardiac examination
A79-51041
Time course of O2-pulse during various tests of aerobic power
A79-52024
Theoretical foundations of cardiovascular processes --- Book
A79-53531
Basic biomechanics equations for cardiovascular flow
A79-53534
The causes of decrements in aircrew performance physiological changes produced by vibration and other environmental stresses and response of the cardiovascular system to vibration and combined stress
[AD-A069952] N79-33845

CELLS (BIOLOGY)
Attachment to autoclaved soil of bacterial cells from pure cultures of soil isolates
A79-51701
Energy transduction in Halobacterium halobium
A79-53000

CENTRIFUGING
Distinctions of influence of the reticular formation of the midbrain on the heart and respiration with exposure to centripetal accelerations
N79-33800

CENTRIPETAL FORCE
Distinctions of influence of the reticular formation of the midbrain on the heart and respiration with exposure to centripetal accelerations
N79-33800

CEREBRAL CORTEX
The visual cortex of normal and deprived monkeys
A79-51174

CHEMICAL EFFECTS
Some neurochemical characteristics of rats after space flight in the Cosmos-936 satellite
A79-52475

CHEMICAL EVOLUTION
Publications of the planetary biology program for 1978: A special bibliography
[NASA-TM-80745] N79-33854

CHEMISORPTION
Effect of rocking on absorption of some group B vitamins and ascorbic acid in the small intestine of dogs
N79-33803

CINEMATOGRAPHY
A cinematographic technique for investigating some aspects of visual recognition
A79-53067

CLINICAL MEDICINE
Noninvasive cardiovascular measurements --- Book
A79-51026
Computer quantitation of coronary angiograms
A79-51030
Clinical applications of new echocardiographic techniques
A79-51040
Cardiac blood flow measurement - A component of the comprehensive cardiac examination
A79-51041
Biomagnetic instrumentation and measurement
A79-51043
Clinical magnetocardiography
A79-51044

CLOSED ECOLOGICAL SYSTEMS
Evaluation of oxidizability of air in closed areas
N79-33808

CLOTTING
Blood coagulation and tissular factors of blood clotting in heparinized rabbits submitted to hypokinesia
N79-33813

COCHLEA
Effects of acute noise traumata on whole-nerve and single-unit activity
[IZF-1978-23] N79-32829

COGNITION
Shalit Perceptual Organization and Reduction Questionnaire (SPORQ). Report 2: Characteristics and reliability
[FOA-C-55031-H6] N79-32836

COGNITIVE PSYCHOLOGY
The role of cognitive switching in head-up displays --- to determine pilot ability to accurately extract information from either of two sources
[NASA-CR-3137] N79-33851

COLD TOLERANCE
Bimodal relationship of human tremor and shivering on introduction to cold exposure
A79-52278

COLD WATER
Cold water survival suits for aircrew
A79-52282

COLOR VISION
Contribution to the theory of photopic vision: Retinal phenomena
[NASA-TM-75507] N79-33823
COMMAND AND CONTROL
Combined discrete network: Continuous control modeling of man-machine systems
[AD-A071574] N79-32842
COMPUTER GRAPHICS
Real-time computerized fluoroscopic cardiac imaging
A79-51035
Pilot performance during simulated approaches and landings made with various computer-generated visual glidepath indicators
A79-52276
A spherical representation of a human body for visualizing movement
A79-53096
COMPUTER PROGRAMS
Computer quantitation of angiocardiographic images
A79-51028
Review of unfolding methods used in the US and their standardization for dosimetry
[BNWL-SA-6503] N79-32828
COMPUTER TECHNIQUES
Computer quantitation of coronary angiograms
A79-51030
Visual motion perception by intelligent systems
A79-52691
COMPUTERIZED SIMULATION
A spherical representation of a human body for visualizing movement
A79-53096
Models of human operators in vision dependent tasks
[NASA-CP-2103] N79-33838
A survey of Applied Psychological Services' models of the human operator
N79-33839
SAINT: A combined simulation language for modeling man-machine systems
N79-33842
CONDITIONED REFLEXES
Early cardiovascular adaptation to zero gravity simulated by head-down tilt
[IAF PAPER 79-77] A79-53286
Ultrastructural development of the vestibular system of frog larvae in 0g simulation
[IAF PAPER 79-78] A79-53287
CONFERENCES
Third Symposium on Motion Sickness
N79-33814
Ultrasonic tissue characterization II
[PB-296356/9] N79-33836
CONTROL CONFIGURED VEHICLES
A theoretical investigation of power and control configurations for a high g-onset centrifuge drive system
[AD-A070912] N79-32841
CONTROL EQUIPMENT
A theoretical investigation of power and control configurations for a high g-onset centrifuge drive system
[AD-A070912] N79-32841
CORONARY ARTERY DISEASE
Computer quantitation of coronary angiograms
A79-51030
CORONARY CIRCULATION
Clinical usefulness of radiopaque markers in left ventricular function
A79-51029
Oxygen delivery in the hypoxic perfused heart: Relation to functional and metabolic changes
N79-32825
CORTICOSTEROIDS
Plasma aldosterone, renin activity, and cortisol responses to heat exposure in sodium depleted and repleted subjects
A79-52023
Influence of pressure chamber conditions on adrenocortical function in man (according to results of assaying blood plasma 11-hydroxycorticosteroids)
N79-33798
COSMONAUTS
Preliminary selection of candidates for space flights
[IAF PAPER 79-83] A79-53289
Psychological training - One of the most important factors of enhancing the safety of space flights
[IAF PAPER 79-A-24] A79-53426
Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/
A79-53486
COSMOS 782 SATELLITE
Intensity of DNA synthesis in animal organs after flight aboard the Cosmos-782 biosatellite
N79-33796
COSMOS 936 SATELLITE
Some neurochemical characteristics of rats after space flight in the Cosmos-936 satellite
A79-52475
CRASH INJURIES
Passive resistive torques about long bone axes of major human joints
A79-52283
CULTURE TECHNIQUES
Attachment to autoclaved soil of bacterial cells from pure cultures of soil isolates
A79-51701
CYBERNETICS
Car driving as a cybernetic task
[IZF-1979-6] N79-32838
CYTOLOGY
Energy transduction in Halobacterium halobium
A79-53000

D

DARK ADAPTATION
Changes in critical duration during dark-adaptation
A79-54252
Influence of light adaptation on dark adaptation time for pattern recognition tasks
[PB-31] N79-33835
DATA PROCESSING
A study of noninvasive blood pressure measurement techniques
A79-51036
DECISION MAKING
Effects of amphetamine on response selection and response execution processes in choice reaction tasks
[IZF-1978-8] N79-32839
DECOMPRESSION SICKNESS
Fundamental biophysical aspects of decompression sickness
[AD-A069998] N79-33827
DEOXYRIBONUCLEIC ACID
Intensity of DNA synthesis in animal organs after flight aboard the Cosmos-782 biosatellite
N79-33796
DIAGNOSIS
Computerized positron emission tomography /PET/ for the assessment of myocardial integrity
A79-51031
Signal processing in ultrasound --- for diagnostic medicine
A79-51039
Clinical applications of new echocardiographic techniques
A79-51040
DIFFRACTION PATTERNS
The retinal resolving power measured by laser interference fringes
A79-54091
DIGESTING
Effect of rocking on absorption of some group B vitamins and ascorbic acid in the small intestine of dogs
N79-33803
DIGITAL SIMULATION
Combined discrete network: Continuous control modeling of man-machine systems
[AD-A071574] N79-32842
DIGITAL TECHNIQUES
The development of a digital video subtraction system for intravenous angiography
A79-51033
DISPLAY DEVICES
Real-time computerized fluoroscopic cardiac imaging
A79-51035
Pilot performance during simulated approaches and landings made with various computer-generated visual glidepath indicators
A79-52276

- Target redundancy in visual search - Do repetitions of the target within the display impair processing A79-52540
- Analysis of visual estimation of system state from arbitrary displays N79-33843

DOSIMETERS
- Review of unfolding methods used in the US and their standardization for dosimetry [BNWL-SA-6503] N79-32828

DYES
- Effect of fiber and dye degradation products /FDP/ on burn wound healing A79-52277

DYNAMIC MODELS
- Car driving as a cybernetic task [IZF-1979-6] N79-32838

E

ECHOCARDIOGRAPHY
- Clinical applications of new echocardiographic techniques A79-51040

ELASTIC PROPERTIES
- Basic biomechanics equations for cardiovascular flow A79-53534

ELECTRIC FIELDS
- Methods for studying and criteria for evaluating the biological effects of electric fields of industrial frequency [CONF-780541-1] N79-32827
- Feasibility of an epidemiological study of workers occupationally exposed to high voltage electric fields in the electric power industry [EPRI-EA-1020] N79-33832

ELECTRIC POWER TRANSMISSION
- A theoretical investigation of power and control configurations for a high g-onset centrifuge drive system [AD-A070912] N79-32841

ELECTROCARDIOGRAPHY
- Non-invasive information on the P-R segment of the cardiac cycle - An assessment of the clinical potential of the electric and magnetic methods A79-51045
- Continuous long-duration recording of the heart rate by means of a noncontact technique A79-53068
- Theoretical foundations of cardiovascular processes --- Book A79-53531
- Fundamentals of electrical processes in the electrophysiology of the heart A79-53532
- A nonlinear mapping approach to discrimination of sleep stages from the human electroencephalogram N79-33817

ELECTROLYTE METABOLISM
- Fluid-electrolyte metabolism in the crew of Salyut-4 N79-33792
- Electrolyte composition of rat blood plasma and skeletal muscles after flight aboard the Cosmos-690 biosatellite N79-33795

ELECTROMAGNETIC RADIATION
- Biological effects of nonionizing electromagnetic radiation, volume 3, number 4 [AD-A070242] N79-33826

ELECTROMYOGRAPHY
- Frequency and amplitude analysis of the EMG during exercise on the bicycle ergometer A79-52022
- Electrophysiological correlates of local muscular fatigue effects upon human visual reaction time A79-52025

ELECTROPHYSIOLOGY
- Electrophysiological correlates of local muscular fatigue effects upon human visual reaction time A79-52025
- Fundamentals of electrical processes in the electrophysiology of the heart A79-53532

ELECTROPLETHYSMOGRAPHY
- Possibilities and perspectives of tetrapolar transthoracic impedance rheophethysmography in noninvasive studies of hemo- and cardiodynamics A79-51118

ELECTRORETINOGRAPHY
- Reciprocal interaction between the photopic and scotopic systems of the visual analyzer in man A79-51327

ENERGY DISSIPATION
- Energy expenditures of man during long exposure to a periodically changing atmosphere N79-33799

ENZYME ACTIVITY
- Plasma aldosterone, renin activity, and cortisol responses to heat exposure in sodium depleted and repleted subjects A79-52023

EPIDEMIOLOGY
- Feasibility of an epidemiological study of workers occupationally exposed to high voltage electric fields in the electric power industry [EPRI-EA-1020] N79-33832

ERGOMETERS
- Frequency and amplitude analysis of the EMG during exercise on the bicycle ergometer A79-52022

ERYTHROCYTES
- Effect of impact accelerations on chemical resistance of rat erythrocytes N79-33811
- Studies of metabolism, function and mechanism of destruction of red cells [AD-A070240] N79-33828

ETHYL ALCOHOL
- Evaluation of oxidizability of air in closed areas N79-33808

ETHYLENE OXIDE
- A system for sterilizing objects --- such as water systems on the space shuttle using ethylene oxide [NASA-CASE-KSC-11085-1] N79-33848

EVOKED RESPONSE (PSYCHOPHYSIOLOGY)
- Electrophysiological correlates of local muscular fatigue effects upon human visual reaction time A79-52025

EXOBIOLOGY
- Space Biology and Aerospace Medicine, no. 4, 1979 [JPRS-74330] N79-33789
- Aerospace medicine and biology: A continuing bibliography with indexes, supplement 197, September 1979 [NASA-SP-7011(197)] N79-33818

EXPERIMENTAL DESIGN
- Some of the problems involved in planning biological experiments N79-33805

EXPOSURE
- Effects on populations of exposure to low levels of ionizing radiation: Implications for nuclear energy and medical radiation [LBL-9084] N79-33833

EXTRATERRESTRIAL LIFE
- Publications of the planetary biology program for 1978: A special bibliography [NASA-TM-80745] N79-33854

EXTRAVEHICULAR ACTIVITY
- The biomedical implications of extended duration zero-g extravehicular activities [IAF PAPER 79-ST-06] A79-53447
- Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/ A79-53486

EYE (ANATOMY)
- Nonlinear perception of infrared radiation in the 800-1355 nm range with human eye A79-53163
- Changes in critical duration during dark-adaptation A79-54252
- Contribution to the theory of photopic vision: Retinal phenomena [NASA-TM-75507] N79-33823
- Measurements in the laser irradiated eye [AD-A069842] N79-33825

EYE EXAMINATIONS
- Advanced transport operation effects on pilot scan patterns A79-51098
- Lightweight helmet-mounted eye movement measurement system A79-53516
- The retinal resolving power measured by laser interference fringes A79-54091

EYE MOVEMENTS
Lightweight helmet-mounted eye movement measurement system A79-53516
Optokinetic reactions in man elicited by localized retinal motion stimuli A79-54251
Eye torsion in response to a tilted visual stimulus A79-54254

F

F-16 AIRCRAFT
Application of a structured decision process for proper inclusion of human resources in the design of a power unit support stand [AD-A069978] N79-32840
FABRICS
Bioassay of thermal protection afforded by candidate flight suit fabrics A79-52280
FEMALES
Considerations associated with the introduction of female crewmembers in spacecraft and space stations [IAF PAPER 79-A-22] A79-53424
FIRE DAMAGE
Effect of fiber and dye degradation products /FDP/ on burn wound healing A79-52277
FLAME RETARDANTS
Effect of fiber and dye degradation products /FDP/ on burn wound healing A79-52277
FLIGHT CLOTHING
Bioassay of thermal protection afforded by candidate flight suit fabrics A79-52280
Cold water survival suits for aircrew A79-52282
FLIGHT CREWS
Automatic audiometry in the practice of flight-personnel examination A79-51084
Cold water survival suits for aircrew A79-52282
FLIGHT FITNESS
Automatic audiometry in the practice of flight-personnel examination A79-51084
Male and female characteristics in vestibular testing - A step toward the selection of the best participants for space flight [IAF PAPER 79-80] A79-53288
Preliminary selection of candidates for space flights [IAF PAPER 79-83] A79-53289
FLIGHT SAFETY
Psychological training - One of the most important factors of enhancing the safety of space flights [IAF PAPER 79-A-24] A79-53426
FLIGHT SIMULATION
Technique for simulating G-induced tunnel vision A79-52286
Lightweight helmet-mounted eye movement measurement system A79-53516
Pilot performance in simulated aerial refueling as a function of tanker model complexity and visual display field-of-view [AD-A070231] N79-32832
A theoretical investigation of power and control configurations for a high g-onset centrifuge drive system [AD-A070912] N79-32841
FLIGHT STRESS (BIOLOGY)
Development of adaptation to hypodynamics on rat and its readaptability to ambulatory life [IAF PAPER 79-76] A79-53285
FLIGHT TRAINING
Development of an objective grading system along with procedures and aids for its effective implementation in flight [AD-A071106] N79-33846
FLOW MEASUREMENT
Quantitative flow estimation with transcutaneous Doppler ultrasound A79-51042
FLOW VELOCITY
Quantitative flow estimation with transcutaneous Doppler ultrasound A79-51042
FLUOROSCOPY
Real-time computerized fluoroscopic cardiac imaging A79-51035
FOG
Manual landings in Category 3 conditions A79-52055
FOVEA
Contribution to the theory of photopic vision: Retinal phenomena [NASA-TM-75507] N79-33823
FREQUENCY RESPONSE
A new noninvasive technique for cardiac pressure measurement. II Scattering from encapsulated bubbles A79-51038
FROGS
Ultrastructural development of the vestibular system of frog larvae in 0g simulation [IAF PAPER 79-78] A79-53287

G

GAMMA RAYS
Role of n-aminobenzoic acid in repairing UV and gamma radiation damage A79-53211
Ultrastructure of lymph nodes of dogs exposed to long-term external gamma radiation N79-33804
GAS DENSITY
The effect of the reduction of inspired gas density on external respiration A79-51115
GAS EXCHANGE
The role of lesser circulation hemodynamic changes in pulmonary gas exchange A79-53066
Energy expenditures of man during long exposure to a periodically changing atmosphere N79-33799
Adaptive optimization of exchange of gases in plants in a sealed phytotron N79-33806
External respiration and gas exchange reactions of man during rotation on a short-arm centrifuge N79-33812
GLANDS (ANATOMY)
Ultrastructure of lymph nodes of dogs exposed to long-term external gamma radiation N79-33804
GLIDE LANDINGS
Pilot performance during simulated approaches and landings made with various computer-generated visual glidepath indicators A79-52276
GNOTOBIOTICS
Microbiological evaluation of the mobile biological isolator system [NASA-CR-162293] N79-32822
GRAVITATIONAL EFFECTS
Radiographic comparison of human lung shape during normal gravity and weightlessness A79-54269
GUNFIRE
Tentative evaluation of annoyance caused by noise from gunfire [IZF-1978-21] N79-32843
GYRATION
Effect of rocking on absorption of some group B vitamins and ascorbic acid in the small intestine of dogs N79-33803

H

HEAD MOVEMENT
A comparison of oculomotor and motion parallax cues of egocentric distance A79-54253
HEAD-UP DISPLAYS
The role of cognitive switching in head-up displays --- to determine pilot ability to accurately extract information from either of two sources [NASA-CR-3137] N79-33851

HEALTH PHYSICS
Methods for studying and criteria for evaluating the biological effects of electric fields of industrial frequency
[CONF-780541-1] N79-32827
Biological effects of nonionizing electromagnetic radiation, volume 3, number 4
[AD-A070242] N79-33826
Health effects of low-level ionizing radiation
[LBL-9018] N79-33834

HEART
The metabolic demand and oxygen supply of the heart - Physiologic and clinical considerations
A79-52894
Distinctions of influence of the reticular formation of the midbrain on the heart and respiration with exposure to centripetal accelerations
N79-33800

HEART DISEASES
Noninvasive cardiovascular measurements --- Book
A79-51026
Computer quantitation of angiocardiographic images
A79-51028
Clinical usefulness of radiopaque markers in left ventricular function
A79-51029
Cardiac blood flow measurement - A component of the comprehensive cardiac examination
A79-51041
Clinical magnetocardiography
A79-51044
Temporal relation between onset of cell anoxia and ischemic contractile failure
A79-52895
The relationship between aerobic fitness and cardiovascular risk factors in the Canadian forces
[AD-A069865] N79-33829

HEART FUNCTION
Application of an isolated heart model to investigate blood-oxygen delivery
A79-51112

HEART RATE
Similarity in the number of lifespan heartbeats among non-hibernating homeothermic animals
A79-52281
Continuous long-duration recording of the heart rate by means of a noncontact technique
A79-53068

HEAT TOLERANCE
Plasma aldosterone, renin activity, and cortisol responses to heat exposure in sodium depleted and repleted subjects
A79-52023

HEAT TRANSFER
Bio-heat transfer processes, for human thermoregulatory and circulatory characteristics measurements
A79-53536

HELICOPTER CONTROL
Performance and workload analysis of inflight helicopter missions
[NLR-MP-77013-U] N79-32834

HELICOPTERS
The influence of low frequency vibration on pilot performance /as measured in a fixed base simulator/
A79-52326
Workload and the certification of helicopters for IFR operation
[AD-A072758] N79-33850

HELMETS
Lightweight helmet-mounted eye movement measurement system
A79-53516

HEMODYNAMIC RESPONSES
The metabolic demand and oxygen supply of the heart - Physiologic and clinical considerations
A79-52894
Studies of venous circulation in the crew of the Salyut-5 orbital station
N79-33791

HEMODYNAMICS
Possibilities and perspectives of tetrapolar transthoracic impedance rheophethysmography in noninvasive studies of hemo- and cardiodynamics
A79-51118
The role of lesser circulation hemodynamic changes in pulmonary gas exchange
A79-53066

HEMOGLOBIN
Studies of metabolism, function and mechanism of destruction of red cells
[AD-A070240] N79-33828

HEPARINS
Blood coagulation and tissular factors of blood clotting in heparinized rabbits submitted to hypokinesia
N79-33813

HIBERNATION
Similarity in the number of lifespan heartbeats among non-hibernating homeothermic animals
A79-52281

HIGH ALTITUDE
Evidence for increased intrathoracic fluid volume in man at high altitude
A79-54266

HIGH PRESSURE OXYGEN
Hyperbaric oxygenation. A bibliography with abstracts
[NTIS/PS-79/0744/7] N79-33837

HOMEOTHERMS
Similarity in the number of lifespan heartbeats among non-hibernating homeothermic animals
A79-52281

HUMAN BEHAVIOR
Car driving as a cybernetic task
[IZF-1979-6] N79-32838

HUMAN BEINGS
Metabolic adrenergic changes during submaximal exercise and in the recovery period in man
A79-54267
Influence of skin temperature on sweating and aerobic performance during severe work
A79-54268

HUMAN BODY
Comparison of physiological effects of head-down tilting and immersion on the human body
A79-52279
A spherical representation of a human body for visualizing movement
A79-53096
Radiographic comparison of human lung shape during normal gravity and weightlessness
A79-54269

HUMAN CENTRIFUGES
A theoretical investigation of power and control configurations for a high g-onset centrifuge drive system
[AD-A070912] N79-32841
External respiration and gas exchange reactions of man during rotation on a short-arm centrifuge
N79-33812

HUMAN FACTORS ENGINEERING
Man and machine design for space flight
A79-52696
Thoughts about man-machine interrelations in space flights applied to Spacelab missions
[IAF PAPER 79-95] A79-53295
Considerations associated with the introduction of female crewmembers in spacecraft and space stations
[IAF PAPER 79-A-22] A79-53424
Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/
A79-53486
Human performance in time-shared verbal and tracking tasks
[AD-A070275] N79-32831
The use of artificial signals during SONAR-watch
[IZF-1978-25] N79-32837
Application of a structured decision process for proper inclusion of human resources in the design of a power unit support stand
[AD-A069978] N79-32840
Acoustic attitude orientation
N79-33816
A nonlinear mapping approach to discrimination of sleep stages from the human electroencephalogram
N79-33817
Effects of congener and noncongener alcoholic beverages on a clinical ataxia test battery
[AD-A069375] N79-33819
Laboratory performance during acute intoxication and hangover
[AD-A069373] N79-33820

Development of electrophysiological indices of neurological toxicity for organosphate pesticides and depressant drugs
[AD-A070299] N79-33821
Models of human operators in vision dependent tasks
[NASA-CP-2103] N79-33838
A survey of Applied Psychological Services' models of the human operator
N79-33839
Visual performance modeling in the human operator simulator
N79-33840
A brief overview of the theory and application of the optimal control model of the human operator
N79-33841
Development of an objective grading system along with procedures and aids for its effective implementation in flight
[AD-A071106] N79-33846
Workload and the certification of helicopters for IFR operation
[AD-A072758] N79-33850
A general model for the transfer of vapour through clothed skin from liquid on and in clothing
[AD-A071577] N79-33853

HUMAN PERFORMANCE
Mechanisms of the effects of vibration frequency, level and duration on continuous manual control performance
A79-52327
Human performance in time-shared verbal and tracking tasks
[AD-A070275] N79-32831
Acoustic attitude orientation
N79-33816
Effects of congener and noncongener alcoholic beverages on a clinical ataxia test battery
[AD-A069375] N79-33819
Laboratory performance during acute intoxication and hangover
[AD-A069373] N79-33820
The causes of decrements in aircrew performance physiological changes produced by vibration and other environmental stresses and response of the cardiovascular system to vibration and combined stress
[AD-A069952] N79-33845
Development of an objective grading system along with procedures and aids for its effective implementation in flight
[AD-A071106] N79-33846
Human memory. A bibliography with abstracts
[NTIS/PS-79/0640/7] N79-33847

HUMAN REACTIONS
Effects of amphetamine on response selection and response execution processes in choice reaction tasks
[IZF-1978-8] N79-32839

HUMAN TOLERANCES
Aerospace highlights and potential medical applications --- in manned space flight
A79-51027
Bimodal relationship of human tremor and shivering on introduction to cold exposure
A79-52278
Tentative evaluation of annoyance caused by noise from gunfire
[IZF-1978-21] N79-32843
Minimum sea surface temperatures and associated survival times
[AD-A070162] N79-33824

HYDROSTATICS
Effect of hydrostatic factor on orthostatic stability and physical fitness of man during 60-day antiorthostatic hypokinesia
N79-33809

HYGIENE
Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/
A79-53486

HYPERBARIC CHAMBERS
Immunobiological reactivity of the body under hyperbaric and hypobaric conditions
N79-33790

HYPERCAPNIA
Influence of pressure chamber conditions on adrenocortical function in man (according to results of assaying blood plasma 11-hydroxycorticosteroids)
N79-33798

HYPEROXIA
The effect of normobaric hyperoxia on brain and liver tissue respiration in albino rats with different resistances to hypoxia
A79-51113
Mechanisms of oxygen toxicity at the cellular level
[AD-A070026] N79-32823
Hyperbaric oxygenation. A bibliography with abstracts
[NTIS/PS-79/0744/7] N79-33837

HYPERTHERMIA
Hypothermia. A bibliography with abstracts
[NTIS/PS-79/0533/4] N79-32830

HYPOBARIC ATMOSPHERES
Medical barofunction testing of aviators with otorhinolaryngologic disease
A79-52285
Immunobiological reactivity of the body under hyperbaric and hypobaric conditions
N79-33790

HYPODYNAMIA
Development of adaptation to hypodynamics on rat and its readaptability to ambulatory life
[IAF PAPER 79-76] A79-53285

HYPOKINESIA
Effects on lipid metabolism in man of some factors that simulate space flight conditions
N79-33794
Effect of restricted activity on vestibular function
N79-33802
Effect of hydrostatic factor on orthostatic stability and physical fitness of man during 60-day antiorthostatic hypokinesia
N79-33809
Vertical orientation of man during 5-day antiorthostatic hypokinesia (-4, -8 and -12 deg head down position)
N79-33810
Blood coagulation and tissular factors of blood clotting in heparinized rabbits submitted to hypokinesia
N79-33813

HYPOXEMIA
Lung oxygen diffusibility and permeability in dogs of various ages under normal conditions and in cases of acute hypoxic hypoxia
A79-51114

HYPOXIA
Effect of hypoxia on mechanical properties of hyperthyroid cat papillary muscle
A79-51111
Lung oxygen diffusibility and permeability in dogs of various ages under normal conditions and in cases of acute hypoxic hypoxia
A79-51114
The effect of microwave fields on muscle oxygen pressure and temperature in animals previously adapted to hypoxia
A79-51116
Oxygen delivery in the hypoxic perfused heart: Relation to functional and metabolic changes
N79-32825
Influence of pressure chamber conditions on adrenocortical function in man (according to results of assaying blood plasma 11-hydroxycorticosteroids)
N79-33798

I

IMAGE PROCESSING
Computer quantitation of coronary angiograms
A79-51030
Visual motion perception by intelligent systems
A79-52691

IMAGE RESOLUTION
The retinal resolving power measured by laser interference fringes
A79-54091

IMAGES
A comparison of verbal and visual imagery learning stategies: Their importance for instrumental technology
[AD-A069983] N79-32833
IMAGING TECHNIQUES
Current status of cardiovascular imaging by transmission computed tomography
A79-51032
Iodine imaging using spectral analysis --- radiography for visualization of small blood vessels
A79-51034
Real-time computerized fluoroscopic cardiac imaging
A79-51035
IMMUNITY
Immunobiological reactivity of the body under hyperbaric and hypobaric conditions
N79-33790
IMPACT ACCELERATION
Significance of the vibration component to the deleterious effect of impact accelerations
N79-33801
Effect of impact accelerations on chemical resistance of rat erythrocytes
N79-33811
INFORMATION SYSTEMS
The role of cognitive switching in head-up displays --- to determine pilot ability to accurately extract information from either of two sources
[NASA-CR-3137] N79-33851
INFRARED RADIATION
Nonlinear perception of infrared radiation in the 800-1355 nm range with human eye
A79-53163
INSTRUMENT FLIGHT RULES
Workload and the certification of helicopters for IFR operation
[AD-A072758] N79-33850
INTERFEROMETRY
The retinal resolving power measured by laser interference fringes
A79-54091
INTERNATIONAL COOPERATION
Communication problems of international crews
[IAF PAPER 79-A-23] A79-53425
INTESTINES
Effect of rocking on absorption of some group B vitamins and ascorbic acid in the small intestine of dogs
N79-33803
INTOXICATION
Effects of congener and noncongener alcoholic beverages on a clinical ataxia test battery
[AD-A069375] N79-33819
Laboratory performance during acute intoxication and hangover
[AD-A069373] N79-33820
IODINE
Iodine imaging using spectral analysis --- radiography for visualization of small blood vessels
A79-51034
IONIZING RADIATION
Effects on populations of exposure to low levels of ionizing radiation: Implications for nuclear energy and medical radiation
[LBL-9084] N79-33833
Health effects of low-level ionizing radiation
[LBL-9018] N79-33834
ISCHEMIA
Temporal relation between onset of cell anoxia and ischemic contractile failure
A79-52895

J

JOINTS (ANATOMY)
Passive resistive torques about long bone axes of major human joints
A79-52283

L

LABYRINTH
Effect of restricted activity on vestibular function
N79-33802
LANDING SIMULATION
Manual landings in Category 3 conditions
A79-52055
Pilot performance during simulated approaches and landings made with various computer-generated visual glidepath indicators
A79-52276
LASER APPLICATIONS
The retinal resolving power measured by laser interference fringes
A79-54091
LASER DOPPLER VELOCIMETERS
Quantitative flow estimation with transcutaneous Doppler ultrasound
A79-51042
LASERS
Measurements in the laser irradiated eye
[AD-A069842] N79-33825
LEARNING
A comparison of verbal and visual imagery learning stategies: Their importance for instrumental technology
[AD-A069983] N79-32833
Human memory. A bibliography with abstracts
[NTIS/PS-79/0640/7] N79-33847
LIFE SPAN
Similarity in the number of lifespan heartbeats among non-hibernating homeothermic animals
A79-52281
LIGHT ADAPTATION
Effect of adaptation level on certain visual functions in man
A79-51328
Influence of light adaptation on dark adaptation time for pattern recognition tasks
[FB-31] N79-33835
LIGHT TRANSMISSION
Measurements in the laser irradiated eye
[AD-A069842] N79-33825
LIPID METABOLISM
Effects on lipid metabolism in man of some factors that simulate space flight conditions
N79-33794
LIPOPROTEINS
Effect of brief head-down position on parameters of carbohydrate metabolism and beta lipoprotein content of blood
N79-33797
LIVER
The effect of normobaric hyperoxia on brain and liver tissue respiration in albino rats with different resistances to hypoxia
A79-51113
LOW FREQUENCIES
The influence of low frequency vibration on pilot performance /as measured in a fixed base simulator/
A79-52326
LUMINANCE
Upper-velocity threshold for detection of movement
A79-52541
LUNG MORPHOLOGY
Radiographic comparison of human lung shape during normal gravity and weightlessness
A79-54269
LUNGS
Lung oxygen diffusibility and permeability in dogs of various ages under normal conditions and in cases of acute hypoxic hypoxia
A79-51114
The physiological role of surface-active substances in the lung
A79-51117
The role of lesser circulation hemodynamic changes in pulmonary gas exchange
A79-53066
Evidence for increased intrathoracic fluid volume in man at high altitude
A79-54266
LYMPH
Ultrastructure of lymph nodes of dogs exposed to long-term external gamma radiation
N79-33804

M

MAGNETIC FIELDS
The theory of the magnetocardiogram
A79-53533

MAGNETOCARDIOGRAPHY
Biomagnetic instrumentation and measurement A79-51043
Clinical magnetocardiography A79-51044
Non-invasive information on the P-R segment of the cardiac cycle - An assessment of the clinical potential of the electric and magnetic methods A79-51045
Theoretical foundations of cardiovascular processes --- Book A79-53531
The theory of the magnetocardiogram A79-53533

MAGNETOMETERS
Biomagnetic instrumentation and measurement A79-51043

MAMMALS
The visual cortex of normal and deprived monkeys A79-51174

MAN ENVIRONMENT INTERACTIONS
Shalit Perceptual Organization and Reduction Questionnaire (SPORQ). Report 2: Characteristics and reliability [FOA-C-55031-H6] N79-32836

MAN MACHINE SYSTEMS
Man and machine design for space flight A79-52696
Thoughts about man-machine interrelations in space flights applied to Spacelab missions [IAF PAPER 79-95] A79-53295
Human performance in time-shared verbal and tracking tasks [AD-A070275] N79-32831
Combined discrete network: Continuous control modeling of man-machine systems [AD-A071574] N79-32842
Models of human operators in vision dependent tasks [NASA-CP-2103] N79-33838
A survey of Applied Psychological Services' models of the human operator N79-33839
Visual performance modeling in the human operator simulator N79-33840
A brief overview of the theory and application of the optimal control model of the human operator N79-33841
SAINT: A combined simulation language for modeling man-machine systems N79-33842
Analysis of visual estimation of system state from arbitrary displays N79-33843
The role of cognitive switching in head-up displays --- to determine pilot ability to accurately extract information from either of two sources [NASA-CR-3137] N79-33851

MANEUVERS
Car driving as a cybernetic task [IZF-1979-6] N79-32838

MANNED SPACE FLIGHT
Aerospace highlights and potential medical applications --- in manned space flight A79-51027
Man and machine design for space flight A79-52696
Thoughts about man-machine interrelations in space flights applied to Spacelab missions [IAF PAPER 79-95] A79-53295

MANOMETERS
Analyses for noninvasive monitoring of arterial blood pressure by /I/ phono cuff-sphygmomanometry, for discrete measurements and /II/ arterial ultrasonic imaging, for continuous measurements A79-51037

MANUAL CONTROL
Mechanisms of the effects of vibration frequency, level and duration on continuous manual control performance A79-52327
A theoretical and experimental analysis of the outside world perception process [NLR-MP-78020-U] N79-32835

MATHEMATICAL LOGIC
Some of the problems involved in planning biological experiments N79-33805

MATHEMATICAL MODELS
Fundamentals of electrical processes in the electrophysiology of the heart A79-53532
Basic biomechanics equations for cardiovascular flow A79-53534
Estimation of rate constants in the Michaelis-Menten model [AD-A070360] N79-32824
A theoretical and experimental analysis of the outside world perception process [NLR-MP-78020-U] N79-32835
Analytical modelling of load-deflection behavior of intervertebral discs subjected to axial compression [AD-A071019] N79-33830
A general model for the transfer of vapour through clothed skin from liquid on and in clothing [AD-A071577] N79-33853

MEDICAL ELECTRONICS
The development of a digital video subtraction system for intravenous angiography A79-51033

MEDICAL EQUIPMENT
Noninvasive cardiovascular measurements --- Book A79-51026

MEDICAL SCIENCE
Signal processing in ultrasound --- for diagnostic medicine A79-51039

MEMBRANES
Energy transduction in Halobacterium halobium A79-53000

MEMORY
A comparison of verbal and visual imagery learning stategies: Their importance for instrumental technology [AD-A069983] N79-32833
Human memory. A bibliography with abstracts [NTIS/PS-79/0640/7] N79-33847

MENTAL PERFORMANCE
Human performance in time-shared verbal and tracking tasks [AD-A070275] N79-32831

METABOLISM
Studies of metabolism, function and mechanism of destruction of red cells [AD-A070240] N79-33828

MICHAELIS THEORY
Estimation of rate constants in the Michaelis-Menten model [AD-A070360] N79-32824

MICROBIOLOGY
Immunobiological reactivity of the body under hyperbaric and hypobaric conditions N79-33790

MICROORGANISMS
Minute tubular forms in soil A79-51698

MICROPROCESSORS
Non-invasive information on the P-R segment of the cardiac cycle - An assessment of the clinical potential of the electric and magnetic methods A79-51045

MICROWAVE EMISSION
Protection standards for microwave and radiofrequency radiations A79-52878

MICROWAVES
Metabolic and physical scaling in microwave/radiofrequency bioeffects studies [UR-3490-1561] N79-33831

MOTION PERCEPTION
Visual motion perception by intelligent systems A79-52691

MOTION SICKNESS
Third Symposium on Motion Sickness N79-33814

MUSCLES
Tremometry as a method of evaluating the functional state of the nervous system of a pilot A79-53065
Electrolyte composition of rat blood plasma and skeletal muscles after flight aboard the Cosmos-690 biosatellite N79-33795

MUSCULAR FATIGUE
Frequency and amplitude analysis of the EMG during exercise on the bicycle ergometer
A79-52022
Electrophysiological correlates of local muscular fatigue effects upon human visual reaction time
A79-52025

MUSCULAR FUNCTION
Effect of hypoxia on mechanical properties of hyperthyroid cat papillary muscle
A79-51111
The effect of microwave fields on muscle oxygen pressure and temperature in animals previously adapted to hypoxia
A79-51116
Development of adaptation to hypodynamics on rat and its readaptability to ambulatory life
[IAF PAPER 79-76] A79-53285

MYOCARDIAL INFARCTION
Computerized positron emission tomography /PET/ for the assessment of myocardial integrity
A79-51031

MYOCARDIUM
Effect of hypoxia on mechanical properties of hyperthyroid cat papillary muscle
A79-51111
Temporal relation between onset of cell anoxia and ischemic contractile failure
A79-52895
Oxygen delivery in the hypoxic perfused heart: Relation to functional and metabolic changes
N79-32825

N

NERVES
Effects of acute noise traumata on whole-nerve and single-unit activity
[IZF-1978-23] N79-32829

NERVOUS SYSTEM
Tremometry as a method of evaluating the functional state of the nervous system of a pilot
A79-53065

NEUROPHYSIOLOGY
The visual cortex of normal and deprived monkeys
A79-51174
Some neurochemical characteristics of rats after space flight in the Cosmos-936 satellite
A79-52475
Experimental and theoretical investigations concerning a frequency filter behavior of the human retina regarding electric pulse currents
[NASA-TM-75372] N79-33822

NOISE INJURIES
Effects of acute noise traumata on whole-nerve and single-unit activity
[IZF-1978-23] N79-32829

NOISE POLLUTION
Tentative evaluation of annoyance caused by noise from gunfire
[IZF-1978-21] N79-32843

NONLINEAR OPTICS
Nonlinear perception of infrared radiation in the 800-1355 nm range with human eye
A79-53163

NUCLEAR ENERGY
Effects on populations of exposure to low levels of ionizing radiation: Implications for nuclear energy and medical radiation
[LBL-9084] N79-33833

O

OCEAN SURFACE
Minimum sea surface temperatures and associated survival times
[AD-A070162] N79-33824

OPERATOR PERFORMANCE
Models of human operators in vision dependent tasks
[NASA-CP-2103] N79-33838
A survey of Applied Psychological Services' models of the human operator
N79-33839
Visual performance modeling in the human operator simulator
N79-33840
A brief overview of the theory and application of the optimal control model of the human operator
N79-33841
Analysis of visual estimation of system state from arbitrary displays
N79-33843

OPERATORS (PERSONNEL)
The use of artificial signals during SONAR-watch
[IZF-1978-25] N79-32837

OPHTHALMOLOGY
The retinal resolving power measured by laser interference fringes
A79-54091

OPTICAL MEASURING INSTRUMENTS
Lightweight helmet-mounted eye movement measurement system
A79-53516

OPTIMAL CONTROL
Performance and workload analysis of inflight helicopter missions
[NLR-MP-77013-U] N79-32834
A brief overview of the theory and application of the optimal control model of the human operator
N79-33841

OPTIMIZATION
Adaptive optimization of exchange of gases in plants in a sealed phytotron
N79-33806

ORBITAL SPACE STATIONS
Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/
A79-53486

ORGANS
Intensity of DNA synthesis in animal organs after flight aboard the Cosmos-782 biosatellite
N79-33796

ORIENTATION
Vertical orientation of man during 5-day antiorthostatic hypokinesia (-4, -8 and -12 deg head down position)
N79-33810

ORTHOSTATIC TOLERANCE
A new application of LBNP to measure orthostatic tolerance before and after 0-G simulation /water immersion/
[IAF PAPER 79-87] A79-53290
Control of vertical position after flights aboard the Salyut-4 orbital station
N79-33793
Effect of hydrostatic factor on orthostatic stability and physical fitness of man during 60-day antiorthostatic hypokinesia
N79-33809

OTOLARYNGOLOGY
Medical barofunction testing of aviators with otorhinolaryngologic disease
A79-52285

OXIDATION
Evaluation of oxidizability of air in closed areas
N79-33808

OXYGEN
Application of an isolated heart model to investigate blood-oxygen delivery
A79-51112

OXYGEN CONSUMPTION
The effect of normobaric hyperoxia on brain and liver tissue respiration in albino rats with different resistances to hypoxia
A79-51113
Lung oxygen diffusibility and permeability in dogs of various ages under normal conditions and in cases of acute hypoxic hypoxia
A79-51114
Frequency and amplitude analysis of the EMG during exercise on the bicycle ergometer
A79-52022
Time course of O2-pulse during various tests of aerobic power
A79-52024
Oxygen delivery in the hypoxic perfused heart: Relation to functional and metabolic changes
N79-32825

OXYGEN METABOLISM
The metabolic demand and oxygen supply of the heart - Physiologic and clinical considerations
A79-52894
Oxygen delivery in the hypoxic perfused heart: Relation to functional and metabolic changes
N79-32825

OXYGEN TENSION
The effect of microwave fields on muscle oxygen pressure and temperature in animals previously adapted to hypoxia
A79-51116

OXYGENATION
Evaluation of oxidizability of air in closed areas
N79-33808

OXYHEMOGLOBIN
Application of an isolated heart model to investigate blood-oxygen delivery
A79-51112

P

PARALLAX
A comparison of oculomotor and motion parallax cues of egocentric distance
A79-54253

PARANASAL SINUSES
Medical barofunction testing of aviators with otorhinolaryngologic disease
A79-52285

PATHOGENESIS
Third Symposium on Motion Sickness
N79-33814

PATHOLOGICAL EFFECTS
Effect of impact accelerations on chemical resistance of rat erythrocytes
N79-33811

PATTERN RECOGNITION
Influence of light adaptation on dark adaptation time for pattern recognition tasks
[FB-31] N79-33835

PENETRATION
A general model for the transfer of vapour through clothed skin from liquid on and in clothing
[AD-A071577] N79-33853

PERFORMANCE PREDICTION
Performance and workload analysis of inflight helicopter missions
[NLR-MP-77013-U] N79-32834

PERIPHERAL VISION
Technique for simulating G-induced tunnel vision
A79-52286

PERSONNEL SELECTION
Male and female characteristics in vestibular testing - A step toward the selection of the best participants for space flight
[IAF PAPER 79-80] A79-53288
Preliminary selection of candidates for space flights
[IAF PAPER 79-83] A79-53289
Selection, training, and health care of working specialists for Shuttle/Spacelab and future space station missions
[IAF PAPER 79-99] A79-53297

PERSPIRATION
Influence of skin temperature on sweating and aerobic performance during severe work
A79-54268

PH
Quality of water reclaimed from urine as related to pH of initial product
N79-33807

PHOTOPEAK
Reciprocal interaction between the photopic and scotopic systems of the visual analyzer in man
A79-51327

PHOTOSENSITIVITY
Nonlinear perception of infrared radiation in the 800-1355 nm range with human eye
A79-53163

PHOTOSYNTHESIS
Adaptive optimization of exchange of gases in plants in a sealed phytotron
N79-33806

PHYSICAL EXAMINATIONS
Automatic audiometry in the practice of flight-personnel examination
A79-51084

PHYSICAL EXERCISE
Frequency and amplitude analysis of the EMG during exercise on the bicycle ergometer
A79-52022
Metabolic adrenergic changes during submaximal exercise and in the recovery period in man
A79-54267

PHYSICAL FITNESS
Effect of hydrostatic factor on orthostatic stability and physical fitness of man during 60-day antiorthostatic hypokinesia
N79-33809
The relationship between aerobic fitness and cardiovascular risk factors in the Canadian forces
[AD-A069865] N79-33829

PHYSICAL WORK
Influence of skin temperature on sweating and aerobic performance during severe work
A79-54268

PHYSIOCHEMISTRY
Metabolic adrenergic changes during submaximal exercise and in the recovery period in man
A79-54267

PHYSIOLOGICAL EFFECTS
Comparison of physiological effects of head-down tilting and immersion on the human body
A79-52279
Composition of cerebral fluids in goats adapted to high altitude
[AD-A070142] N79-33788
Space Biology and Aerospace Medicine, no. 4, 1979
[JPRS-74330] N79-33789
Control of vertical position after flights aboard the Salyut-4 orbital station
N79-33793
Electrolyte composition of rat blood plasma and skeletal muscles after flight aboard the Cosmos-690 biosatellite
N79-33795
Influence of pressure chamber conditions on adrenocortical function in man (according to results of assaying blood plasma 11-hydroxycorticosteroids)
N79-33798
Distinctions of influence of the reticular formation of the midbrain on the heart and respiration with exposure to centripetal accelerations
N79-33800
Significance of the vibration component to the deleterious effect of impact accelerations
N79-33801
Effect of restricted activity on vestibular function
N79-33802
Fundamental biophysical aspects of decompression sickness
[AD-A069998] N79-33827
Optimal methods for physiologic research on clothing
[AD-A071855] N79-33852

PHYSIOLOGICAL FACTORS
Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/
A79-53486

PHYSIOLOGICAL RESPONSES
The effect of normobaric hyperoxia on brain and liver tissue respiration in albino rats with different resistances to hypoxia
A79-51113
The physiological role of surface-active substances in the lung
A79-51117
Early cardiovascular adaptation to zero gravity simulated by head-down tilt
[IAF PAPER 79-77] A79-53286
Ultrastructural development of the vestibular system of frog larvae in 0g simulation
[IAF PAPER 79-78] A79-53287
Eye torsion in response to a tilted visual stimulus
A79-54254
Blood coagulation and tissular factors of blood clotting in heparinized rabbits submitted to hypokinesia
N79-33813

PHYSIOLOGICAL TESTS
Lung oxygen diffusibility and permeability in dogs of various ages under normal conditions and in cases of acute hypoxic hypoxia
A79-51114
The effect of the reduction of inspired gas density on external respiration
A79-51115
A cinematographic technique for investigating some aspects of visual recognition
A79-53067

Continuous long-duration recording of the heart rate by means of a noncontact technique A79-53068
Changes in critical duration during dark-adaptation A79-54252
Effects of acute noise traumata on whole-nerve and single-unit activity [IZF-1978-23] N79-32829
Effects of amphetamine on response selection and response execution processes in choice reaction tasks [IZF-1978-8] N79-32839

PHYTOTRONS
Adaptive optimization of exchange of gases in plants in a sealed phytotron N79-33806

PILOT PERFORMANCE
Advanced transport operation effects on pilot scan patterns A79-51098
Technique for simulating G-induced tunnel vision A79-52286
The influence of low frequency vibration on pilot performance /as measured in a fixed base simulator/ A79-52326
Lightweight helmet-mounted eye movement measurement system A79-53516
Pilot performance in simulated aerial refueling as a function of tanker model complexity and visual display field-of-view [AD-A070231] N79-32832
Performance and workload analysis of inflight helicopter missions [NLR-MP-77013-U] N79-32834
Undergraduate pilot training: Visual discrimination pretraining for land task [AD-A068141] N79-33844
The role of cognitive switching in head-up displays --- to determine pilot ability to accurately extract information from either of two sources [NASA-CR-3137] N79-33851

PILOT SELECTION
Medical barofunction testing of aviators with otorhinolaryngologic disease A79-52285

PILOT TRAINING
Pilot performance during simulated approaches and landings made with various computer-generated visual glidepath indicators A79-52276
Undergraduate pilot training: Visual discrimination pretraining for land task [AD-A068141] N79-33844

PILOTS (PERSONNEL)
Tremometry as a method of evaluating the functional state of the nervous system of a pilot A79-53065

PLANETARY ENVIRONMENTS
Publications of the planetary biology program for 1978: A special bibliography [NASA-TM-80745] N79-33854

PLANNING
Some of the problems involved in planning biological experiments N79-33805

PLANTS (BOTANY)
Adaptive optimization of exchange of gases in plants in a sealed phytotron N79-33806

POLYSACCHARIDES
Attachment to autoclaved soil of bacterial cells from pure cultures of soil isolates A79-51701

PORTABLE LIFE SUPPORT SYSTEMS
Microbiological evaluation of the mobile biological isolator system [NASA-CR-162293] N79-32822

POSTURE
Control of vertical position after flights aboard the Salyut-4 orbital station N79-33793

PRESSURE BREATHING
Hyperbaric oxygenation. A bibliography with abstracts [NTIS/PS-79/0744/7] N79-33837

PRESSURE CHAMBERS
Energy expenditures of man during long exposure to a periodically changing atmosphere N79-33799

PRESSURE EFFECTS
Influence of pressure chamber conditions on adrenocortical function in man (according to results of assaying blood plasma 11-hydroxycorticosteroids) N79-33798
Energy expenditures of man during long exposure to a periodically changing atmosphere N79-33799

PRESSURE MEASUREMENTS
Analyses for noninvasive monitoring of arterial blood pressure by /I/ phono cuff-sphygmomanometry, for discrete measurements and /II/ arterial ultrasonic imaging, for continuous measurements A79-51037
A new noninvasive technique for cardiac pressure measurement. II Scattering from encapsulated bubbles A79-51038

PRESSURE SUITS
Evolution of space suit technology [IAF PAPER 79-92] A79-53293
Microbiological evaluation of the mobile biological isolator system [NASA-CR-162293] N79-32822

PROBLEM SOLVING
Some of the problems involved in planning biological experiments N79-33805

PROTECTIVE CLOTHING
Bioassay of thermal protection afforded by candidate flight suit fabrics A79-52280
Cold water survival suits for aircrew A79-52282
Optimal methods for physiologic research on clothing [AD-A071855] N79-33852

PROTEINS
Energy transduction in Halobacterium halobium A79-53000

PROTOPLASM
Ultrastructural development of the vestibular system under conditions of simulated weightlessness A79-52284

PSYCHOLOGICAL FACTORS
Psychological training - One of the most important factors of enhancing the safety of space flights [IAF PAPER 79-A-24] A79-53426

PSYCHOLOGICAL TESTS
Shalit Perceptual Organization and Reduction Questionnaire (SPORQ). Report 2: Characteristics and reliability [FOA-C-55031-H6] N79-32836

PULMONARY FUNCTIONS
Evidence for increased intrathoracic fluid volume in man at high altitude A79-54266

PULSE DURATION
Changes in critical duration during dark-adaptation A79-54252

PURSUIT TRACKING
Mechanisms of the effects of vibration frequency, level and duration on continuous manual control performance A79-52327
Optokinetic reactions in man elicited by localized retinal motion stimuli A79-54251

Q

QUANTITATIVE ANALYSIS
Computer quantitation of angiocardiographic images A79-51028

R

RADIATION DAMAGE
Role of n-aminobenzoic acid in repairing UV and gamma radiation damage A79-53211

Ultrastructure of lymph nodes of dogs exposed to long-term external gamma radiation N79-33804

RADIATION DOSAGE
Metabolic and physical scaling in microwave/radiofrequency bioeffects studies [UR-3490-1561] N79-33831
Health effects of low-level ionizing radiation [LBL-9018] N79-33834

RADIATION EFFECTS
Space Biology and Aerospace Medicine, no. 4, 1979 [JPRS-74330] N79-33789
Ultrastructure of lymph nodes of dogs exposed to long-term external gamma radiation N79-33804
Biological effects of nonionizing electromagnetic radiation, volume 3, number 4 [AD-A070242] N79-33826

RADIATION HAZARDS
Protection standards for microwave and radiofrequency radiations A79-52878

RADIATION MEASUREMENT
Review of unfolding methods used in the US and their standardization for dosimetry [BNWL-SA-6503] N79-32828

RADIATION MEDICINE
Computerized positron emission tomography /PET/ for the assessment of myocardial integrity A79-51031

RADIATION PROTECTION
Protection standards for microwave and radiofrequency radiations A79-52878

RADIATION SPECTRA
Review of unfolding methods used in the US and their standardization for dosimetry [BNWL-SA-6503] N79-32828

RADIO EMISSION
Protection standards for microwave and radiofrequency radiations A79-52878

RADIO PROBING
Computerized positron emission tomography /PET/ for the assessment of myocardial integrity A79-51031

RADIOBIOLOGY
Role of n-aminobenzoic acid in repairing UV and gamma radiation damage A79-53211

RADIOGRAPHY
Iodine imaging using spectral analysis --- radiography for visualization of small blood vessels A79-51034
Radiographic comparison of human lung shape during normal gravity and weightlessness A79-54269

RATES (PER TIME)
Estimation of rate constants in the Michaelis-Menten model [AD-A070360] N79-32824

REACTION KINETICS
Estimation of rate constants in the Michaelis-Menten model [AD-A070360] N79-32824

REACTION TIME
Electrophysiological correlates of local muscular fatigue effects upon human visual reaction time A79-52025
Target redundancy in visual search - Do repetitions of the target within the display impair processing A79-52540

REPETITION
Target redundancy in visual search - Do repetitions of the target within the display impair processing A79-52540

RESPIRATION
The effect of the reduction of inspired gas density on external respiration A79-51115
Influence of skin temperature on sweating and aerobic performance during severe work A79-54268
Energy expenditures of man during long exposure to a periodically changing atmosphere N79-33799
External respiration and gas exchange reactions of man during rotation on a short-arm centrifuge N79-33812

RESPIRATORY PHYSIOLOGY
The physiological role of surface-active substances in the lung A79-51117
Time course of O2-pulse during various tests of aerobic power A79-52024
The role of lesser circulation hemodynamic changes in pulmonary gas exchange A79-53066

RESPONSES
Effects of amphetamine on response selection and response execution processes in choice reaction tasks [IZF-1978-8] N79-32839

RETENTION (PSYCHOLOGY)
A comparison of verbal and visual imagery learning stategies: Their importance for instrumental technology [AD-A069983] N79-32833

RETINA
Orientation relative to the retina determines perceptual organization A79-52539
Experimental and theoretical investigations concerning a frequency filter behavior of the human retina regarding electric pulse currents [NASA-TM-75372] N79-33822

RETINAL IMAGES
Optokinetic reactions in man elicited by localized retinal motion stimuli A79-54251

RHEOMETERS
Possibilities and perspectives of tetrapolar transthoracic impedance rheophethysmography in noninvasive studies of hemo- and cardiodynamics A79-51118

RISK
The relationship between aerobic fitness and cardiovascular risk factors in the Canadian forces [AD-A069865] N79-33829

ROTATION
External respiration and gas exchange reactions of man during rotation on a short-arm centrifuge N79-33812

S

SACCADIC EYE MOVEMENTS
Upper-velocity threshold for detection of movement A79-52541

SAFETY MANAGEMENT
Protection standards for microwave and radiofrequency radiations A79-52878

SALYUT SPACE STATION
Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/ A79-53486
Studies of venous circulation in the crew of the Salyut-5 orbital station N79-33791
Fluid-electrolyte metabolism in the crew of Salyut-4 N79-33792
Control of vertical position after flights aboard the Salyut-4 orbital station N79-33793

SCENE ANALYSIS
Visual motion perception by intelligent systems A79-52691

SCORING
Development of an objective grading system along with procedures and aids for its effective implementation in flight [AD-A071106] N79-33846

SCRUBBERS
Spacelab scrubber analysis and test support [NASA-CR-161309] N79-33849

SEASAT PROGRAM
Aerospace highlights and potential medical applications --- in manned space flight A79-51027

SENSORIMOTOR PERFORMANCE
Electrophysiological correlates of local muscular fatigue effects upon human visual reaction time A79-52025

A theoretical and experimental analysis of the outside world perception process
[NLR-MP-78020-U] N79-32835

SENSORY DEPRIVATION
The visual cortex of normal and deprived monkeys
A79-51174

SEX FACTOR
Male and female characteristics in vestibular testing - A step toward the selection of the best participants for space flight
[IAF PAPER 79-80] A79-53288
A new application of LBNP to measure orthostatic tolerance before and after O-G simulation /water immersion/
[IAF PAPER 79-87] A79-53290

SIGNAL DETECTION
The use of artificial signals during SONAR-watch
[IZF-1978-25] N79-32837

SIGNAL PROCESSING
Signal processing in ultrasound --- for diagnostic medicine
A79-51039

SIMULATORS
Visual performance modeling in the human operator simulator
N79-33840

SITTING POSITION
Effect of brief head-down position on parameters of carbohydrate metabolism and beta lipoprotein content of blood
N79-33797
Vertical orientation of man during 5-day antiorthostatic hypokinesia (-4, -8 and -12 deg head down position)
N79-33810

SKIN TEMPERATURE (BIOLOGY)
Influence of skin temperature on sweating and aerobic performance during severe work
A79-54268

SLEEP
A nonlinear mapping approach to discrimination of sleep stages from the human electroencephalogram
N79-33817

SODIUM
Plasma aldosterone, renin activity, and cortisol responses to heat exposure in sodium depleted and repleted subjects
A79-52023

SOIL SCIENCE
Minute tubular forms in soil
A79-51698
Attachment to autoclaved soil of bacterial cells from pure cultures of soil isolates
A79-51701

SONAR
The use of artificial signals during SONAR-watch
[IZF-1978-25] N79-32837

SPACE ENVIRONMENT SIMULATION
A new application of LBNP to measure orthostatic tolerance before and after O-G simulation /water immersion/
[IAF PAPER 79-87] A79-53290
Bioinstrumentation for evaluation of workload in payload specialists - Results of ASSESS II
[IAF PAPER 79-88] A79-53291

SPACE FLIGHT FEEDING
Food and waste management biotechnology for the space shuttle
[IAF PAPER 79-93] A79-53294

SPACE FLIGHT STRESS
Some neurochemical characteristics of rats after space flight in the Cosmos-936 satellite
A79-52475
Psychological training - One of the most important factors of enhancing the safety of space flights
[IAF PAPER 79-A-24] A79-53426
Space Biology and Aerospace Medicine, no. 4, 1979
[JPRS-74330] N79-33789
Studies of venous circulation in the crew of the Salyut-5 orbital station
N79-33791
Effects on lipid metabolism in man of some factors that simulate space flight conditions
N79-33794
Intensity of DNA synthesis in animal organs after flight aboard the Cosmos-782 biosatellite
N79-33796

SPACE PERCEPTION
A comparison of oculomotor and motion parallax cues of egocentric distance
A79-54253

SPACE SHUTTLE ORBITERS
Food and waste management biotechnology for the space shuttle
[IAF PAPER 79-93] A79-53294
Selection, training, and health care of working specialists for Shuttle/Spacelab and future space station missions
[IAF PAPER 79-99] A79-53297

SPACE SHUTTLES
A system for sterilizing objects --- such as water systems on the space shuttle using ethylene oxide
[NASA-CASE-KSC-11085-1] N79-33848

SPACE SUITS
Evolution of space suit technology
[IAF PAPER 79-92] A79-53293

SPACECRAFT CONTAMINATION
Spacelab scrubber analysis and test support
[NASA-CR-161309] N79-33849

SPACECRAFT DESIGN
Man and machine design for space flight
A79-52696

SPACECRAFT STERILIZATION
A system for sterilizing objects --- such as water systems on the space shuttle using ethylene oxide
[NASA-CASE-KSC-11085-1] N79-33848

SPACECREWS
Selection, training, and health care of working specialists for Shuttle/Spacelab and future space station missions
[IAF PAPER 79-99] A79-53297
Considerations associated with the introduction of female crewmembers in spacecraft and space stations
[IAF PAPER 79-A-22] A79-53424
Communication problems of international crews
[IAF PAPER 79-A-23] A79-53425
Fluid-electrolyte metabolism in the crew of Salyut-4
N79-33792

SPACELAB
Bioinstrumentation for evaluation of workload in payload specialists - Results of ASSESS II
[IAF PAPER 79-88] A79-53291
Thoughts about man-machine interrelations in space flights applied to Spacelab missions
[IAF PAPER 79-95] A79-53295
Selection, training, and health care of working specialists for Shuttle/Spacelab and future space station missions
[IAF PAPER 79-99] A79-53297
Spacelab scrubber analysis and test support
[NASA-CR-161309] N79-33849

SPECTRUM ANALYSIS
Iodine imaging using spectral analysis --- radiography for visualization of small blood vessels
A79-51034

SPHYGMOGRAPHY
Analyses for noninvasive monitoring of arterial blood pressure by /I/ phono cuff-sphygmomanometry, for discrete measurements and /II/ arterial ultrasonic imaging, for continuous measurements
A79-51037

SPINAL CORD
Analytical modelling of load-deflection behavior of intervertebral discs subjected to axial compression
[AD-A071019] N79-33830

STANDARDIZATION
Review of unfolding methods used in the US and their standardization for dosimetry
[BNWL-SA-6503] N79-32828

STANDARDS
Protection standards for microwave and radiofrequency radiations
A79-52878

STORAGE TANKS
A system for sterilizing objects --- such as water systems on the space shuttle using ethylene oxide
[NASA-CASE-KSC-11085-1] N79-33848

STRESS (PHYSIOLOGY)
The causes of decrements in aircrew performance physiological changes produced by vibration and other environmental stresses and response of the cardiovascular system to vibration and combined stress [AD-A069952] N79-33845

STRUCTURAL DESIGN
Application of a structured decision process for proper inclusion of human resources in the design of a power unit support stand [AD-A069978] N79-32840

SUBMERGED BODIES
Minimum sea surface temperatures and associated survival times [AD-A070162] N79-33824

SUBMERGING
Comparison of physiological effects of head-down tilting and immersion on the human body A79-52279

SUBZERO TEMPERATURE
Bimodal relationship of human tremor and shivering on introduction to cold exposure A79-52278

SURGERY
Equipment for surgical interventions and childbirth in weightlessness [IAF PAPER 79-97] A79-53296

SURVIVAL
Minimum sea surface temperatures and associated survival times [AD-A070162] N79-33824

SURVIVAL EQUIPMENT
Cold water survival suits for aircrew A79-52282

SYSTEMS ANALYSIS
SAINT: A combined simulation language for modeling man-machine systems N79-33842

SYSTEMS ENGINEERING
Application of a structured decision process for proper inclusion of human resources in the design of a power unit support stand [AD-A069978] N79-32840

T

TARGET RECOGNITION
Target redundancy in visual search - Do repetitions of the target within the display impair processing A79-52540

TASK COMPLEXITY
Performance and workload analysis of inflight helicopter missions [NLR-MP-77013-U] N79-32834

TECHNOLOGY ASSESSMENT
Current status of cardiovascular imaging by transmission computed tomography A79-51032
Evolution of space suit technology [IAF PAPER 79-92] A79-53293

TERMINAL CONFIGURED VEHICLE PROGRAM
Advanced transport operation effects on pilot scan patterns A79-51098

THERMAL COMFORT
Bimodal relationship of human tremor and shivering on introduction to cold exposure A79-52278

THERMAL DEGRADATION
Effect of fiber and dye degradation products /FDP/ on burn wound healing A79-52277

THERMAL PROTECTION
Bioassay of thermal protection afforded by candidate flight suit fabrics A79-52280

THERMODYNAMIC EQUILIBRIUM
Equations on biotransport mechanisms A79-53535

THERMOREGULATION
Bimodal relationship of human tremor and shivering on introduction to cold exposure A79-52278
Bio-heat transfer processes, for human thermoregulatory and circulatory characteristics measurements A79-53536
Influence of skin temperature on sweating and aerobic performance during severe work A79-54268

THREE DIMENSIONAL MOTION
A spherical representation of a human body for visualizing movement A79-53096

THRESHOLDS (PERCEPTION)
Effect of adaptation level on certain visual functions in man A79-51328
Upper-velocity threshold for detection of movement A79-52541

THYROID GLAND
Effect of hypoxia on mechanical properties of hyperthyroid cat papillary muscle A79-51111

TIME LAG
Influence of light adaptation on dark adaptation time for pattern recognition tasks [PB-31] N79-33835

TISSUES (BIOLOGY)
Ultrasonic tissue characterization II [PB-296356/9] N79-33836

TOMOGRAPHY
Computerized positron emission tomography /PET/ for the assessment of myocardial integrity A79-51031
Current status of cardiovascular imaging by transmission computed tomography A79-51032

TORQUE
Passive resistive torques about long bone axes of major human joints A79-52283

TOXICITY
Mechanisms of oxygen toxicity at the cellular level [AD-A070026] N79-32823
Development of electrophysiological indices of neurological toxicity for organosphate pesticides and depressant drugs [AD-A070299] N79-33821

TRANSDUCERS
A study of noninvasive blood pressure measurement techniques A79-51036

TRANSPORT PROPERTIES
Equations on biotransport mechanisms A79-53535

TREMORS
Tremometry as a method of evaluating the functional state of the nervous system of a pilot A79-53065

U

U.S.S.R.
Methods for studying and criteria for evaluating the biological effects of electric fields of industrial frequency [CONF-780541-1] N79-32827

U.S.S.R. SPACE PROGRAM
Space Biology and Aerospace Medicine, no. 4, 1979 [JPRS-74330] N79-33789

ULTRAHIGH FREQUENCIES
The effect of microwave fields on muscle oxygen pressure and temperature in animals previously adapted to hypoxia A79-51116

ULTRASONIC TESTS
Signal processing in ultrasound --- for diagnostic medicine A79-51039
Quantitative flow estimation with transcutaneous Doppler ultrasound A79-51042
Ultrasonic tissue characterization II [PB-296356/9] N79-33836

ULTRASONICS
Analyses for noninvasive monitoring of arterial blood pressure by /I/ phono cuff-sphygmomanometry, for discrete measurements and /II/ arterial ultrasonic imaging, for continuous measurements A79-51037

ULTRAVIOLET RADIATION
Role of m-aminobenzoic acid in repairing UV and gamma radiation damage A79-53211

URINE
Quality of water reclaimed from urine as related to pH of initial product
N79-33807

V

VAPORS
A general model for the transfer of vapour through clothed skin from liquid on and in clothing
[AD-A071577] N79-33853

VASCULAR SYSTEM
Early cardiovascular adaptation to zero gravity simulated by head-down tilt
[IAF PAPER 79-77] A79-53286

VEINS
Studies of venous circulation in the crew of the Salyut-5 orbital station
N79-33791

VERBAL COMMUNICATION
Communication problems of international crews
[IAF PAPER 79-A-23] A79-53425

VERTEBRAE
Analytical modelling of load-deflection behavior of intervertebral discs subjected to axial compression
[AD-A071019] N79-33830

VERTICAL PERCEPTION
Vertical orientation of man during 5-day antiorthostatic hypokinesia (-4, -8 and -12 deg head down position)
N79-33810

VESTIBULAR NYSTAGMUS
Effect of restricted activity on vestibular function
N79-33802

VESTIBULAR TESTS
Male and female characteristics in vestibular testing - A step toward the selection of the best participants for space flight
[IAF PAPER 79-80] A79-53288

VESTIBULES
Ultrastructural development of the vestibular system under conditions of simulated weightlessness
A79-52284

Ultrastructural development of the vestibular system of frog larvae in 0g simulation
[IAF PAPER 79-78] A79-53287

VIBRATION EFFECTS
The influence of low frequency vibration on pilot performance /as measured in a fixed base simulator/
A79-52326

Mechanisms of the effects of vibration frequency, level and duration on continuous manual control performance
A79-52327

Significance of the vibration component to the deleterious effect of impact accelerations
N79-33801

VIBRATION SIMULATORS
The influence of low frequency vibration on pilot performance /as measured in a fixed base simulator/
A79-52326

Mechanisms of the effects of vibration frequency, level and duration on continuous manual control performance
A79-52327

VIDEO DATA
The development of a digital video subtraction system for intravenous angiography
A79-51033

VISION
The visual cortex of normal and deprived monkeys
A79-51174

VISUAL ACUITY
The retinal resolving power measured by laser interference fringes
A79-54091

VISUAL DISCRIMINATION
Upper-velocity threshold for detection of movement
A79-52541

Undergraduate pilot training: Visual discrimination pretraining for land task
[AD-A068141] N79-33844

The role of cognitive switching in head-up displays --- to determine pilot ability to accurately extract information from either of two sources
[NASA-CR-3137] N79-33851

VISUAL OBSERVATION
Advanced transport operation effects on pilot scan patterns
A79-51098

VISUAL PERCEPTION
Reciprocal interaction between the photopic and scotopic systems of the visual analyzer in man
A79-51327

Effect of adaptation level on certain visual functions in man
A79-51328

Orientation relative to the retina determines perceptual organization
A79-52539

Target redundancy in visual search - Do repetitions of the target within the display impair processing
A79-52540

Visual motion perception by intelligent systems
A79-52691

A cinematographic technique for investigating some aspects of visual recognition
A79-53067

Nonlinear perception of infrared radiation in the 800-1355 nm range with human eye
A79-53163

A theoretical and experimental analysis of the outside world perception process
[NLR-MP-78020-U] N79-32835

Analysis of visual estimation of system state from arbitrary displays
N79-33843

VISUAL STIMULI
Orientation relative to the retina determines perceptual organization
A79-52539

Optokinetic reactions in man elicited by localized retinal motion stimuli
A79-54251

A comparison of oculomotor and motion parallax cues of egocentric distance
A79-54253

Eye torsion in response to a tilted visual stimulus
A79-54254

Methods for localization of electrical sources in the human brain and applications to the visual system
N79-33815

VISUAL TASKS
A cinematographic technique for investigating some aspects of visual recognition
A79-53067

VITAMINS
Effect of rocking on absorption of some group B vitamins and ascorbic acid in the small intestine of dogs
N79-33803

W

WASTE DISPOSAL
Food and waste management biotechnology for the space shuttle
[IAF PAPER 79-93] A79-53294

WATER BALANCE
Fluid-electrolyte metabolism in the crew of Salyut-4
N79-33792

WATER QUALITY
Quality of water reclaimed from urine as related to pH of initial product
N79-33807

A system for sterilizing objects --- such as water systems on the space shuttle using ethylene oxide
[NASA-CASE-KSC-11085-1] N79-33848

WATER RECLAMATION
Quality of water reclaimed from urine as related to pH of initial product
N79-33807

WATER TEMPERATURE
Minimum sea surface temperatures and associated survival times
[AD-A070162] N79-33824

WEIGHTLESSNESS
Man and machine design for space flight
A79-52696

A new application of LBNP to measure orthostatic tolerance before and after 0-G simulation /water immersion/
[IAF PAPER 79-87] A79-53290
Equipment for surgical interventions and childbirth in weightlessness
[IAF PAPER 79-97] A79-53296
The biomedical implications of extended duration zero-g extravehicular activities
[IAF PAPER 79-ST-06] A79-53447
Radiographic comparison of human lung shape during normal gravity and weightlessness
A79-54269
Studies of venous circulation in the crew of the Salyut-5 orbital station
N79-33791
Effects on lipid metabolism in man of some factors that simulate space flight conditions
N79-33794

WEIGHTLESSNESS SIMULATION
Comparison of physiological effects of head-down tilting and immersion on the human body
A79-52279
Ultrastructural development of the vestibular system under conditions of simulated weightlessness
A79-52284
Early cardiovascular adaptation to zero gravity simulated by head-down tilt
[IAF PAPER 79-77] A79-53286
Ultrastructural development of the vestibular system of frog larvae in 0g simulation
[IAF PAPER 79-78] A79-53287

WORKLOADS (PSYCHOPHYSIOLOGY)
Bioinstrumentation for evaluation of workload in payload specialists - Results of ASSESS II
[IAF PAPER 79-88] A79-53291
Performance and workload analysis of inflight helicopter missions
[NLR-MP-77013-U] N79-32834

WOUND HEALING
Effect of fiber and dye degradation products /FDP/ on burn wound healing
A79-52277

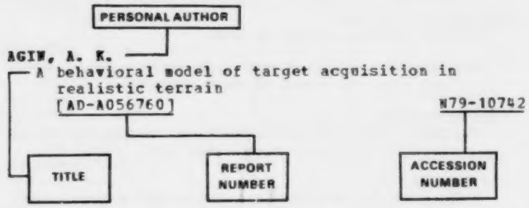
X

X RAY ANALYSIS
The development of a digital video subtraction system for intravenous angiography
A79-51033
Radiographic comparison of human lung shape during normal gravity and weightlessness
A79-54269

PERSONAL AUTHOR INDEX

AEROSPACE MEDICINE AND BIOLOGY / *A Continuing Bibliography (Suppl. 201)* JANUARY 1980

Typical Personal Author Index Listing



The title of the document is used to provide the user with a brief description of the subject matter. The NASA or AIAA accession number is included in each entry to assist the user in locating the abstract in the abstract section of this supplement. If applicable, a report number is also included as an aid in identifying the document.

A

ABE, H.
Development of adaptation to hypodynamics on rat and its readaptability to ambulatory life
[IAF PAPER 79-76] A79-53285
AGADZHANYAN, N. A.
Energy expenditures of man during long exposure to a periodically changing atmosphere
N79-33799
AGANEZOV, S. A.
The role of lesser circulation hemodynamic changes in pulmonary gas exchange
A79-53066
ALEKSANDROVA, E. A.
Comparison of physiological effects of head-down tilting and immersion on the human body
A79-52279
ALLEN, C. L.
The relationship between aerobic fitness and cardiovascular risk factors in the Canadian forces
[AD-A069865] N79-33829
ANASHKIN, O. D.
Effect of hydrostatic factor on orthostatic stability and physical fitness of man during 60-day antiorthostatic hypokinesia
N79-33809
ANDERSON, D. Z.
A new noninvasive technique for cardiac pressure measurement. II Scattering from encapsulated bubbles
A79-51038
ANGELL, J. B.
A study of noninvasive blood pressure measurement techniques
A79-51036
AUST, G.
Male and female characteristics in vestibular testing - A step toward the selection of the best participants for space flight
[IAF PAPER 79-80] A79-53288

B

BADLER, N. I.
A spherical representation of a human body for visualizing movement
A79-53096
BAKER, D. W.
Cardiac blood flow measurement - A component of the comprehensive cardiac examination
A79-51041
BALKWILL, D. L.
Attachment to autoclaved soil of bacterial cells from pure cultures of soil isolates
A79-51701
BARANOV, V. M.
Energy expenditures of man during long exposure to a periodically changing atmosphere
N79-33799
BARANSKI, S.
Preliminary selection of candidates for space flights
[IAF PAPER 79-83] A79-53289
BARER, A. S.
Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/
A79-53486
BARKER, N. D.
Application of an isolated heart model to investigate blood-oxygen delivery
A79-51112
BARLOW, C. H.
Temporal relation between onset of cell anoxia and ischemic contractile failure
A79-52895
BARNES, J. A.
Lightweight helmet-mounted eye movement measurement system
A79-53516
BEDNENKO, V. S.
Studies of venous circulation in the crew of the Salyut-5 orbital station
N79-33791
BELICH, A. I.
Continuous long-duration recording of the heart rate by means of a noncontact technique
A79-53068
BELLENKES, A. H.
The biomedical implications of extended duration zero-g extravehicular activities
[IAF PAPER 79-ST-06] A79-53447
BELYTSCHKO, T.
Refinement and validation of a three-dimensional head-spin model
[AD-A062502] N79-32826
BERBERICH, J. J.
Evidence for increased intrathoracic fluid volume in man at high altitude
A79-54266
BEREGOVOI, G. T.
Psychological training - One of the most important factors of enhancing the safety of space flights
[IAF PAPER 79-A-24] A79-53426
BEREZOVSKII, V. A.
The physiological role of surface-active substances in the lung
A79-51117
BERKOVICH, Y. A.
Adaptive optimization of exchange of gases in plants in a sealed phytotron
N79-33806
BESPALOVA, L. A.
Ultrastructure of lymph nodes of dogs exposed to long-term external gamma radiation
N79-33804
BIRK, J.
A new application of LBNP to measure orthostatic tolerance before and after 0-G simulation /water immersion/
[IAF PAPER 79-87] A79-53290
BLAAUW, G. J.
Car driving as a cybernetic task
[IZF-1979-6] N79-32838
BLANKENHORN, D. H.
Computer quantitation of coronary angiograms
A79-51030

BLOMQVIST, C. G.
Early cardiovascular adaptation to zero gravity simulated by head-down tilt
[IAF PAPER 79-77] A79-53286

BOKHOV, B. B.
Vertical orientation of man during 5-day antiorthostatic hypokinesia (-4, -8 and -12 deg head down position)
N79-33810

BOLSHOV, V. M.
Studies of venous circulation in the crew of the Salyut-5 orbital station
N79-33791

BORGER, H. J.
A new application of LBNP to measure orthostatic tolerance before and after 0-G simulation /water immersion/
[IAF PAPER 79-87] A79-53290

BRANDENBERGER, G.
Plasma aldosterone, renin activity, and cortisol responses to heat exposure in sodium depleted and repleted subjects
A79-52023

BRENNECKE, R.
Computer quantitation of angiocardiographic images
A79-51028

BRODY, W. R.
Current status of cardiovascular imaging by transmission computed tomography
A79-51032
Quantitative flow estimation with transcutaneous Doppler ultrasound
A79-51042

BROOKE, J. D.
Bimodal relationship of human tremor and shivering on introduction to cold exposure
A79-52278

BROWER, R. W.
Clinical usefulness of radiopaque markers in left ventricular function
A79-51029

BROWN, A. D.
Manual landings in Category 3 conditions
A79-52055

BROWN, J. L.
Changes in critical duration during dark-adaptation
A79-54252

BROWN, J. W.
Considerations associated with the introduction of female crewmembers in spacecraft and space stations
[IAF PAPER 79-A-22] A79-53424

BROWN, O. R.
Mechanisms of oxygen toxicity at the cellular level
[AD-A070026] N79-32823

BROWN, T. E.
The relationship between aerobic fitness and cardiovascular risk factors in the Canadian forces
[AD-A069865] N79-33829

BRYAN, C. J.
A system for sterilizing objects
[NASA-CASE-KSC-11085-1] N79-33848

BUERSCH, J. H.
Computer quantitation of angiocardiographic images
A79-51028

BUGLIARELLO, G.
Basic biomechanics equations for cardiovascular flow
A79-53534

BURNS, M. L.
Analytical modelling of load-deflection behavior of intervertebral discs subjected to axial compression
[AD-A071019] N79-33830

BYCHKOV, V. P.
Effects on lipid metabolism in man of some factors that simulate space flight conditions
N79-33794
Influence of pressure chamber conditions on adrenocortical function in man (according to results of assaying blood plasma 11-hydroxycorticosteroids)
N79-33798

BYSTROVA, A. G.
Third Symposium on Motion Sickness
N79-33814

C

CALVET, H.
Contribution to the theory of photopic vision: Retinal phenomena
[NASA-TM-75507] N79-33823

CAPP, M. P.
The development of a digital video subtraction system for intravenous angiography
A79-51033

CARBONE, D.
Real-time computerized fluoroscopic cardiac imaging
A79-51035

CASIDA, L. E., JR.
Minute tubular forms in soil
A79-51698
Attachment to autoclaved soil of bacterial cells from pure cultures of soil isolates
A79-51701

CHEREDNICHENKO, O. B.
Nonlinear perception of infrared radiation in the 800-1355 nm range with human eye
A79-53163

CHESTUKHIN, V. V.
Effect of brief head-down position on parameters of carbohydrate metabolism and beta lipoprotein content of blood
N79-33797

CHIGOLEV, V. V.
Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/
A79-53486

CHILDS, J. M.
Development of an objective grading system along with procedures and aids for its effective implementation in flight
[AD-A071106] N79-33846

CHILES, W. D.
Laboratory performance during acute intoxication and hangover
[AD-A069373] N79-33820

CHIZHOV, S. V.
Quality of water reclaimed from urine as related to pH of initial product
N79-33807

COHEN, J.
Studies of metabolism, function and mechanism of destruction of red cells
[AD-A070240] N79-33828

COLLEWIJN, H.
Optokinetic reactions in man elicited by localized retinal motion stimuli
A79-54251

COLLINS, W. E.
Effects of congener and noncongener alcoholic beverages on a clinical ataxia test battery
[AD-A069375] N79-33819
Laboratory performance during acute intoxication and hangover
[AD-A069373] N79-33820

CRUMMY, A.
Real-time computerized fluoroscopic cardiac imaging
A79-51035

CYMERMAN, A.
Evidence for increased intrathoracic fluid volume in man at high altitude
A79-54266

D

DANILOV, L. N.
The role of lesser circulation hemodynamic changes in pulmonary gas exchange
A79-53066

DARCEY, T. M.
Methods for localization of electrical sources in the human brain and applications to the visual system
N79-33815

DAVIES, C. T. M.
Influence of skin temperature on sweating and aerobic performance during severe work
A79-54268

DAVNICHENKO, L. S.
Role of m-aminobenzoic acid in repairing UV and gamma radiation damage
A79-53211

DAVYDOV, G. A.
Energy expenditures of man during long exposure to a periodically changing atmosphere
N79-33799

DAVYDOV, I. V.
Psychological training - One of the most important factors of enhancing the safety of space flights
[IAF PAPER 79-A-24] A79-53426

DE VRIES, H. A.
Time course of O2-pulse during various tests of aerobic power
A79-52024

DEGTIAR, U. N.
The effect of microwave fields on muscle oxygen pressure and temperature in animals previously adapted to hypoxia
A79-51116

DEGTYAREV, V. A.
Studies of venous circulation in the crew of the Salyut-5 orbital station
N79-33791

DELUCIEN, A. G.
Workload and the certification of helicopters for IFR operation
[AD-A072758] N79-33850

DEMIN, N. N.
Some neurochemical characteristics of rats after space flight in the Cosmos-936 satellite
A79-52475

DENNISTON, J. C.
Evidence for increased intrathoracic fluid volume in man at high altitude
A79-54266

DINNAR, U.
Bio-heat transfer processes, for human thermoregulatory and circulatory characteristics measurements
A79-53536

DMITRIEV, V. G.
Nonlinear perception of infrared radiation in the 800-1355 nm range with human eye
A79-53163

DOLOMAN, L. B.
Possibilities and perspectives of tetrapolar transthoracic impedance rheophethysmography in noninvasive studies of hemo- and cardiodynamics
A79-51118

DOROKHOVA, B. R.
Fluid-electrolyte metabclism in the crew of Salyut-4
N79-33792

DUBOIS, M. F. W.
Optokinetic reactions in man elicited by localized retinal motion stimuli
A79-54251

E

EARLES, J. A.
A comparison of verbal and visual imagery learning stategies: Their importance for instrumental technology
[AD-A069983] N79-32833

ECKERLEY, J. S.
A study of noninvasive blood pressure measurement techniques
A79-51036

EDWARDS, B. J.
Undergraduate pilot training: Visual discrimination pretraining for land task
[AD-A068141] N79-33844

ELIVANOV, V. A.
Significance of the vibration component to the deleterious effect of impact accelerations
N79-33801

ELKINS, W.
Evolution of space suit technology
[IAF PAPER 79-92] A79-53293

EMELIANOV, V. M.
Nonlinear perception of infrared radiation in the 800-1355 nm range with human eye
A79-53163

EMERY, J. C.
Medical barofunction testing of aviators with otorhinolaryngologic disease
A79-52285

ENGIN, A. E.
Passive resistive torques about long bone axes of major human joints
A79-52283

ERGUN, D. L.
Real-time computerized fluoroscopic cardiac imaging
A79-51035

ERIKSEN, B. A.
Target redundancy in visual search - Do repetitions of the target within the display impair processing
A79-52540

ERIKSEN, C. W.
Target redundancy in visual search - Do repetitions of the target within the display impair processing
A79-52540

EVANS, J. N.
The causes of decrements in aircrew performance physiological changes produced by vibration and other environmental stresses and response of the cardiovascular system to vibration and combined stress
[AD-A069952] N79-33845

F

FABRIKANT, J. I.
Effects on populations of exposure to low levels of ionizing radiation: Implications for nuclear energy and medical radiation
[LBL-9084] N79-33833
Health effects of low-level ionizing radiation
[LBL-9018] N79-33834

FARRELL, D.
Non-invasive information on the P-R segment of the cardiac cycle - An assessment of the clinical potential of the electric and magnetic methods
A79-51045

FAYTELBERG, R. P.
Effect of rocking on absorption of some group B vitamins and ascorbic acid in the small intestine of dogs
N79-33803

FENCL, V.
Composition of cerebral fluids in goats adapted to high altitude
[AD-A070142] N79-33788

FILIPENKOV, S. N.
Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/
A79-53486

FISCHER, E.
The role of cognitive switching in head-up displays
[NASA-CR-3137] N79-33851

FISHER, H. D.
The development of a digital video subtraction system for intravenous angiography
A79-51033

FLANDROIS, R.
Metabolic adrenergic changes during submaximal exercise and in the recovery period in man
A79-54267

FOLLENIUS, M.
Plasma aldosterone, renin activity, and cortisol responses to heat exposure in sodium depleted and repleted subjects
A79-52023

FORSTER, L. D.
Measurements in the laser irradiated eye
[AD-A069842] N79-33825

FOUDIN, L.
Mechanisms of oxygen toxicity at the cellular level
[AD-A070026] N79-32823

FRIEDMAN, P. J.
Radiographic comparison of human lung shape during normal gravity and weightlessness
A79-54269

FROST, M. M.
The development of a digital video subtraction system for intravenous angiography
A79-51033

FROWEIN, H. W.
Effects of amphetamine on response selection and response execution processes in choice reaction tasks
[IZF-1978-8] N79-32839

FURRY, D. E.
Medical barofunction testing of aviators with otorhinolaryngologic disease
A79-52285

G

GABEL, R. A.
Composition of cerebral fluids in goats adapted to high altitude
[AD-A070142] N79-33788

GAINER, P. A.
Analysis of visual estimation of system state from arbitrary displays
N79-33843

GAMMELL, P. M.
Signal processing in ultrasound
A79-51039

GAZENKO, O. G.
Some neurochemical characteristics of rats after space flight in the Cosmos-936 satellite
A79-52475
Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/
A79-53486

GEBHARDT, U.
A new application of LBNP to measure orthostatic tolerance before and after 0-G simulation /water immersion/
[IAF PAPER 79-87] A79-53290

GEORGIYEVSKIY, V. S.
Control of vertical position after flights aboard the Salyut-4 orbital station
N79-33793

GERZBERG, L.
Quantitative flow estimation with transcutaneous Doppler ultrasound
A79-51042

GHISTA, D. N.
Analyses for noninvasive monitoring of arterial blood pressure by /I/ phono cuff-sphygmomanometry, for discrete measurements and /II/ arterial ultrasonic imaging, for continuous measurements
A79-51037
Theoretical foundations of cardiovascular processes
A79-53531

GIEROWSKI, Z.
Preliminary selection of candidates for space flights
[IAF PAPER 79-83] A79-53289

GILLAM, B.
Orientation relative to the retina determines perceptual organization
A79-52539

GILLILAND, P.
Mechanisms of oxygen toxicity at the cellular level
[AD-A070026] N79-32823

GLADKIY, T. V.
Effect of rocking on absorption of some group B vitamins and ascorbic acid in the small intestine of dogs
N79-33803

GOGEL, W. C.
A comparison of oculomotor and motion parallax cues of egocentric distance
A79-54253

GOGOLEV, K. I.
Comparison of physiological effects of head-down tilting and immersion on the human body
A79-52279

GOLDMAN, R. F.
Optimal methods for physiologic research on clothing
[AD-A071855] N79-33852

GOLIKOVA, N. A.
Quality of water reclaimed from urine as related to pH of initial product
N79-33807

GOLOVKIN, L. G.
Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/
A79-53486

GOLOVKINA, O. L.
External respiration and gas exchange reactions of man during rotation on a short-arm centrifuge
N79-33812

GOODENOUGH, D. R.
Eye torsion in response to a tilted visual stimulus
A79-54254

GORCHAKOV, V. IU.
The physiological role of surface-active substances in the lung
A79-51117

GORDON, R. M.
Computer quantitation of coronary angiograms
A79-51030

GORGILADZE, G. I.
Effect of restricted activity on vestibular function
N79-33802

GOVORUKHA, T. N.
The effect of normobaric hyperoxia on brain and liver tissue respiration in albino rats with different resistances to hypoxia
A79-51113

GREEN, D. L.
Workload and the certification of helicopters for IFR operation
[AD-A072758] N79-33850

GRIFFIN, M. J.
Mechanisms of the effects of vibration frequency, level and duration on continuous manual control performance
A79-52327

GRIGORYEV, A. I.
Fluid-electrolyte metabolism in the crew of Salyut-4
N79-33792

PUBLIC COLLECTIONS OF NASA DOCUMENTS

DOMESTIC

NASA distributes its technical documents and bibliographic tools to ten special libraries located in the organizations listed below. Each library is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

CALIFORNIA
University of California, Berkeley
COLORADO
University of Colorado, Boulder
DISTRICT OF COLUMBIA
Library of Congress
GEORGIA
Georgia Institute of Technology, Atlanta
ILLINOIS
The John Crerar Library, Chicago
MASSACHUSETTS
Massachusetts Institute of Technology, Cambridge
MISSOURI
Linda Hall Library, Kansas City
NEW YORK
Columbia University, New York
PENNSYLVANIA
Carnegie Library of Pittsburgh
WASHINGTON
University of Washington, Seattle

NASA publications (those indicated by an "*" following the accession number) are also received by the following public and free libraries:

CALIFORNIA
Los Angeles Public Library
San Diego Public Library
COLORADO
Denver Public Library
CONNECTICUT
Hartford Public Library
MARYLAND
Enoch Pratt Free Library, Baltimore
MASSACHUSETTS
Boston Public Library
MICHIGAN
Detroit Public Library
MINNESOTA
Minneapolis Public Library
MISSOURI
Kansas City Public Library
St. Louis Public Library
NEW JERSEY
Trenton Public Library
NEW YORK
Brooklyn Public Library
Buffalo and Erie County Public Library
Rochester Public Library
New York Public Library
OHIO
Akron Public Library
Cincinnati Public Library
Cleveland Public Library
Dayton Public Library
Toledo Public Library
OKLAHOMA
Oklahoma County Libraries, Oklahoma City
TENNESSEE
Memphis Public Library
TEXAS
Dallas Public Library
Fort Worth Public Library
WASHINGTON
Seattle Public Library
WISCONSIN
Milwaukee Public Library

An extensive collection of NASA and NASA-sponsored documents and aerospace publications available to the public for reference purposes is maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 750 Third Avenue, New York, New York, 10017.

EUROPEAN

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. By virtue of arrangements other than with NASA, the British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols "#" and "*", from: ESRO/ELDO Space Documentation Service, European Space Research Organization, 114, av. Charles de Gaulle, 92-Neuilly-sur-Seine, France.

This bibliography was prepared by the NASA Scientific and Technical Information Facility operated for the National Aeronautics and Space Administration by Informatics Information Systems Company.

SPECIAL NOTICE

The abstract sections of the monthly supplements of *Aerospace Medicine and Biology* can be bound separately. Individual abstracts can be located readily by means of the page numbers given at each entry, e.g., p0239 N79-26762. To assist the user in binding Supplements SP-7011(190) through SP-7011(201), a title page is included in the back of this Cumulative index.

NASA SP-7011 (202)

A CUMULATIVE INDEX
TO
A CONTINUING BIBLIOGRAPHY ON

AEROSPACE MEDICINE
AND BIOLOGY

This Cumulative Index supersedes the indexes contained in supplements [SP-7011 (190) through SP-7011 (201)], published by NASA during 1979.

NASA Scientific and Technical Information Branch 1980
National Aeronautics and Space Administration
Washington, DC

This Index is available from the National Technical Information Service (NTIS), Springfield, Virginia 22161 for $11.00 domestic; $22.00 foreign.

INTRODUCTION

WHAT THIS CUMULATIVE INDEX IS

This publication is a cumulative index to the abstracts contained in NASA SP-7011(190) through NASA SP-7011(201) of *Aerospace Medicine and Biology: A Continuing Bibliography*. NASA SP-7011, by means of supplements, serves as a current abstracting and announcement journal for references on bioscience and biotechnology. It has been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronautics (AIAA), and the National Aeronautics and Space Administration (NASA). Entries prepared by the two contributing organizations are identified as follows:

1. NASA entries by their *STAR* accession numbers (N79-10000 series)
2. AIAA entries by their *IAA* accession numbers (A79-10000 series)

HOW THIS CUMULATIVE INDEX IS ORGANIZED

This Cumulative Index includes a subject index, a personal author index, and a corporate source index.

HOW TO USE THE SUBJECT INDEX

Two types of cross-references appear in the subject index:

1. Use (U) references indicate that the subject term is not "postable," i.e., not a valid term, and that the following term or terms are used instead. For example:

   DOSE
   U DOSAGE
   AIRLINERS
   U COMMERCIAL AIRCRAFT
   U PASSENGER AIRCRAFT

2. Narrower Term (NT) references refer the user to more specific headings in the same subject area, under which additional material on the subject may be found. For example:

   FATIGUE (BIOLOGY)
   NT AUDITORY FATIGUE
   NT FLIGHT FATIGUE
   NT MUSCULAR FATIGUE

In addition, a searcher may use the title or title and title extension in the index to narrow further his quest for particular items, this is because subject terms can readily include more than one class of document. For example:

BIOLOGICAL EFFECT
Vibratory force effect upon
biological systems, particularly
human organism.
Biological effect of cosmic and
solar radiations on human
body at high altitudes.

illustrates a case where two references on different topics are listed under the same subject term.

HOW TO USE THE PERSONAL AUTHOR INDEX

All personal authors used in the abstract-section citations in the individual Supplements appear in the index. Differences in translation schemes may require multiple searching of the index for variants of an author's name. For example:

EMELIANOV, M. D.
and
YEMELYANOV, M. D.

HOW TO USE THE CORPORATE SOURCE INDEX

The corporate source index entries are abridged versions of the corporate sources used in the abstract-section citations in the individual Supplements. The corporate source supplementary (organizational component) does not appear in the index. For example:

NEW MEXICO STATE UNIV., LAS CRUCES. DEPT. OF BIOLOGY.	(Source citation entry)
NEW MEXICO STATE UNIV., LAS CRUCES.	(Source index entry)

IDENTIFICATION OF DESIRED SUPPLEMENT

The abstract and descriptive cataloging for any accession number selected from the indexes may be found in the appropriate Supplement. The page-number range of each Supplement appears on the inside front cover of this index. Once the range of page numbers containing the selected accession number is located in the second column, the desired Supplement number will be found in the first column. For example:

Page 191 will be found in Supplement 196.

AVAILABILITY OF DOCUMENTS

Information concerning the availability of documents announced in *Aerospace Medicine and Biology* supplements is found in the introduction to the most currently issued monthly supplement.

TABLE OF CONTENTS

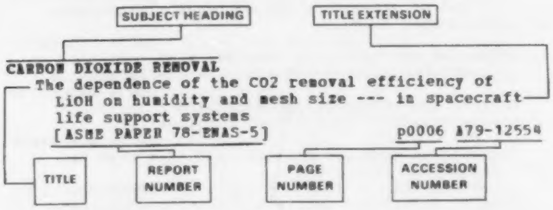
Page
Subject Index A-1
Personal Author Index B-1
Corporate Source Index C-1

SUBJECT INDEX

AEROSPACE MEDICINE AND BIOLOGY / *a continuing bibliography* JANUARY 1980

1979 Cumulative Index

Typical Subject Index Listing



SUBJECT HEADING
TITLE EXTENSION
CARBON DIOXIDE REMOVAL
The dependence of the CO2 removal efficiency of LiOH on humidity and mesh size --- in spacecraft life support systems
[ASME PAPER 78-ENAS-5] p0006 A79-12554
TITLE
REPORT NUMBER
PAGE NUMBER
ACCESSION NUMBER

The title is used to provide a description of the subject matter. When the title is insufficiently descriptive of the document content, a title extension is added, separated from the title by three hyphens. The NASA or AIAA accession number is included in each entry to assist the user in locating the abstract in the abstract section of this supplement. If applicable, a report number is also included as an aid in identifying the document.

A

A-7 AIRCRAFT
- A7 training effectiveness through performance analysis --- carrier landing instruction [AD-A056230] p0031 N79-11728

- The study of the origin of life - Results and prospects p0206 A79-37981
- The importance of the physical laws on the origin and evolution of life p0207 A79-37983
- A critical assessment of the origin of life p0207 A79-37985
- Inverse assimilation - A general principle of evolution of planetary surfaces p0207 A79-37989
- A proposal concerning the origin of life on the planet earth p0253 A79-45641
- Polymers produced by heating an amino acid mixture in sea water enriched with transition elements p0254 A79-46461
- Exobiology and the origin of life --- organic compounds in planetary atmospheres and interstellar matter [NASA-CR-157988] p0081 N79-14782

ABNORMALITIES
- NT PSYCHOSES

ABSORBENTS
- Molecular sieve oxygen generating system - The argon question /A brief review/ --- effects of 5 percent Ar in breathing gas p0274 A79-49994
- Human compatibility testing of a 2-man molecular sieve oxygen generator [AD-A058248] p0053 N79-12710
- Environmental test and evaluation of a molecular sieve on-board oxygen generation system [AD-A061531] p0125 N79-17559

ABSORBERS (EQUIPMENT)
- Electrochemically regenerable carbon dioxide absorber [NASA-CR-152099] p0262 N79-29794

ABSORPTION BANDS
- U ABSORPTION SPECTRA

ABSORPTION SPECTRA
- Photochemical transformations of the visual pigment rhodopsin p0181 A79-32319

ABSORPTION SPECTROSCOPY
- Iodine imaging using spectral analysis --- radiography for visualization of small blood vessels p0294 A79-51038

ABUNDANCE
- The evolution of the environment and its influence on the evolution of life

p0099 A79-22076
Abundance of organic compounds photochemically produced in the atmospheres of the Outer Planets
p0210 A79-39075

ACCELERATION (PHYSICS)
NT ANGULAR ACCELERATION
NT HIGH ACCELERATION
NT HIGH GRAVITY ENVIRONMENTS
NT IMPACT ACCELERATION
A numerical method of film analysis with differentiation --- curve fitting with harmonic analysis
p0061 A79-17585
Evaluation of assisted positive-pressure breathing on +Gz tolerance
p0266 A79-47336
Helmet weight simulator
[NASA-CASE-LAR-12320-1] p0223 N79-25761
Animal endurance to recurrent impact accelerations
p0246 N79-27833
Frequency response of cardiovascular regulation in canines to sinusoidal acceleration at frequencies below 1 Hz (basis for biodynamic modeling)
p0286 N79-31915
A head injury model
p0286 N79-31918

ACCELERATION STRESSES (PHYSIOLOGY)
NT CENTRIFUGING STRESS
Blood volume and cardiorespiratory responses to lower body negative pressure
p0010 A79-12864
Regional coronary blood flow at rest and during high sustained +Gz in a miniature swine with subclinical, ischemic, coronary heart disease due to coronary stenosis
p0010 A79-12865
Development of space biology experiments for the Space Shuttle - A student's perspective
[AAS PAPER 78-134] p0099 A79-21252
Cardiovascular regulatory response to lower body negative pressure following blood volume loss
p0101 A79-23470
Mitral prolapse and acceleration --- in aircraft pilots
p0103 A79-23951
Central and cerebral hemodynamics and metabolism of the healthy man during head-down tilting
p0127 A79-24634
Head acceleration and psychomotor performance --- related to crash accident survival rates
p0135 A79-27559
Cardiac responses of dogs to nonsynchronous and heart synchronous whole-body vibration
p0162 A79-29728
Oculogravic illusion in response to straight-ahead acceleration of a CF-104 aircraft
p0164 A79-30660
Cerebral accident subsequent to G-force loading - A case report
p0165 A79-30664
Positive pressure breathing as a protective technique in +Gz acceleration
p0201 A79-37132
Motion sickness in cats - A symptom rating scale used in laboratory and flight tests
p0202 A79-37711
Concurrent loss of consciousness and sino-atrial block during +Gz stress
p0202 A79-37714
Thermoregulation in unrestrained rats during and after exposure to 1.5-4 G
p0227 A79-41185
Determination of cerebral and neck subcutaneous tissue PO2 with 3 and 4 +Gz in M. mulatta
p0234 A79-43205
+Gz tolerance correlation with clinical parameters
p0235 A79-43213
Heat and acute dehydration effects on acceleration response
p0237 A79-43705
Reproducibility of +Gz tolerance testing
p0267 A79-47337
Modeling human tracking performance in a high G-stress environment
p0269 A79-48012
Functional anatomy of vertebral column with reference to load bearing areas
p0272 A79-49732
Biodynamics of aviation stresses on the vertebral column
p0272 A79-49733
Assessment of spinal disabilities in relation to flying
p0272 A79-49736
A new application of LBNP to measure orthostatic tolerance before and after 0-G simulation /water immersion/
[IAF PAPER 79-87] p0302 A79-53290
Cardiac arrhythmia following postimmersion +G sub z accelerations
p0015 N79-10710
A method of evaluating the pupillary reaction to vestibular stimuli
p0016 N79-10717
Effect of accelerations combined with radiation on occurrence of gene mutations in the drosophila
p0016 N79-10720
Medical qualification procedures for hazardous-duty aeromedical research
p0026 N79-11695
Engineering test and evaluation during high G. Volume 3: Anti-G suits
[AD-A059122] p0052 N79-12706
Role of vestibular system in behavior of animals submitted to prolonged slow rotation
p0074 N79-14734
Modeling the effects of high-G stress on pilots in a tracking task
p0087 N79-15593
Specialized physiological studies in support of manned space flight
[NASA-CR-151876] p0111 N79-16542
Stress factors on pilot performance. A bibliography with abstracts
[NTIS/PS-78/1289/4] p0145 N79-18589
Simulation of fluid-electrolyte metabolism as a means of preventing orthostatic instability in the crew of the second expedition aboard the Salyut-4 station
p0243 N79-27819
A lower body negative pressure box for +Gz simulation in the upright seated position
[AD-A069326] p0259 N79-28868
Third Symposium on Motion Sickness
p0313 N79-33814

ACCELERATION TOLERANCE
Relaxed +Gz tolerance in healthy men - Effect of age
p0067 A79-18956
Hemodynamic indices under orthostatic and vestibular effects
p0098 A79-20692
Incapacitation time for +Gz-induced loss of consciousness
p0102 A79-23475
Cardiac reactions in tests on the wearing of the Yankee Escape System harness during minus G accelerations in the z direction
p0103 A79-23953
Cardiorespiratory assessment of decongestant-antihistamine effects on altitude, +Gz, and fatigue tolerances
p0127 A79-24628
Tolerance of domestic fowl to high sustained +Gz
p0127 A79-24630
Effects of brief exposure of domestic fowl to very intense acceleration fields
p0127 A79-24631
Better definition of eye to aortic valve distance in high acceleration cockpit /HAC/ seating geometries
p0183 A79-33632
Pathophysiology of overloads: Bibliography of Soviet publications --- Russian book
p0200 A79-36385
Physiological effect of high, sustained +Gz forces on man
p0229 A79-41711
Prophylactic effects of intermittent acceleration against physiological deconditioning in simulated weightlessness
p0229 A79-41712
Influence of the ambient acceleration field upon acute acceleration tolerance in chickens
p0230 A79-41715
+Gz tolerance correlation with clinical parameters
p0235 A79-43213

Heat and acute dehydration effects on acceleration response p0237 A79-43705

Evaluation of assisted positive-pressure breathing on +Gz tolerance p0266 A79-47336

Delayed effects of alcohol ingestion on + Gz tolerance p0272 A79-49730

Effect of microwave radiation on the resistance of rats to transverse acceleration loading p0275 A79-50496

Modification of cardiac function by synchronized oscillating acceleration p0278 A79-50908

Technique for simulating G-induced tunnel vision p0299 A79-52286

An examination of statistical impact acceleration injury prediction models based on -Gx accelerator data from subhuman primates [AD-A057276] p0026 N79-11690

Molecular determinants for the prediction and survival of ischemic anoxic stress pathology p0027 N79-11700

Effect of age on relaxed +G sub z tolerance of aircrewmen p0030 N79-11719

Effects of hyperhydration on human endurance of orthostatic and LBNP tests p0072 N79-14721

Balance training of the equilibrium organ and its effect on flight strategy p0242 N79-27074

The effect of a reclined sitting position on psychomotor performance during exposure to high, sustained +Gsub z acceleration [FPRC-1362] p0248 N79-27856

The effect of acceleration and seat back angle on performance of a reaction time task [FPRC-1364] p0248 N79-27857

The influence of seat back angle on acceleration tolerance [FPRC-1365] p0248 N79-27858

A lower body negative pressure box for +Gz simulation in the upright seated position [AD-A069326] p0259 N79-28868

A subhuman primate restraint system [AD-A069607] p0279 N79-30915

Models and Analogues for the Evaluation of Human Biodynamic Response, Performance and Protection --- conferences, human tolerance of acceleration, vibration, and shock [AGARD-CP-253] p0284 N79-31901

Mathematical modeling of arterial oxygen saturation and eye-level blood pressure during +G sub Z stress p0286 N79-31916

Unsteady-state response of the vascular system to transient and sustained aerospace acceleration profiles p0286 N79-31917

Some human responses to repeated +G sub z pulses p0288 N79-31928

External respiration and gas exchange reactions of man during rotation on a short-arm centrifuge p0313 N79-33812

ACCIDENT INVESTIGATION
NT AIRCRAFT ACCIDENT INVESTIGATION

ACCIDENT PREVENTION
Investigation of techniques to reduce electrostatic discharge susceptibility of EFD's containing plastic plugs [AD-A059982] p0093 N79-15638

Three decades of USAF efforts to reduce human error accidents, 1947-1977 p0290 N79-31943

Human factors in production and prevention of aircraft accidents due to disorientation in flight p0291 N79-31952

ACCIDENT PRONENESS

p0041 A79-13998
Increasing pilot's performance capacity during flight through use of a control element serving as information carrier
[DGLR PAPER 78-152] p0042 A79-14097
Application of control theory to the investigation of roll motion effects on pilot control behavior
[AD-A054921] p0046 A79-14972
The man-computer division of tasks in the case of the control of complex technical systems --- applied to aircraft
p0061 A79-17683
Pilot performance during flight simulation with peripherally presented visual signals
p0063 A79-18213
Control logic design criteria for multifunction switching devices --- in aircraft
p0064 A79-18223
A comparison of kinesthetic-tactual and visual displays via a critical tracking task --- for aircraft control
p0162 A79-29720
Pilot workload during final approach in congested airspace
p0269 A79-48014
Prediction, evaluation, and specification of flying qualities by means of step target tracking
p0088 N79-15604
The determination of the operating range of a twin-grip control yoke through biomechanical means
p0089 N79-15609
Influences of joystick spring resistance on the execution of simple and complex positioning movements
p0119 N79-17517
AIRCRAFT DESIGN
NT HELICOPTER DESIGN
Factors that affect display size criteria in a cockpit display system
p0063 A79-18212
A trade-off analysis design tool: Aircraft interior noise-motion/passenger satisfaction model
p0112 N79-16549
The design of air combat aircraft
p0114 N79-16566
Ground attack
p0114 N79-16567
Contributions of psychophysiological techniques to aircraft design and other operational problems
[AGARD-AG-244] p0290 N79-31941
AIRCRAFT DETECTION
Predicting aircraft detectability
p0208 A79-38358
The limited range of the human eye for optical aircraft acquisition
p0291 N79-31948
Analyses of midair collisions in German airspace: Methodology and results
p0291 N79-31949
AIRCRAFT EQUIPMENT
NT EJECTION SEATS
Observer performance using a video display --- in simulated air to ground target acquisition tasks
p0039 A79-13217
Oxygen systems for Army helicopters
p0044 A79-14421
Human compatibility testing of a 2-man molecular sieve oxygen generator
[AD-A058248] p0053 N79-12710
Aircrew personnel restraint subsystems definition of deficiencies and requirements

[AD-A058995] p0053 N79-12711
US Navy development of an On-Board Oxygen Generation (OBOG) system
[AD-A063958] p0197 N79-24656

AIRCRAFT HAZARDS
Biodynamic effects of canopy loss in the TF-15 aircraft
p0163 A79-30651
Detection of conflict states in air traffic control of airport zones
p0166 A79-31181
Aviation and radiation hazards
p0271 A79-49727

AIRCRAFT INSTRUMENTS
NT APPROACH INDICATORS
NT AUTOMATIC PILOTS
Contrast enhancement using local area brightness and gain control --- of airborne CRT display
p0037 A79-13199
Four years of color research for visual displays --- human performance consideration for use in aircraft
p0039 A79-13210
Response surface methodology as a manipulator of complex task difficulty --- for computer generated aircraft area navigation control-display systems evaluation
p0039 A79-13211
Transfer of a computer-assisted instrument procedures trainer to flight
p0039 A79-13216
Arrangement of aircraft flight indicators with the help of optimal theoretical models for man as the controller
[DGLR PAPER 78-149] p0042 A79-14094

AIRCRAFT LANDING
NT CRASH LANDING
Flight management research utilizing an oculometer --- pilot scanning behavior during simulated approach and landing
p0001 A79-10389
The effects of prediction, quickening, frequency separation, and percent of pursuit in perspective displays for low-visibility landing
p0063 A79-18210
An investigation of pictorial and symbolic aircraft displays for landing
p0063 A79-18211
Transfer of landing skill after training with supplementary visual cues
p0138 A79-28167
A7 training effectiveness through performance analysis --- carrier landing instruction
[AD-A056230] p0031 N79-11728
Undergraduate pilot training: Visual discrimination pretraining for land task
[AD-A068141] p0317 N79-33844

AIRCRAFT MAINTENANCE
Life cycle costing of simulated vs actual equipment for intermediate maintenance training --- for F-16 avionics
p0064 A79-18217

AIRCRAFT MANEUVERS
An Air Combat Effectiveness Study /ACES/ program
p0040 A79-13222
Development of automated performance measures for introductory air combat maneuvers
p0040 A79-13223
A study of progress in flying performance revealed from daily check sheets in a primary flight training course. III - Comparison of progress between two courses
p0134 A79-27119
Predictive validity of flight simulators as a function of simulator motion
p0181 A79-32627
Measurements of pilot workload during low altitude and high speed maneuvers of F-1 supersonic jet fighter
p0209 A79-38821
RNAV procedural turn anticipation techniques experiment no. 2, GAT-2A. Phase 3: 2 and 4 nmi offset tracking procedures
[AD-A060501] p0085 N79-15583
Flight experience with manually controlled unconventional aircraft motions
p0088 N79-15602
Prediction of pilot reserve attention capacity during air-to-air target tracking
p0116 N79-17488
Changes in the rotary wing aviator's ability to perform an uncommon low altitude rearward hover maneuver as a function of extended flight requirements and aviator fatigue
p0150 N79-19623
Visual effects of helicopter maneuvre on weapon aiming performance
p0150 N79-19626
Oculomotor performance of aviators during an autorotation maneuver in a helicopter simulator
p0151 N79-19638
The relationship between Air Combat Maneuvering Range (ACMR) output measures and initial visual acquisition performance
[AD-A062134] p0173 N79-20744
Estimation of aircraft target motion using pattern recognition orientation measurements
p0177 N79-21764
A study of pilot/observed interaction in aligning a helicopter with a target
[DLR-FB-79-04] p0283 N79-30945

AIRCRAFT NOISE
NT SONIC BOOMS
Responses of teachers to aircraft noise
p0103 A79-23881
Aircraft noise and its effect on man: Methods and results of research, consequences for environmental protection --- German book
p0162 A79-29763
Sources of noise stress on flying personnel
p0227 A79-41169
Temporary threshold shift from transportation noise
p0254 A79-46286
The influence of intermittent aircraft noise on sleep. I
p0255 A79-46599
A trade-off analysis design tool: Aircraft interior noise-motion/passenger satisfaction model
p0112 N79-16549
Aircraft sonic boom: Biological effects. A bibliography with abstracts
[NTIS/PS-79/0190/3] p0214 N79-24650
Effect of helicopter noise on passenger annoyance
[NASA-TM-80106] p0241 N79-26782

AIRCRAFT PERFORMANCE
NT HELICOPTER PERFORMANCE
The effects of ambient illumination, aircraft velocity and feedback on absolute distance judgments during simulated night nap-of-the-earth flight
p0038 A79-13204
Predictive validity of flight simulators as a function of simulator motion
p0181 A79-32627

AIRCRAFT PILOTS
Visual workload of the copilot/navigator during terrain flight
p0038 A79-13206
NASA flight management research
p0040 A79-13218
The helmet protects the aviator's head - Or does it
p0044 A79-14429
Selection and techniques for analysis of indices of visual data reception. II --- aircraft pilot eye movements
p0047 A79-15494
Time estimation as a technique to measure workload --- of aircraft pilot in flight simulation
p0062 A79-18203
On the relationship between pilot rating and pilot dynamics. I - An experimental approach
p0066 A79-1 474
On the relationship between pilot rating and pilot dynamics. II - An analytical approach
p0066 A79-18475
SPH-4 helmet damage and head injury correlation
p0127 A79-24633
Naval aviation training - Perspective and prospects
[SAE PAPER 781004] p0130 A79-25886
Cost analysis of pilot training systems
[SAE PAPER 781005] p0130 A79-25887
Recent studies of simulation training effectiveness
[SAE PAPER 781006] p0130 A79-25888
Universal airborne approach to pilot performance assessment
[SAE PAPER 781009] p0130 A79-25891
A study of progress in flying performance revealed from daily check sheets in a primary flight

training course. III - Comparison of progress between two courses p0134 A79-27119
Methodological considerations of visual workloads of helicopter pilots p0209 A79-38363
Visual workload of the copilot/navigator during terrain flight p0209 A79-38364
Pilot workload in the aircraft of the future p0226 A79-40646
Analysis of population mortality kinetics with application to the longevity followup of the Navy's '1,000 aviators' p0234 A79-43207
+Gz tolerance correlation with clinical parameters p0235 A79-43213
A structural model of the adaptive human pilot [AIAA 79-1784] p0252 A79-45411
Medical barofunction testing of aviators with otorhinolaryngologic disease p0298 A79-52285
Effect of age on relaxed +G sub z tolerance of aircrewmen p0030 N79-11719
Cardiological findings in 115 pilots: Diagnoses and assessment of their flying fitness p0030 N79-11721
The impact of coronary vascular risk factors on professional aircrew license loss in the United Kingdom p0031 N79-11724
Cardiovascular diseases as a cause of unfitness for flying service in aircrews of Italian Air Force: Etiopathogenesis, influence of performance in flight, and prevention p0031 N79-11725
Cardiovascular fitness of pilots of transport aircraft p0031 N79-11726
A model for the pilot's use of roll-axis motion cues in steady-state tracking tasks [AD-A059504] p0079 N79-14772
Speech as a pilot input medium p0119 N79-17519
Changes in the rotary wing aviator's ability to perform an uncommon low altitude rearward hover maneuver as a function of extended flight requirements and aviator fatigue p0150 N79-19623
A description of the recent neuropsychological selection of pilots for land forces light aircraft p0151 N79-19633
Radiological examination of the Rachis and fitness for employment as a helicopter pilot p0151 N79-19634
Oculomotor performance of aviators during an autorotation maneuver in a helicopter simulator p0151 N79-19638
Sensorial aspects of helicopter operations p0152 N79-19644
The effective acoustic environment of helicopter crewmen p0152 N79-19645
Vertebral pains in helicopter pilots --- symptomology and radiology p0153 N79-19656
Airline pilot scan patterns during simulated ILS approaches [NASA-TP-1250] p0155 N79-19682

AIRCRAFT SAFETY
Evolution of the man-machine interface in surveillance radar systems p0001 A79-10322
Heat transfer principles in personal protection applications p0043 A79-14405
High 'G' escape protection --- pilot restraint during high speed ejection p0044 A79-14428
Human factors considerations in establishing aircraft collision avoidance system alert thresholds p0045 A79-14438
Pilot preflight briefing utilizing an interactive computer generated Voice Response System p0167 A79-31887
The fitting of Canadian Forces aircrew helmets - Why the difference p0184 A79-33645
Synthetic training and evaluation - Some current issues p0275 A79-50550
Visual performance assessment through clear and sunscreen-treated windows [AD-A059750] p0080 N79-14775
The use of mathematical modeling in crashworthy helicopter seating systems p0287 N79-31923
Pilot incapacity in flight p0291 N79-31950
Geographical disorientation and flight safety p0291 N79-31951

AIRCRAFT STABILITY
NT HOVERING STABILITY
Prediction of pilot-aircraft stability boundaries and performance contours p0118 N79-17507
Manual control of yaw motion with combined visual and vestibular cues p0119 N79-17513

AIRCREWS
U FLIGHT CREWS
AIRFIELDS
U AIRPORTS
AIRFOILS
NT FIXED WINGS
NT ROTARY WINGS
AIRLINE OPERATIONS
Coordinated crew performance in commercial aircraft operations p0040 A79-13219
Recurrent training/supernumerary system p0041 A79-13283
Survey on eye comfort in aircraft. I - Flight attendants p0165 A79-30665
Soviet civil aviation training programs p0270 A79-49221

AIRPORTS
A new case of autochthonous malaria in the Paris region associated with frequentation of airports - Recommendations of prophylactic procedures p0104 A79-23958
Detection of conflict states in air traffic control of airport zones p0166 A79-31181

AIRSPEED
The behavior of observers in detecting unbriefed targets at different aircraft speeds with side-looking radar [AD-A060908] p0085 N79-15586
ALARMS
U WARNING SYSTEMS
ALBUMINS
RBC-/Cr-51/ half-life and albumin turnover in growing Beagle dogs during chronic radial acceleration p0135 A79-27553
Investigation of albumin and globulin composition of blood of the crew of the Salyut-3 orbital station p0244 N79-27820
Binding of biologically active agents to plasma proteins [CL-1977-22] p0261 N79-29787
ALCOHOLS
NT ETHYL ALCOHOL
The effects of alcohol on driver performance in a decision making situation p0092 N79-15629
A decision model applied to alcohol effects on driver signal light behavior p0092 N79-15630
Analysis of visible spectra and thermodynamic parameters in hemeprotein systems p0144 N79-18579

ALDEHYDES
NT FORMALDEHYDE
ALDOSTERONE
Plasma aldosterone, renin activity, and cortisol responses to heat exposure in sodium depleted and repleted subjects p0297 A79-52023

ALERTNESS
Vigilance and electroencephalogram --- human performance in compensatory target tracking p0100 A79-22975

Auditory and visual sustained attention during ozone exposure
p0273 A79-49988

Effects of prolonged unidirectional shift of sleeping-waking cycle on physiological functions, mental productivity and sleep of man
p0109 N79-16526

ALGAE
NT BLUE GREEN ALGAE
NT CHLORELLA
NT SCENEDESMUS

Organic geochemical studies on kerogen precursors in recently deposited algal mats and oozes
p0001 A79-10419

A biogeochemical study of the Abu Dhabi algal mats - A simplified ecosystem
p0132 A79-26373

Algal growth under multiple nutrient limiting conditions
p0013 N79-10692

Impact of large scale aquatic biomass systems
[PB-282617/0] p0013 N79-10697

Effects of electromagnetic field induction on development of the green algae, scenedesmus quadricauda (Turbpin) Breb. and composition of free amino acids in its biomass and medium
p0075 N79-14740

The growth kinetics of freshwater algae
p0174 N79-21740

Citric acid enhancement of copper sulfate toxicity to the blue-green algae ""aphanizomenon flos-aquae'' and ""microcystis aeruginosa''
[PB-291637/7] p0189 N79-22751

ALGAL BLOOM
U ALGAE

ALGEBRA
NT HOMOMORPHISMS
NT LINEAR EQUATIONS
NT MATRICES (MATHEMATICS)

ALGORITHMS

The augmentation algorithm and molecular phylogenetic trees
p0070 A79-20267

An algorithm to ascertain critical regions of human tracking ability
p0163 A79-30218

On investigating the statistical properties of the populous path algorithm by computer simulation - Counterconclusions to those of Tateno and Nei --- for mutational change in protein evolution
p0253 A79-45640

Augmentation algorithm - A reply to Holmquist --- for nucleotide substitutions
p0253 A79-45644

Molecular phylogenetic trees - On the validity of the Goodman-Moore augmentation algorithm
p0253 A79-45645

Design specification for the whole-body algorithm
[NASA-CR-160226] p0212 N79-24641

Study report on interfacing major physiological subsystem models: An approach for developing a whole-body algorithm
[NASA-CR-160232] p0218 N79-25729

The development of a whole-body algorithm
[NASA-CR-160214] p0218 N79-25730

User's instructions for the whole-body algorithms
[NASA-CR-160233] p0219 N79-25735

ALL-WEATHER LANDING SYSTEMS

Manual landings in Category 3 conditions
p0297 A79-52055

ALLERGIC DISEASES

Allergy to lanolin
[BLL-RTS-11185] p0142 N79-18570

ALLOYS
NT PLATINUM ALLOYS

ALPHANUMERIC CHARACTERS

The effect of active area on the legibility of dot matrix displays
[AD-A058014] p0052 N79-12708

A human engineering specification for legibility of alphanumeric symbology on video monitor displays
[AD-A064960] p0197 N79-23667

ALTERATION
U REVISIONS

ALTITUDE
NT FLIGHT ALTITUDE
NT HIGH ALTITUDE
NT LOW ALTITUDE

ALTITUDE ACCLIMATIZATION

Norepinephrine uptake by the isolated heart of rats adapted and deadapted to hypoxia
p0097 A79-20621

Cerebral gas exchange in rats adapted to hypoxia during inspiration of oxygen-poor mixtures
p0097 A79-20623

Responses of high altitude natives to a standard cold test at sea level
p0164 A79-30658

Immunophysiological aspects of man's adaptation to highland
p0188 A79-35123

Investigation of the content of hemoglobin and its fractions in permanent inhabitants of the Tien Shan and Pamir
p0188 A79-35124

Effect of adaptation to high-altitude hypoxia on cardiac adrenoreactivity and the state of the adenylcyclase and phosphodiesterase systems in the myocardium
p0255 A79-46500

Oxygen affinity of blood in altitude Sherpas
p0268 A79-47854

Composition of cerebral fluids in goats adapted to high altitude
p0277 A79-50902

Evidence for increased intrathoracic fluid volume in man at high altitude
p0305 A79-54266

Composition of cerebral fluids in goats adapted to high altitude
[AD-A070142] p0310 N79-33788

ALTITUDE SICKNESS

Case report - Intracardial gas bubbles in relation to altitude decompression chokes
p0011 A79-12871

Prevention and treatment of space sickness in Shuttle-Orbiter missions
p0128 A79-24639

ALTITUDE SIMULATION

Hemoglobinemia in rats exposed to high altitude is not due to an overload of catabolic mechanisms
p0101 A79-23467

Thermal sweat rate response to an acute short exposure at a simulated altitude of 4,600 m
p0102 A79-23474

Response of women mountaineers to maximal exercise during hypoxia
p0234 A79-43201

Effect of physical training at moderate altitude /1850 m/ on hypoxic tolerance

p0235 A79-43210

ALTITUDE TESTS
NT HIGH ALTITUDE TESTS
Intracardial gas bubbles and decompression sickness while flying at 9,000 m within 12-24 h of diving
p0010 A79-12866

ALTITUDE TOLERANCE
Hemoglobinemia in rats exposed to high altitude is not due to an overload of catabolic mechanisms
p0101 A79-23467

Cardiorespiratory assessment of decongestant-antihistamine effects on altitude, +Gz, and fatigue tolerances
p0127 A79-24628

Effects of altitude and two decongestant-antihistamine preparations on physiological functions and performance
p0127 A79-24635

Individual differences in hypoxic responses at high altitudes
p0159 A79-28738

Plasma electrolytes in relation to altitude tolerance in rats
p0163 A79-30652

Effect of physical training at moderate altitude /1850 m/ on hypoxic tolerance
p0235 A79-43210

Effects of propranolol on Time of Useful Function (TUF) in rats --- tolerance to rapid decompression
[AD-A068535/4] p0283 N79-31896

ALUMINUM
Aluminized firefighters' crash-rescue protective hood: Facepiece-visor redesign study
[AD-A066492] p0223 N79-25764

ALUMINUM COMPOUNDS
NT KAOLINITE
NT MONTMORILLONITE

ALUMINUM SILICATES
NT KAOLINITE
NT MONTMORILLONITE

AMBIENT TEMPERATURE
Effect of cockpit temperature gradients on the validity of single-point measurements
p0234 A79-43203

Responses of conscious rabbits to CO2 at ambient temperatures of 5, 20, and 35 C
p0277 A79-50904

Protective approaches in the moderation of the physiological effects of extreme ambient conditions in helicopter operations
p0149 N79-19618

AMBULANCES
Evaluation of the helicopter in aeromedical transfers
p0128 A79-24638

AMERICIUM

AMERICIUM 241
Pacific Northwest Laboratory report for 1977 to the DOE assistant secretary for environment. Part 2: Ecological sciences
[PNL-2500-PT-2] p0053 N79-13677

AMIDES
NT CYANAMIDES
NT UREAS

AMINES
NT AMPHETAMINES
NT CATECHOLAMINE
NT HYOSCINE
NT PROMETHAZINE
NT SEROTONIN
Effect of electroconvulsive shock on monoaminergic receptor binding sites in rat brain
p0162 A79-29925

Experimental approach to the chemical evolution in the primeval sea. I - Formation of amino acids and amino acid polymers in modified sea mediums
p0203 A79-37935

Prebiotic synthesis of amino acids by carboxylation of amines in oxidative atmosphere
p0203 A79-37937

AMINO ACIDS
NT GLUTAMINE
NT LEUCINE
NT PEPTIDES
NT POLYPEPTIDES
NT PROTOPROTEINS
NT TRYPTOPHAN
Coupling of aspartate and serine transport to the transmembrane electrochemical gradient for sodium ions in Halobacterium halobium - Translocation stoichiometries and apparent cooperativity
p0002 A79-10425

In vivo response of ornithine decarboxylase activity to growth hormone as demonstrated by oxidation of L-ornithine-1-/C-14/ in hypophysectomized rats
p0005 A79-12400

Speculations of the evolution of the genetic code. II
p0099 A79-22080

Photochemical synthesis of amino acids from aqueous solutions of ethyl alcohol, ammonia/nitrogen under varied conditions
p0105 A79-24520

Beta-galactosidase and selective neutrality --- amino acid composition of proteins
p0132 A79-26169

The origin of life on earth - Recent studies
p0134 A79-27335

Amino acids in southern Kamchatka hot springs
p0182 A79-33122

Synthesis of amino acids under primitive earth conditions in the presence of clay
p0203 A79-37930

Experimental approach to the chemical evolution in the primeval sea. I - Formation of amino acids and amino acid polymers in modified sea mediums
p0203 A79-37935

Prebiotic synthesis of amino acids by carboxylation of amines in oxidative atmosphere
p0203 A79-37937

Incorporation of sulphur in chemical evolution
p0203 A79-37938

Experimental approach to the chemical evolution in the primeval sea. II - Formation of protocell-like structures 'marigranules' in a modified sea medium
p0204 A79-37964

The point mutation process in proteins
p0205 A79-37972

Some characteristic features of the origin and evolution of the amino acid composition of proteins - A theoretical consideration
p0206 A79-37973

Nucleotide-binding site data and the origin of the genetic code
p0206 A79-37974

Studies of amino acid metabolism in the muscles of rats flown aboard the biosatellite Cosmos 782
p0230 A79-41714

Inadequacy of prebiotic synthesis as origin of proteinous amino acids
p0253 A79-45643

Polymers produced by heating an amino acid mixture in sea water enriched with transition elements
p0254 A79-46461

Gating effects in Halobacterium halobium membrane transport
p0268 A79-47849

Light-driven solute transport in Halobacterium halobium
p0270 A79-49194

Role of n-aminobenzoic acid in repairing UV and gamma radiation damage
p0301 A79-53211

Effects of electromagnetic field induction on development of the green algae, scenedesmus quadricauda (Turbpin) Breb. and composition of free amino acids in its biomass and medium
p0075 N79-14740

AMMONIA
Photochemical synthesis of amino acids from aqueous solutions of ethyl alcohol, ammonia/nitrogen under varied conditions
p0105 A79-24520

Enhancing biological production of ammonia from atmospheric nitrogen and soil nitrate
[PB-286515/2] p0083 N79-15571

AMPHETAMINES
Effects of amphetamine on response selection and response execution processes in choice reaction tasks
[IZF-1978-8] p0309 N79-32839

AMPHIBIA
NT FROGS
AMPLITUDE MODULATION
Classification of amplitude-modulated noise patterns with extended practice
[AD-A066703] p0222 N79-25756
ANAEROBES
Sulfate-reducing bacteria and biochemical evolution
p0205 A79-37967
A biochemical basis of obligate anaerobiosis
p0142 N79-18561
Studies of microbial flora and immunity of Salyut-3 crew
p0192 N79-23629
ANALGESIA
Indomethacin-antihistamine combination for gastric ulceration control
[NASA-CASE-ARC-11118-2] p0077 N79-14755
ANALOG SIMULATION
Various modeling approaches in biomechanics --- analog simulation of impact events
p0005 A79-12407
A three-dimensional mathematical analogue of the spine structure: A comprehensive approach
p0285 N79-31909
ANALYSIS (MATHEMATICS)

ANTIADRENERGICS
Effects of propranolol on Time of Useful Function (TUF) in rats --- tolerance to rapid decompression
[AD-A068535/4] p0283 N79-31896

ANTIBIOTICS
Determination of antimicrobial susceptibilities on infected urines without isolation
[NASA-CASE-GSC-12046-1] p0076 N79-14750

ANTIBODIES
NT GAMMA GLOBULIN

ANTIGENS
Design of polymeric immunomicrospheres for cell labelling and cell separation
p0275 A79-50234

Clinical and morphological studies of people in the course of long-term hypokinesia and subsequent readaptation
p0015 N79-10709

Isolation of virus-augmented tumor antigens
p0142 N79-18564

ANTIHISTAMINICS
NT PROMETHAZINE
Cardiorespiratory assessment of decongestant-antihistamine effects on altitude, +Gz, and fatigue tolerances
p0127 A79-24628

Effects of altitude and two decongestant-antihistamine preparations on

physiological functions and performance
p0127 A79-24635
Indomethacin-antihistamine combination for gastric
ulceration control
[NASA-CASE-ARC-11118-2] p0077 N79-14755
ANTIINFECTIVES AND ANTIBACTERIALS
Microbial Check Valve for Shuttle
[ASME PAPER 78-ENAS-27] p0008 A79-12576
ANTIRADIATION DRUGS
Role of n-aminobenzoic acid in repairing UV and
gamma radiation damage
p0301 A79-53211

AORTA
Better definition of eye to aortic valve distance
in high acceleration cockpit /HAC/ seating
geometries
p0183 A79-33632
Aortic blood flow velocity during exercise in man
p0216 N79-25710

APERTURES
On the measurement of hazardous e.m. fields
radiated through an aperture
p0233 A79-42486

APNEA
U RESPIRATION
APOLLO SOYUZ TEST PROJECT
Biological study of tobacco seeds flown in the
joint Apollo-Soyuz test-project
p0006 A79-12519
Genetic effects of cosmic radiation on
bacteriophage T4Br/+/ /On materials of
biological experiment Soyuz-Apollo/
p0229 A79-41708

APPENDAGES
NT ARM (ANATOMY)
NT FOREARM
NT HAND (ANATOMY)
NT KNEE (ANATOMY)
NT LEG (ANATOMY)
APPLICATION
U UTILIZATION
APPROACH
NT INSTRUMENT APPROACH
A safety margin and flight reference system and
display for powered-lift aircraft
p0090 N79-15614
The limited range of the human eye for optical
aircraft acquisition
p0291 N79-31948

APPROACH CONTROL
Manual landings in Category 3 conditions
p0297 A79-52055

APPROACH INDICATORS
Pilot performance during simulated approaches and
landings made with various computer-generated
visual glidepath indicators
p0297 A79-52276

APTITUDE
Relating performance in basic electricity and
electronics and A schools
[AD-A060914] p0085 N79-15584
Some variations on derivations by Primoff and
their extensions
[PB-287298/4] p0112 N79-16548
AQUEOUS SOLUTIONS
Prebiotic condensation of oligonucleotide
p0204 A79-37945

AQUICULTURE
Impact of large scale aquatic biomass systems
[PB-282617/0] p0013 N79-10697
Nitrogen fixation with photosynthetic marine
microorganisms
[PB-286000/5] p0083 N79-15570
ARCTIC REGIONS
Man and materiel in the cold regions, part 1
[AD-A063752] p0178 N79-21771
AREA NAVIGATION
Response surface methodology as a manipulator of
complex task difficulty --- for computer
generated aircraft area navigation
control-display systems evaluation
p0039 A79-13211

ARGON
Molecular sieve oxygen generating system - The
argon question /A brief review/ --- effects of 5
percent Ar in breathing gas
p0274 A79-49994

ARGON-OXYGEN ATMOSPHERES
Tissue gas and blood analyses of human subjects
breathing 80% argon and 20% oxygen
p0164 A79-30655

ARGUMENTS (MATHEMATICS)
U INDEPENDENT VARIABLES
ARIP (IMPACT PREDICTION)
U COMPUTERIZED SIMULATION
ARKANSAS
Distribution of phytoplankton in Arkansas lakes
[PB-292742/4] p0240 N79-26768
ARM (ANATOMY)
NT FOREARM
A prediction model of arm push strength in the
transverse plane
p0037 A79-13195
Arm-leg reach and workspace layout
p0033 N79-11739

ARMED FORCES
NT ARMED FORCES (UNITED STATES)
NT NAVY
ARPA authoring system
[AD-A064723] p0190 N79-22762
ARMED FORCES (UNITED STATES)
Acute toxicity of a number of chemicals of
interest to the Air Force
[AD-A067313] p0220 N79-25742
United States Army anthrometry: 1946-1977
[AD-A068095] p0289 N79-31938
Analysis of body size measurements for US Navy
women's clothing and pattern design
[AD-A068600] p0290 N79-31939
Three decades of USAF efforts to reduce human
error accidents, 1947-1977
p0290 N79-31943

ARRHYTHMIA
+Gz tolerance correlation with clinical parameters
p0235 A79-43213
Cardiac arrhythmia following postimmersion +G sub
z accelerations
p0015 N79-10710
The significance of rhythm disturbances in
asymptomatic persons
p0027 N79-11698

ARTEMIA
Development capacity of artemia cysts and lettuce
seeds flown in Cosmos 936 and directly exposed
to cosmic rays
p0127 A79-24632

ARTERIES
NT AORTA
Effect of exercise on collateral development in
dogs with normal coronary arteries
p0067 A79-18960
Responses of pial arterioles after prolonged
hypercapnia and hypoxia in the awake rabbit
p0101 A79-23075
Circulatory response to arterial hyperoxia
p0221 A79-36048
Norepinephrine action on smooth muscle cells of
coronary arteries
p0208 A79-38149
Analyses for noninvasive monitoring of arterial
blood pressure by /I/ phono
cuff-sphygmomanometry, for discrete measurements
and /II/ arterial ultrasonic imaging, for
continuous measurements
p0294 A79-51037
Regulation of the carbon dioxide tension in
arterial blood during inhalation of carbon
dioxide in birds and mammals
p0169 N79-20713
Mechanics of arterial blood flow
p0247 N79-27846
Mass transport in arteries
p0247 N79-27848

ARTERIOSCLEROSIS
Ruptured arteriovenous anomaly in a former woman
astronaut candidate
p0128 A79-24640
Predicting coronary artery disease with treadmill
stress testing Changes in R-wave amplitude
compared with ST segment depression
p0186 A79-34284
The development of a digital video subtraction
system for intravenous angiography
p0294 A79-51033
Development of high-resolution ultrasonic imaging
techniques for detection and clinical assessment
of cardiovascular disease
[PB-286696/0] p0085 N79-15581

Development and evaluation of instrument systems for noninvasive detection, characterization and quantification of atherosclerotic lesions [PB-286851/1] p0085 N79-15582

Ergometric tests in expert medical certification of flight personnel p0109 N79-16527

Effects of dietary fats on atherosclerosis and thrombosis p0240 N79-26776

Aspects of dietary prevention of arteriosclerosis p0262 N79-29792

ARTHROPODS

Man and automation --- for human-automatic pilot interfaces
p0275 A79-50372
The effects of closed loop tracking on a subjective tilt threshold in the roll axis
p0090 N79-15620
Use of the tilt cue in a simulated heading tracking task
p0091 N79-15621
Roll tracking effects of G-vector tilt and various types of motion washout
p0091 N79-15622

ATTITUDE CONTROL
NT LATERAL CONTROL
A model for the pilot's use of roll-axis motion cues in steady-state tracking tasks
[AD-A059504] p0079 N79-14772

AUDIO EQUIPMENT
NT EARPHONES
Magnitude estimation as a hearing aid selection procedure
p0246 N79-27838

AUDIO FREQUENCIES
A continuous wave, frequency modulated, ultrasonic device with auditory output for observing the heart
p0045 A79-14602
Effects of noise frequency on performance and annoyance
[NASA-TM-80107] p0241 N79-26781

AUDIO VISUAL EQUIPMENT
U TRAINING DEVICES

AUDIOMETRY
Automatic audiometry in the practice of flight-personnel examination
p0295 A79-51084

AUDITORY DEFECTS
Aeromedical aspects of otolaryngology
p0136 A79-27562
Two approaches to category representation in aural classification
[AD-A066705] N79-25754

AUDITORY PERCEPTION
The relationship between classical centers of the auditory tract and certain 'nonspecific' brain structures in the organization of the auditory function in animals
p0043 A79-14370
Role of the frontal associative region of the cortex in the activity of the auditory and visual sensory systems
p0043 A79-14371
Significance of motor activity for spatial hearing
p0043 A79-14372

Elements of the theory of biological analysers --- Russian book p0132 A79-26450

Auditory analysis of complex sound: Electrophysiological investigations --- Russian book p0167 A79-31899

Effect of paradoxical sleep deprivation on the acquisition of sound discrimination p0167 A79-31988

Automatic recognition of spoken words using a functional model of the auditory system p0235 A79-43464

Studies on the microwave-induced auditory effect [PB-290598/2] p0213 N79-24648

Overall loudness of steady sounds according to theory and experiment [NASA-RP-1001] N79-25753

Two approaches to category representation in aural classification [AD-A066705] N79-25754

Predicting individual listener confusions in the classification of complex, steady-state sounds [AD-A066704] p0222 N79-25755

Classification of amplitude-modulated noise patterns with extended practice [AD-A066703] p0222 N79-25756

The loudness of tinnitus p0246 N79-27837

Effects of acute noise traumata on whole-nerve and single-unit activity [IZF-1978-23] p0308 N79-32829

AUDITORY SIGNALS

The relationship between classical centers of the auditory tract and certain 'nonspecific' brain structures in the organization of the auditory function in animals p0043 A79-14370

A continuous wave, frequency modulated, ultrasonic device with auditory output for observing the heart p0045 A79-14602

Auditory analysis of complex sound: Electrophysiological investigations --- Russian book p0167 A79-31899

Manual control of yaw motion with combined visual and vestibular cues p0119 N79-17513

AUDITORY STIMULI

Bilateral and interhemispheric asymmetry of acoustic evoked potentials during monoaural acoustic stimulation p0159 A79-28735

A further investigation of visual dominance p0186 A79-33949

Auditory evoked potentials during short-term auditory stimulation p0277 A79-50659

Effects of filtering electroencephalic signals on auditory evoked brain stem responses p0176 N79-21758

Overall loudness of steady sounds according to theory and experiment [NASA-RP-1001] N79-25753

AUDITORY TASKS

Carbon monoxide and human time discrimination - Failure to replicate Beard-Wertheim experiments p0102 A79-23472

Comparative evaluation of the effectiveness of visual and aural tracking of a sinusoidal signal p0159 A79-28736

Auditory and visual sustained attention during ozone exposure p0273 A79-49988

Auditory evoked potentials during short-term auditory stimulation p0277 A79-50659

AUGMENTATION

NT STABILITY AUGMENTATION

Augmentation algorithm - A reply to Holmquist --- for nucleotide substitutions p0253 A79-45644

Molecular phylogenetic trees - On the validity of the Goodman-Moore augmentation algorithm p0253 A79-45645

Pilot-optimal augmentation synthesis p0088 N79-15603

AUTOCATALYSIS

The crisis in the problem of the origin of life p0207 A79-37982

Evolution in open systems - Acquisition and conservation of information in bioids p0207 A79-37987

AUTOCLAVES

A system for sterilizing objects --- such as water systems on the space shuttle using ethylene oxide [NASA-CASE-KSC-11085-1] p0318 N79-33848

AUTOMATA THEORY

Control systems for robots and manipulators --- Russian book p0134 A79-27303

Some properties of conservative systems --- walking robot model p0221 A79-35942

Goal-directed mechanics of controlled manipulators --- Russian book p0275 A79-50447

AUTOMATIC CONTROL

NT ADAPTIVE CONTROL
NT AUTOMATIC FLIGHT CONTROL
NT AUTOMATIC GAIN CONTROL
NT DYNAMIC CONTROL
NT FEEDBACK CONTROL
NT LEARNING MACHINES
NT NUMERICAL CONTROL
NT OPTIMAL CONTROL

Automatic control of physiological functions of the human organism in pathology --- Russian book p0132 A79-26350

Control systems for robots and manipulators --- Russian book p0134 A79-27303

Visually estimating workpiece pose in a robot hand using the feature points method p0269 A79-48018

An analysis of helicopter pilot control behaviour and workload during instrument flying tasks [NLR-MP-78003-U] p0124 N79-17553

Microbial load monitor [NASA-CR-160274] p0243 N79-27815

The systemic principles of building a man-machine control staff --- functional analysis p0249 N79-27861

AUTOMATIC DATA PROCESSING

U DATA PROCESSING

AUTOMATIC FLIGHT CONTROL

The man-computer division of tasks in the case of the control of complex technical systems --- applied to aircraft p0061 A79-17683

AUTOMATIC GAIN CONTROL

Contrast enhancement using local area brightness and gain control --- of airborne CRT display p0037 A79-13199

AUTOMATIC PATTERN RECOGNITION

U PATTERN RECOGNITION

AUTOMATIC PILOTS

Communications management by the remote system - An adaptive approach --- modeling of RPV autopilot/operator systems p0041 A79-13226

Man and automation --- for human-automatic pilot interfaces p0275 A79-50372

AUTOMATIC ROCKET IMPACT PREDICTORS

U COMPUTERIZED SIMULATION

AUTOMATIC TEST EQUIPMENT

Development of automated performance measures for introductory air combat maneuvers p0040 A79-13223

Automatic audiometry in the practice of flight-personnel examination p0295 A79-51084

Automated clinical system for chromosome analysis [NASA-CASE-NPO-13913-1] p0050 N79-12694

AUTOMATION

New principles of automation of biomedical research p0078 N79-14763

Proceedings of the 1977 Computerized Adaptive Testing Conference [AD-A060049] p0079 N79-14771

AUTOMOBILE ACCIDENTS

Whole body response research program [PB-286151/6] p0093 N79-15640

Whole body response research program. Appendix A: Methodology

[PB-286152/4] p0094 N79-15641
Whole body response research program. Appendix B: Raw data
[PB-286153/2] p0094 N79-15642
Whole body response research program. Appendix C: Processed data
[PB-286154/0] p0094 N79-15643
Calibration of three year old child dummies
[PB-288961/6] p0157 N79-19692

AUTOMOBILES
Evaluation of occupant protection devices and restraint systems
[PB-284299/5] p0053 N79-12713
Development of recommendations to improve controls operability
[PB-284433/0] p0053 N79-12714
Vehicle Steering control: A model of learning
p0089 N79-15606
The influence of vehicle aerodynamic and control response characteristics on driver-vehicle performance
p0089 N79-15608
The effects of alcohol on driver performance in a decision making situation
p0092 N79-15629
A decision model applied to alcohol effects on driver signal light behavior
p0092 N79-15630
The application of integral performance criteria to the analysis of discrete maneuvers in a driving simulator
[NS-GMR-2394] p0115 N79-17484
A control theoretic model of driver steering behavior
p0116 N79-17491
Driver steering dynamics measured in car simulator under a range of visibility and roadmaking conditions
p0117 N79-17493
Steering behaviour and manual control actions. Part 1: An evaluation of the literature and a research plan
[IZF-1978-3] p0146 N79-18594
Test and evaluation of head restraints, seat backs, and anchorages in vehicles subjected to rear impact collision
[PB-289779/1] p0178 N79-21773
Evaluation of research on surrogates for humans in motor vehicle crashes
[PB-291012/3] p0178 N79-21774
Development of a solid propellant inflation technique for the subcompact car passenger restraint system, phase 1
[PB-290328/4] p0178 N79-21775
Car driving as a cybernetic task
[IZF-1979-6] p0309 N79-32838

AUTONOMIC NERVOUS SYSTEM
NT SYMPATHETIC NERVOUS SYSTEM

AUTOPILOTS
U AUTOMATIC PILOTS

AUTOPSIES
Assessment of burns in accident fatalities
p0272 A79-49729
Whole body response research program. Appendix B: Raw data
[PB-286153/2] p0094 N79-15642

AUTORADIOGRAPHY
Autoradiographic enhancement of mammograms
p0227 A79-40773

AUTOROTATION
Oculomotor performance of aviators during an autorotation maneuver in a helicopter simulator
p0151 N79-19638

AVIATION
U AERONAUTICS

AVIATORS
U AIRCRAFT PILOTS

AVIONICS
Refinement of a computer simulation model for evaluating DAIS display concepts --- Digital Avionics Information System
p0038 A79-13209
Light weight solid state helmet symbol display and position system
p0046 A79-15177
Helicopter night operations - Feasibility and impact on the overall system --- helmet mounted FLIR detectors and image intensifier goggles
p0048 A79-16235
Life cycle costing of simulated vs actual equipment for intermediate maintenance training --- for F-16 avionics
p0064 A79-18217
Manual landings in Category 3 conditions
p0297 A79-52055
Optimisation of pilot capability and avionic system design
[AGARD-AR-118] p0113 N79-16560
Optimisation of pilot capability and avionic system design, introduction
p0113 N79-16561
Pilot workload qualification for avionics design
p0114 N79-16564
Human factors evaluations of today's helicopters as an aid to future systems design
p0150 N79-19627

AVOIDANCE
NT COLLISION AVOIDANCE

AXES (COORDINATES)
U COORDINATES

AXIAL COMPRESSION LOADS
Analytical modelling of load-deflection behavior of intervertebral discs subjected to axial compression
[AD-A071019] p0316 N79-33830

AXIAL LOADS
NT AXIAL COMPRESSION LOADS

AXIAL STRESS
Modeling the effect of axial bronchial tension on expiratory flow
p0067 A79-18957

AXIOMS
Axiomatic summary and deductions from Hering's principles of visual direction
p0228 A79-41421

AXONS
A study of axonal degeneration in the optic nerves of aging mice
p0005 A79-12123
Stereological ultrastructural analysis of the axonal endings in the neuromuscular junction of rats after a flight on biosputnik 782
p0101 A79-23468

AZINES
Clozapine metabolism in humans
[BLL-RTS-10902] p0142 N79-18567

AZOLES
NT INDOLES
NT TRYPTOPHAN

B

BACK INJURIES
Incidence of spinal disability amongst IAF pilots - Follow up of 38 cases
p0201 A79-37133
Vertebral fractures in Gnat ejections
p0201 A79-37134
Functional anatomy of vertebral column with reference to load bearing areas
p0272 A79-49732
Radiological diagnosis of spinal injuries and deformities
p0272 A79-49735
Assessment of spinal disabilities in relation to flying
p0272 A79-49736
Spinal injuries in the F/FB-111 crew escape system
p0274 A79-49996
Dynamic response of vertebral elements related to USAF injury
[AD-A059489] p0071 N79-14713
Radiological examination of the Rachis and fitness for employment as a helicopter pilot
p0151 N79-19634

BACKGROUND NOISE
Nonparametric model for the detection of signals observed by a human operator on a CRT screen on a noise background --- cathode-ray tube
p0159 A79-28565
Information-handling capacity of a human operator in detection of signals against a noisy background
p0081 N79-14989
Predicting individual listener confusions in the classification of complex, steady-state sounds
[AD-A066704] p0222 N79-25755

BACKSCATTERING
X-ray backscatter imaging

p0176 N79-21754
BACTERIA
NT CLOSTRIDIUM BOTULINUM
NT ESCHERICHIA
NT NITROBACTER
NT SALMONELLA
Characterization of a novel extremely alkalophilic bacterium p0004 A79-11950
Effects of magnesium, calcium, and serum on reversion of stable L-forms --- of soil bacterium p0131 A79-26140
Effects of low temperature on in vivo and in vitro protein synthesis in Escherichia coli and Pseudomonas fluorescens p0131 A79-26141
Thermal resistance of naturally occurring airborne bacterial spores --- Viking spacecraft dry heat decontamination simulation p0131 A79-26147
Nitrate fermentation in Clostridium perfringens and significance in metabolic evolution p0205 A79-37968
Evolution of early life inferred from protein and ribonucleic acid sequences p0206 A79-37980
Relationship between proton motive force and potassium ion transport in Halobacterium halobium envelope vesicles p0227 A79-40775
Squalenes, phytanes and other isoprenoids as major neutral lipids of methanogenic and thermoacidophilic 'archaebacteria' p0232 A79-42274
Accuracy of RGD approximation for computing light scattering properties of diffusing and motile bacteria --- Rayleigh-Gans-Debye p0233 A79-42448
Increased survival in experimental dog heatstroke after reduction of gut flora p0266 A79-47335
Gating effects in Halobacterium halobium membrane transport p0268 A79-47849
Light-driven solute transport in Halobacterium halobium p0270 A79-49194
Minute tubular forms in soil p0297 A79-51698
Attachment to autoclaved soil of bacterial cells from pure cultures of soil isolates p0297 A79-51701
Characteristics of bacterial aerosol in airtight rooms occupied by humans p0016 N79-10715
Mechanisms of recombination and function of DNA in bacteria [ORO-3941-33] p0072 N79-14715
Determination of antimicrobial susceptibilities on infected urines without isolation [NASA-CASE-GSC-12046-1] p0076 N79-14750
Mechanism of plant virus inactivation in soil injected with municipal wastewater and treatment plant sludges [PB-287012/9] p0107 N79-16513
The utilisation of organic compounds by purple bacteria in the presence of light [BLL-RTS-11213] p0141 N79-18556
A biochemical basis of obligate anaerobiosis p0142 N79-18561
Effects of lead on subcellular components in bacteria p0142 N79-18565
Bacteria in a North Carolina salt marsh. Standing crop and importance in the decomposition of Spartina alterniflora [PB-288816/2] p0153 N79-19668
Effects of different values of urine pH during long-term storage on microflora composition p0194 N79-23643
Microbial transformation of nucleosides [NASA-CR-158696] p0197 N79-25704
BACTERIOLOGY
In vitro duplication of the primary light-induced charge separation in purple photosynthetic bacteria p0131 A79-26100
Use of platinum electrodes for the electrochemical detection of bacteria p0131 A79-26146
Evolutionary relationship based on a biochemical study of energy-acquiring system between Nitrosomonas europaea and Thiobacillus novellus p0205 A79-37966
Sulfate-reducing bacteria and biochemical evolution p0205 A79-37967
Control by episome on salt-resistance in bacteria p0205 A79-37969
An ultraviolet light induced bacteriophage in Beneckea gazogenes --- organism growth on precambrian earth p0254 A79-46463
Energy transduction in Halobacterium halobium p0300 A79-53000
The utilisation of organic compounds by purple bacteria in the presence of light [BLL-RTS-11213] p0141 N79-18556
BACTERIOPHAGES
Possible contribution of transferable exogenous DNA in prokaryotic evolution p0205 A79-37971
Subcellular organisms and evolution of cell structure p0206 A79-37978
Genetic effects of cosmic radiation on bacteriophage T4Br/+/ /On materials of biological experiment Soyuz-Apollo/ p0229 A79-41708
An ultraviolet light induced bacteriophage in Beneckea gazogenes --- organism growth on precambrian earth p0254 A79-46463
BAGS
NT AIR BAG RESTRAINT DEVICES
NT GAS BAGS
Gas diffusion liquid storage bag and method of use for storing blood [NASA-CASE-NPO-13930-1] p0076 N79-14749
BALANCE
Balance training of the equilibrium organ and its effect on flight strategy p0242 N79-27074
BALLOON FLIGHT
Genetic effects of balloon flight in Drosophila melanogaster p0006 A79-12520
BANDWIDTH
NT BROADBAND
The human as a detector of changes in variance and bandwidth p0117 N79-17496
BANKING FLIGHT
U TURNING FLIGHT
BARDEEN APPROXIMATION
U ELECTRICAL PROPERTIES
BARITE
Microanalytical identification of barium sulphate crystals in statoliths of Chara Rhizoids [NASA-TM-75611] p0175 N79-21744
BAROMETRIC PRESSURE
U ATMOSPHERIC PRESSURE
BAROTRAUMA
Aeromedical aspects of otolaryngology p0136 A79-27562
Cases of probable Aero Otitis interna p0183 A79-33194
Doppler detection of thresholds for decompression-induced venous gas emboli in the awake rat p0202 A79-37707
BAYES THEOREM
Some Bayesian inference procedures for use in developing an impact acceleration injury prediction model [AD-A067228] p0220 N79-25741
BAYESIAN STATISTICS
U BAYES THEOREM
BAYS (TOPOGRAPHIC FEATURES)
NT CHESAPEAKE BAY (US)
BEAMS (RADIATION)
NT LIGHT BEAMS
NT PROTON BEAMS
BEARING (DIRECTION)
Investigations into the importance of the direction of centrifugal forces acting on the human body [RAE-LIB-TRANS-1945] p0077 N79-14758

BED REST
Physiological responses of women to simulated weightlessness: A review of the first female bed-rest study
[NASA-SP-430] p0054 N79-13686
Effects of physical conditioning and electric stimulation on metabolic processes in the soleus muscle and structure thereof in hypokinetic man
p0192 N79-23634
Development of an hypothesis for simulating anti-orthostatic bed rest
[NASA-CR-160200] p0217 N79-25717
Study report on modification of the long term circulatory model for the simulation of bed rest
[NASA-CR-160186] p0218 N79-25727
Improvements and validation of the erythropoiesis control model for bed rest simulation
[NASA-CR-160187] p0218 N79-25728
Effect of brief head-down position on parameters of carbohydrate metabolism and beta lipoprotein content of blood
p0311 N79-33797

BEHAVIOR
NT DECONDITIONING
NT HUMAN BEHAVIOR
Study of specific effects of hyperfrequencies on the central nervous system. II - Exploratory research on rat /Wistar/ behaviour
p0047 A79-15493
Low tryptophan diet decreases brain serotonin and alters response to apomorphine
p0226 A79-40672
Quantitative analysis of mating behavior in aging male Drosophila Melanogaster
p0252 A79-44799
Translations on USSR science and technology: Biomedical and behavioral sciences, no. 50
[JPRS-72462] p0170 N79-20720

BELGIUM
Analysis of the intervention of the human factor as a principal cause or influence in accidents of Mirage aircraft in the Belgian Air Force
p0290 N79-31945

BELL AIRCRAFT
NT UH-1 HELICOPTER

BENCHES
U SEATS

BENDS (PHYSIOLOGY)
U DECOMPRESSION SICKNESS

BENZENE POISONING
Assessment of human exposures to atmospheric benzene
[PB-284203/7] p0051 N79-12701

BETA PARTICLES
Beta-adrenoceptor antagonists: Central effects
p0027 N79-11702

BIBLIOGRAPHIES
Pathophysiology of overloads: Bibliography of Soviet publications --- Russian book
p0200 A79-36385
Eutrophication. Volume 2: A bibliography with abstracts
[NTIS/PS-78/0771/2] p0013 N79-10695

BINARY DATA
Application of pseudo random binary sequence input to identification of respiratory control dynamics
p0268 A79-48011

BINARY SYSTEMS (DIGITAL)
U DIGITAL SYSTEMS

BINOCULAR VISION
The importance of providing stereoscopic vision in training for nap-of-the-earth /NOE/ flight
p0062 A79-18206
The perceived direction of the binocular image
p0104 A79-24069
Correlation of binocular vision test results with synaptophore evaluation
p0201 A79-37136
The relationship between the apparent vertical and the vertical horopter --- visual perception of luminous line
p0225 A79-40186
The influence of rapid prism adaptation upon fixation disparity
p0231 A79-42230
Visual angle constancy for the subjective checkerboard pattern, as an indication of cortical origination of size constancy
p0231 A79-42232
Spatial frequency masking in human vision - Binocular interactions
p0232 A79-42284
Eye torsion and visual tilt are mediated by different binocular processes
p0256 A79-46651
Stereopsis in monkeys using random dot stereograms - The effect of viewing duration
p0271 A79-49481

Dynamic measurement of human cyclofusional eye movements p0142 N79-18575

BIOACOUSTICS

A continuous wave, frequency modulated, ultrasonic device with auditory output for observing the heart p0045 A79-14602

Elicited acoustic responses to meaningful and meaningless verbal stimuli p0276 A79-50654

The effective acoustic environment of helicopter crewmen p0152 N79-19645

BIOASSAY

Studies on the bioassayable growth hormone-like activity of plasma p0267 A79-47848

Clinical usefulness of radiopaque markers in left ventricular function p0293 A79-51029

A new noninvasive technique for cardiac pressure measurement. II Scattering from encapsulated bubbles p0294 A79-51038

Bioassay of thermal protection afforded by candidate flight suit fabrics p0298 A79-52280

Automated clinical system for chromosome analysis [NASA-CASE-NPO-13913-1] p0050 N79-12694

Cyclic nucleotides and adaptation of the organism --- Russian Book
p0133 A79-26500
Process of search control of coordinated movement in man
p0166 A79-30701
Effect of the blockade of hypothalamic adrenergic structures on thermoregulatory reactions
p0167 A79-31950
Control theory and biosystems: Analysis of homeostatic properties --- Russian book
p0186 A79-34506
Self-regulation of cerebral circulation under orthostatic influences
p0221 A79-36098
Neural regulation of coronary circulation
p0208 A79-38148
Central and reflex mechanisms of controlling movements --- Russian book
p0251 A79-43950
Application of pseudo random binary sequence input to identification of respiratory control dynamics
p0268 A79-48011
Characteristics of somatic and autonomic regulation during work of small muscle groups as a function of loading regime
p0276 A79-50653
Calcium regulation in smooth muscle: Isolation and characterization of the myosin light chain kinase
p0024 N79-11680
User's instructions for the 41-node thermoregulatory model (steady state version)
[NASA-CR-160220] p0212 N79-24638
Acid-base homeostasis in the human system
[NASA-CR-160222] p0212 N79-24640
User's instructions for the erythropoiesis regulatory model
[NASA-CR-160193] p0216 N79-25711
Use of a computer model in the understanding of erythropoietic control mechanisms
[NASA-CR-160201] p0217 N79-25718
Dynamic regulation of erythropoiesis: A computer model of general applicability
[NASA-CR-160203] p0217 N79-25720
Fluid and electrolyte control systems in the human body: A study report
[NASA-CR-160210] p0217 N79-25723
On a basic model of circulatory, fluid, and electrolyte regulation in the human system based upon the model of Guyton
[NASA-CR-160212] p0218 N79-25725
Improvements and validation of the erythropoiesis control model for bed rest simulation
[NASA-CR-160187] p0218 N79-25728
User's instructions for the Guyton circulatory dynamics model using the Univac 1110 batch and demand processing (with graphic capabilities)
[NASA-CR-160215] p0218 N79-25731
Study report on guidelines and test procedures for investigating stability of nonlinear cardiovascular control system models
[NASA-CR-160229] p0219 N79-25734
The application of systems analysis and mathematical models to the study of erythropoiesis during space flight
[NASA-CR-160218] p0219 N79-25739

BIODEGRADATION
Waste treatment options for use in closed systems --- in space colonies
[AIAA PAPER 79-1409] p0187 A79-34843

BIODYNAMICS
Various modeling approaches in biomechanics --- analog simulation of impact events
p0005 A79-12407
Anatomical frames of reference and biomechanics
p0065 A79-18230
Anatomical coordinate systems for human body segments
p0065 A79-18231
Can man be calculated - Biological models in aeronautical medicine and engineering
p0161 A79-29589
Biodynamic effects of canopy loss in the TF-15 aircraft
p0163 A79-30651
Process of search control of coordinated movement in man
p0166 A79-30701
Improved measurements of shear modulus and pleural membrane tension of the lung
p0236 A79-43702
Central and reflex mechanisms of controlling movements --- Russian book
p0251 A79-43950
Biodynamics of aviation stresses on the vertebral column
p0272 A79-49733
Problem of modeling the mechanism of heart contraction
p0275 A79-50287
Mechanism for the regulation of human posture during movements of the foot
p0276 A79-50651
Biomechanical properties of muscles and the efficiency of movement
p0276 A79-50652
Possibility of quantitative evaluation of the heart's mechanical activity from seismocardiosignals
p0276 A79-50658

Lung inflation and longitudinal distribution of
pulmonary vascular resistance during hypoxia
p0277 A79-50905
Effect of hypoxia on mechanical properties of
hyperthyroid cat papillary muscle
p0296 A79-51111
Passive resistive torques about long bone axes of
major human joints
p0298 A79-52283
A spherical representation of a human body for
visualizing movement
p0301 A79-53096
Theoretical foundations of cardiovascular processes
--- Book
p0304 A79-53531
Basic biomechanics equations for cardiovascular flow
p0304 A79-53534
Equations on biotransport mechanisms
p0304 A79-53535
Isokinetic exercise: A review of the literature
[NASA-CR-151841] p0051 N79-12695
Analysis and validation of human biodynamic models
[AD-A059013] p0058 N79-13714
A study of the effect of forcing function
characteristics on human operator dynamics in
manual control
p0086 N79-15590
Photometric methods for the analysis of human
kinematic responses to impact environments
[AD-A062006] p0157 N79-19690
Prosthesis coupling
[NASA-CASE-KSC-11069-1] p0240 N79-26772
Effects of vibration on the human organism
p0249 N79-27862
Operator performance and localized muscle fatigue
in a simulated space vehicle control task
[NASA-TM-58220] p0259 N79-28867
Models and Analogues for the Evaluation of Human
Biodynamic Response, Performance and Protection
--- conferences, human tolerance of
acceleration, vibration, and shock
[AGARD-CP-253] p0284 N79-31901
Prediction of whole-body response to impact forces
in flight environments
p0284 N79-31902
Procedures used to generate input data sets for
the articulated total body model from
anthropometric data
p0284 N79-31903
A three dimensional discrete element dynamic model
of the spine, head and torso
p0285 N79-31910
Application of biodynamic models to the analysis
of F-16 canopy birdstrike
p0285 N79-31911
A failure criterion for human, vertebral,
cancellous bone
p0285 N79-31912
The use of spinal analogue to compare human
tolerance of repeated shocks with tolerance of
vibration, part 1
p0288 N79-31926
The biodynamic response of the human body and its
application to standards
p0288 N79-31929
Refinement and validation of a three-dimensional
head-spin model
[AD-A062502] p0307 N79-32826

BIOELECTRIC POTENTIAL
The event related cortical potential as an index
of task workload
p0038 A79-13208
Evoked potential correlates of display image quality
p0068 A79-18998
ST isopotential precordial surface maps in
patients with acute myocardial infarction
p0098 A79-21245
Electromagnetic fields and power deposition in
body-of-revolution models of man
p0130 A79-26007
Bilateral and interhemispheric asymmetry of
acoustic evoked potentials during monoaural
acoustic stimulation
p0159 A79-28735
Elicited acoustic responses to meaningful and
meaningless verbal stimuli
p0276 A79-50654
Nonshivering thermogenesis in normal and
dystrophic muscle
p0054 N79-13680
Bioelectrical activity of the brain during 49-day
antiorthostatic hypokinesia in individuals with
early signs of vegetovascular dysfunction
p0108 N79-16521
Synchronous brain evoked potential correlates of
directed attention in humans
p0110 N79-16537

BIOELECTRICITY
Conduction difficulties of vagal origin in flight
personnel - Significance of intrathoracic data
on the bundle of His --- neural activity effects
on heart block
p0103 A79-23955
Effects of vestibular stimuli on the electrical
activity of muscles
p0187 A79-35121
Changes in the bioelectrical activity of some
cerebral structures in rabbits exposed to
microwaves
p0188 A79-35917
A hypothesis of plasmonic absorption of RF energy
by biological objects
p0233 A79-42506
An empirical formula for broad-band SAR
calculations of prolate spheroidal models of
humans and animals --- Specific Absorption Rate
p0278 A79-51015
The effect of impact acceleration on the
electrical activity of the brain
p0287 N79-31921
Distinctions of influence of the reticular
formation of the midbrain on the heart and
respiration with exposure to centripetal
accelerations
p0312 N79-33800
Methods for localization of electrical sources in
the human brain and applications to the visual
system
p0314 N79-33815
Development of electrophysiological indices of
neurological toxicity for organophosphate
pesticides and depressant drugs
[AD-A070299] p0314 N79-33821
Experimental and theoretical investigations
concerning a frequency filter behavior of the
human retina regarding electric pulse currents
[NASA-TM-75372] p0314 N79-33822

p0010 A79-12864

Analysis of Pco2 differences during rebreathing due to slow pH equilibration in blood
p0067 A79-18958

Cardiac and vascular components of the systemic response of blood circulation to orthostatic influence
p0097 A79-20651

Regional blood supply under hypoxic hypoxia
p0097 A79-20652

Interaction between hypothalamic and bulbar levels of regulating blood circulation
p0098 A79-21242

Reliability of determining the cardiac output by the method of quadrupole chest impedance rheography
p0098 A79-21243

Self-regulation of cerebral circulation under orthostatic influences
p0221 A79-36098

The response of the microvascular canal to a hypoxic helium-containing medium
p0208 A79-38151

Application of an isolated heart model to investigate blood-oxygen delivery
p0296 A79-51112

The role of lesser circulation hemodynamic changes in pulmonary gas exchange
p0300 A79-53066

Bio-heat transfer processes, for human thermoregulatory and circulatory characteristics measurements
p0304 A79-53536

Noninvasive ultrasonic blood flow characterization
p0017 N79-10726

Changes in human renal function in passive head-up and head-down positions
p0072 N79-14722

The influence of mechanical vibration and noise on the peripheral blood circulation at skin level
[RAE-LIB-TRANS-1980] p0084 N79-15578

A study of cerebral blood flow in the goat. A. Correlations between the ventilatory and cerebrovascular responses to carbon monoxide inhalation. B. The dynamics of the cerebral blood flow response to hypoxia by frequency response analysis
p0107 N79-16510

Noninvasive techniques in the evaluation of the peripheral circulation
p0154 N79-19675

A long term model of circulation --- human body
[NASA-CR-147674] p0212 N79-24636

Effect of hyperbaric oxygen on peripheral blood neutrophil metabolism
p0245 N79-27830

Evaluation of circulatory reactions in the head to antiorthostatic position
p0245 N79-27832

Physiological fluid dynamics
[VKI-LECTURE-SERIES-32] p0247 N79-27843

Mechanics of arterial blood flow
p0247 N79-27846

Mechanics of the microcirculation
p0247 N79-27847

Techniques of measurement
p0247 N79-27850

BLOOD COAGULATION

Tissue gas and blood analyses of human subjects breathing 80% argon and 20% oxygen
p0164 A79-30655

State of blood clotting during prolonged hypokinesia
p0073 N79-14729

Blood clotting factors of the vascular wall and myocardium of hypokinetic rabbits
p0108 N79-16523

The effects of brain ischemia on the control of breathing in unanesthetized goats
p0190 N79-23624

Tissular blood clotting factors of vascular walls and myocardium during hypokinesia
p0194 N79-23644

Blood coagulation and tissular factors of blood clotting in heparinized rabbits submitted to hypokinesia
p0313 N79-33813

BLOOD FLOW

Aggregation of red cells and blood viscosity as models of materials experimentation in the space environment
[AIAA PAPER 79-0310] p0069 A79-19664

Hemodynamics in teenagers and asthmatic children during exercise
p0133 A79-27102

Organ blood flow, cardiac output, arterial blood pressure, and vascular resistance in rats exposed to various oxygen pressures
p0135 A79-27557

A fluid-mechanical study of the closure of heart valves
p0161 A79-29540

Control of skin blood flow during exercise - Thermal and nonthermal factors
p0185 A79-33807

Specific problems in cardiovascular fluid dynamics measurements

p0210 A79-39506

Disorder in pulsatile flow - Biomedical measurements with hot film, laser and ultrasound anemometers
p0210 A79-39509

Limb blood flow - Rest and heavy exercise in sitting and supine positions in man
p0235 A79-43208

A catheter flow probe for measurement of left ventricular source parameters
p0274 A79-50108

Clinical usefulness of radiopaque markers in left ventricular function
p0293 A79-51029

Cardiac blood flow measurement - A component of the comprehensive cardiac examination
p0295 A79-51041

Quantitative flow estimation with transcutaneous Doppler ultrasound
p0295 A79-51042

Application of an isolated heart model to investigate blood-oxygen delivery
p0296 A79-51112

Noninvasive ultrasonic blood flow characterization
p0017 N79-10726

A directional pulsed-Doppler ultrasonic blood flowmeter
p0050 N79-12693

Noninvasive assessment of pulmonary hypertension
[PB-285121/0] p0057 N79-13701

Effect of intermittent hypoxia on functional activity of peripheral blood neutrophils
p0074 N79-14732

Effect of cerebrocranial trauma on reactive distinctions of hypothalamic and hippocampal vessels in the presence of hypoxia
p0074 N79-14733

The effect of hyperoxia on cerebral blood flow in the unanesthetized pony
p0107 N79-16511

A transient analysis of the cerebrovascular response to carbon dioxide
p0111 N79-16539

Noninvasive techniques in the evaluation of the peripheral circulation
p0154 N79-19675

Mechanics of blood flow through normal and stenotic coronary arteries
p0154 N79-19676

Multiple tracer diffusion methods for the evaluation of cerebral capillary permeability and capillary blood flow rate in the rat
p0169 N79-20712

Aortic blood flow velocity during exercise in man
p0216 N79-25710

Physiological fluid dynamics
[VKI-LECTURE-SERIES-32] p0247 N79-27843

Mechanics of arterial blood flow
p0247 N79-27846

Mechanics of the microcirculation
p0247 N79-27847

Techniques of measurement
p0247 N79-27850

Ultrasonic doppler directional blood flow velocity meter
[RAE-LIB-TRANS-1918] p0279 N79-30920

Oxygen delivery in the hypoxic perfused heart: Relation to functional and metabolic changes
p0307 N79-32825

BLOOD PLASMA

Plasma volume and electrolyte shifts with heavy exercise in sitting and supine positions
p0161 A79-29336

Plasma electrolytes in relation to altitude tolerance in rats
p0163 A79-30652

Hyperthermia and exercise --- plasma fluid and electrolyte effects on human thermoregulation
p0252 A79-44775

The importance of light, postural and social cues in the regulation of the plasma cortisol rhythm in man
p0267 A79-47398

Studies on the bioassayable growth hormone-like activity of plasma
p0267 A79-47848

Plasma aldosterone, renin activity, and cortisol responses to heat exposure in sodium depleted and repleted subjects
p0297 A79-52023

Effect of oxygen poisoning on the spectrum of lactate dehydrogenase isozymes of rabbit blood plasma
p0017 N79-10721

Comparison of plasma and urinary steroids in men with type A and type B behavior patterns
p0028 N79-11704

Sterols bound with blood plasma proteins and erythrocyte membranes during hypokinesia
p0193 N79-23636

Electrolyte composition of rat blood plasma and skeletal muscles after flight aboard the Cosmos-690 biosatellite
p0311 N79-33795

Influence of pressure chamber conditions on adrenocortical function in man (according to results of assaying blood plasma 11-hydroxycorticosteroids)
p0311 N79-33798

BLOOD PRESSURE
NT DIASTOLIC PRESSURE
NT HYPERTENSION

Systolic time intervals during combined hand cooling and head-up tilt
p0135 A79-27554

Organ blood flow, cardiac output, arterial blood pressure, and vascular resistance in rats exposed to various oxygen pressures
p0135 A79-27557

Blood pressure variability of the individual in orthostatic testing
p0265 A79-47328

A catheter flow probe for measurement of left ventricular source parameters
p0274 A79-50108

Noninvasive cardiovascular measurements --- Book
p0293 A79-51026

A study of noninvasive blood pressure measurement techniques
p0294 A79-51036

Analyses for noninvasive monitoring of arterial blood pressure by /I/ phono cuff-sphygmomanometry, for discrete measurements and /II/ arterial ultrasonic imaging, for continuous measurements
p0294 A79-51037

A new noninvasive technique for cardiac pressure measurement. II Scattering from encapsulated bubbles
p0294 A79-51038

Cardiac blood flow measurement - A component of the comprehensive cardiac examination
p0295 A79-51041

Beta-adrenoceptor antagonists: Central effects
p0027 N79-11702

Clinical comparisons of pressure pulse and indicator dilution methods of determining cardiac output
p0050 N79-12690

Noninvasive assessment of pulmonary hypertension using bubble ultrasonic ringing (BURP) method, part 2
[PB-283935/5] p0051 N79-12699

A study of some of the factors influencing the left ventricular diastolic pressure-volume relationship and myocardial metabolism
p0154 N79-19674

Regulation of the carbon dioxide tension in arterial blood during inhalation of carbon dioxide in birds and mammals
p0169 N79-20713

Unsteady-state response of the vascular system to transient and sustained aerospace acceleration profiles
p0286 N79-31917

BLOOD PUMPS

Physical testing of polymers use in circulatory assist devices
[PB-286129/2] p0084 N79-15579

Development of an electrical energy converter for driving left heart assist blood pumps
[PB-293510/4] p0241 N79-26780

BLOOD VESSELS
NT AORTA
NT ARTERIES
NT CAPILLARIES (ANATOMY)
NT VEINS

Influences of physical conditioning and deconditioning on coronary vasculature of dogs
p0067 A79-18955

The bloodflow in skeletal muscle capillaries in normoxia and arterial hypoxemia /Microcinematographic studies/
p0208 A79-38150

Iodine imaging using spectral analysis --- radiography for visualization of small blood vessels
p0294 A79-51034

Quantitative flow estimation with transcutaneous Doppler ultrasound
p0295 A79-51042

Unsteady-state response of the vascular system to transient and sustained aerospace acceleration profiles
p0286 N79-31917

BLOOD VOLUME

Blood volume and cardiorespiratory responses to lower body negative pressure
p0010 A79-12864

Pulmonary blood volume and interventricular circulation time in physically trained and untrained subjects
p0128 A79-24700

Plasma volume and electrolyte shifts with heavy exercise in sitting and supine positions
p0161 A79-29336

Effects of regional hemoconcentration during LBNP on plasma volume determinations --- Lower Body Negative Pressure
p0265 A79-47326

Investigation of blood subjected to volume tension
p0275 A79-50261

Early cardiovascular adaptation to zero gravity simulated by head-down tilt
[IAF PAPER 79-77] p0301 A79-53286

BLUE GREEN ALGAE

Evolution of early life inferred from protein and ribonucleic acid sequences
p0206 A79-37980

Distribution of bluegreen algae in a Mississippi Gulf Coast salt marsh
[PB-288982/2] p0153 N79-19667

Citric acid enhancement of copper sulfate toxicity to blue-green algae and other nuisance organisms
[PB-289490/5] p0170 N79-20718

Tissue gas and blood analyses of human subjects breathing 80% argon and 20% oxygen
p0164 A79-30655

Contribution of rib cage and abdomen-diaphragm to tidal volume during CO2 rebreathing
p0185 A79-33805

Positive pressure breathing as a protective technique in +Gz acceleration
p0201 A79-37132

Distribution of regional volumes and ventilation in excised canine lobes
p0236 A79-43703

Influence of exercise and CO2 on breathing pattern of normal man
p0237 A79-43704

Gas exchange under environmental stress
[AD-A058242] p0056 N79-13697
BREATHING APPARATUS
NT OXYGEN MASKS
The objective evaluation of aircrew protective breathing equipment. III - Improved types of mask/goggles combinations. IV - Fullface masks and hoods suitable for flight attendant use
p0184 A79-33638

The dynamic oxygen-regulator test stand
[AD-A060978] p0125 N79-17560
BRIGHTNESS
Cerebral hemodynamics and visual analyzer function following exposure to bright light
p0109 N79-16525

BRIGHTNESS DISCRIMINATION
Perceived quantization error. Effect of quantization function, reconstruction function and number of levels
[FOA-C-56015-H9] p0124 N79-17556
BROADBAND
An empirical formula for broad-band SAR calculations of prolate spheroidal models of humans and animals --- Specific Absorption Rate
p0278 A79-51015

BRONCHI
Modeling the effect of axial bronchial tension on

expiratory flow
p0067 A79-18957
BRONCHIAL TUBE
NT TRACHEA
BUBBLES
Detection of bubbles in decompression sickness
p0041 A79-13573
Application of a bubble formation model to decompression sickness in rats and humans
p0102 A79-23473
Scanning and transmission electron microscopy of the blood-bubble interface in decompressed rats
p0266 A79-47333
Effects of endogenous factors on the process of gas bubble formation in the body related to decompression
p0015 N79-10713
Hyperbaric decompression by means of bubble detection
[AD-A062441] p0171 N79-20726
BUILDING STRUCTURES
U BUILDINGS
BUILDINGS
Establishing habitability factors for the design of office environments
[AD-A056463] p0020 N79-10744
Human responses to fire: Three designs for research
[PB-284959/4] p0058 N79-13708
Measurements of radiofrequency field intensity in buildings with close proximity to broadcast stations
[PB-290944/8] N79-25750
BURNS (INJURIES)
Thermal conduction effects in human skin
p0265 A79-47329
Assessment of burns in accident fatalities
p0272 A79-49729
Effect of fiber and dye degradation products /FDP/ on burn wound healing
p0298 A79-52277
A porcine bioassay study of the physiological effects of fiber and dye degradation products (FDP) on burn wound healing
[AD-A066990] N79-25748
Mathematical models of skin burns induced by simulated postcrash fires as aids in thermal protective clothing design and selection
[AD-A066946] p0223 N79-25766
Diagnosis of cutaneous thermal burn injuries by multispectral imaging analysis
[NASA-CR-162103] p0279 N79-30922
BY-PRODUCTS
Decreased activity of palladium catalyst during processing of excreta
p0016 N79-10716

C

C-135 AIRCRAFT
Visual system for the Boom Operator Part Task Trainer --- KC-135 aerial refueling task simulator
p0137 A79-28162
C-141 AIRCRAFT
Study of crew task loading on the C-141A aircraft
[AD-A057346] p0034 N79-11746
CABIN ATMOSPHERES
NT SPACECRAFT CABIN ATMOSPHERES
Analysis of climatic data and cockpit thermal conditions at a fighter base in North West India
p0201 A79-37135
Effect of hypokinesia on animal resistance to chemical agents
p0109 N79-16524
CADMIUM
The distribution of cadmium and other metals in human tissues
[PB-285200/2] p0057 N79-13703
CAI
U COMPUTER ASSISTED INSTRUCTION
CALCIFICATION
Coronary calcification in the diagnosis of coronary artery disease
p0226 A79-40465
CALCIUM
Thresholds for Na/+/ and Ca/++/ effects on thermoregulation
p0045 A79-14774
Effects of magnesium, calcium, and serum on reversion of stable L-forms --- of soil bacterium
p0131 A79-26140
Effect of sodium and calcium ingestion on thermoregulation during exercise in man
p0163 A79-30624
Space osteoporosis - An electromagnetic hypothesis
p0165 A79-30666
Calcium regulation in smooth muscle: Isolation and characterization of the myosin light chain kinase
p0024 N79-11680
A correlation of the effects of cationic uncouplers on intact cardiac muscle and on calcium bound to isolated cardiac muscle plasma membranes
p0111 N79-16540
Changes in calcium ion activity due to magnetization of solution as the possible mechanism of biological action of magnetic fields
p0173 N79-20741
Study report on a double isotope method of calcium absorption
[NASA-CR-160194] p0216 N79-25712
Preliminary design specifications of a calcium model
[NASA-CR-160199] p0217 N79-25716
CALCIUM METABOLISM
Prolonged weightlessness and calcium loss in man
[IAF PAPER 78-48] p0002 A79-11219
A brief review of space flight calcium metabolism: Results and methodologies
[NASA-CR-160198] p0217 N79-25715
CALIBRATING
Calibration of three year old child dummies
[PB-268961/6] p0157 N79-19692
CALIFORNIA
Biomedical application in space, pilot program in the southern California region
[NASA-CR-160171] p0195 N79-23653
Energy supply and demand in California
p0242 N79-27603
CALORIC REQUIREMENTS
Caloric and exercise requirements of space flight - Biostereometric results from Skylab
p0128 A79-24637
CALORIC STIMULI
A study of the effects of six light conditions on caloric induced nystagmus
p0195 N79-23652
Effect of restricted activity on vestibular function
p0312 N79-33802
CAMERAS
NT TELEVISION CAMERAS
CANADA
The Canadian Forces Life Quality Improvement Programme
p0026 N79-11693
CANADAIR CF-104 AIRCRAFT
U F-104 AIRCRAFT
CANCER
Hyperthermia as an Antineoplastic Treatment Modality
[NASA-CP-2051] p0017 N79-10728
Hyperthermia in the treatment of cancer: A review of the radiobiological basis
p0017 N79-10729
The combined effects of pulsed magnetic radiation (diapulse) and chemotherapy on tumor bearing mice. The measurement of rodent palatal explants as a device for measurement of the biologic effects of nonionic radiation (EMR)
p0018 N79-10733
Coupling apparatus for ultrasonic medical diagnostic system
[NASA-CASE-NPO-13935-1] p0077 N79-14751
The lymph nodes and lymph vessels of the white rat
[BLL-RTS-11309] p0141 N79-18554
Isolation of virus-augmented tumor antigens
p0142 N79-18564
The dangerous relation between sunburn and skin cancer
[BLL-RTS-11310] p0142 N79-18573
A wide aperture focussed ultrasound system for detection of breast carcinoma by ultrasonic attenuation
p0142 N79-18577
Study of pharmaceutical industrial problems
[NASA-CR-160267] p0248 N79-27852
CANOPIES
Biodynamic effects of canopy loss in the TF-15 aircraft
p0163 A79-30651

Internal cockpit reflections of external point light sources for the model YAH-64 advanced attack helicopter
[AD-A056489] p0033 N79-11744

CAPILLARIES (ANATOMY)
Capillary fragility during air exposure of man to 1-5 ATA and after decompression
p0010 A79-12863
Multiple tracer diffusion methods for the evaluation of cerebral capillary permeability and capillary blood flow rate in the rat
p0169 N79-20712

CAPILLARY CIRCULATION
U CAPILLARY FLOW

CAPILLARY FLOW
Correction of transcapillary exchange in man under the influence of rotation on a centrifuge while immersed in water
p0110 N79-16533
Mechanics of the microcirculation
p0247 N79-27847

CARBOHYDRATE METABOLISM
The effect of plasmoidal slime on the metabolism of haploid cells of Physarum flavicomum and the respiration of isolated mitochondria
p0105 A79-24513
Energetic aspects of adaptation --- Russian book on metabolic responses to stress
p0167 A79-31906
Glucose metabolism in rat lung during exposure to hyperbaric O2
p0221 A79-36047
Insulin-like effect of bovine growth hormone in vivo as demonstrated by oxidation of C/14/-U-glucose in diabetic rats
p0252 A79-44797
COSMOS 936, experiment K204: The effects of space flight on some liver enzymes concerned with carbohydrate and lipid metabolism in the rat
p0023 N79-11675
Carbohydrate metabolism of the stimulated diaphragm muscle
p0050 N79-12689
Effects of intermittent magnetic field on activity of carbohydrate metabolism enzymes and oxygen uptake in testicular tissue
p0075 N79-14738
Effect of brief head-down position on parameters of carbohydrate metabolism and beta lipoprotein content of blood
p0311 N79-33797

CARBOHYDRATES
NT ADENOSINES
NT FATS
NT GLUCOSE
NT GLYCOGENS
NT HEXOSES
NT INOSITOLS
NT NUCLEOSIDES
NT POLYSACCHARIDES
Response of crown gall tissue to the space environment: Residual carbohydrates in supporting tissue --- COSMOS 782
p0020 N79-11653

CARBON
NT ACTIVATED CARBON
NT CARBON 14
Photosynthethic carbon reduction by seagrasses exposed to ultraviolet B radiation
[NASA-CR-160144] p0175 N79-21742

CARBON COMPOUNDS
NT FLUOROPOLYMERS
Prebiotic molecular evolution
p0203 A79-37928
Physical testing of polymers use in circulatory assist devices
[PB-286129/2] p0084 N79-15579

CARBON DIOXIDE
CO2 and exercise tidal volume
p0133 A79-27104
Contribution of rib cage and abdomen-diaphragm to tidal volume during CO2 rebreathing
p0185 A79-33805
Influence of exercise and CO2 on breathing pattern of normal man
p0237 A79-43704
Gas exchange under environmental stress
[AD-A058242] p0056 N79-13697
A transient analysis of the cerebrovascular response to carbon dioxide
p0111 N79-16539
Regulation of the carbon dioxide tension in arterial blood during inhalation of carbon dioxide in birds and mammals
p0169 N79-20713
The growth kinetics of freshwater algae
p0174 N79-21740
Computer program for calculation of oxygen uptake
[NASA-TM-78585] p0174 N79-21741
Metabolic rate meter and method
[NASA-CASE-MSC-12239-1] p0175 N79-21750
Investigations about the quantitative changes of carbon dioxide production in humans. Report 2: Carbon dioxide production during fever and its relationship with heat production
[NASA-TM-75452] p0211 N79-24632
Flight prototype CO2 and humidity control system
[NASA-CR-160224] p0222 N79-25760

CARBON DIOXIDE CONCENTRATION
Responses of conscious rabbits to CO2 at ambient temperatures of 5, 20, and 35 C
p0277 A79-50904

CARBON DIOXIDE REMOVAL
The dependence of the CO2 removal efficiency of LiOH on humidity and mesh size --- in spacecraft life support systems
[ASME PAPER 78-ENAS-5] p0006 A79-12554
Electrochemically regenerable carbon dioxide absorber
[NASA-CR-152099] p0262 N79-29794

CARBON DIOXIDE TENSION
NT HYPERCAPNIA
NT HYPOCAPNIA
Analysis of Pco2 differences during rebreathing due to slow pH equilibration in blood
p0067 A79-18958
Mechanics of the regulation of the respiratory system in man
p0160 A79-29258

CARBON ISOTOPES
NT CARBON 14

CARBON MONOXIDE
Synthesis of organic compounds from carbon monoxide and water by UV photolysis
p0099 A79-22077
The effects of carbon monoxide on dual-task performance
p0161 A79-29716
The effects of carbon monoxide and cyanide on the brain
p0024 N79-11682
The interaction of carbon monoxide and altitude on aviator performance: Pathophysiology of exposure to carbon monoxide
[AD-A055212] p0056 N79-13694
Translations on USSR science and technology: Biomedical and behavioral sciences, no. 51
[JPRS-72588] p0076 N79-14745
Liberation of carbon monoxide by man when working in protective gear
p0076 N79-14748
A study of cerebral blood flow in the goat. A. Correlations between the ventilatory and cerebrovascular responses to carbon monoxide inhalation. B. The dynamics of the cerebral blood flow response to hypoxia by frequency response analysis
p0107 N79-16510
Effects of oxides on nitrogen, Carbon monoxide and photochemical oxidants on the ECG during exercise and on cardiopulmonary function
[PB-291595/7] p0177 N79-21763

CARBON MONOXIDE POISONING
Developmental and hematological responses to low level exposure of carbon monoxide in mice
p0048 A79-16099
Carbon monoxide and human time discrimination - Failure to replicate Beard-Wertheim experiments
p0102 A79-23472
Characteristics of serious carbon monoxide poisoning
p0167 A79-32100
The combined effect of carbon monoxide and normobaric hyperoxia on animals
p0073 N79-14730

CARBON SUBOXIDES
Carbon suboxide and the genetic code --- in biochemical evolution

p0252 A79-44865
CARBON 14
Insulin-like effect of bovine growth hormone in vivo as demonstrated by oxidation of C/14/-U-glucose in diabetic rats
p0252 A79-44797
CARBOXYLATION
Prebiotic synthesis of amino acids by carboxylation of amines in oxidative atmosphere
p0203 A79-37937
CARBOXYLIC ACIDS
NT ACETIC ACID
NT TRYPTOPHAN
CARCINOGENS
Evaluation of toxic effects of organic contaminants in recycled water
[PB-291379/6] p0190 N79-22760
CARCINOMA
U CANCER
CARDIAC VENTRICLES
Microwave apexcardiography
p0231 A79-41848
Effects of endurance training on left ventricular dimensions in healthy men
p0237 A79-43706
A catheter flow probe for measurement of left ventricular source parameters
p0274 A79-50108
Clinical usefulness of radiopaque markers in left ventricular function
p0293 A79-51029
Temporal relation between onset of cell anoxia and ischemic contractile failure
p0300 A79-52895
Contour detector and data acquisition system for the left ventricular outline
[NASA-CASE-ARC-10985-1] p0017 N79-10724
Hybrid computation of left ventricular performance using noninvasive techniques
[AD-A063749] p0190 N79-22758
Influences of dietary fats on coronary flow rate and left ventricular work of the isolated rat heart
p0239 N79-26766
Effects of dietary fats on the coronary flow rate and the left ventricular function of the isolated rat heart
p0239 N79-26767
Characterization of cardiovascular function by automated monitoring of cardiac contractility and left ventricular wall motion activity
p0247 N79-27842
CARDIOGRAPHY
NT ECHOCARDIOGRAPHY
NT ELECTROCARDIOGRAPHY
NT MAGNETOCARDIOGRAPHY
NT PHONOCARDIOGRAPHY
NT SEISMOCARDIOGRAPHY
NT VECTORCARDIOGRAPHY
A tethering system for direct measurement of cardiovascular function in the caged baboon
p0200 A79-36576
Predictive accuracy of Q-X/Q-T ratio, Q-Tc interval, S-T depression and R wave amplitude during stress testing --- heart pathology
p0225 A79-40464
Real-time computerized fluoroscopic cardiac imaging
p0294 A79-51035
CARDIOLOGY
Cardiac response to whole-body heating
p0165 A79-30661
Some tests used in the practice of aviation medical examination for differential diagnosis of heart diseases
p0188 A79-35136
Frequency analysis of heart rate variability under flight conditions
p0202 A79-37713
Coronary calcification in the diagnosis of coronary artery disease
p0226 A79-40465
Modification of cardiac function by synchronized oscillating acceleration
p0278 A79-50908
Noninvasive cardiovascular measurements --- Book
p0293 A79-51026
Computer quantitation of angiocardiographic images
p0293 A79-51028
Computer quantitation of coronary angiograms
p0293 A79-51030
Clinical applications of new echocardiographic techniques
p0295 A79-51040
Biomagnetic instrumentation and measurement
p0295 A79-51043
Clinical magnetocardiography
p0295 A79-51044
Application of an isolated heart model to investigate blood-oxygen delivery
p0296 A79-51112
Possibilities and perspectives of tetrapolar transthoracic impedance rheophethysmography in noninvasive studies of hemo- and cardiodynamics
p0296 A79-51118
The metabolic demand and oxygen supply of the heart - Physiologic and clinical considerations
p0300 A79-52894
Temporal relation between onset of cell anoxia and ischemic contractile failure
p0300 A79-52895
Difficulties posed by left axis deviation in the evaluation of fliers, and their relations to the concept of left anterior hemiblock
p0029 N79-11714
Cardiological findings in 115 pilots: Diagnoses and assessment of their flying fitness
p0030 N79-11721
Normal and pathological cardiovascular findings in applicants to the Air Force service
p0031 N79-11722
Clinical comparisons of pressure pulse and indicator dilution methods of determining cardiac output
p0050 N79-12690
A correlation of the effects of cationic uncouplers on intact cardiac muscle and on calcium bound to isolated cardiac muscle plasma membranes
p0111 N79-16540
Technical evaluation report on the Aerospace Medical Panel London Specialists' Meeting, Fall 1977 --- disease prevention, flight fitness, and findings in cardiology and pulmonary function
[AGARD-AR-131] p0171 N79-20729
Specific findings in cardiology and pulmonary function with special emphasis on assessment criteria for flying
p0171 N79-20731

Special tests for astronaut selection - Study of cardiovascular reactions by the orthostatism test
p0047 A79-15490
Cardiac and vascular components of the systemic response of blood circulation to orthostatic influence
p0097 A79-20651
Interaction between hypothalamic and bulbar levels of regulating blood circulation
p0098 A79-21242
Cardiovascular regulatory response to lower body negative pressure following blood volume loss
p0101 A79-23470
Cardiorespiratory assessment of decongestant-antihistamine effects on altitude, +Gz, and fatigue tolerances
p0127 A79-24628
Central and cerebral hemodynamics and metabolism of the healthy man during head-down tilting
p0127 A79-24634
Time for loss of increased cardiac responsiveness to isoproterenol in cold-acclimated rats after removal from cold
p0128 A79-24636

Age trends in the cardiovascular dynamics of aircrewmen
p0136 A79-27560

Functional changes in the cardiovascular system of machine-tool operators under physical and neurologically stressful loads
p0160 A79-29270

Early cardiovascular adaptation to simulated zero gravity
p0162 A79-29727

Cardiac responses of dogs to nonsynchronous and heart synchronous whole-body vibration
p0162 A79-29728

Incidence of cardiovascular problems among flying personnel and their evaluation
p0182 A79-33186

Cardiac changes during behavioral stress in dogs
p0200 A79-36575

Specific problems in cardiovascular fluid dynamics measurements
p0210 A79-39506

Continuous metabolic and cardiovascular measurements on a monkey subject during a simulated 6-day Spacelab mission
p0229 A79-41713

Isolation of a shock-induced circulating cardiodepressant substance
p0257 A79-46967

Noninvasive cardiovascular measurements --- Book
p0293 A79-51026

Current status of cardiovascular imaging by transmission computed tomography
p0294 A79-51032

A new noninvasive technique for cardiac pressure measurement. II Scattering from encapsulated bubbles
p0294 A79-51038

Clinical applications of new echocardiographic techniques
p0295 A79-51040

Cardiac blood flow measurement - A component of the comprehensive cardiac examination
p0295 A79-51041

Time course of O2-pulse during various tests of aerobic power
p0297 A79-52024

Theoretical foundations of cardiovascular processes --- Book
p0304 A79-53531

Basic biomechanics equations for cardiovascular flow
p0304 A79-53534

Clinical and morphological studies of people in the course of long-term hypokinesia and subsequent readaptation
p0015 N79-10709

Cardiovascular, metabolic, and respiratory responses of sedentary females to equal metabolic workloads on the bicycle ergometer and treadmill
p0024 N79-11681

Experience with periodic aviation medical examinations
p0026 N79-11696

Beta-adrenoceptor antagonists: Central effects
p0027 N79-11702

Specific Findings in Cardiology and Pulmonary Function with Special Emphasis on Assessment criteria for Flying
[AGARD-CP-232] p0028 N79-11705

Reproducibility of human cardiovascular responses to orthostatic stress
p0030 N79-11720

Evaluation of cardiac risk and subject response to ameliorative efforts
p0031 N79-11723

Cardiovascular diseases as a cause of unfitness for flying service in aircrews of Italian Air Force: Etiopathogenesis, influence of performance in flight, and prevention
p0031 N79-11725

Cardiovascular fitness of pilots of transport aircraft
p0031 N79-11726

Cardiovascular studies of reducing and oxidizing agents
p0049 N79-12682

Development of high-resolution ultrasonic imaging techniques for detection and clinical assessment of cardiovascular disease
[PB-284686/3] p0052 N79-12703

Development of high-resolution ultrasonic imaging techniques for detection and clinical assessment of cardiovascular disease
[PB-286696/0] p0085 N79-15581

Aircraft flight simulation of spacelab experiment using an implanted telemetry system to obtain cardiovascular data from the monkey
p0147 N79-19022

Noninvasive techniques in the evaluation of the peripheral circulation
p0154 N79-19675

Cardiac adaptation to endurance training: Determined by echocardiography and electrocardiography
p0194 N79-23648

The effects of active and passive heat acclimatization procedures on the cardiovascular, thermoregulatory, and sweat rate responses to work in the heat in male humans
p0195 N79-23651

Physiological system integrations with emphasis on the respiratory-cardiovascular system
[NASA-CR-160230] p0213 N79-24643

User's instructions for the cardiovascular Walters model
[NASA-CR-160204] p0217 N79-25721

User's instructions for the high speed version of the cardiovascular exercise model
[NASA-CR-160211] p0218 N79-25724

User's instructions for the GE cardiovascular model to simulate LBNP and tilt experiments, with graphic capabilities
[NASA-CR-160216] p0219 N79-25732

Study report on guidelines and test procedures for investigating stability of nonlinear cardiovascular control system models
[NASA-CR-160229] p0219 N79-25734

Effect of brief head-down hypokinesia on pressure in various parts of the healthy man's cardiovascular system
p0245 N79-27831

Characterization of cardiovascular function by automated monitoring of cardiac contractility and left ventricular wall motion activity
p0247 N79-27842

Cardiovascular diseases, volume 3. A bibliography with abstracts
[NTIS/PS-79/0063/2] p0260 N79-28874

Possibility of improving assessment of cardio-pulmonary function by submaximal exercise on a bicycle ergometer
[BLL-RTS-11657] p0279 N79-30918

Frequency response of cardiovascular regulation in canines to sinusoidal acceleration at frequencies below 1 Hz (basis for biodynamic modeling)
p0286 N79-31915

The causes of decrements in aircrew performance physiological changes produced by vibration and other environmental stresses and response of the cardiovascular system to vibration and combined stress
[AD-A069952] p0318 N79-33845

CARGO AIRCRAFT
NT C-135 AIRCRAFT
NT C-141 AIRCRAFT

CAROTID SINUS REFLEX
Frequency response of cardiovascular regulation in canines to sinusoidal acceleration at frequencies below 1 Hz (basis for biodynamic modeling)
p0286 N79-31915

CARTILAGE
The relationship between adult articular cartilage thickness and dynamic loads of a uniaxial joint
p0154 N79-19671

U EXPLOSIVE DEVICES

CASCADES (FLUID DYNAMICS)
U FLUID DYNAMICS

CASE HISTORIES
Case report - Intracardial gas bubbles in relation to altitude decompression chokes
p0011 A79-12871

CATABOLISM
Hemoglobinemia in rats exposed to high altitude is not due to an overload of catabolic mechanisms
p0101 A79-23467

CATALASE
  Dynamics of the catalase activity of the blood of athletes under the influence of local decompression
  p0271 A79-49699
CATALYSIS
 NT AUTOCATALYSIS
  Four-man rated dual catalyst system for the recovery of water from urine
  [NASA-CR-152227] p0112 N79-16550
CATALYTIC ACTIVITY
  A simple analogical model for the selection of optical activity and of the most efficient catalysts in the course of molecular evolution
  p0204 A79-37957
  Decreased activity of palladium catalyst during processing of excreta
  p0016 N79-10716
CATECHOLAMINE
  Sustained operations and sleep deprivation - Effects on indices of stress
  p0009 A79-12859
  Effects of microwaves on catecholamine metabolism in the brain
  p0075 N79-14739
  Catecholamines and enzymes of metabolism thereof in the rat hypothalamus after flight aboard Cosmos-782 biosatellite
  p0244 N79-27822
CATHODE RAY TUBES
  Visual acuity with regard to simultaneous colored contrast on a television screen - Results
  p0103 A79-23952
  Providing an eye separator on a color cathode tube --- enhancing visual acuity
  p0152 N79-19639
CATIONS
 NT METAL IONS
  A correlation of the effects of cationic uncouplers on intact cardiac muscle and on calcium bound to isolated cardiac muscle plasma membranes
  p0111 N79-16540
CAVITATION
 U CAVITATION FLOW
CAVITATION FLOW
  Application of a bubble formation model to decompression sickness in rats and humans

CLIMATOLOGY
NT MICROCLIMATOLOGY
CLINICAL MEDICINE
Clinical importance of directional statistics for electrocardiographic differentiation of smoking habits
p0098 A79-21246
Pneumothorax and flight personnel --- incidence, etiology and treatment
p0103 A79-23956
The value of measuring ocular tonus as a test for detecting glaucoma in flight personnel
p0104 A79-23959
Characteristics of serious carbon monoxide poisoning
p0167 A79-32100
Myocardial infarction in young men
p0188 A79-35137
+Gz tolerance correlation with clinical parameters
p0235 A79-43213
Noninvasive cardiovascular measurements --- Book
p0293 A79-51026
Computer quantitation of coronary angiograms
p0293 A79-51030
Clinical applications of new echocardiographic techniques
p0295 A79-51040
Cardiac blood flow measurement - A component of the comprehensive cardiac examination
p0295 A79-51041
Biomagnetic instrumentation and measurement
p0295 A79-51043
Clinical magnetocardiography
p0295 A79-51044
Detection and supervision of obstructed respiratory flow in fliers. Advantages of debit-volume graphs
p0028 N79-11707
Difficulties posed by left axis deviation in the evaluation of fliers, and their relations to the concept of left anterior hemiblock
p0029 N79-11714
Cardiac conduction and aptitude problem of fliers. The benefits of endocavital recording of the His bundles
p0030 N79-11716
The advantages of ultrasonic echocardiography in the cardiological evaluation of fliers
p0030 N79-11718
Clinical comparisons of pressure pulse and indicator dilution methods of determining cardiac output
p0050 N79-12690
Automated clinical system for chromosome analysis
[NASA-CASE-NPO-13913-1] p0050 N79-12694
Noninvasive estimation of bilirubin and hemoglobin oxygen saturation in the skin by reflection spectrophotometry
p0054 N79-13684
Early detection of disease: The correlation of the volatile organic profiles from patients with upper respiratory infections with subjects of normal profiles
[NASA-CR-160100] p0121 N79-17532
Evaluation of clinical biofeedback
[PB-287776/9] p0123 N79-17544
The role of computer technology mathematical models in treatment of patients following heart surgery
p0170 N79-20721
Liquid crystal developments for medicine
p0175 N79-21746
Study report on combining diagnostic and therapeutic considerations with subsystem and whole-body simulation
[NASA-CR-160231] p0213 N79-24644
Possibility of improving assessment of cardio-pulmonary function by submaximal exercise on a bicycle ergometer
[BLL-RTS-11657] p0279 N79-30918
CLOSED ECOLOGICAL SYSTEMS
Developing closed life support systems for large space habitats
[AAS PAPER 78-145] p0099 A79-21260
Space biology and medicine
p0132 A79-26344
Systems integration in the development of controlled ecological life support systems
[AIAA PAPER 79-1406] p0187 A79-34842
Waste treatment options for use in closed systems --- in space colonies
[AIAA PAPER 79-1409] p0187 A79-34843
Closed regenerative life support systems for space travel - Their development poses fundamental questions for ecological science
p0228 A79-41702
Closed ecology in space from a bioengineering perspective
p0228 A79-41703
Microflora of water reclaimed in sealed compartments
p0193 N79-23638
Evaluation of oxidizability of air in closed areas
p0313 N79-33808
CLOSED LOOP SYSTEMS
U FEEDBACK CONTROL
CLOSTRIDIUM BOTULINUM
The effect of ultrasound on botulin toxin
[AD-A059544] p0142 N79-18566
CLOSURES
A fluid-mechanical study of the closure of heart valves
p0161 A79-29540
CLOTH
U FABRICS
CLOTHING
NT BOOTS (FOOTWEAR)
NT COVERALLS
NT FLIGHT CLOTHING
NT GLOVES
NT GOGGLES

NT PROTECTIVE CLOTHING
NT SPACE SUITS
NT SUITS
CLOTTING
Tissular blood clotting factors of vascular walls and myocardium during hypokinesia
p0194 N79-23644
Blood coagulation and tissular factors of blood clotting in heparinized rabbits submitted to hypokinesia
p0313 N79-33813
COAGULATION
NT BLOOD COAGULATION
Scanning and transmission electron microscopy of the blood-bubble interface in decompressed rats
p0266 A79-47333
COASTAL ECOLOGY
A biogeochemical study of the Abu Dhabi algal mats - A simplified ecosystem
p0132 A79-26373
COASTAL MARSHLANDS
U MARSHLANDS
COASTAL WATER
The application of remote sensors to a model for fish mapping
[INPE-1379-PE/176] p0071 N79-14712
COATINGS
NT PAINTS
NT PROTECTIVE COATINGS
COCHLEA
Effects of acute noise traumata on whole-nerve and single-unit activity
[IZF-1978-23] p0308 N79-32829
COCKPIT SIMULATORS
Tracking-task performance during heat stress simulating cockpit conditions in high-performance aircraft
p0236 A79-43675
COCKPITS
Physiological requirements for design of environmental control systems - Control of heat stress in high-performance aircraft
[ASME PAPER 78-ENAS-22] p0007 A79-12571

Investigation of arrangement of multipurpose displays and use of tailored control logic in a fighter aircraft cockpit
p0038 A79-13205
Multifunction keyboard configurations for single-seat, air-to-ground fighter cockpits
p0039 A79-13213
Factors that affect display size criteria in a cockpit display system
p0063 A79-18212
Better definition of eye to aortic valve distance in high acceleration cockpit /HAC/ seating geometries
p0183 A79-33632
Effect of cockpit temperature gradients on the validity of single-point measurements
p0234 A79-43203
Cockpit thermal stress and aircrew thermal strain during routine Jaguar operations
p0266 A79-47334
Internal cockpit reflections of external point light sources for the model YAH-64 advanced attack helicopter
[AD-A056489] p0033 N79-11744
In-flight toxicology of fixed and rotary wing aircraft crew stations
p0149 N79-19619
The use of biostereometry in helicopter cockpit design --- using a simulator and analytic geometry
p0150 N79-19629
The effective acoustic environment of helicopter crewmen
p0152 N79-19645
A human body and crew station modelling system for motion studies
p0287 N79-31922

COENZYMES
NT CYTOCHROMES
Effects of aeration on formation and localization of the acetyl coenzyme A synthetases of Saccharomyces cerevisiae
p0162 A79-30125

COGNITION
Shalit Perceptual Organization and Reduction Questionnaire (SPORQ). Report 2: Characteristics and reliability
[FOA-C-55031-H6] p0309 N79-32836

COGNITIVE PSYCHOLOGY
Rhythms in human performance - 1-1/2-hour oscillations in cognitive style
p0210 A79-39601
The role of cognitive switching in head-up displays --- to determine pilot ability to accurately extract information from either of two sources
[NASA-CR-3137] p0318 N79-33851

COHERENT ANTI-STOKES RAMAN SPECTROSCOPY
U RAMAN SPECTROSCOPY

COLD ACCLIMATIZATION
Human psychophysiology in extremal conditions --- Russian book on polar region adaptation
p0048 A79-15977
Time for loss of increased cardiac responsiveness to isoproterenol in cold-acclimated rats after removal from cold
p0128 A79-24636
Thermoregulation in swimmers and runners
p0227 A79-41186
Cross-adaptive effects of cold, hypoxia, or physical training on decompression sickness in mice
p0268 A79-47855

COLD TOLERANCE
Time for loss of increased cardiac responsiveness to isoproterenol in cold-acclimated rats after removal from cold
p0128 A79-24636
Responses of high altitude natives to a standard cold test at sea level
p0164 A79-30658
Thermoregulation in unrestrained rats during and after exposure to 1.5-4 G
p0227 A79-41185
Bimodal relationship of human tremor and shivering on introduction to cold exposure
p0298 A79-52278
Uncommon hypersensitivity to contacting cold water and cold air with propagated reflex-like erythema development
[BLL-RTS-11644] p0279 N79-30917

COLD WATER
Cold water survival suits for aircrew
p0298 A79-52282
Survival and protection of aircrew in the event of accidental immersion in cold water
[AGARD-AG-211(ENG)] p0196 N79-23661

COLD WEATHER TESTS
Responses of high altitude natives to a standard cold test at sea level
p0164 A79-30658
Evaluation of British and Canadian conductive rubber heating elements for handwear: Preliminary report
[AD-A052826] p0093 N79-15637
Man and materiel in the cold regions, part 1
[AD-A063752] p0178 N79-21771

COLLAGENS
Raman and infrared investigations of the nature of intracellular water
[AD-A061254] p0120 N79-17522

COLLECTION
Urine collection apparatus
[NASA-CASE-MSC-18381-1] p0195 N79-23657

COLLISION AVOIDANCE
Human factors considerations in establishing aircraft collision avoidance system alert thresholds
p0045 A79-14438
Collision avoidance response stereotypes in pilots and nonpilots
p0068 A79-18995

COLLISION WARNING DEVICES
U COLLISION AVOIDANCE
U WARNING SYSTEMS

COLLISIONS
NT BIRD-AIRCRAFT COLLISIONS
NT MIDAIR COLLISIONS
Test and evaluation of head restraints, seat backs, and anchorages in vehicles subjected to rear impact collision
[PB-289779/1] p0178 N79-21773

COLLOIDS
NT AEROSOLS
NT FOG
Coacervate drops as a model for precellular structures
p0204 A79-37960
Coacervate drops - Primitive forms of precells
p0204 A79-37962

COLOR
Regression models of search time for color-coded information displays
p0209 A79-38359
Light and color on a manned spacecraft
p0059 N79-13996
Electrophysiological determination of retinal sensitivity to color after intense monochromatic light adaptation
[AD-A063852] p0189 N79-22756

COLOR PERCEPTION
U COLOR VISION

COLOR TELEVISION
Digital color image compression in a perceptual space
p0136 A79-28013
A 25-inch precision color display for simulator visual systems
p0137 A79-28164
Contrast sensitivity of the human eye to various display phosphor types
[AD-A058383] p0056 N79-13695

COLOR VISION
Apparent saturation of blue-sensitive cones occurs at a color-opponent stage
p0002 A79-10474
Four years of color research for visual displays --- human performance consideration for use in aircraft
p0039 A79-13210
A controller's eye view of color
p0102 A79-23596
Visual acuity with regard to simultaneous colored contrast on a television screen - Results
p0103 A79-23952
Aeromedical implications of the X-Chrom lens for improving color vision deficiencies
p0135 A79-27556
Recognition by the human eye of colored symbols on different backgrounds

p0136 A79-27673
ISAAC-1 - A color sensing robot
p0138 A79-28168
Chromatic border distinctness - Not an index of hue or saturation differences
p0139 A79-28332
Deductive derivation of a mathematical model for spectral sensitivity of the human organ of sight. I, II
p0166 A79-31178
Visual contrast sensitivity functions obtained with colored and achromatic gratings
p0181 A79-32628
Detection of coloured stimuli by independent linear systems
p0231 A79-42229
Enhancement of luminance flicker by color-opponent mechanisms
p0252 A79-44582
Using color substitution pupil response to expose chromatic mechanisms
p0265 A79-47116
Contrast sensitivity of the human eye to various display phosphor types
[AD-A058383] p0056 N79-13695
Providing an eye separator on a color cathode tube --- enhancing visual acuity
p0152 N79-19639
Effects of vestibular factors on color-discriminating function of the human eyes following color preadaptation
p0192 N79-23632
Restoration of color perception after deadapting flashes
p0193 N79-23640
Contribution to the theory of photopic vision: Retinal phenomena
[NASA-TM-75507] p0315 N79-33823
COLORATION
U COLOR
COMA
The child in coma
p0094 N79-15890
Coma recovery
p0094 N79-15891
COMBAT
An Air Combat Effectiveness Study /ACES/ program
p0040 A79-13222
Development of automated performance measures for introductory air combat maneuvers
p0040 A79-13223
Air Combat Maneuvering Range /ACMR/ - Has operational performance measurement entered a Golden Age
p0064 A79-18221
Methodology to assess psychological stress and its impact in the air combat environment
[AD-A053874] p0057 N79-13707
Air-to-air combat skills: Contribution of platform motion to inertial training
[AD-A062738] p0173 N79-20743
COMBINED STRESS
Physiologic and performance measurements in simulated airborne combined stress environments
p0202 A79-37710
COMBUSTION PRODUCTS
Renal damage in mice following exposure to the pyrolysis products of polytetrafluoroethylene
p0066 A79-18306
COMFORT
A study of the available evidence on duration effects on comfort and task proficiency under vibration
p0258 A79-46399
COMMAND AND CONTROL
The man-computer division of tasks in the case of the control of complex technical systems --- applied to aircraft
p0061 A79-17683
Man/terminal interaction evaluation of computer operating system command and control service concepts --- in Spacelab
p0064 A79-18224
Combined monitoring, decision and control model for the human operator in a command and control desk
p0092 N79-15631
Combined discrete network: Continuous control modeling of man-machine systems
[AD-A071574] p0310 N79-32842

COMPUTERS
NT AIRBORNE/SPACEBORNE COMPUTERS
NT HYBRID COMPUTERS
The role of computer technology mathematical models in treatment of patients following heart surgery
p0170 N79-20721

CONCENTRATION (COMPOSITION)
NT CARBON DIOXIDE CONCENTRATION
NT MOISTURE CONTENT
Aphotometer for determining the biomass of microorgan from the ATP content
[BLL-RTS-11456] p0141 N79-18555
Effects of different values of urine pH during long-term storage on microflora composition
p0194 N79-23643
Investigation of albumin and globulin composition of blood of the crew of the Salyut-3 orbital station
p0244 N79-27820
Mathematical modeling of arterial oxygen saturation and eye-level blood pressure during +G sub Z stress
p0286 N79-31916

CONCENTRATORS
Health and safety hazards associated with solar concentration systems
p0200 A79-36628

CONDENSATION
Prebiotic condensation reactions using cyanamide
p0203 A79-37932
Prebiotic condensation of oligonucleotide
p0204 A79-37945

CONDITIONED REFLEXES
Early cardiovascular adaptation to zero gravity simulated by head-down tilt
[IAF PAPER 79-77] p0301 A79-53286
Ultrastructural development of the vestibular system of frog larvae in 0g simulation
[IAF PAPER 79-78] p0301 A79-53287
Neurophysiological bases of vestibular conditioning
p0013 N79-10699

CONDITIONED RESPONSES
U CONDITIONING (LEARNING)

CONDITIONING
Effect of physical conditioning on cardiac mitochondrial function
p0068 A79-18966

Sweating responses during heat acclimation and moderate conditioning p0185 A79-33803
CONDITIONING (LEARNING)
Role of autogenic training in psychophysiological conditioning of aviation school students p0098 A79-21244
Rat behavior in maze after flight aboard Kosmos-690 biosatellite p0014 N79-10705
CONDITIONS
NT FLIGHT CONDITIONS
CONDUCTIVE HEAT TRANSFER
Modeling heat transfer through human skin subjected to high external temperatures p0102 A79-23782
Application of similarity transformation to unsteady state heat migration problems in human skin and subcutaneous tissues p0233 A79-42932
CONDUCTORS
NT ELECTROLYTES
CONES
Evidence for the equivalent-background hypothesis in cones --- for dark adaptation thresholds p0232 A79-42233

Human/computer control of undersea teleoperators p0089 N79-15612
Earth orbital teleoperator systems evaluation [NASA-CR-150912] p0112 N79-16552
Advanced industrial robot control systems [PB-287273/7] p0113 N79-16558
Microprocessor: Based prosthetic control [PB-286652/3] p0113 N79-16559
Flight prototype CO2 and humidity control system [NASA-CR-160224] p0222 N79-25760
A theoretical investigation of power and control configurations for a high g-onset centrifuge drive system [AD-A070912] p0309 N79-32841

CONTROL SIMULATION
Simulation study on time series of heart responses p0037 A79-13197
A computer-based simulator simulator --- computer-assisted pilot training p0039 A79-13215
The multiloop concept of the pilot work load as a basis of future experiments and studies [ONERA, TP NO. 1978-10] p0045 A79-14795
Effects of target motion and image on AAA tracking --- Anti-Aircraft Artillery p0046 A79-14969
The human operator in the control system: Linear models --- German book p0132 A79-26356
Modeling human tracking performance in a high G-stress environment p0269 A79-48012
Pilot workload during final approach in congested airspace p0269 A79-48014
Driver steering dynamics measured in car simulator under a range of visibility and roadmaking conditions p0117 N79-17493
The driving simulator developed by the Institute for Perception TNO. A validation study in straight road driving [IZF-1978-16-PR-1] p0145 N79-18588
Helmet weight simulator [NASA-CASE-LAR-12320-1] p0223 N79-25761
Ergonomic research into human tolerances for roll and pitch as well as their influence on individual perception and reactions to control parameters [BMVG-FBWT-78-18] p0282 N79-30944

CONTROL STICKS
Influences of joystick spring resistance on the execution of simple and complex positioning movements p0119 N79-17517

CONTROL SYSTEMS
U CONTROL

CONTROL THEORY
A model for sensorimotor control and learning p0005 A79-12122
Application of control theory to the investigation of roll motion effects on pilot control behavior [AD-A054921] p0046 A79-14972
Control of robot manipulators from the modeling of their dynamics --- French thesis p0101 A79-23427
Control theory and biosystems: Analysis of homeostatic properties --- Russian book p0186 A79-34506
Stabilization of a biped walking machine with incomplete information on its phase coordinates p0273 A79-49879
Proceedings, 13th Annual Conference on Manual Control [NASA-CR-158107] p0114 N79-17475
The effects of deviate internal representations in the optimal model of the human operator p0114 N79-17477
A quasi-linear control theory analysis of timesharing skills p0115 N79-17479
A dual-loop model of the human controller p0115 N79-17480
Parameter estimation in a human operator describing function model for a two-dimensional tracking task p0115 N79-17481
An approach to the multi-axis problem in manual control --- optimal pilot model p0115 N79-17482
Error rate information in attention allocation pilot models p0115 N79-17483
The effects of participatory mode and task workload on the detection of dynamic system

failures
p0116 N79-17487
A control theoretic model of driver steering behavior
p0116 N79-17491
Modelling the human operator of slowly responding systems using linear models
p0117 N79-17492
A model of the human supervisor
p0117 N79-17495
Prediction of pilot-aircraft stability boundaries and performance contours
p0118 N79-17507
Use of the optimal control model in the design of motion cue experiments
p0118 N79-17510
The systemic principles of building a man-machine control staff --- functional analysis
p0249 N79-27861
The application of control theory to the investigation of roll motion effects on human operator performance
p0288 N79-31931

CONTROL VALVES
Microbial Check Valve for Shuttle
[ASME PAPER 78-ENAS-27] p0008 A79-12576

CONTROLLABILITY
Quantifying operator preference during human factors test and evaluation --- in helicopter design
p0062 A79-18202

CONTROLLED ATMOSPHERES
NT ARGON-OXYGEN ATMOSPHERES
NT CABIN ATMOSPHERES
NT HELIUM-OXYGEN ATMOSPHERES
NT SPACECRAFT CABIN ATMOSPHERES
Voice communication in artificial atmospheres --- Russian book
p0048 A79-16500
The combined effect of carbon monoxide and normobaric hyperoxia on animals
p0073 N79-14730

CONTROLLED STABILITY
U CONTROL

CONTROLLERS
NT SERVOMECHANISMS
Evaluation of models describing human operator control of slowly responding complex systems --- Thesis
p0167 A79-31494

CONVAIR MILITARY AIRCRAFT
U MILITARY AIRCRAFT

CONVECTION
Mathematical studies of oxygen transport to tissue
p0170 N79-20723

CONVECTIVE FLOW
Convective control of long-range coherence in plant growth regulation
p0006 A79-12515

CONVERGENCE
Region extraction using convergent evidence
[AD-A061591] p0124 N79-17552

CONVULSIONS
Effect of electroconvulsive shock on monoaminergic receptor binding sites in rat brain
p0162 A79-29925
The control and prevention of seizures in children, a developmental and environmental approach
p0094 N79-15892

COOLING
NT LIQUID COOLING
NT SURFACE COOLING
Epiphysis of rats under the combined action of hypoxia, hypercapnia and cooling
p0256 A79-46680

COORDINATE SYSTEMS
U COORDINATES

COORDINATES
Anatomical coordinate systems for human body segments
p0065 A79-18231

COORDINATION
Process of searca control of coordinated movement in man
p0166 A79-30701

COPILOTS
U AIRCRAFT PILOTS

COPPER
NT COPPER ISOTOPES
Cu-content of the liver of young mice in relation to a defect in the Cu-metabolism
[IRI-133-77-02] p0239 N79-26764

COPPER COMPOUNDS
Citric acid enhancement of copper sulfate toxicity to blue-green algae and other nuisance organisms
[PB-289490/5] p0170 N79-20718
Citric acid enhancement of copper sulfate toxicity to the blue-green algae ""aphanizomenon flos-aquae'' and ""microcystis aeruginosa''
[PB-291637/7] p0189 N79-22751

COPPER ISOTOPES
Results of a 64Cu-loading test applied to patients with an inherited defect in their Cu-metabolism (Menkes' disease)
[IRI-133-77-04] p0240 N79-26774
The oral 64Cu-loading test: Applications and problems
[IRI-133-78-02] p0240 N79-26775

CORIOLIS EFFECT
Voluntary movement control and adaptation to cross-coupled stimulation --- motion sickness avoidance
p0009 A79-12860

CORNEA
Experimental determination of maximum permissible exposure to laser radiation of 1.54-micron wavelength --- corneal damage
p0002 A79-10648

CORONARY ARTERY DISEASE
Predicting coronary artery disease with treadmill stress testing Changes in R-wave amplitude compared with ST segment depression
p0186 A79-34284
Coronary calcification in the diagnosis of coronary artery disease
p0226 A79-40465
Computer quantitation of coronary angiograms
p0293 A79-51030
The prediction of the existence or nonexistence of coronary artery disease using routine clinical laboratory measurement
p0028 N79-11703
Coronary atherosclerosis and fitness for flying
p0029 N79-11711
Detection of coronary artery disease in apparently healthy, asymptomatic aircrew members using thallium-201 myocardial perfusion scintigraphy
p0029 N79-11712
Left Anterior Hemiblock (LAH): Diagnosis and aeromedical risk
p0029 N79-11715
The impact of coronary vascular risk factors on professional aircrew license loss in the United Kingdom
p0031 N79-11724
The effect of moderate hypothermia on the circulatory and myocardial consequences of acute coronary ligation in dogs
p0049 N79-12683
Development and evaluation of instrument systems for noninvasive detection, characterization and quantification of atherosclerotic lesions
[PB-286851/1] p0085 N79-15582

CORONARY CIRCULATION
Regional coronary blood flow at rest and during high sustained +Gz in a miniature swine with subclinical, ischemic, coronary heart disease due to coronary stenosis
p0010 A79-12865
Influences of physical conditioning and deconditioning on coronary vasculature of dogs
p0067 A79-18955
Effect of exercise on collateral development in dogs with normal coronary arteries
p0067 A79-18960
Pulmonary blood volume and interventricular circulation time in physically trained and untrained subjects
p0128 A79-24700
Cardiac responses of dogs to nonsynchronous and heart synchronous whole-body vibration
p0162 A79-29728
Neural regulation of coronary circulation
p0208 A79-38148
Norepinephrine action on smooth muscle cells of coronary arteries

p0208 A79-38149
A catheter flow probe for measurement of left ventricular source parameters
p0274 A79-50108
Clinical usefulness of radiopaque markers in left ventricular function
p0293 A79-51029
Mechanics of blood flow through normal and stenotic coronary arteries
p0154 N79-19676
Influences of dietary fats on coronary flow rate and left ventricular work of the isolated rat heart
p0239 N79-26766
Effects of dietary fats on the coronary flow rate and the left ventricular function of the isolated rat heart
p0239 N79-26767
Oxygen delivery in the hypoxic perfused heart: Relation to functional and metabolic changes
p0307 N79-32825

CORPUSCULAR RADIATION
NT BETA PARTICLES
CORRELATION
NT DATA CORRELATION
NT SIGNAL ANALYSIS
CORSAIR AIRCRAFT
U A-7 AIRCRAFT
CORTICOSTEROIDS
NT ALDOSTERONE
Inhibition of the pituitary-adrenal response to stress during deprivation-induced feeding
p0235 A79-43605
Plasma aldosterone, renin activity, and cortisol responses to heat exposure in sodium depleted and repleted subjects
p0297 A79-52023
Effects of methylprednisolone sodium succinate on clearance of living E. coli from peripheral blood of dogs
[AD-A062123] p0169 N79-20717
Influence of pressure chamber conditions on adrenocortical function in man (according to results of assaying blood plasma 11-hydroxycorticosteroids)
p0311 N79-33798

COSMIC RADIATION
U COSMIC RAYS
COSMIC RAYS
Radiobiological investigations in Cosmos 782 space flight /Biobloc SP1 experiment/
p0006 A79-12518
Biological study of tobacco seeds flown in the joint Apollo-Soyuz test-project
p0006 A79-12519
Genetic effects of balloon flight in Drosophila melanogaster
p0006 A79-12520
Light flashes in space --- cosmic ray interaction with astronaut visual system
p0100 A79-22261
Development capacity of artemia cysts and lettuce seeds flown in Cosmos 936 and directly exposed to cosmic rays
p0127 A79-24632
Genetic effects of cosmic radiation on bacteriophage T4Br/+/ /On materials of biological experiment Soyuz-Apollo/
p0229 A79-41708
Preliminary results of Cytos experiment flown in Salyut VI - Investigations of Paramecium aurelia
p0229 A79-41709
The dose rate of cosmic ray radiation received by a biological target in the stratosphere and at altitudes of satellite orbits
p0233 A79-42623
Cosmic ray effects on the eyes of rats flown on COSMOS 782
p0022 N79-11669
Cosmic ray effects on the eyes of stationary and centrifuged rats flown on COSMOS 936, experiment K-207
p0024 N79-11678

COSMOGONY
U COSMOLOGY
COSMOLOGY
Lifecloud: The origin of life in the universe --- book
p0061 A79-17123
A review of recent concepts of the problem of the origin of life
p0221 A79-36081

COSMONAUTS
Preliminary selection of candidates for space flights
[IAF PAPER 79-83] p0302 A79-53289
Psychological training - One of the most important factors of enhancing the safety of space flights
[IAF PAPER 79-A-24] p0303 A79-53426
Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/
p0303 A79-53486
The cosmonaut in flight
[NASA-TT-F-17838] p0032 N79-11729
Salyut-6--Soyuz-29: Our commentary, the crew and the station
[NASA-TM-75393] p0174 N79-20745
Investigation of albumin and globulin composition of blood of the crew of the Salyut-3 orbital station
p0244 N79-27820

COSMOS SATELLITES
NT INTERCOSMOS SATELLITES
The joint US-USSR biological satellite program
p0182 A79-33050
US experiments flown on the Soviet satellite COSMOS 936
[NASA-TM-78526] p0023 N79-11671
The Cosmos 936 mission
p0023 N79-11672
Space radiation dosimetry onboard COSMOS 936: US portion of experiment K-206
p0023 N79-11677
Biochemical study of proteins of gastric and intestinal mucosa of rats flown aboard the Kosmos-605 biosatellite --- effects of space flight stress
p0192 N79-23631

COSMOS 782 SATELLITE
Radiobiological investigations in Cosmos 782 space flight /Biobloc SP1 experiment/
p0006 A79-12518
Stereological ultrastructural analysis of the axonal endings in the neuromuscular junction of rats after a flight on biosputnik 782
p0101 A79-23468
Studies of amino acid metabolism in the muscles of rats flown aboard the biosatellite Cosmos 782
p0230 A79-41714
US experiments flown on the Soviet Satellite COSMOS 782
[NASA-TM-78525] p0020 N79-11651
US experiments flown on COSMOS 782
p0020 N79-11652
Response of crown gall tissue to the space environment: Residual carbohydrates in supporting tissue --- COSMOS 782
p0020 N79-11653
Responses of crown gall tissue to the space environment: Tumor development and anatomy --- cosmos 782
p0020 N79-11654
Responses of crown gall tissue to the space environment: Glutamine synthetase activity --- cosmos 782
p0020 N79-11655
Responses to crown gall tissue to the space environment: Isozyme patterns --- cosmos 782
p0020 N79-11656
The morphogenetic responses of cultured totipotent cells of carrot (Daucus carota L.) at zero gravity --- cosmos 782
p0021 N79-11657
Killfish development in zero-G on COSMOS 782: Fundulus experiment K-104
p0021 N79-11659
Absence of gastric ulceration in rats after flight on the COSMOS 782
p0021 N79-11660
Effect of space flight on cell-mediated immunity --- COSMOS 782 satellite
p0021 N79-11661
Alterations in erythrocyte survival parameters in rats after 19.5 days aboard COSMOS 782
p0021 N79-11663
Histological studies on tibial bone of rats in the 1975 COSMOS-782 flight. Part 1: Endochondral osteogenesis; medullary bone turnover

p0022 N79-11665
Histological studies on tibial bone of rats in the 1975 COSMOS-782 flight. Part 2: Microradiographic study of cortical bone
p0022 N79-11666
Mineralization in teeth and jaws, as judged radiographically, in rats of the COSMOS-782 experiment
p0022 N79-11667
Quantitative analysis of selected bone parameters
p0022 N79-11668
Cosmic ray effects on the eyes of rats flown on COSMOS 782
p0022 N79-11669
Effects of weightlessness on the embryonic development and aging of Drosophila
p0022 N79-11670
Intensity of DNA synthesis in animal organs after flight aboard the Cosmos-782 biosatellite
p0311 N79-33796

COSMOS 936 SATELLITE
Development capacity of artemia cysts and lettuce seeds flown in Cosmos 936 and directly exposed to cosmic rays
p0127 A79-24632
Biological experiments carried out aboard the biological satellite Cosmos-936
p0230 A79-41717
Some neurochemical characteristics of rats after space flight in the Cosmos-936 satellite
p0299 A79-52475

COST ANALYSIS
USAF life support equipment costs
p0083 A79-14402
Life cycle costing of simulated vs actual equipment for intermediate maintenance training --- for F-16 avionics
p0064 A79-18217
Cost analysis of pilot training systems
[SAE PAPER 781005] p0130 A79-25487

COST EFFECTIVENESS
AWAVS, a research facility for defining flight trainer visual system requirements
p0062 A79-18207
Simulator Training Requirements and Effectiveness Study /STRES/
p0063 A79-18216

COST REDUCTION
Very-large-scale integration - What it means for technical systems and humans
p0181 A79-32640

COUNTERS
Perceived quantization error. Effect of quantization function, reconstruction function and number of levels
[FOA-C-56015-H9] p0124 N79-17556

COUPLINGS
Prosthesis coupling
[NASA-CASE-KSC-11069-1] p0240 N79-26772

COVERALLS
Development of the CWU-48/P high temperature resistant aramid knit flyer's coverall
[AD-A059128] p0059 N79-13716

CRACKING (CHEMICAL ENGINEERING)
NT PYROLYSIS

CRASH INJURIES
Various modeling approaches in biomechanics --- analog simulation of impact events
p0005 A79-12407
SPH-4 helmet damage and head injury correlation
p0127 A79-24633
Head acceleration and psychomotor performance --- related to crash accident survival rates
p0135 A79-27559
Spinal injury pattern due to ejections
p0272 A79-49734
Passive resistive torques about long bone axes of major human joints
p0298 A79-52283
Analysis of naval aviation head and neck injuries (1969-1978)
[AD-A057657] p0026 N79-11689
Whole body response research program
[PB-286151/6] p0093 N79-15640
Whole body response research program. Appendix A: Methodology
[PB-286152/4] p0094 N79-15641
Whole body response research program. Appendix B: Raw data
[PB-286153/2] p0094 N79-15642
Whole body response research program. Appendix C: Processed data
[PB-286154/0] p0094 N79-15643
Tentative estimation of the injuries likely to occur during the crash of a SA 341 Gazelle helicopter, from a study on mannequins
p0287 N79-31925

CRASH LANDING
An inflatable restraint system --- for helicopter crash protection
p0044 A79-14408

CRASHES
NT CRASH LANDING
Test and evaluation of head restraints, seat backs, and anchorages in vehicles subjected to rear impact collision
[PB-289779/1] p0178 N79-21773
Evaluation of research on surrogates for humans in motor vehicle crashes
[PB-291012/3] p0178 N79-21774
The use of mathematical modeling in crashworthy helicopter seating systems
p0287 N79-31923

CREW PROCEDURES (INFLIGHT)
Spacelab's payload specialists, their selection and duties on-board
p0226 A79-40720

CREWS
NT FLIGHT CREWS
NT SPACECREWS

CRITERIA
Criteria for maximum tolerable heat stress. A proposal
[IZF-1978-13] p0144 N79-18583

CRITICAL FLICKER FUSION
Effect of physical training at moderate altitude /1850 m/ on hypoxic tolerance
p0235 A79-43210
Enhancement of luminance flicker by color-opponent mechanisms
p0252 A79-44582
The peripheral critical flicker frequency
p0271 A79-49482

CROP GROWTH
The impact of sulfur dioxide on vegetation: A sulfur dioxide-ozone response model
[PB-283604/7] p0049 N79-12686
Selected examples of dispersal of arthropods associated with agricultural crop and animal production
p0148 N79-19595

CRYOGENIC EQUIPMENT
System for and method of freezing biological tissue
[NASA-CASE-GSC-12173-1] p0013 N79-10694

CRYSTAL GROWTH
The growth of single crystals from proteins in gravity-free space
[AIAA PAPER 79-0311] p0069 A79-19665

CRYSTALS
NT LIQUID CRYSTALS
NT SINGLE CRYSTALS
Microanalytical identification of barium sulphate crystals in statoliths of Chara Rhizoids
[NASA-TM-75611] p0175 N79-21744

CUES
Use of the optimal control model in the design of motion cue experiments
p0118 N79-17510
A model for the pilot's use of motion cues in roll-axis tracking tasks
p0118 N79-17512
Manual control of yaw motion with combined visual and vestibular cues
p0119 N79-17513
Motion cue effects on human pilot dynamics in manual control
p0119 N79-17514
Motion cue models for pilot-vehicle analysis
[AD-A061477] p0125 N79-17561
Helmet weight simulator
[NASA-CASE-LAR-12320-1] p0223 N79-25761

CULTIVATION
Serendipitous solution to the problem of culturing Arabidopsis plants in sealed containers for spaceflights of long duration
p0229 A79-41704
Purification and cultivation of human pituitary growth hormone secreting cells

[NASA-CR-151853] p0051 N79-12697
Preparation of guinea pig macrophage for electrophoretic experiments in space
[NASA-CR-158777] p0243 N79-27814

CULTURE TECHNIQUES
Attachment to autoclaved soil of bacterial cells from pure cultures of soil isolates
p0297 A79-51701
Purification and cultivation of human pituitary growth hormone secreting cells
[NASA-CR-160242] p0219 N79-25736
Study of pharmaceutical industrial problems
[NASA-CR-160267] p0248 N79-27852

CURES
Aspects of dietary prevention of arteriosclerosis
p0262 N79-29792

CURRENT CONVERTERS (AC TO DC)
Development of an electrical energy converter for circulatory device
[PB-286738/0] p0111 N79-16545

CURRENT REGULATORS
Development of an electrical energy converter for circulatory device
[PB-286738/0] p0111 N79-16545

CURRENT STABILIZERS
U CURRENT REGULATORS

CURTISS-WRIGHT MILITARY AIRCRAFT
U MILITARY AIRCRAFT

CURVE FITTING
A numerical method of film analysis with differentiation --- curve fitting with harmonic analysis
p0061 A79-17585

CURVED SURFACES
U CONTOURS

CYANAMIDES
Prebiotic nucleotide oligomerization in a fluctuating environment - Effects of kaolinite and cyanamide
p0162 A79-29938
Prebiotic condensation reactions using cyanamide
p0203 A79-37932

CYANIDES
The effects of carbon monoxide and cyanide on the brain
p0024 N79-11682
The effects of the pollutant, sodium cyanide, on the morphology and physiology of oedogonium cardiacum
p0147 N79-19028

CYANO COMPOUNDS
NT CYANAMIDES

CYANOPHYTA
U BLUE GREEN ALGAE

CYBERNETICS
Elements of the theory of biological analyzers --- Russian book
p0132 A79-26450
Car driving as a cybernetic task
[IZF-1979-6] p0309 N79-32838

CYCLES
NT WORK-REST CYCLE

CYSTS
Coupling apparatus for ultrasonic medical diagnostic system
[NASA-CASE-NPO-13935-1] p0077 N79-14751

CYTOCHROMES
Evolution of early life inferred from protein and ribonucleic acid sequences
p0206 A79-37980

CYTOGENESIS
Evolutionary relationship based on a biochemical study of energy-acquiring system between Nitrosomonas europaea and Thiobacillus novellus
p0205 A79-37966
Evolution of transfer RNA
p0206 A79-37975

CYTOLOGY
The effect of plasmoidal slime on the metabolism of haploid cells of Physarum flavicomum and the respiration of isolated mitochondria
p0105 A79-24513
Energy transduction in Halobacterium halobium
p0300 A79-53000
Development and application of resistive pulse spectroscopy: Studies on the size, form and deformability of red blood cells
[LBL-8640] p0280 N79-30924

CYTOPLASM
Senescent changes in the ribosomes of animal cells in vivo and in vitro
p0134 A79-27226

DARK ADAPTATION
Primate cone sensitivity to flicker during light and dark adaptation as indicated by the foveal local electroretinogram
p0104 A79-24065
The equivalent background and retinal eccentricity
p0104 A79-24066
Evidence for the equivalent-background hypothesis in cones --- for dark adaptation thresholds
p0232 A79-42233
Changes in critical duration during dark-adaptation
p0304 A79-54252
Influence of light adaptation on dark adaptation time for pattern recognition tasks
[FB-31] p0316 N79-33835

DATA ACQUISITION
Contour detector and data acquisition system for the left ventricular outline
[NASA-CASE-ARC-10985-1] p0017 N79-10724
Aircrew inflight physiological data acquisition system 2
[AD-A055638] p0055 N79-13690
RNAV procedural turn anticipation techniques experiment no. 2, GAT-2A. Phase 3: 2 and 4 nmi offset tracking procedures
[AD-A060501] p0085 N79-15583
Strategic and tactical use of movement information in pest management
p0148 N79-19597
Regional program for acquisition of medical experiments
[NASA-CR-160121] p0155 N79-19677
Aircrew modularized inflight data acquisition system
[AD-A064725] p0190 N79-22766
Improvements in the man-machine interface for data acquisition, display and control
p0224 N79-25983
The information in aircraft accidents investigation
p0291 N79-31947

DATA ADAPTIVE EVALUATOR/MONITOR
U DATA PROCESSING
U DATA REDUCTION
U DATA TRANSMISSION

DATA ANALYSIS
U DATA PROCESSING
U DATA REDUCTION

DATA BASES
Human factors design criteria for transilluminated displays
p0036 A79-13187

DATA COMPACTION
U DATA COMPRESSION

DATA COMPRESSION
Digital color image compression in a perceptual space
p0136 A79-28013

DATA CONVERSION ROUTINES
NT SUBROUTINES

DATA CORRELATION
NT SIGNAL ANALYSIS
The development of the ATC selection battery: A new procedure to make maximum use of available information when correcting correlations for restriction in range due to selection

DECOMPRESSION SICKNESS
Intracardial gas bubbles and decompression sickness while flying at 9,000 m within 12-24 h of diving p0010 A79-12866
Case report - Intracardial gas bubbles in relation to altitude decompression chokes p0011 A79-12871
Detection of bubbles in decompression sickness p0041 A79-13573
Effect of decompression per se on nitrogen elimination p0067 A79-18964

Application of a bubble formation model to decompression sickness in rats and humans
p0102 A79-23473

Mechanical vs. ischemic mechanisms for decompression sickness
p0164 A79-30656

Doppler detection of thresholds for decompression-induced venous gas emboli in the awake rat
p0202 A79-37707

Scanning and transmission electron microscopy of the blood-bubble interface in decompressed rats
p0266 A79-47333

Cross-adaptive effects of cold, hypoxia, or physical training on decompression sickness in mice
p0268 A79-47855

Dynamics of the catalase activity of the blood of athletes under the influence of local decompression
p0271 A79-49699

Investigation of blood subjected to volume tension
p0275 A79-50261

Effects of endogenous factors on the process of gas bubble formation in the body related to decompression
p0015 N79-10713

Applied analysis of computer simulated decompression profiles
p0017 N79-10722

Early diagnosis for decompression sickness. Changes in the blood found shortly after decompression. Part 2: Experiments on rats
[MBL-1978-7] p0120 N79-17524

Hyperbaric decompression by means of bubble detection
[AD-A062441] p0171 N79-20726

Probability of caisson disease while wearing a space suit when exiting from a spacecraft with an atmosphere close to that of earth
p0244 N79-27826

Compatibility test of oxygen exposures in the range of 2.2 to 2.8 bar absolute
[DLR-FB-78-10] p0280 N79-30925

Fundamental biophysical aspects of decompression sickness
[AD-A069998] p0315 N79-33827

DECONDITIONING

Prophylactic effects of intermittent acceleration against physiological deconditioning in simulated weightlessness
p0229 A79-41712

Deconditioning-induced exercise responses as influenced by heat acclimation
p0273 A79-49985

DECONGESTANTS

Cardiorespiratory assessment of decongestant-antihistamine effects on altitude, +Gz, and fatigue tolerances
p0127 A79-24628

Effects of altitude and two decongestant-antihistamine preparations on physiological functions and performance
p0127 A79-24635

DECONTAMINATION

NT SPACECRAFT STERILIZATION

Thermal resistance of naturally occurring airborne bacterial spores --- Viking spacecraft dry heat decontamination simulation
p0131 A79-26147

DEFECTS

NT AUDITORY DEFECTS

DEFLATING

U INFLATABLE STRUCTURES

U PRESSURE REDUCTION

DEGRADATION

NT BIODEGRADATION

NT THERMAL DEGRADATION

Mechanisms of activated carbon degradation by perspiration
[AD-A059872] p0080 N79-14777

DEGREES OF FREEDOM

The development of a six degree-of-constraint robot performance evaluation test
p0117 N79-17504

DEHYDRATED FOOD

Maximizing storage stability of foods to be used for resupply in a controlled ecological life supply system: Evaluation of research
[NASA-CR-158846] p0260 N79-28880

DEHYDRATION

Prebiotic condensation reactions using cyanamide
p0203 A79-37932

Heat and acute dehydration effects on acceleration response
p0237 A79-43705

Specialized physiological studies in support of manned space flight
[NASA-CR-151876] p0111 N79-16542

The effects of dehydration on peripheral cooling

ELECTROCARDIOGRAPHY

Simulation study on time series of heart responses
p0037 A79-13197

Selection of astronaut candidates - Contribution of the exercise ECG and spirography
p0047 A79-15489

Value and limits of the electrocardiogram in aviation medicine evaluations
p0048 A79-15495

ST isopotential precordial surface maps in patients with acute myocardial infarction
p0098 A79-21245

Clinical importance of directional statistics for electrocardiographic differentiation of smoking habits
p0098 A79-21246

The effects of filtering the His-Purkinje system electrocardiogram
p0130 A79-26073

Single frequency RF powered ECG telemetry system
p0131 A79-26074

Electrocardiographic abnormalities in Air Force personnel
p0182 A79-33191

Predicting coronary artery disease with treadmill stress testing Changes in R-wave amplitude compared with ST segment depression
p0186 A79-34284

Aerobiotelemetry from a fighter aircraft
p0200 A79-37131

Influence of Beta-Blockade on asymptomatic ST-T wave changes - A follow up study
p0201 A79-37137

Some electrophysiological concepts of the U wave of ECG
p0201 A79-37138

Homomorphic analysis and modeling of ECG signals
p0210 A79-39973

The eccentric spheres model as the basis for a study of the role of geometry and inhomogeneities in electrocardiography
p0226 A79-40649

An inductively powered telemetry system for temperature, EKG, and activity monitoring
p0228 A79-41424

Microwave apexcardiography
p0231 A79-41848

Adjustment of an electronic model for electrocardiogram simulation
p0232 A79-42240

The evolutionary pattern of exercise-induced ST segment depression
p0251 A79-44166

The electrocardiogram recorded by telemetry during a parachute jump, compared to a trace during stress tests - A preliminary study of 29 cases
p0256 A79-46600

Non-invasive information on the P-R segment of the cardiac cycle - An assessment of the clinical potential of the electric and magnetic methods
p0295 A79-51045

Continuous long-duration recording of the heart rate by means of a noncontact technique
p0300 A79-53068

Theoretical foundations of cardiovascular processes --- Book
p0304 A79-53531

Fundamentals of electrical processes in the electrophysiology of the heart
p0304 A79-53532

Analysis of distribution of sequences of R-R intervals in astronauts: Generalized coordinate method
p0015 N79-10707

The significance of T wave abnormalities
p0029 N79-11713

Difficulties posed by left axis deviation in the evaluation of fliers, and their relations to the concept of left anterior hemiblock
p0029 N79-11714

Left Anterior Hemiblock (LAH): Diagnosis and aeromedical risk
p0029 N79-11715

Cardiac conduction and aptitude problem of fliers. The benefits of endocavital recording of the His bundles
p0030 N79-11716

Effects of oxides on nitrogen, Carbon monoxide and photochemical oxidants on the ECG during exercise and on cardiopulmonary function
[PB-291595/7] p0177 N79-21763

A nonlinear mapping approach to discrimination of sleep stages from the human electroencephalogram
p0314 N79-33817

[NASA-CR-158777] p0243 N79-27814
ELECTROPHYSICS
NT ELECTRO-OPTICS

ELECTROPHYSIOLOGY
Auditory analysis of complex sound: Electrophysiological investigations --- Russian book
p0167 A79-31899
Some electrophysiological concepts of the U wave of ECG
p0201 A79-37138
Electrophysiological investigation of sleep during work-shift regime and production-induced emotional stress
p0276 A79-50655
Electrophysiological correlates of local muscular fatigue effects upon human visual reaction time
p0297 A79-52025
Fundamentals of electrical processes in the electrophysiology of the heart
p0304 A79-53532
Electrophysiological determination of retinal sensitivity to color after intense monochromatic light adaptation
[AD-A063852] p0189 N79-22756
The effects of high nitrogen tensions of the properties of neuronal membranes and synaptic transmission
[AD-A063856] p0213 N79-24647
Effects of sleep at altered ambient temperatures on electrophysiological sleep and thermoregulatory mechanisms in human subjects and in the ground squirrel (Citellus lateralis)
p0216 N79-25709
The effect of impact acceleration on the electrical activity of the brain
p0287 N79-31921

ELECTROPLETHYSMOGRAPHY
Possibilities and perspectives of tetrapolar transthoracic impedance rheophethysmography in noninvasive studies of hemo- and cardiodynamics
p0296 A79-51118

ELECTRORETINOGRAPHY
An apparatus for studying electroretinographic responses under conditions of space flight
p0006 A79-12517
Primate cone sensitivity to flicker during light and dark adaptation as indicated by the foveal local electroretinogram
p0[illegible] A79-24065
Reciprocal interaction between the photopic and scotopic systems of the visual analyzer in man
p0296 A79-51327

ELECTROSTATIC CHARGE
Investigation of techniques to reduce electrostatic discharge susceptibility of EED's containing plastic plugs
[AD-A059982] p0093 N79-15638

Heat- and exercise-induced hyperthermia - Effects on high-energy phosphates p0266 A79-47332

EXOBIOLOGY
Life sciences and space research XVI; Proceedings of the Open Meetings of the Working Group on Space Biology, Tel Aviv, Israel, June 7-18, 1977 p0005 A79-12508
Life support systems for biological specimens in the Shuttle/Spacelab [ASME PAPER 78-ENAS-38] p0009 A79-12585
Spacelab and beyond - Bioscience problems in the use of space [DGLR PAPER 78-129] p0041 A79-14081
Biological implications of the Viking mission to Mars p0045 A79-14595
The Viking biological investigations - Review and status p0100 A79-22083
The physical appearance of intelligent aliens p0105 A79-24519
Space biology and medicine p0132 A79-26344
The response of selected terrestrial organisms to the Martian environment - A modeling study p0136 A79-27928
The importance of the physical laws on the origin and evolution of life p0207 A79-37983
Life sciences and space research XVII; Proceedings of the Open Meeting of the Working Group on Space Biology, May 29-June 10, 1978, and Symposium on Gravitational Physiology, Innsbruck, Austria, June 2, 3, 1978 p0228 A79-41701
Biological experiments carried out aboard the biological satellite Cosmos-936 p0230 A79-41717
Influence of orbital flight conditions on formation of genitals in Muscari racemosum and Anethum graveolens p0230 A79-41718
Space biology and aerospace medicine, vol. 12, no. 5, 1978 [JPRS-72115] p0013 N79-10698
US experiments flown on the Soviet Satellite COSMOS 782 [NASA-TM-78525] p0020 N79-11651
US experiments flown on COSMOS 782 p0020 N79-11652
Absence of gastric ulceration in rats after flight on the COSMOS 782 p0021 N79-11660
Experiment K-002: Results of histological examination of inguinal lymph nodes, supplementary report --- COSMOS 782 satellite p0021 N79-11662
Effects of space flight on plasma and glandular concentrations of pituitary hormones --- COSMOS 782 satellite p0021 N79-11664
Space biology and aerospace medicine, vol. 12, no. 6 [JPRS-72487] p0072 N79-14716
Exobiology and the origin of life --- organic compounds in planetary atmospheres and interstellar matter [NASA-CR-157988] p0081 N79-14782
Publications of the planetary biology program for 1977: A special bibliography [NASA-TM-80338] p0179 N79-21777

Space biology and aerospace medicine, no. 2, 1979 [JPRS-73377] p0190 N79-23627
Space biology and aerospace medicine, v. 13, no. 3, 1979 [JPRS-73784] p0243 N79-27817
BIOSPEX: Biological space experiments, a compendium of life sciences experiments carried on US spacecraft [NASA-TM-58217] p0251 N79-29784
Space Biology and Aerospace Medicine, no. 4, 1979 [JPRS-74330] p0310 N79-33789

EXPANDABLE STRUCTURES
NT GAS BAGS
NT INFLATABLE STRUCTURES

EXPECTATION
The effect of expectations on slow oculomotor control. I - Periodic target steps. II - Single target displacements p0225 A79-40185

EXPERIMENTAL DESIGN
Experimental designs for investigating complex human operator/machine systems p0040 A79-13225
The European life sciences experiments onboard the first Spacelab mission p0100 A79-22254
Importance of temperature control for HEFLEX, a biological experiment for Spacelab 1 --- plant gravitational physiology study p0230 A79-41716
Design, fabrication and utility of a flight oriented performance test p0271 A79-49728
Prospective Medicine Opportunities in Aerospace Medicine --- conferences [AGARD-CP-231] p0026 N79-11692
Early diagnosis for decompression sickness. Changes in the blood found shortly after decompression. Part 2: Experiments on rats [NBL-1978-7] p0120 N79-17524
A construct validation of adaptive achievement testing [AD-A063148] p0173 N79-20742
Knee flail design limits: Background, experimentation and design criteria [AD-A062384] p0220 N79-25746
Some of the problems involved in planning biological experiments p0312 N79-33805

EXPERIMENTATION
The Meduza experiment: An orbital complex ten weeks in flight [NASA-TM-75394] p0169 N79-20714

EXPIRATION
Modeling the effect of axial bronchial tension on expiratory flow p0067 A79-18957
Mechanics of breathing during graded exercise measured with the bodyplethysmograph p0029 N79-11709
Density dependence of maximum expiratory flow p0050 N79-12691

EXPIRED AIR
Metabolic rate meter and method [NASA-CASE-MSC-12239-1] p0175 N79-21750

EXPLORATION
NT SPACE EXPLORATION

EXPLOSIVE DECOMPRESSION
Scanning and transmission electron microscopy of the blood-bubble interface in decompressed rats p0266 A79-47333

EXPLOSIVE DEVICES
Safety evaluation tests of personal protective equipment for ordnance operations [AD-A058987] p0053 N79-12712
Investigation of techniques to reduce electrostatic discharge susceptibility of EED's containing plastic plugs [AD-A059982] p0093 N79-15638

EXPOSURE
Assessment of human exposures to atmospheric benzene [PB-284203/7] p0051 N79-12701
Developmental and hematological responses to low level continuous exposure of nitrogen dioxide in mice p0147 N79-19026
Electrophoresis pattern of serum from mice exposed to different concentrations of sulfur dioxide p0147 N79-19027
Radiation protection activities, 1977 [PB-290215/3] p0176 N79-21759
Radiofrequency radiation levels and population exposure in urban areas of the eastern United States [PB-292855/4] p0241 N79-26779
Direct exposure of monolayers of mammalian cells to airborne pollutants in a unique culture system [AD-A069822] p0283 N79-31897
Effects on populations of exposure to low levels of ionizing radiation: Implications for nuclear energy and medical radiation [LBL-9084] p0316 N79-33833

EXTENSIONS
Concept definition for an extended duration orbiter ECLSS [NASA-CR-160164] p0197 N79-23666

EXTRAGALACTIC LIGHT
U EXTRATERRESTRIAL RADIATION
U LIGHT (VISIBLE RADIATION)

EXTRATERRESTRIAL ENVIRONMENTS
NT JUPITER ATMOSPHERE
NT MARS ENVIRONMENT
NT PLANETARY ATMOSPHERES
NT PLANETARY ENVIRONMENTS
Development opportunities in the space environment p0095 N79-15897

EXTRATERRESTRIAL INTELLIGENCE
The physical appearance of intelligent aliens p0105 A79-24519
Extraterrestrial intelligence research [GPO-35-355] p0094 N79-15645

EXTRATERRESTRIAL LIFE
On the reality of extraterrestrial biogenesis [IAF PAPER 78-A-51] p0003 A79-11344
Public health considerations associated with a Mars surface sample return mission p0005 A79-12510
Biological implications of the Viking mission to Mars p0045 A79-14595
Lifecloud: The origin of life in the universe --- Book p0061 A79-17123
The Viking biological investigations - Review and status p0100 A79-22083
Chemical fingerprints of life in terrestrial soils and their possible use for the detection of life on Mars and other planets p0136 A79-27929
A review of recent concepts of the problem of the origin of life p0221 A79-36041
Solar-driven chemical energy source for a Martian biota p0254 A79-46464
Some comments on interpretations of Viking biological experiments p0255 A79-46465
Publications of the planetary biology program for 1978: A special bibliography [NASA-TM-80745] p0319 N79-33854

EXTRATERRESTRIAL RADIATION
NT GALACTIC RADIATION
NT SOLAR RADIATION
NT SUNLIGHT
Space radiation dosimetry onboard COSMOS 936: US portion of experiment K-206 p0023 N79-11677

EXTRAVEHICULAR ACTIVITY
Manual alignment of structural components in space [AIAA PAPER 79-0535] p0129 A79-25855
Construction in space - Toward a fresh definition of the man/machine relation p0187 A79-34985
The biomedical implications of extended duration zero-g extravehicular activities [IAF PAPER 79-ST-06] p0303 A79-53447
Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/ p0303 A79-53486
Manned maneuvering unit: User's guide [NASA-CR-151864] p0113 N79-16553
Simulated EVA operation of a remote connector assembly test report [NASA-CR-161167] p0156 N79-19687
Probability of caisson disease while wearing a space suit when exiting from a spacecraft with

an atmosphere close to that of earth
p0244 N79-27826

Light flashes in space --- cosmic ray interaction with astronaut visual system
p0100 A79-22261
Contributions of the retina and of the eye optical system to the modulation lowering of the aerial image
p0100 A79-22771
Hyper-resolution in human perception of movement in visual displays
p0132 A79-26240
Extrapolation of pulsed light data in scanned displays --- laser radiation eye exposure limits
p0138 A79-28170
Low level laser light effects --- on vision
p0138 A79-28171
Survey on eye comfort in aircraft. I - Flight attendants
p0165 A79-30665
Deductive derivation of a mathematical model for spectral sensitivity of the human organ of sight. I, II
p0166 A79-31178
A bioengineering simulator of the human visual apparatus
p0166 A79-31180
Better definition of eye to aortic valve distance in high acceleration cockpit /HAC/ seating geometries
p0183 A79-33632
Nonlinear optical susceptibility of the human eye to IR radiation in the 800 to 1355 micron range
p0188 A79-35363
The visual perception of motion in depth
p0210 A79-39087
Nonlinear perception of infrared radiation in the 800-1355 nm range with human eye
p0301 A79-53163
Changes in critical duration during dark-adaptation
p0304 A79-54252
Cosmic ray effects on the eyes of rats flown on COSMOS 782
p0022 N79-11669
Cosmic ray effects on the eyes of stationary and centrifuged rats flown on COSMOS 936, experiment K-207
p0024 N79-11678
Contrast sensitivity of the human eye to various display phosphor types
[AD-A058383] p0056 N79-13695
The physiological significance of light for human beings
[RAE-LIB-TRANS-1976] p0077 N79-14757
The want and feasibility to temper sunlight for the eyes
[IZF-1977-21] p0122 N79-17538
Official method for determining ocular irritation
[BLL-RTS-11221] p0142 N79-18571
Contrast sensitivity of the human visual system at one luminance level while adapted to a stimulus at another luminance level
[AD-A064370] p0190 N79-22759
Effects of vestibular factors on color-discriminating function of the human eyes following color preadaptation
p0192 N79-23632
Intraocular pressure reduction and regulation system
[NASA-TM-79187] p0260 N79-28881
The limited range of the human eye for optical aircraft acquisition
p0291 N79-31948
Contribution to the theory of photopic vision: Retinal phenomena
[NASA-TM-75507] p0315 N79-33823
Measurements in the laser irradiated eye
[AD-A069842] p0315 N79-33825
EYE DISEASES
NT GLAUCOMA
NT HYPEROPIA
EYE DOMINANCE
The perceived direction of the binocular image
p0104 A79-24069
A further investigation of visual dominance
p0186 A79-33949
EYE EXAMINATIONS
NT ELECTRONYSTAGMOGRAPHY
Visual acuity of the aging hyperopic eye in the intermediate range
p0037 A79-13198
Correlation of binocular vision test results with synaptophore evaluation
p0201 A79-37136
The use of synchronous demodulation for the measurement of eye movements by means of an ocular magnetic search coil
p0210 A79-39974
Laser Doppler technique for measurement of eye movement
p0233 A79-42450
An analysis of the saccadic system by means of double step stimuli
p0270 A79-49480
The peripheral critical flicker frequency
p0271 A79-49482
Advanced transport operation effects on pilot scan patterns
p0295 A79-51098
Lightweight helmet-mounted eye movement measurement system
p0303 A79-53516
The retinal resolving power measured by laser interference fringes
p0304 A79-54091
Mechanisms of retinal damage from chronic laser radiation: Thresholds and mechanisms

EYE MOVEMENTS
NT ELECTRONYSTAGMOGRAPHY
NT NYSTAGMUS
NT SACCADIC EYE MOVEMENTS
Lateral orientation and cerebral activation - Considerations for information display
p0037 A79-13194
Selection and techniques for analysis of indices of visual data reception. II --- aircraft pilot eye movements
p0047 A79-15494
Effects of information processing requirements on reaction time of the eye
p0064 A79-18219
Visual target acquisition and ocular scanning performance
p0069 A79-19000
Eye movements and symmetry - Foundations for a quantitative analysis of eye movements as they depend on the structure of the perception field --- German thesis
p0098 A79-20756
Effect of alcohol and marijuana on eye movements
p0101 A79-23469
Linearization and sensitivity analysis of model for human eye movements
p0102 A79-23783
Choice and techniques of analysis of indices for the perception of visual information. III --- by pilots
p0103 A79-23954
Contrast effects on smooth-pursuit eye movement velocity
p0104 A79-24068
Velocity precision in smooth pursuit eye movements
p0129 A79-25399
Visual-vestibular interactions. I - Influence of peripheral vision on suppression of the vestibulo-ocular reflex and visual acuity
p0135 A79-27552
Smooth pursuit eye movements - Is perceived motion necessary
p0139 A79-28375
Information transmission during eye movements
p0209 A79-38360
Methodological considerations of visual workloads of helicopter pilots
p0209 A79-38363

The use of synchronous demodulation for the measurement of eye movements by means of an ocular magnetic search coil
p0210 A79-39974

The role of perceived motion in smooth pursuit eye movements
p0225 A79-40184

The effect of expectations on slow oculomotor control. I - Periodic target steps. II - Single target displacements
p0225 A79-40185

The influence of rapid prism adaptation upon fixation disparity
p0231 A79-42230

Laser Doppler technique for measurement of eye movement
p0233 A79-42450

Eye torsion and visual tilt are mediated by different binocular processes
p0256 A79-46651

Spatial summation in human vision - Simple reaction time measurements
p0265 A79-47115

Eye movements and visual perception --- Russian book
p0267 A79-47429

Forms of oculomotor activity under conditions of positive visual feedback
p0276 A79-50657

Lightweight helmet-mounted eye movement measurement system
p0303 A79-53516

Optokinetic reactions in man elicited by localized retinal motion stimuli
p0304 A79-54251

Eye torsion in response to a tilted visual stimulus
p0305 A79-54254

Modeling of visual-vestibular interaction and the fast components of nystagmus
p0050 N79-12692

Effects of information processing requirements on reaction time of the eye
[AD-A060099] p0080 N79-14778

Lightweight helmet-mounted eye movement measurement system
p0090 N79-15619

A relationship between eye movement patterns and performance in a precognitive tracking task
p0116 N79-17490

Dynamic measurement of human cyclofusional eye movements
p0142 N79-18575

A method for semi-automatic analysis of eye movements
[DLR-MITT-79-02] p0283 N79-30946

EYE PROTECTION

Laser eye protection for flight personnel
p0135 A79-27555

Test and evaluation in the acquisition process - A look at the PLZT goggle
p0184 A79-33642

No harmful effects through infrared light emitting diodes
p0184 A79-33650

Health and safety hazards associated with solar concentration systems
p0200 A79-36628

Thermal effects during the exposure of ocular fundus tissues to laser radiation
p0234 A79-43057

Effects of high-LET neon /Ne-20/ particle radiation on the brain, eyes and other head structures of the pocket mouse - A histological study
p0252 A79-44798

Suprathreshold retinal damage due to single 6 picosecond 1060 nm laser light pulses
p0266 A79-47330

Responses of retinal and visual pathway potentials of the guinea pig to nitrogen and helium at high pressure
p0266 A79-47331

Laser eye protection for flight personnel, volume 1
[AD-A057417] p0034 N79-11747

The want and feasibility to temper sunlight for the eyes
[IZF-1977-21] p0122 N79-17538

Sunglasses for drivers?
[IZF-1977-24] p0122 N79-17539

EYEPIECES

Providing an eye separator on a color cathode tube --- enhancing visual acuity
p0152 N79-19639

F

F-4 AIRCRAFT

F-4J/N instructional system development: Phase 1
[AD-A061098] p0156 N79-19684

Air-to-air combat skills: Contribution of platform motion to inertial training
[AD-A062738] p0173 N79-20743

Correlation of mechanism of extremity injury and aerodynamic factors in ejections from F-4 aircraft
p0284 N79-31904

F-110 AIRCRAFT

U F-4 AIRCRAFT

F-15 AIRCRAFT

Biodynamic effects of canopy loss in the TF-15 aircraft
p0163 A79-30651

F-16 AIRCRAFT

Life cycle costing of simulated vs actual equipment for intermediate maintenance training --- for F-16 avionics
p0064 A79-18217

Application of learning curves of aircraft produced at more than one location to the F-16 lightweight fighter
[AD-A065881] p0196 N79-23664

Application of biodynamic models to the analysis of F-16 canopy birdstrike
p0285 N79-31911

Application of a structured decision process for proper inclusion of human resources in the design of a power unit support stand
[AD-A069978] p0309 N79-32840

F-18 AIRCRAFT

The application of computer aided evaluative techniques to system test and evaluation --- of fighter aircraft pilot performance
p0036 A79-13190

System operability - Concept and measurement in test and evaluation --- man system compatibility indices in F-18 aircraft example
p0062 A79-18204

F-104 AIRCRAFT

Oculogravic illusion in response to straight-ahead acceleration of a CF-104 aircraft
p0164 A79-30660

F-111 AIRCRAFT

Spinal injuries in the F/FB-111 crew escape system
p0274 A79-49996

FABRICATION

NT SPACE MANUFACTURING

FABRICS

Development of integrated tubing fabric for liquid conditioning undergarments
p0044 A79-14415

Bioassay of thermal protection afforded by candidate flight suit fabrics
p0298 A79-52280

Evaluation of four thermally protective fabrics using the USAARL bioassay method
[AD-A067351] p0223 N79-25762

FABRY-PEROT LASERS

U LASERS

FACE (ANATOMY)

Development of a specialized head/face protective device for test parachuting operations
p0045 A79-14437

Field evaluation of experimental crash-crew firefighter's facepiece
[AD-A066544] p0223 N79-25765

FACTOR ANALYSIS

Vigilance and electroencephalogram --- human performance in compensatory target tracking
p0100 A79-22975

Analysis of electroencephalogram during psychomotor performance
p0209 A79-38820

Time-sharing ability in complex performance: An expanded replication
[FAA-AM-78-33] p0145 N79-18591

A study of some of the factors influencing the left ventricular diastolic pressure-volume relationship and myocardial metabolism
p0154 N79-19674

FAILURE
NT SYSTEM FAILURES
The internal model: A study of the relative contribution of proprioception and visual information to failure detection in dynamic systems --- sensitivity of operators versus monitors to failures
p0087 N79-15596

FAILURE ANALYSIS
Development and utilization of internal models in dynamic systems: A comparison of monitors and operators as failure detectors
[AD-A069730] p0282 N79-30942

FAIRCHILD MILITARY AIRCRAFT
U MILITARY AIRCRAFT

FAR INFRARED RADIATION
Millimeter wave and far infrared absorption in biological systems
p0082 N79-15554

FAST FOURIER TRANSFORMATIONS
Computerized clinical electroencephalography in perspective
p0226 A79-40648

FAST NEUTRONS
Atmospheric neutrons
[NASA-CR-3126] p0211 N79-24631

FATIGUE (BIOLOGY)
NT FLIGHT FATIGUE
NT MUSCULAR FATIGUE
The assessment of rotary wing aviator precision performance during extended helicopter flights
p0040 A79-13221
How does the saccadic eye movement controller adapt for pathological states
p0046 A79-14961
Cardiorespiratory assessment of decongestant-antihistamine effects on altitude, +Gz, and fatigue tolerances
p0127 A79-24628
Saccadic velocity characteristics - Intrinsic variability and fatigue
p0165 A79-30663
Characteristics of somatic and autonomic regulation during work of small muscle groups as a function of loading regime
p0276 A79-50653
Honest 1: Personality, heart rate, urinary catecholamine, and subjective fatigue measures related to night nap-of-the-earth flying
[AD-A054888] p0055 N79-13692
Minuteman missile crew fatigue and 24-hour alerts
[AD-A056561] p0056 N79-13696
Comparative experiments on performance and fatigue effects on pilots using tracking tests and physiological measurement parameters
[RAE-LIB-TRANS-1971] p0080 N79-14774
Effects of fatigue on human behavior and performance. A bibliography with abstracts
[NTIS/PS-79/0071/5] p0177 N79-21762
Stress and fatigue in the driving environment --- physiological and psychological effects of heat and noise experienced inside automobiles
p0211 N79-24629

FATIGUE TESTS
Physical testing of polymers use in circulatory assist devices
[PB-286129/2] p0084 N79-15579
Evaluation of the Sierra Engineering Company lightweight helmet
[AD-A061799] p0157 N79-19689

FATS
Influences of dietary fats on coronary flow rate and left ventricular work of the isolated rat heart
p0239 N79-26766
Effects of dietary fats on the coronary flow rate and the left ventricular function of the isolated rat heart
p0239 N79-26767

FATTY ACIDS
NT ACETIC ACID
Effects of dietary fats on atherosclerosis and thrombosis
p0240 N79-26776

FEASIBILITY ANALYSIS
A safety margin and flight reference system and display for powered-lift aircraft
p0090 N79-15618

FECES
Automated biowaste sampling system feces monitoring system
[NASA-CR-160301] p0281 N79-30937

FEDERAL REPUBLIC OF GERMANY
U GERMANY

FEEDBACK
NT SENSORY FEEDBACK
A model of human decisionmaking in fault diagnosis tasks that include feedback and redundancy
p0163 A79-30222
Evaluation of biofeed therapy
[PB-287777/7] p0123 N79-17543
A discrete parameter model of the head and neck with neuromuscular feedback
p0211 N79-24627

FEEDBACK CONTROL
Simulation and control of a human temperature regulation system
p0041 A79-13613
Augmented feedback in adaptive motor skill training
p0062 A79-18208
Biped stability considerations with vestibular models
p0066 A79-18287
Transfer of landing skill after training with supplementary visual cues
p0138 A79-28167
A rationale for human operator pulsive control behavior
p0186 A79-34520
Pilot-optimal augmentation of the air-to-air tracking task
[AIAA 79-1747] p0252 A79-45388
A structural model of the adaptive human pilot
[AIAA 79-1784] p0252 A79-45411
Closed loop models for analyzing the effects of simulator characteristics --- digital simulation of human operators
p0087 N79-15598
The effects of closed loop tracking on a subjective tilt threshold in the roll axis
p0090 N79-15620
The effects of deviate internal representations in the optimal model of the human operator
p0114 N79-17477
A dual-loop model of the human controller
p0115 N79-17480
Evaluation of clinical biofeedback
[PB-287776/9] p0123 N79-17544
Investigations of respiratory control systems simulation
[NASA-CR-160213] p0218 N79-25726

FEEL
U SENSORY FEEDBACK

FEMALES
Response of women mountaineers to maximal exercise during hypoxia
p0234 A79-43201
Considerations associated with the introduction of female crewmembers in spacecraft and space stations
[IAF PAPER 79-A-22] p0303 A79-53424
Cardiovascular, metabolic, and respiratory responses of sedentary females to equal metabolic workloads on the bicycle ergometer and treadmill
p0024 N79-11681
Physiological responses of women to simulated weightlessness: A review of the first female bed-rest study
[NASA-SP-430] p0054 N79-13686
A comparison of the physiological responses in young men and women to heat and cold stress
[AD-A061024] p0155 N79-19679
Masculinity, femininity, androgyny. What really works at work
[AD-A061177] p0156 N79-19683
Urine collection apparatus
[NASA-CASE-MSC-18381-1] p0195 N79-23657
Air Force female pilots program: Initial performance and attitudes

Flight simulator training, volume 2. A bibliography with abstracts
[NTIS/PS-79/0277/8] p0222 N79-25758
Sensory mechanism modeling
[AD-A069439] p0262 N79-29796
Pilot performance in simulated aerial refueling as a function of tanker model complexity and visual display field-of-view
[AD-A070231] p0308 N79-32832
A theoretical investigation of power and control configurations for a high g-onset centrifuge drive system
[AD-A070912] p0309 N79-32841
FLIGHT SIMULATORS
NT COCKPIT SIMULATORS
Flight management research utilizing an oculometer --- pilot scanning behavior during simulated approach and landing
p0001 A79-10389
A computer-based simulator simulator --- computer-assisted pilot training
p0039 A79-13215
AWAVS, a research facility for defining flight trainer visual system requirements
p0062 A79-18207
A visual simulator with transformation of the perspective in the raster of television pictures --- German book on pilot training systems
p0069 A79-19375
Psychologists vs engineers --- flight simulators training requirements
p0132 A79-26499
Visual system for the Boom Operator Part Task Trainer --- KC-135 aerial refueling task simulator
p0137 A79-28162
Component performance of a 360 deg non-programmed visual display --- laser image flight simulator
p0137 A79-28163
The holographic Pancake Window --- magnifier for flight simulation display
p0138 A79-28172
Predictive validity of flight simulators as a function of simulator motion
p0181 A79-32627
Psychophysical assessment of angular vibration - Comparison of vertical and roll vibrations
p0234 A79-43206
The relationship between flight simulator motion and training requirements
p0267 A79-47766
Soviet civil aviation training programs
p0270 A79-49221
Compensation for transport delays produced by computer image generation systems
[AD-A056720] p0019 N79-10738
Subjective motion discrimination in the simulator for air-to-air combat
[AD-A059742] p0079 N79-14770
A model for the pilot's use of roll-axis motion cues in steady-state tracking tasks
[AD-A059594] p0079 N79-14772
The development and evaluation of objective frequency domain based pilot performance measures in ASUPT
[AD-A059477] p0080 N79-14776
Influence of motion wash-out filters on pilot tracking performance
[NLR-MP-78005-U] p0124 N79-17554
Oculomotor performance of aviators during an autorotation maneuver in a helicopter simulator
p0151 N79-19638
Aviator visual performance: A comparative study of a helicopter simulator and the UH-1 helicopter
p0153 N79-19652
Stress and simulation in pilot training
[AD-A066670] p0222 N79-25757
Flight simulator training, volume 2. A bibliography with abstracts
[NTIS/PS-79/0277/8] p0222 N79-25758
Helmet weight simulator
[NASA-CASE-LAR-12320-1] p0223 N79-25761
A lower body negative pressure box for +Gz simulation in the upright seated position
[AD-A069326] p0259 N79-28868
Effects on A-6E bombardier/navigator flight training with the introduction of device 2F114, A-6E weapon system trainer
[AD-A068607] p0289 N79-31933
Advanced training features: Bridging the gap between in-flight and simulator-based models of flying training
[AD-A068142] p0289 N79-31934
FLIGHT STRESS
The effect of Nap-of-the-Earth (NOE) helicopter flying on pilot blood and urine biochemicals
[AD-A055204] p0055 N79-13693
FLIGHT STRESS (BIOLOGY)
NT SPACE FLIGHT STRESS
Case report - Intracardial gas bubbles in relation to altitude decompression chokes
p0011 A79-12871
Physiological biorhythm as a correlate of pilot error accidents and incidents
p0065 A79-18228
Speed and load stress as determinants of performance in a time sharing task
p0068 A79-18999
Physiological aspects of flight --- Book
p0134 A79-27298
Paroxysmal disorders of consciousness due to flight factors
p0161 A79-29300
Oculogravic illusion in response to straight-ahead acceleration of a CF-104 aircraft
p0164 A79-30660
Rotation at 30 RPM about the Z axis after 6 hours in the 10-deg head-down position - Effect on susceptibility to motion sickness
p0165 A79-30662
Physiologic and performance measurements in simulated airborne combined stress environments
p0202 A79-37710
Frequency analysis of heart rate variability under flight conditions
p0202 A79-37713
Concurrent loss of consciousness and sino-atrial block during +Gz stress
p0202 A79-37714
Fighter index of thermal stress /FITS/ - guidance for hot-weather aircraft operations
p0202 A79-37715
Sources of noise stress on flying personnel
p0227 A79-41169
The vestibule and flying --- pilot disorientation
p0255 A79-46598
Aero Medical Society of India, Annual Meeting, 21st, Bangalore, India, December 15, 16, 1978, Proceedings
p0271 A79-49726
Design, fabrication and utility of a flight oriented performance test
p0271 A79-49728
In-flight measures of stress reduction due to wearing expandable foam earplugs
p0273 A79-49986
Development of adaptation to hypodynamics on rat and its readaptability to ambulatory life
[IAF PAPER 79-76] p0301 A79-53285
Reproducibility of human cardiovascular responses to orthostatic stress
p0030 N79-11720
Modeling the effects of high-G stress on pilots in a tracking task
p0087 N79-15593
Quantification and validation of percept-genetic defense mechanisms. A hierarchical analysis of

behavior of pilots under stress
[FOA-C-55020-H6] p0128 N79-17555
Human exposure to mechanical vibration at lying posture in the ambulance helicopter UH-1D
p0149 N79-19617
Backache in UH-1D helicopter crews
p0149 N79-19620
Prediction of whole-body response to impact forces in flight environments
p0288 N79-31902
Unsteady-state response of the vascular system to transient and sustained aerospace acceleration profiles
p0286 N79-31917
Medical and operational factors of accidents in advanced fighter aircraft
p0290 N79-31944
Between incident and accident
p0292 N79-31953

FLIGHT SURGEONS
Psychiatric education in aerospace medicine
p0202 A79-37712

FLIGHT TECHNICAL ERROR
U PILOT ERROR

FLIGHT TESTS
Joint testing of the RAF high altitude protective ensemble
p0044 A79-14434
Human factors considerations in establishing aircraft collision avoidance system alert thresholds
p0045 A79-14438
Special test for astronaut selection - Tests of tolerance in the centrifuge and in flight
p0047 A79-15491
Flight experience with manually controlled unconventional aircraft motions
p0088 N79-15602

FLIGHT TRAINING
NT SPACE FLIGHT TRAINING
Transfer of a computer-assisted instrument procedures trainer to flight
p0039 A79-13216
Development of automated performance measures for introductory air combat maneuvers
p0040 A79-13223
Recurrent training/supernumerary system
p0041 A79-132.3
Army Aviation Training - Research now and then
[SAE PAPER 781008] p0130 A79-25890
Universal airborne approach to pilot performance assessment
[SAE PAPER 781009] p0130 A79-25891
Training effectiveness versus simulation realism
p0138 A79-28166
The evaluation of a complex computer-based flight procedures trainer
p0161 A79-29717
Aeromedical aspects of flying training with special reference to instructor pupil relationship
p0201 A79-37139
Initial training and retraining of technical agricultural flight personnel
p0227 A79-41166
A7 training effectiveness through performance analysis --- carrier landing instruction
[AD-A056230] p0031 N79-11728
Effect of psychophysiological self-regulation on emotional stability of aviation cadets in flight and on effectiveness of assimilation of flight training program
p0074 N79-14735
A system of training in aviation physiology and human factors for Army and Navy helicopter aircrew
p0151 N79-19635
Training requirements for helicopter operation with night vision goggles
p0153 N79-19650
F-4J/N instructional system development: Phase 1
[AD-A061090] p0156 N79-19684
Stress and simulation in pilot training
[AD-A066670] p0222 N79-25757
Air Force female pilots program: Initial performance and attitudes
[AD-A065641] p0241 N79-26783
Effects on A-6E bombardier/navigator flight training with the introduction of device 2F114, A-6E weapon system trainer
[AD-A068607] p0289 N79-31933
Advanced training features: Bridging the gap between in-flight and simulator-based models of flying training
[AD-A068142] p0289 N79-31934
Development of an objective grading system along with procedures and aids for its effective implementation in flight
[AD-A071106] p0318 N79-33846

FLIR DETECTORS
Helicopter night operations - Feasibility and impact on the overall system --- helmet mounted FLIR detectors and image intensifier goggles
p0048 A79-16235
Real-time reconnaissance systems simulator
p0139 A79-28175
Human factors aspects of low light level television and forward looking infrared sensor displays. 11: A feasibility study of scaled subjective complexity of still scenes applied to computer image generation
[AD-A050938] p0058 N79-13715

FLORA
U PLANTS (BOTANY)

FLOW CHARACTERISTICS
NT FLOW STABILITY
NT FLOW VELOCITY

FLOW MEASUREMENT
A fluid-mechanical study of the closure of heart valves
p0161 A79-29540
Specific problems in cardiovascular fluid dynamics measurements
p0210 A79-39506
Disorder in pulsatile flow - Biomedical measurements with hot film, laser and ultrasound anemometers
p0210 A79-39509
Quantitative flow estimation with transcutaneous Doppler ultrasound
p0295 A79-51042
Density dependence of maximum expiratory flow
p0050 N79-12691
Techniques of measurement
p0247 N79-27850

FLOW RATE
U FLOW VELOCITY

FLOW STABILITY
Lung mechanics: Dynamic response, acoustic generation, and flow limitation
p0017 N79-10727

FLOW VELOCITY
Quantitative flow estimation with transcutaneous Doppler ultrasound
p0295 A79-51042
A directional pulsed-Doppler ultrasonic blood flowmeter
p0050 N79-12693
Aortic blood flow velocity during exercise in man
p0216 N79-25710

FLOW VISUALIZATION
Noninvasive assessment of pulmonary hypertension
[PB-285121/0] p0057 N79-13701

FLOWMETERS
NT ROTAMETERS
Ultrasonic doppler directional blood flow velocity meter
[RAE-LIB-TRANS-1918] p0279 N79-30920

FLUID DYNAMICS
Application of numerical methods to physiological flows --- Navier-stokes equation, prosthetic heart valves and vasoconstriction
p0146 N79-18945
Physiological fluid dynamics
[VKI-LECTURE-SERIES-32] p0247 N79-27843
Respiration
p0247 N79-27845
Mechanics of arterial blood flow
p0247 N79-27846

FLUID FLOW
NT BLOOD FLOW
NT CAPILLARY FLOW
NT CAVITATION FLOW
NT CONVECTIVE FLOW
NT GAS FLOW
NT UNSTEADY FLOW
A simple model of fluid flow and electrolyte balance in the body
[NASA-CR-160205] p0217 N79-25722

FLUID MECHANICS
NT FLUID DYNAMICS
NT HYDROSTATICS
A fluid-mechanical study of the closure of heart valves
p0161 A79-29540
FLUORESCENCE
Applications of chlorophyll fluorescence transient measurements to the functional analysis of photosynthetic processes
p0243 N79-27813
FLUORESCENT EMISSION
U FLUORESCENCE
FLUORINE COMPOUNDS
NT FLUOROPOLYMERS

FLUORINE ORGANIC COMPOUNDS
NT FLUOROPOLYMERS
FLUORO COMPOUNDS
NT FLUOROPOLYMERS
NT POLYTETRAFLUOROETHYLENE
FLUOROPOLYMERS
NT POLYTETRAFLUOROETHYLENE
Evaluation of fluoropolymer membranes in oxygenators
[PB-286698/6] p0112 N79-16547
FLUOROSCOPY
Real-time computerized fluoroscopic cardiac imaging
p0294 A79-51035
FLUTTER
Lung mechanics: Dynamic response, acoustic generation, and flow limitation
p0017 N79-10727
FLUX DENSITY
NT LUMINANCE
NT LUMINOUS INTENSITY
FLUX QUANTIZATION
Perceived quantization error. Effect of quantization function, reconstruction function and number of levels
[FOA-C-56015-H9] p0124 N79-17556
FLUXMETERS
U MEASURING INSTRUMENTS
FLYING PERSONNEL
NT AIRCRAFT PILOTS
NT ASTRONAUTS
NT COSMONAUTS
NT FLIGHT CREWS
NT PILOTS (PERSONNEL)
NT SPACECREWS
Some tests used in the practice of aviation medical examination for differential diagnosis of heart diseases
p0188 A79-35136
Detection and supervision of obstructed respiratory flow in fliers. Advantages of debit-volume graphs
p0028 N79-11707
Measuring systolic time intervals at rest and under stress by external methods. Advantages in the evaluation of fliers
p0030 N79-11717
The advantages of ultrasonic echocardiography in the cardiological evaluation of fliers
p0030 N79-11718
FLYING PLATFORM STABILITY
U AERODYNAMIC STABILITY
FOAMS
A preliminary toxicological study of silastic 386 foam elastomer: catalyst
[LA-7366-MS] p0071 N79-14714
FOCUSING
Night vision goggles and in-flight evaluation of the inside/outside refocusing problems in a UH-1H helicopter
p0063 A79-18215
FOG
Manual landings in Category 3 conditions
p0297 A79-52055
FOOD
A technology assessment of vegetable substitutes for animal protein in human food. Volume 1: The study
[PB-284681/4] p0059 N79-13719
A technology assessment of vegetable substitutes for animal protein in human food. Volume 2: Appendices
[PB-284682/2] p0059 N79-13720
Nitrogen fixation with photosynthetic marine microorganisms
[PB-286000/5] p0083 N79-15570
The Department of the Army's food irradiation program: Is it worth continuing
[PB-286399/1] p0094 N79-15644
FOOD INTAKE
Effects of dietary composition on nutritional state in rats during exposure to high altitude
p0134 A79-27118
Changes in the circadian rhythm of performance and mood in healthy young men exposed to prolonged, heavy physical work, sleep deprivation, and caloric deficit
p0234 A79-43202
Inhibition of the pituitary-adrenal response to stress during deprivation-induced feeding
p0235 A79-43605
Effects of endogenous factors on the process of gas bubble formation in the body related to decompression
p0015 N79-10713
FOREARM
Hemodynamics in teenagers and asthmatic children during exercise
p0133 A79-27102
FORECASTING
NT DELPHI METHOD (FORECASTING)
NT PERFORMANCE PREDICTION
NT PREDICTION ANALYSIS TECHNIQUES
NT TECHNOLOGICAL FORECASTING
Eye-ball control
p0270 A79-49225
FORECASTS
U FORECASTING
FOREIGN BODIES
Official method for determining ocular irritation
[BLL-RTS-11221] p0142 N79-18571
FOREIGN POLICY
NT INTERNATIONAL COOPERATION
FORESTS
Dispersal of forest insects
p0148 N79-19596
FORGING
Nonionizing radiation protection special study: Infrared radiation hazard evaluation of the rotary forge, Watervliet Arsenal, Watervliet, New York, March - April 1978
[AD-A055643] p0055 N79-13691
FORM PERCEPTION
U SPACE PERCEPTION
FORMALDEHYDE
Experimental approach to the chemical evolution in the primeval sea. I - Formation of amino acids and amino acid polymers in modified sea mediums
p0203 A79-37935
FORMING TECHNIQUES
NT FORGING
FORWARD LOOKING INFRARED DETECTORS
U FLIR DETECTORS
FOSSIL METEORITE CRATERS
U FOSSILS
FOSSILS
Epimerization of L-isoleucine on Na-montmorillonite and its implication to Precambrian chemical fossils
p0206 A79-37979
FOURIER ANALYSIS
Piecewise Fourier analysis of images and the role of occipital, temporal and parietal cortex in visual perception
p0160 A79-29248
FOURIER TRANSFORMATION
NT FAST FOURIER TRANSFORMATIONS
FOVEA
Contribution to the theory of photopic vision: Retinal phenomena
[NASA-TM-75507] p0315 N79-33823
FRACTURING
Vertebral fractures in Gnat ejections
p0201 A79-37134
FREE RADICALS
NT HYDROXYL RADICALS
FREEZE DRYING
Mechanisms of deterioration of nutrients --- improved quality of freeze-dried foods
[NASA-CR-160128] p0156 N79-19686
FREEZING
System for and method of freezing biological tissue
[NASA-CASE-GSC-12173-1] p0013 N79-10694

FREQUENCIES
NT AUDIO FREQUENCIES
NT BROADBAND
NT LOW FREQUENCIES
NT MICROWAVE FREQUENCIES
NT RADIO FREQUENCIES
NT SUPERHIGH FREQUENCIES
NT ULTRAHIGH FREQUENCIES

FREQUENCY RESPONSE
A new noninvasive technique for cardiac pressure measurement. II Scattering from encapsulated bubbles
p0294 A79-51038

FRESNEL LENSES
Application of Fresnel lenses to virtual image display --- for training simulators
p0139 A79-28173

FRINGE PATTERNS
U DIFFRACTION PATTERNS

FROGS
Ultrastructural development of the vestibular system of frog larvae in 0g simulation
[IAF PAPER 79-78] p0301 A79-53287

FROZEN FOODS
Method and arrangement for the preparation of solid foodstuffs for long-term storage
[BLL-RTS-11445] p0145 N79-18590
Mechanisms of deterioration of nutrients --- improved quality of freeze-dried foods
[NASA-CR-160128] p0156 N79-19686

FUELS
NT DIESEL FUELS
NT JET ENGINE FUELS
NT SYNTHETIC FUELS

FUNCTIONAL ANALYSIS
NT HARMONIC ANALYSIS
A survey of existing computer programs for aircrew workload assessment
[AD-A058518] p0059 N79-13718
Applications of chlorophyll fluorescence transient measurements to the functional analysis of photosynthetic processes
p0243 N79-27813
The systemic principles of building a man-machine control staff --- functional analysis
p0249 N79-27861

FUNCTIONS (MATHEMATICS)
NT DISCRETE FUNCTIONS
NT NORMAL DENSITY FUNCTIONS
NT PEARSON DISTRIBUTIONS
NT TIME FUNCTIONS
NT WEIGHTING FUNCTIONS

FUNGI
NT ASPERGILLUS
NT SACCHAROMYCES
NT SPORES
Materials of the final reports on the joint Soviet-American experiment on the Kosmos-936 biosatellite
[NASA-TM-75582] p0071 N79-14711
Orenburg symposium on mycotoxins
p0175 N79-21749
Effects of different values of urine pH during long-term storage on microflora composition
p0194 N79-23643

FUSIFORM SHAPES

GALACTIC EVOLUTION
Chirality of compounds essential for the existence of life, and the possibility of its evolution in the universe
p0186 A79-34464

GALACTIC RADIATION
Personnel neutron monitoring in space
[NASA-CR-151865] p0111 N79-16541

GALVANIC SKIN RESPONSE
Skin-resistance measuring device with higher resolution
p0252 A79-45476

GAMMA GLOBULIN
Investigation of albumin and globulin composition of blood of the crew of the Salyut-3 orbital station
p0244 N79-27820

GAMMA RADIATION
U GAMMA RAYS

GAMMA RAYS
3'5'-cyclic AMP content in rat tissues during hypoxic adaptation and gamma irradiation
p0069 A79-19426
Role of n-aminobenzoic acid in repairing UV and gamma radiation damage
p0301 A79-53211
Changes in blood sugar content of dogs exposed to chronic gamma radiation for six years
p0014 N79-10706
Comparative analysis of causes of animal deaths during chronic exposure to gamma radiation and the aftereffect period
p0016 N79-10718
Spermatogenesis in dogs during many years of chronic exposure to gamma radiation and in the aftereffect period
p0073 N79-14727
Ultrastructure of lymph nodes of dogs exposed to long-term external gamma radiation
p0312 N79-33808

GANGLIA
NT NERVES
NT NEURONS
Enchancement of luminance flicker by color-opponent mechanisms
p0252 A79-44582

GAS ANALYSIS
Transient changes in arterial blood gases and heart rate during and after acutely induced hypoxia and hyperoxia to rabbits
p0134 A79-27120
Tissue gas and blood analyses of human subjects breathing 80% argon and 20% oxygen
p0164 A79-30655
Investigation of composition of trace contaminants in the air environment of the Soyuz-22 spacecraft
p0072 N79-14720

GAS BAGS
Design considerations for inflatable head/neck restraint systems
p0043 A79-14407
An inflatable restraint system --- for helicopter crash protection
p0044 A79-14408

GAS CHROMATOGRAPHY
Concentration of trace contaminants during gas chromatography and chromato-mass spectrometry in biomedical research
p0109 N79-16528

GAS COMPOSITION
NT CARBON DIOXIDE CONCENTRATION

GAS DENSITY
The effect of the reduction of inspired gas density on external respiration
p0296 A79-51115

GAS DISCHARGE COUNTERS
U COUNTERS

GAS EVOLUTION
Inverse assimilation - A general principle of evolution of planetary surfaces
p0207 A79-37989

GAS EXCHANGE
Analysis of Pco2 differences during rebreathing due to slow pH equilibration in blood
p0067 A79-18958
Cerebral gas exchange in rats adapted to hypoxia during inspiration of oxygen-poor mixtures
p0097 A79-20623
The role of lesser circulation hemodynamic changes in pulmonary gas exchange
p0300 A79-53066
Analysis of inert gas exchange in the middle ear
p0017 N79-10723
Gas exchange under environmental stress
[AD-A058242] p0056 N79-13697
External respiration and gas exchange reactions to exercise during rotation of man on a short-radius centrifuge
p0193 N79-23639
Energy expenditures of man during long exposure to a periodically changing atmosphere

p0312 N79-33799
Adaptive optimization of exchange of gases in plants in a sealed phytotron
p0313 N79-33806
External respiration and gas exchange reactions of man during rotation on a short-arm centrifuge
p0313 N79-33812
GAS FLOW
Respiration

Ultrastructure of lymph nodes of dogs exposed to long-term external gamma radiation
p0312 N79-33804

GLASS ELECTRODES
Apparatus and method of inserting a microelectrode in body tissue or the like using vibration means
[NASA-CASE-NPO-13910-1] p0246 N79-27836
GLAUCOMA
The value of measuring ocular tonus as a test for detecting glaucoma in flight personnel
p0104 A79-23959

GLAUERT COEFFICIENT
U AERODYNAMIC FORCES
GLIDE LANDINGS
Pilot performance during simulated approaches and landings made with various computer-generated visual glidepath indicators
p0297 A79-52276

GLIDERS
Balance training of the equilibrium organ and its effect on flight strategy
p0242 N79-27074

GLOBULINS
NT GAMMA GLOBULIN
Obtaining growth hormone from calf blood
[NASA-TM-75326] p0283 N79-31895
GLOVES
Evaluation of British and Canadian conductive rubber heating elements for handwear: Preliminary report
[AD-A052826] p0093 N79-15637
Aluminized firemen's (fire proximity) handwear: Redesign of experimental prototype
[AD-A069895] p0290 N79-31940
GLUCOSE
Glucose metabolism in rat lung during exposure to hyperbaric O2
p0221 A79-36047
Insulin-like effect of bovine growth hormone in vivo as demonstrated by oxidation of C/14/-U-glucose in diabetic rats
p0252 A79-44797
Changes in blood sugar content of dogs exposed to chronic gamma radiation for six years
p0014 N79-10706
GLUTAMINE
Responses of crown gall tissue to the space environment: Glutamine synthetase activity --- cosmos 782
p0020 N79-11655

GLYCOGENS
Phosphorylase a in human skeletal muscle during exercise and electrical stimulation
p0067 A79-18962
Effects of glycogen depletion and work load on postexercise O2 consumption and blood lactate
p0277 A79-50903

GNOTOBIOTICS
Microbiological evaluation of the mobile biological isolator system
[NASA-CR-162293] p0307 N79-32822
GOATS
A study of cerebral blood flow in the goat. A. Correlations between the ventilatory and cerebrovascular responses to carbon monoxide inhalation. B. The dynamics of the cerebral blood flow response to hypoxia by frequency response analysis
p0107 N79-16510

GOGGLES
Night vision goggles and in-flight evaluation of the inside/outside refocusing problems in a UH-1H helicopter
p0063 A79-10215
The objective evaluation of aircrew protective breathing equipment. III - Improved types of mask/goggles combinations. IV - Fullface masks and hoods suitable for flight attendant use
p0184 A79-33638
Test and evaluation in the acquisition process - A look at the PLZT goggle
p0184 A79-33642
Visual and optical assessment of gas protective face masks
p0152 N79-19642
Operational consideration of AN/PVS-5 night vision goggles for helicopter night flight
p0152 N79-19649
Training requirements for helicopter operation with night vision goggles
p0153 N79-19650
GOVERNMENT PROCUREMENT
Test and evaluation in the acquisition process - A look at the PLZT goggle
p0184 A79-33642

GRAVITATIONAL EFFECTS
Life sciences and space research XVI: Proceedings of the Open Meetings of the Working Group on Space Biology, Tel Aviv, Israel, June 7-18, 1977
p0005 A79-12508
Geotropism of hornet comb construction under persistent acceleration
p0006 A79-12514
Cerebral accident subsequent to G-force loading - A case report
p0165 A79-30664
A model for vestibular function in altered gravitational states
p0229 A79-41710
Physiological effect of high, sustained +Gz forces on man
p0229 A79-41711
Influence of the ambient acceleration field upon acute acceleration tolerance in chickens
p0230 A79-41715
Importance of temperature control for HEFLEX, a biological experiment for Spacelab 1 --- plant gravitational physiology study
p0230 A79-41716
Radiographic comparison of human lung shape during normal gravity and weightlessness

p0305 A79-54269
Effects of weightlessness on the genetics and aging process of drosophila melanogaster
p0023 N79-11673
Role of gravity in early development
[NASA-TM-75590] p0049 N79-12684
Engineering test and evaluation during high G. Volume 2: Anti-G valves
[AD-A059521] p0081 N79-14780
GREENHOUSE EFFECT
Habitable zones about main sequence stars
p0136 A79-27930
GREENHOUSES
U PHYTOTRONS
GRIDS
Visual angle constancy for the subjective checkerboard pattern, as an indication of cortical origination of size constancy
p0231 A79-42232
The effect of active area on the legibility of dot matrix displays
[AD-A058014] p0052 N79-12708
GROUND BASED CONTROL
NT AIR TRAFFIC CONTROL
Human factors considerations in establishing aircraft collision avoidance system alert thresholds
p0045 A79-14438
Ergonomic problems regarding the interactive touch input via screens in onboard and ground-based flight control
p0061 A79-17695
Short-term memory factors in ground controller/pilot communication
p0181 A79-32626
Effects of space flight on plasma and glandular concentrations of pituitary hormones --- COSMOS 782 satellite
p0021 N79-11664
GROUND CREWS
Electrocardiographic abnormalities in Air Force personnel
p0182 A79-33191
Initial training and retraining of technical agricultural flight personnel
p0227 A79-41166
Soviet civil aviation training programs
p0270 A79-49221
Normal and pathological cardiovascular findings in applicants to the Air Force service
p0031 N79-11722
Minuteman missile crew fatigue and 24-hour alerts
[AD-A056561] p0056 N79-13696
Field evaluation of experimental crash-crew firefighter's facepiece
[AD-A066544] p0223 N79-25765
GROUND TESTS
Piloted aircraft simulation - Advantages, disadvantages, and practical problems
[SAE PAPER 780548] p0001 A79-10407

NT TOXIC HAZARDS
HEAD (ANATOMY)
Design considerations for inflatable head/neck restraint systems
p0043 A79-14407
Development of a specialized head/face protective device for test parachuting operations
p0045 A79-14437
SPH-4 helmet damage and head injury correlation
p0127 A79-24633
Quality of retinal image stabilization during small natural and artificial body rotations in man
p0225 A79-40187
Effects of high-LET neon /Ne-20/ particle radiation on the brain, eyes and other head structures of the pocket mouse - A histological study
p0252 A79-44798
Analysis of naval aviation head and neck injuries (1969-1978)
[AD-A057657] p0026 N79-11689
Changes in human renal function in passive head-up and head-down positions
p0072 N79-14722
A discrete parameter model of the head and neck with neuromuscular feedback
p0211 N79-24627
Multiaxis dynamic response of the human head and neck to impact acceleration
p0284 N79-31906
A head injury model
p0286 N79-31918
Correlation of head injury with mechanical forces based on helmet damage duplication
p0287 N79-31920
HEAD MOVEMENT
Voluntary movement control and adaptation to cross-coupled stimulation --- motion sickness avoidance
p0009 A79-12860
Optokinetic motion sickness - Attenuation of visually-induced apparent self-rotation by passive head movements
p0135 A79-27558
Head acceleration and psychomotor performance --- related to crash accident survival rates
p0135 A79-27559
Information transmission during eye movements
p0209 A79-38360
Dynamics of the eye and head during movement between displays - A qualitative and quantitative guide for designers
p0209 A79-38362
A comparison of oculomotor and motion parallax cues of egocentric distance
p0305 A79-54253
Head tracking at large angles from the straight ahead position
p0090 N79-15618
HEAD-UP DISPLAYS
Light weight solid state helmet symbol display and position system
p0046 A79-15177
Helicopter night operations - Feasibility and impact on the overall system --- helmet mounted FLIR detectors and image intensifier goggles
p0048 A79-16235
A head-up display for mid-air drone recovery
p0090 N79-15615
The role of cognitive switching in head-up displays --- to determine pilot ability to accurately extract information from either of two sources
[NASA-CR-3137] p0318 N79-33851

NT MYOCARDIUM

The metabolic demand and oxygen supply of the heart - Physiologic and clinical considerations
p0300 A79-52894

Noninvasive ultrasonic blood flow characterization
p0017 N79-10726

Development of an electrical energy converter for circulatory device
[PB-286738/0] p0111 N79-16545

Observability of electrical heart activity studied with singular value decomposition
[TR-78-E-81] p0148 N79-18584

Decrease in the functional abilities of the heart as a result of exposure of an organism to an electromagnetic field of industrial frequency
p0172 N79-20733

Distinctions of influence of the reticular formation of the midbrain on the heart and respiration with exposure to centripetal accelerations
p0312 N79-33800

HEART DISEASES
NT CORONARY ARTERY DISEASE

Regional coronary blood flow at rest and during high sustained +Gz in a miniature swine with subclinical, ischemic, coronary heart disease due to coronary stenosis
p0010 A79-12865

Clinical importance of directional statistics for electrocardiographic differentiation of smoking habits
p0098 A79-21246

Some tests used in the practice of aviation medical examination for differential diagnosis of heart diseases
p0188 A79-35136

Myocardial infarction in young men
p0188 A79-35137

Predictive accuracy of Q-X/Q-T ratio, Q-Tc interval, S-T depression and R wave amplitude during stress testing --- heart pathology
p0225 A79-40464

Comparative study of hypoxia and other non-invasive stress tests for evaluation of ischaemic heart disease
p0272 A79-49731

Magnetocardiography - An overview
p0274 A79-50107

Noninvasive cardiovascular measurements --- Book
p0293 A79-51026

Computer quantitation of angiocardiographic images
p0293 A79-51028

Clinical usefulness of radiopaque markers in left ventricular function
p0293 A79-51029

Cardiac blood flow measurement - A component of the comprehensive cardiac examination
p0295 A79-51041

Clinical magnetocardiography
p0295 A79-51044

Temporal relation between onset of cell anoxia and ischemic contractile failure
p0300 A79-52895

Experience with periodic aviation medical examinations
p0026 N79-11696

The significance of rhythm disturbances in asymptomatic persons
p0027 N79-11698

Cardiovascular diseases as a cause of unfitness for flying service in aircrews of Italian Air Force: Etiopathogenesis, influence of performance in flight, and prevention
p0031 N79-11725

Cardiovascular diseases, volume 3. A bibliography with abstracts
[NTIS/PS-79/0063/2] p0260 N79-28874

The relationship between aerobic fitness and cardiovascular risk factors in the Canadian forces
[AD-A069865] p0316 N79-33829

HEART FUNCTION
NT HEART MINUTE VOLUME

Biomagnetism and artificial magnetic stimulation of living structures
[IAF PAPER 78-52] p0002 A79-11222

Intracardial gas bubbles and decompression sickness while flying at 9,000 m within 12-24 h of diving
p0010 A79-12866

Influences of physical conditioning and deconditioning on coronary vasculature of dogs
p0067 A79-18955

Effect of physical conditioning on cardiac mitochondrial function
p0068 A79-18966

Norepinephrine uptake by the isolated heart of rats adapted and deadapted to hypoxia
p0097 A79-20621

Reliability of determining the cardiac output by the method of quadrupole chest impedance rheography
p0098 A79-21243

Mitral prolapse and acceleration --- in aircraft pilots
p0103 A79-23951

Cardiac reactions in tests on the wearing of the Yankee Escape System harness during minus G accelerations in the z direction
p0103 A79-23953

Conduction difficulties of vagal origin in flight personnel - Significance of intrathoracic data on the bundle of His --- neural activity effects on heart block
p0103 A79-23955

Systolic time intervals during combined hand cooling and head-up tilt
p0135 A79-27554

Organ blood flow, cardiac output, arterial blood pressure, and vascular resistance in rats exposed to various oxygen pressures
p0135 A79-27557

Age trends in the cardiovascular dynamics of aircrewmen
p0136 A79-27560

Conjoint effect of physical stress and noise stress on information processing performance and cardiac response
p0161 A79-29715

Early cardiovascular adaptation to simulated zero gravity
p0162 A79-29727

Cardiac responses of dogs to nonsynchronous and heart synchronous whole-body vibration
p0162 A79-29728

Cardiac response to whole-body heating
p0165 A79-30661

Electrocardiographic abnormalities in Air Force personnel
p0182 A79-33191

Cardiac changes during behavioral stress in dogs
p0200 A79-36575

A tethering system for direct measurement of cardiovascular function in the caged baboon
p0200 A79-36576

Influence of Beta-Blockade on asymptomatic ST-T wave changes - A follow up study
p0201 A79-37137

Some electrophysiological concepts of the U wave of ECG

p0201 A79-37138

Concurrent loss of consciousness and sino-atrial block during +Gz stress
p0202 A79-37714

Homomorphic analysis and modeling of ECG signals
p0210 A79-39973

Adjustment of an electronic model for electrocardiogram simulation
p0232 A79-42240

Effects of endurance training on left ventricular dimensions in healthy men
p0237 A79-43706

Effect of adaptation to high-altitude hypoxia on cardiac adrenoreactivity and the state of the adenylcyclase and phosphodiesterase systems in the myocardium
p0255 A79-46500

Isolation of a shock-induced circulating cardiodepressant substance
p0257 A79-46967

Problem of modeling the mechanism of heart contraction
p0275 A79-50287

Possibility of quantitative evaluation of the heart's mechanical activity from seismocardiosignals
p0276 A79-50658

Modification of cardiac function by synchronized oscillating acceleration
p0278 A79-50908

Application of an isolated heart model to investigate blood-oxygen delivery
p0296 A79-51112

Difficulties posed by left axis deviation in the evaluation of fliers, and their relations to the concept of left anterior hemiblock
p0029 N79-11714

Cardiac conduction and aptitude problem of fliers. The benefits of endocavital recording of the His bundles
p0030 N79-11716

Measuring systolic time intervals at rest and under stress by external methods. Advantages in the evaluation of fliers
p0030 N79-11717

Functional outcomes of prosthetic cardiac valve replacement
p0076 N79-14746

Temperature effects on shape and function of human granulocytes
[AD-A063750] p0189 N79-22757

Characterization of cardiovascular function by automated monitoring of cardiac contractility and left ventricular wall motion activity
p0247 N79-27842

HEART MINUTE VOLUME

Studies of hemodynamics and phase structure of cardiac cycle in the crew of Salyut-4
p0072 N79-14718

NT ARRHYTHMIA
NT BRADYCARDIA
NT SYSTOLE

Comparison of circadian rhythms in male and female humans
p0004 A79-11947

Simulation study on time series of heart responses
p0037 A79-13197

Effects of brief exposure of domestic fowl to very intense acceleration fields
p0127 A79-24631

Transient changes in arterial blood gases and heart rate during and after acutely induced hypoxia and hyperoxia to rabbits
p0134 A79-27120

Physical performance and peak aerobic power at different body temperatures
p0221 A79-36046

Frequency analysis of heart rate variability under flight conditions
p0202 A79-37713

Similarity in the number of lifespan heartbeats among non-hibernating homeothermic animals
p0298 A79-52281

Continuous long-duration recording of the heart rate by means of a noncontact technique
p0300 A79-53068

Analysis of distribution of sequences of R-R intervals in astronauts: Generalized coordinate method
p0015 N79-10707

The significance of rhythm disturbances in asymptomatic persons
p0027 N79-11698

Honest 1: Personality, heart rate, urinary catecholamine, and subjective fatigue measures related to night nap-of-the-earth flying
[AD-A054888] p0055 N79-13692

Studies of hemodynamics and phase structure of cardiac cycle in the crew of Salyut-4
p0072 N79-14718

A simulator study of the interaction of pilot workload with errors, vigilance, and decisions
[NASA-TM-78482] p0079 N79-14769

Heart rate: Physiological characteristics and quantification methods for use in behavioral studies
[CSIR-SR-PERS-276] p0121 N79-17531

A study of some of the factors influencing the left ventricular diastolic pressure-volume relationship and myocardial metabolism
p0154 N79-19674

Hybrid computation of left ventricular performance using noninvasive techniques
[AD-A063749] p0190 N79-22758

HEART VALVES

A continuous wave, frequency modulated, ultrasonic device with auditory output for observing the heart
p0045 A79-14602

Mitral prolapse and acceleration --- in aircraft pilots
p0103 A79-23951

A fluid-mechanical study of the closure of heart valves
p0161 A79-29540

Better definition of eye to aortic valve distance in high acceleration cockpit /HAC/ seating geometries
p0183 A79-33632

HEAT
NT DRY HEAT

HEAT ACCLIMATIZATION

Temperature-dependent morphological changes in membranes of Bacillus stearothermophilus
p0005 A79-12475

Sweating responses during heat acclimation and moderate conditioning
p0185 A79-33803

Thermoregulation in swimmers and runners
p0227 A79-41186

Intestinal transport of hexoses in the rat following chronic heat exposure
p0236 A79-43701

Heat and acute dehydration effects on acceleration response
p0237 A79-43705

Effect of rate of change in skin temperature on local sweating rate
p0268 A79-47853

Deconditioning-induced exercise responses as influenced by heat acclimation
p0273 A79-49985

A comparison of sweating responses in men and women before and after acclimation to humid heat
p0175 N79-21752

The effects of active and passive heat acclimatization procedures on the cardiovascular, thermoregulatory, and sweat rate responses to work in the heat in male humans
p0195 N79-23651

flight simulation display
p0138 A79-28172

Binocular holographic helmet mounted display
[AD-A062761] p0174 N79-20749
HOMEOSTASIS
Cardiovascular regulatory response to lower body
negative pressure following blood volume loss
p0101 A79-23470

Control theory and biosystems: Analysis of
homeostatic properties --- Russian book
p0186 A79-34506

The role of the neurohormone system of the hypothalamus in physiology and pathology --- Russian book
p0251 A79-43835

Acid-base homeostasis in the human system
[NASA-CR-160222] p0212 N79-24640

HOMEOTHERMS

Neurophysiology of thermal reception
p0043 A79-14374

The local and time-dependent temperature field in the body of a homeothermic organism in case of sudden changes of quantity and local distribution of internal heat production
p0128 A79-24699

Similarity in the number of lifespan heartbeats among non-hibernating homeothermic animals
p0298 A79-52281

HOMOMORPHISMS

Homomorphic analysis and modeling of ECG signals
p0210 A79-39973

HORMONE METABOLISMS

Comparison of hormone and electrolyte circadian rhythms in male and female humans
p0004 A79-11948

Energetic aspects of adaptation --- Russian book on metabolic responses to stress
p0167 A79-31906

Insulin-like effect of bovine growth hormone in vivo as demonstrated by oxidation of C/14/-U-glucose in diabetic rats
p0252 A79-44797

HORMONES

NT ADRENOCORTICOTROPIN (ACTH)
NT ALDOSTERONE
NT CORTICOSTEROIDS
NT PITUITARY HORMONES

In vivo response of ornithine decarboxylase activity to growth hormone as demonstrated by oxidation of l-ornithine-1-/C-14/ in hypophysectomized rats
p0005 A79-12400

The role of the neurohormone system of the hypothalamus in physiology and pathology --- Russian book
p0251 A79-43835

The effect of 17alpha-ethynylestradiol on the radiation sensitivity of mice
p0141 N79-18557

HOT WEATHER

Effect of water and electrolyte replacement during exercise in the heat on biochemical indices of stress and performance
p0127 A79-24629

Fighter index of thermal stress /FITS/ - guidance for hot-weather aircraft operations
p0202 A79-37715

Fighter index of thermal stress: Development of interim guidance for hot-weather USAF operations
[AD-A053471] p0056 N79-13699

HOT-FILM ANEMOMETERS

Disorder in pulsatile flow - Biomedical measurements with hot film, laser and ultrasound anemometers
p0210 A79-39509

HOVERING

Analysis of a VTOL hover task with predictor displays using an optimal control model of the human operator
p0088 N79-15605

Changes in the rotary wing aviator's ability to perform an uncommon low altitude rearward hover maneuver as a function of extended flight requirements and aviator fatigue
p0150 N79-19623

HOVERING STABILITY

An evaluation of perceptual-motor workload during a helicopter hover maneuver
[AD-A058016] p0052 N79-12709

An evaluation of the effects of a stability augmentation system upon aviator performance/workload during a MEDEVAC high hover operation
p0148 N79-19612

HU-1 HELICOPTER
U UH-1 HELICOPTER

HUGHES MILITARY AIRCRAFT
U MILITARY AIRCRAFT

HUMAN BEHAVIOR

Comparison of plasma and urinary steroids in men with type A and type B behavior patterns
p0028 N79-11704

Human responses to fire: Three designs for research
[PB-284959/4] p0058 N79-13708

A formal model of the adaptive and discrete control behaviors of human operators
[AD-A059039] p0059 N79-13717

Translations on USSR science and technology: Biomedical and behavioral sciences, no. 47
[JPRS-72134] p0071 N79-14708

Translations on USSR science and technology. Biomedical and behavioral science, no. 54
[JPRS-72650] p0077 N79-14753

Modeling the human as a controller in a multitask environment
p0087 N79-15595

Prospects of a mathematical theory of human behavior in complex man-machine systems tasks --- time sharing computer analogy of automobile driving
p0088 N79-15599

Petri nets as a modeling tool for discrete concurrent tasks of the human operator --- describing sequential and parallel demands on human operators
p0088 N79-15600

Use of reward-penalty structures in human experimentation
p0089 N79-15607

A decision model applied to alcohol effects on driver signal light behavior
p0092 N79-15630

Translations on USSR science and technology: Biomedical and behavioral sciences, no. 57
[JPRS-72808] p0121 N79-17526

Masculinity, femininity, androgyny. What really works at work
[AD-A061177] p0156 N79-19683

Translations on USSR science and technology: Biomedical and behavioral sciences, no. 60
[JPRS-73135] p0175 N79-21745

A two level model of human steering behavior in a motor vehicle
[FB-27] p0197 N79-24657

Personality profiles of divers involved in research activities
[DLR-FB-78-11] p0281 N79-30935

Methodological and operational aspects of programmed environment research
[AD-A068587] p0289 N79-31936

Car driving as a cybernetic task
[IZF-1979-6] p0309 N79-32838

HUMAN BEINGS

Acid-base curve nomogram for chimpanzee blood and comparison with human blood characteristics
p0133 A79-27105

Central and reflex mechanisms of controlling movements --- Russian book
p0251 A79-43950

Metabolic adrenergic changes during submaximal exercise and in the recovery period in man
p0305 A79-54267

Influence of skin temperature on sweating and aerobic performance during severe work
p0305 A79-54268

Numerical studies of absorption of electro-magnetic energy by man
p0110 N79-16538

The effect of infection with herpes simplex viruses types 1 and 2 on cell DNA synthesis and thymidine kinase activities in cultured human cells
p0141 N79-18558

Human health damages from mobile source air pollution: Additional Delphi data analysis, volume 2
[PB-288320/5] p0145 N79-18586

Man and materiel in the cold regions, part 1
[AD-A063752] p0178 N79-21771

Investigations about the quantitative changes of carbon dioxide production in humans. Report 2: Carbon dioxide production during fever and its relationship with heat production
[NASA-TM-75452] p0211 N79-24632

Acid-base homeostasis in the human system
[NASA-CR-160222] p0212 N79-24640

Chemicals identified in human biological media, a pilot literature survey
[PB-290690/7] p0214 N79-24649

Man, dummy, test vehicle: A comparison of test results for escape systems with the 3 different test methods p0287 N79-31924

HUMAN BODY

Digital enhancement of computerized axial tomograms p0004 A79-11544

Heat transfer and temperature distribution in the human body p0041 A79-13612

Anatomical coordinate systems for human body segments p0065 A79-18231

Electromagnetic fields and power deposition in body-of-revolution models of man p0130 A79-26007

Model of human heat exchange and identification of its parameters Physiological studies and mathematical modeling p0159 A79-28739

Thermal conduction effects in human skin p0265 A79-47329

Comparison of physiological effects of head-down tilting and immersion on the human body p0298 A79-52279

A spherical representation of a human body for visualizing movement p0301 A79-53096

Radiographic comparison of human lung shape during normal gravity and weightlessness p0305 A79-54269

Variability in human body size p0032 N79-11736

Anthropometry p0032 N79-11737

Range of joint motion p0033 N79-11740

Human muscular strength p0033 N79-11741

Anthropometry in sizing and design p0033 N79-11742

The effects of ozone on human erythrocytes and phospholipid vesicles p0049 N79-12687

Isokinetic exercise: A review of the literature [NASA-CR-151881] p0051 N79-12695

Purification and cultivation of human pituitary growth hormone secreting cells [NASA-CR-151853] p0051 N79-12697

Review of chest deflection measurement techniques and transducers [PB-283654/2] p0051 N79-12702

Aerodynamic forces exerted on an articulated human body subjected to windblast [AD-A059023] p0055 N79-13688

The distribution of cadmium and other metals in human tissues [PB-285200/2] p0057 N79-13703

Zinc [PB-285130/1] p0057 N79-13704

Analysis and validation of human biodynamic models [AD-A059013] p0058 N79-13714

Effects of hyperhydration on human endurance of orthostatic and LBNP tests p0072 N79-14721

Changes in human renal function in passive head-up and head-down positions p0072 N79-14722

Stability of circadian system of the body p0073 N79-14723

Combined effect of hyperoxia, low pressure and exercise on the rate of methylketone excretion from the human body p0073 N79-14725

Some recent results on the deposition of electromagnetic energy in animals and models of man p0083 N79-15563

Development opportunities in the space environment p0095 N79-15897

Space biology and aerospace medicine, volume 13, no. 1, 1979 [JPRS-72826] p0107 N79-16514

Effects of LBNP on catecholamines and adrenal cortex p0110 N79-16532

Correction of transcapillary exchange in man under the influence of rotation on a centrifuge while immersed in water p0110 N79-16533

Rehabilitation measures used to restore physical fitness of man after long-term restriction of movement p0110 N79-16534

Instrumentation and techniques for the measurement of muscular strength and endurance in the human body [AD-A061023] p0155 N79-19681

Design specification for the whole-body algorithm [NASA-CR-160226] p0212 N79-24641

Study report on combining diagnostic and therapeutic considerations with subsystem and whole-body simulation [NASA-CR-160231] p0213 N79-24644

Study report on interfacing major physiological subsystem models: An approach for developing a whole-body algorithm [NASA-CR-160232] p0218 N79-25729

The development of a whole-body algorithm [NASA-CR-160214] p0218 N79-25730

Pneumotachographic distinctions of external respiration in man in the presence of excess intrapulmonary pressure on ground level and at high altitudes p0245 N79-27827

Refinement and validation of a mathematical model of the human torso p0247 N79-27841

The human micro-environment p0248 N79-27851

Effects of vibration on the human organism p0249 N79-27862

Models and Analogues for the Evaluation of Human Biodynamic Response, Performance and Protection --- conferences, human tolerance of acceleration, vibration, and shock [AGARD-CP-253] p0284 N79-31901

Transient intraventricular conduction defects observed during experimental impact in human subjects p0285 N79-31907

A human body and crew station modelling system for motion studies p0287 N79-31922

The biodynamic response of the human body and its application to standards p0288 N79-31929

HUMAN CENTRIFUGES

Physiological effect of high, sustained +Gz forces on man p0229 A79-41711

External respiration and gas exchange reactions to exercise during rotation of man on a short-radius centrifuge p0193 N79-23639

Some human responses to repeated +G sub z pulses p0288 N79-31928

A theoretical investigation of power and control configurations for a high g-onset centrifuge drive system [AD-A070912] p0309 N79-32841

External respiration and gas exchange reactions of man during rotation on a short-arm centrifuge p0313 N79-33812

HUMAN ENGINEERING

U HUMAN FACTORS ENGINEERING

HUMAN FACTORS ENGINEERING

A biophysical model for evaluating auxiliary heating and cooling systems --- for protective clothing systems design [ASME PAPER 78-ENAS-33] p0008 A79-12581

Firefighters Integrated Response Equipment System [ASME PAPER 78-ENAS-39] p0009 A79-12586

Intensity judgements of non-sinusoidal vibrations - Support for the ISO weighting method p0010 A79-12868

Human Factors Society, Annual Meeting, 21st, San Francisco, Calif., October 17-20, 1977, Proceedings p0035 A79-13181

Development and transfer of timesharing skills --- for human multiple task performance p0035 A79-13184

Effects of vibration on humans - Performance decrements and limits p0035 A79-13185

A composite view of task performance in hot environments p0036 A79-13186

Human factors design criteria for transilluminated displays
p0036 A79-13187

Seating, console and workplace design - Seated operator reach profiles
p0036 A79-13188

Seating, console, and workplace design - Integration of literature and accommodation model
p0036 A79-13189

The application of computer aided evaluative techniques to system test and evaluation --- of fighter aircraft pilot performance
p0036 A79-13190

Imagery interpreter performance in the comparison of subjective estimates of photographic image quality
p0036 A79-13191

Discrimination of density and clustering on four versions of a stochastic display --- human performance of pattern recognition
p0036 A79-13192

Tracking in two dimensions as a function of dimension priorities and tracking difficulty
p0036 A79-13193

A prediction model of arm push strength in the transverse plane
p0037 A79-13195

Computer simulation of thermoregulatory responses to heat stress - A future work design and training tool
p0037 A79-13196

Four years of color research for visual displays --- human performance consideration for use in aircraft
p0039 A79-13210

Response surface methodology as a manipulator of complex task difficulty --- for computer generated aircraft area navigation control-display systems evaluation
p0039 A79-13211

Task functional demands as factors in dual-task performance
p0039 A79-13214

NASA flight management research
p0040 A79-13218

Arrangement of aircraft flight indicators with the help of optimal theoretical models for man as the controller
[DGLR PAPER 78-149] p0042 A79-14094

Anthropology in Spacelab - Control and display system in Spacelab
[DGLR PAPER 78-151] p0042 A79-14096

USAF life support equipment costs
p0043 A79-14402

Heat transfer principles in personal protection applications
p0043 A79-14405

Oxygen systems for Army helicopters
p0044 A79-14421

Human factors considerations in establishing aircraft collision avoidance system alert thresholds
p0045 A79-14438

Adaptive supervisory control of remote manipulation
p0046 A79-14987

Subjective data in human reliability estimates
p0046 A79-15398

Computer-graphic design for human performance
[AD-A055132] p0046 A79-15399

Man-machine reliability - A practical engineering tool
p0047 A79-15400

The man-computer division of tasks in the case of the control of complex technical systems --- applied to aircraft
p0061 A79-17683

Ergonomic problems regarding the interactive touch input via screens in onboard and ground-based flight control
p0061 A79-17695

Human Factors Society, Annual Meeting, 22nd, Detroit, Mich., October 16-19, 1978, Proceedings
p0062 A79-18201

Quantifying operator preference during human factors test and evaluation --- in helicopter design
p0062 A79-18202

AWAVS, a research facility for defining flight trainer visual system requirements
p0062 A79-18207

Factors that affect display size criteria in a cockpit display system
p0063 A79-18212

Human factors considerations in the design and evaluation of a helmet mounted display using a light emitting diode matrix
p0063 A79-18214

Estimating percentiles of nonnormal anthropometric populations - Final report
p0065 A79-18226

Human engineering study of information processing applicable to helmet-mounted displays
p0068 A79-18994

Collision avoidance response stereotypes in pilots and nonpilots
p0068 A79-18995

Peripheral acuity and photointerpretation performance
p0068 A79-18996

Line criteria in target acquisition with television --- visibility of target image on TV screen
p0068 A79-18997

Evoked potential correlates of display image quality
p0068 A79-18998

Speed and load stress as determinants of performance in a time sharing task
p0068 A79-18999

Visual target acquisition and ocular scanning performance
p0069 A79-19000

A visual simulator with transformation of the perspective in the raster of television pictures --- German book on pilot training systems
p0069 A79-19375

Vigilance and electroencephalogram --- human performance in compensatory target tracking
p0100 A79-22975

A controller's eye view of color
p0102 A79-23596

Relations between research and instruction in physiology and aerospace ergonomy in the military health services
p0104 A79-23960

Interdisciplinary and international contributions to research on biological effects of electromagnetic waves - Past performances and future challenges
p0129 A79-24878

Digital man-machine control systems - The effects of preview lag
p0131 A79-26149

A theoretical model to estimate some ergonomic parameters from age, height and weight
p0132 A79-26150

Hyper-resolution in human perception of movement in visual displays
p0132 A79-26240

The human operator in the control system: Linear models --- German book
p0132 A79-26356

A comparison of kinesthetic-tactual and visual displays via a critical tracking task --- for aircraft control
p0162 A79-29720

The biomedical implications of engineering in space
p0166 A79-31122

Better definition of eye to aortic valve distance in high acceleration cockpit /HAC/ seating geometries
p0183 A79-33632

The objective evaluation of aircrew protective breathing equipment. III - Improved types of mask/goggles combinations. IV - Fullface masks and hoods suitable for flight attendant use
p0184 A79-33638

Improved headgear for fixed wing Navy aircrewmen
p0184 A79-33641

Perception of continuity in stroboscopic motion - A temporal frequency analysis
p0186 A79-34375

Dynamics of the eye and head during movement between displays - A qualitative and quantitative guide for designers
p0209 A79-38362

Pilot workload in the aircraft of the future
p0226 A79-40646

Thermal bounds to the time of stay of human beings in enclosures

p0231 A79-41770

Guidelines for designing machines and devices for acoustic vibrations from the point of view of the physiological and psychological properties of the human organism
p0236 A79-43608

The relative effects of multiple factors on target acquisition --- by combat pilots
p0267 A79-47765

Synthetic training and evaluation - Some current issues
p0275 A79-50550

Man and machine design for space flight
p0300 A79-52696

Thoughts about man-machine interrelations in space flights applied to Spacelab missions
[IAF PAPER 79-95] p0302 A79-53295

Considerations associated with the introduction of female crewmembers in spacecraft and space stations
[IAF PAPER 79-A-22] p0303 A79-53424

The use of artificial signals during SONAR-watch
[IZF-1978-25] p0309 N79-32837
Application of a structured decision process for proper inclusion of human resources in the design of a power unit support stand
[AD-A069978] p0309 N79-32840
Acoustic attitude orientation
p0314 N79-33816
A nonlinear mapping approach to discrimination of sleep stages from the human electroencephalogram
p0314 N79-33817
Effects of congener and noncongener alcoholic beverages on a clinical ataxia test battery
[AD-A069375] p0314 N79-33819
Laboratory performance during acute intoxication and hangover
[AD-A069373] p0314 N79-33820
Development of electrophysiological indices of neurological toxicity for organophosphate pesticides and depressant drugs
[AD-A070299] p0314 N79-33821
Models of human operators in vision dependent tasks
[NASA-CP-2103] p0317 N79-33838
A survey of Applied Psychological Services' models of the human operator
p0317 N79-33839
Visual performance modeling in the human operator simulator
p0317 N79-33840
A brief overview of the theory and application of the optimal control model of the human operator
p0317 N79-33841
Development of an objective grading system along with procedures and aids for its effective implementation in flight
[AD-A071106] p0318 N79-33846
Workload and the certification of helicopters for IFR operation
[AD-A072758] p0318 N79-33850
A general model for the transfer of vapour through clothed skin from liquid on and in clothing
[AD-A071577] p0319 N79-33853

HUMAN FACTORS LABORATORIES
Ergonomics laboratory studies pilots' stability for command --- psychophysiological characteristics
p0121 N79-17529

HUMAN PATHOLOGY
The use of aviation pathology and aviation medicine as proof of liability and damage
p0100 A79-22704
Morbidity experience of air traffic control personnel - 1967-77
p0101 A79-23466
Pneumothorax and flight personnel --- incidence, etiology and treatment
p0103 A79-23956
Automatic control of physiological functions of the human organism in pathology --- Russian book
p0132 A79-26350
Paroxysmal disorders of consciousness due to flight factors
p0161 A79-29300
Diagnostics of initial deficiency in cerebral circulation
p0166 A79-31164
Characteristics of serious carbon monoxide poisoning
p0167 A79-32100
Predicting coronary artery disease with treadmill stress testing Changes in R-wave amplitude compared with ST segment depression
p0186 A79-34284
Pathophysiology of overloads: Bibliography of Soviet publications --- Russian book
p0200 A79-36385
Coronary calcification in the diagnosis of coronary artery disease
p0226 A79-40465
The role of the neurohormone system of the hypothalamus in physiology and pathology --- Russian book
p0251 A79-43835
Magnetocardiography - An overview
p0274 A79-50107
Assessment of human exposures to atmospheric benzene
[PB-284203/7] p0051 N79-12701
Study report on combining diagnostic and therapeutic considerations with subsystem and whole-body simulation
[NASA-CR-160231] p0213 N79-24684
Results of a 64Cu-loading test applied to patients with an inherited defect in their Cu-metabolism (Menkes' disease)
[IRI-133-77-04] p0240 N79-26774
The oral 64Cu-loading test: Applications and problems
[IRI-133-78-02] p0240 N79-26775
ESR studies on different pathological states
[ISS-L-22/9] p0248 N79-27854

HUMAN PERFORMANCE
NT ASTRONAUT PERFORMANCE
NT OPERATOR PERFORMANCE
NT PILOT PERFORMANCE
Mental work and emotions --- Russian book
p0002 A79-10847
Human Factors Society, Annual Meeting, 21st, San Francisco, Calif., October 17-20, 1977, Proceedings
p0035 A79-13181
Models for automated motor skills training --- computer controlled adaptive instruction
p0035 A79-13182
Perceptual delay - A consequence of metacontrast and apparent motion
p0035 A79-13183
Task taxonomy - Two ignored issues --- criteria for task evaluation with respect to empirical data
p0039 A79-13212
Coordinated crew performance in commercial aircraft operations
p0040 A79-13219
Vibration, performance, and personality --- vibration effects on human performance and psychological factors
p0040 A79-13224
Effects of target motion and image on AAA tracking --- Anti-Aircraft Artillery
p0046 A79-14969
Subjective data in human reliability estimates
p0046 A79-15398
System operability - Concept and measurement in test and evaluation --- man system compatibility indices in F-18 aircraft example
p0062 A79-18204
Application of performance model to assess aviator critical incidence
p0063 A79-18209
Secondary visual workload capability with primary visual and kinesthetic-tactual displays
p0064 A79-18220
Team performance - A model for research
p0065 A79-18227
Collision avoidance response stereotypes in pilots and nonpilots
p0068 A79-18995
Peripheral acuity and photointerpretation performance
p0068 A79-18996
Evoked potential correlates of display image quality
p0068 A79-18998
Structure of biorhythms as one of the criteria for physiological adaptability of the human organism
p0097 A79-20653
Vigilance and electroencephalogram --- human performance in compensatory target tracking
p0100 A79-22975
Correlation of choice reaction time performance with biorhythmic criticality and cycle phase
p0102 A79-23471

Carbon monoxide and human time discrimination -
Failure to replicate Beard-Wertheim experiments
p0102 A79-23472

A theoretical model to estimate some ergonomic
parameters from age, height and weight
p0132 A79-26150

Comparative evaluation of the effectiveness of
visual and aural tracking of a sinusoidal signal
p0159 A79-28736

Mechanics of the regulation of the respiratory
system in man
p0160 A79-29258

The effects of carbon monoxide on dual-task
performance
p0161 A79-29716

Discrimination, temperature, and time of day ---
human performance variances
p0161 A79-29718

An algorithm to ascertain critical regions of
human tracking ability
p0163 A79-30218

Deductive derivation of a mathematical model for
spectral sensitivity of the human organ of
sight. I, II
p0166 A79-31178

A bioengineering simulator of the human visual
apparatus
p0166 A79-31180

Visual contrast sensitivity functions obtained
with colored and achromatic gratings
p0181 A79-32628

Human error accidents - Some case studies --- for
aircraft
p0183 A79-33193

A rationale for human operator pulsive control
behavior
p0186 A79-34520

Effect of induced cyclic changes of deep body
temperature on task performances
p0202 A79-37708

Physiologic and performance measurements in
simulated airborne combined stress environments
p0202 A79-37710

Rhythms in human performance - 1-1/2-hour
oscillations in cognitive style
p0210 A79-39601

Spatial frequency masking in human vision -
Binocular interactions
p0232 A79-42284

Changes in the circadian rhythm of performance and
mood in healthy young men exposed to prolonged,
heavy physical work, sleep deprivation, and
caloric deficit
p0234 A79-43202

Test of the 10 bits/sec channel-capacity
hypothesis for human tracking
p0253 A79-45771

A study of the available evidence on duration
effects on comfort and task proficiency under
vibration
p0254 A79-46399

Mechanisms of the effects of vibration frequency,
level and duration on continuous manual control
performance
p0299 A79-52327

Development of a performance criterion for air
traffic personnel research through air traffic
control simulation
[AD-A058082] p0031 N79-11727
Life stress, organizational stress, and job
satisfaction
[AD-A055153] p0057 N79-13706
Information processing in humans, volume 3. A
bibliography with abstracts
[NTIS/PS-78/1154/0] p0058 N79-13710
Survey of human operator modeling techniques for
measurement applications
[AD-A058327] p0058 N79-13713
Proceedings of the 1977 Computerized Adaptive
Testing Conference
[AD-A060049] p0079 N79-14771
Human work measurement. A bibliography with
abstracts
[NTIS/PS-78/1197/9] p0081 N79-14781
Relating performance in basic electricity and
electronics and A schools
[AD-A060914] p0085 N79-15584
Human performance in concurrent verbal and
tracking tasks: A review of the literature
[AD-A060493] p0085 N79-15585
A comparison of motor submodels in the optimal
control model
p0087 N79-15597

Use of reward-penalty structures in human
experimentation
p0089 N79-15607

The influence of vehicle aerodynamic and control
response characteristics on driver-vehicle
performance
p0089 N79-15608

A model for dynamic allocation of human attention
among multiple tasks
p0092 N79-15627

The effects of alcohol on driver performance in a
decision making situation
p0092 N79-15629

Combined monitoring, decision and control model
for the human operator in a command and control
desk
p0092 N79-15631

A model of human event detection in multiple
process monitoring situations
p0092 N79-15632

Vision
p0095 N79-15694

Human capabilities
p0114 N79-16562

The effects of deviate internal representations in
the optimal model of the human operator
p0114 N79-17477

A quasi-linear control theory analysis of
timesharing skills
p0115 N79-17479

A dual-loop model of the human controller
p0115 N79-17480

Parameter estimation in a human operator
describing function model for a two-dimensional
tracking task
p0115 N79-17481

Reduced mental capacity and behavior of a rider of
a bicycle simulator under alcohol stress or
under dual task load
p0116 N79-17489

A relationship between eye movement patterns and
performance in a precognitive tracking task
p0116 N79-17490

A model of the human supervisor
p0117 N79-17495

The human as a detector of changes in variance and
bandwidth
p0117 N79-17496

Task complexity and 24-hr performance patterns in
morning and evening active subjects
[FOA-C-52001-H6] p0122 N79-17537
A method to evaluate performance reliability of
individual subjects in laboratory research
applied to work settings
[FAA-AM-78-37] p0123 N79-17547
The measurement and scaling of workload in complex
performance
[FAA-AM-78-34] p0125 N79-17558
Investigation on the effect of mechanical
properties of control elements on human control
performance under stochastic roll vibrations
[BMVG-FBWT-78-11] p0146 N79-18593
Simulated EVA operation of a remote connector
assembly test report
[NASA-CR-161167] p0156 N79-19687
Graphic display of human motion
[AD-A064344] p0190 N79-22763
Individual differences in knowledge acquisition
from maps
[AD-A065040] p0196 N79-23663
Evidence for increased intrathoracic fluid volume
in man at high altitude
[AD-A065333] p0220 N79-25743
Predicting individual listener confusions in the
classification of complex, steady-state sounds
[AD-A066704] p0222 N79-25755
Effects of noise frequency on performance and
annoyance
[NASA-TM-80107] p0241 N79-26781
The influence of hyperbaric environment in
combination with workload and confinement on
human information processing
[DLR-FB-78-12] p0280 N79-30926
Multipurpose digital switching and flight control
workload

[AD-A069606] p0281 N79-30934

Development of human performance models for man-machine system simulation
[AD-A069879] p0282 N79-30940

Ergonomic research into human tolerances for roll and pitch as well as their influence on individual perception and reactions to control parameters
[BMVG-FBWT-78-18] p0282 N79-30944

Progress in measuring and modeling the effects of low frequency vibration on performance
p0288 N79-31930

Making it in academic psychology: Demographic and personality correlates of eminence
[NASA-CR-162287] p0289 N79-31932

Hemispheric asymmetry as related to pilot and radar intercept officer performance
[AD-A068087] p0289 N79-31935

Human performance in time-shared verbal and tracking tasks
[AD-A070275] p0308 N79-32831

Acoustic attitude orientation
p0314 N79-33816

Effects of congener and noncongener alcoholic beverages on a clinical ataxia test battery
[AD-A069375] p0314 N79-33819

Laboratory performance during acute intoxication and hangover
[AD-A069373] p0314 N79-33820

The causes of decrements in aircrew performance physiological changes produced by vibration and other environmental stresses and response of the cardiovascular system to vibration and combined stress
[AD-A069952] p0318 N79-33845

Development of an objective grading system along with procedures and aids for its effective implementation in flight
[AD-A071106] p0318 N79-33846

Human memory. A bibliography with abstracts
[NTIS/PS-79/0640/7] p0318 N79-33847

HUMAN REACTIONS

False hypothesis and the pilot --- aircraft accidents due to decision making errors
[SAE PAPER 780528] p0001 A79-10399

Human psychophysiology in extremal conditions --- Russian book on polar region adaptation
p0048 A79-15977

Effects of information processing requirements on reaction time of the eye
p0064 A79-18219

Startle reactions to simulated sonic booms - Influence of habituation, boom level and background noise
p0097 A79-20502

Responses of teachers to aircraft noise
p0103 A79-23881

A study of the available evidence on duration effects on comfort and task proficiency under vibration
p0254 A79-46399

Estimated body rotation as a predictor of motion sickness susceptibility
p0273 A79-49990

The effects of carbon monoxide and cyanide on the brain
p0024 N79-11682

The 14th Annual Conference on Manual Control --- digital simulation of human operator dynamics
[NASA-CP-2060] p0086 N79-15588

Directional errors of movements and their correction in a discrete tracking task --- pilot reaction time and sensorimotor performance
p0086 N79-15589

AAA gunnermodel based on observer theory --- predicting a gunner's tracking response
p0087 N79-15594

Closed loop models for analyzing the effects of simulator characteristics --- digital simulation of human operators
p0087 N79-15598

Discrete-time pilot model --- human dynamics and digital simulation
p0088 N79-15601

Effects of prolonged unidirectional shift of sleeping-waking cycle on physiological functions, mental productivity and sleep of man
p0109 N79-16526

An investigation to determine the effect of physical conditioning upon fibrinolytic reactivity in normal young men
p0110 N79-16536

Effect on mice of microwaves in the non-thermal intensity region. Respiration, rectal temperature and mental reaction
[FOA-C-54021-H2(E6)] p0120 N79-17523

Heart rate: Physiological characteristics and quantification methods for use in behavioral studies
[CSIR-SR-PERS-276] p0121 N79-17531

Human health damages from mobile source air pollution: A delphi method, volume 1
[PB-288319/7] p0145 N79-18585

A model for predicting human discomfort response to combined noise and vertical vibration
p0156 N79-19685

Effects of filtering electroencephalic signals on auditory evoked brain stem responses
p0176 N79-21758

Discomfort criteria for single-axis vibrations
[NASA-TP-1422] p0196 N79-23662

Stress and fatigue in the driving environment --- physiological and psychological effects of heat and noise experienced inside automobiles
p0211 N79-24629

Physiological effects of a high soybean protein diet in man
p0240 N79-26777

Effects of amphetamine on response selection and response execution processes in choice reaction tasks
[IZF-1978-8] p0309 N79-32839

HUMAN TOLERANCES

Relaxed +Gz tolerance in healthy men - Effect of age
p0067 A79-18956

SPH-4 helmet damage and head injury correlation
p0127 A79-24633

Aircraft noise and its effect on man: Methods and results of research, consequences for environmental protection --- German book
p0162 A79-29763

Physiological effect of high, sustained +Gz forces on man
p0229 A79-41711

Temporary threshold shift from transportation noise
p0258 A79-46286

Blood pressure variability of the individual in orthostatic testing
p0265 A79-47328

Evaluation of assisted positive-pressure breathing on +Gz tolerance
p0266 A79-47336

Reproducibility of +Gz tolerance testing
p0267 A79-47337

Aerospace highlights and potential medical applications --- in manned space flight
p0293 A79-51027

Bimodal relationship of human tremor and shivering on introduction to cold exposure
p0298 A79-52278

Quantitative review of human susceptibility to magnetic fields
[UCID-17773] p0026 N79-11691

Development opportunities in the space environment
p0095 N79-15897

Problems of human adaption to spaceflight
p0157 N79-19985

Multibody dynamics including translation between the bodies, with application to head-neck systems
[AD-A062114] p0174 N79-20747

A comparison of sweating responses in men and women before and after acclimation to humid heat
p0175 N79-21752

Human discomfort response to noise combined with vertical vibration
[NASA-TP-1374] p0190 N79-22761

Discomfort criteria for single-axis vibrations
[NASA-TP-1422] p0196 N79-23662

Effects of noise frequency on performance and annoyance
[NASA-TM-80107] p0241 N79-26781

Effect of helicopter noise on passenger annoyance
[NASA-TM-80106] p0241 N79-26782

Thermal conduction effects in human skin. 1: Experimental data acquisition
[AD-A068479] p0259 N79-28871

Thermal conduction effects in human skin. 3: Influence of epidermal thickness and exposure time [AD-A068481] p0259 N79-28872
A subhuman primate restraint system [AD-A069607] p0279 N79-30915
Compatibility test of oxygen exposures in the range of 2.2 to 2.8 bar absolute [DLR-FB-78-10] p0280 N79-30925
Ergonomic research into human tolerances for roll and pitch as well as their influence on individual perception and reactions to control parameters [BMVG-FBWT-78-18] p0282 N79-30944
The validation of biodynamic models p0286 N79-31914
The use of mathematical modeling in crashworthy helicopter seating systems p0287 N79-31923
The use of spinal analogue to compare human tolerance of repeated shocks with tolerance of vibration, part 1 p0288 N79-31926
Tentative evaluation of annoyance caused by noise from gunfire [IZF-1978-21] p0310 N79-32843
Minimum sea surface temperatures and associated survival times [AD-A070162] p0315 N79-33824

HUMAN WASTES
NT FECES
NT SWEAT
NT URINE
Decreased activity of palladium catalyst during processing of excreta p0016 N79-10716
Utilization of the wastes of vital activity [NASA-TM-75410] p0177 N79-21768

HUMIDITY
The dependence of the CO2 removal efficiency of LiOH on humidity and mesh size --- in spacecraft life support systems [ASME PAPER 78-ENAS-5] p0006 A79-12554
Human skin wettedness and evaporative efficiency of sweating p0162 A79-29726
Apparatus for supplying conditioned air at a substantially constant temperature and humidity [NASA-CASE-GSC-12191-1] p0156 N79-19688
Flight prototype CO2 and humidity control system [NASA-CR-160224] p0222 N79-25760

HYBRID CIRCUITS
The use of hybrid integrated circuit techniques in biotelemetry applications p0131 A79-26145
Hybridization of biomedical circuitry [NASA-CR-151874] p0111 N79-16543

HYBRID COMPUTERS
Hybrid computation of left ventricular performance using noninvasive techniques [AD-A063749] p0190 N79-22758

HYDRATION
Effects of hyperhydration on human endurance of orthostatic and LBNP tests p0072 N79-14721

HYDRAULIC VALVES
U VALVES

HYDRAZINES
Metabolism of hydrazine [AD-A062251] p0169 N79-20716
Effects of propellant hydrazines on red blood cells: Methemoglobin and Heinz body formation [AD-A064133] p0189 N79-22755

HYDROCARBON FUELS
NT DIESEL FUELS
NT JET ENGINE FUELS

HYDROCARBONS
NT ETHYLENE
NT KEROGEN
NT METHANE
Squalenes, phytanes and other isoprenoids as major neutral lipids of methanogenic and thermoacidophilic 'archaebacteria' p0232 A79-42274
Clozapine metabolism in humans [BLL-RTS-10902] p0142 N79-18567

HYDROCYANIC ACID
HCN did not condense to give heteropolypeptides on the primitive earth p0133 A79-26542

HYDRODYNAMIC STABILITY
U FLOW STABILITY

HYDROFOIL BOATS
U BOATS

HYDROGEN
NT HYDROGEN IONS
NT TRITIUM

HYDROGEN COMPOUNDS
NT HYDROCYANIC ACID
NT HYDROGEN SULFIDE

HYDROGEN CYANIDES
U HYDROCYANIC ACID

HYDROGEN IONS
Gating effects in Halobacterium halobium membrane transport p0268 A79-47849

HYDROGEN ISOTOPES
NT TRITIUM

HYDROGEN SULFIDE
Incorporation of sulphur in chemical evolution p0203 A79-37938
Decreased activity of palladium catalyst during processing of excreta p0016 N79-10716

HYDROGEN 3
U TRITIUM

HYDROMECHANICS
NT HYDROSTATICS

HYDROSTATIC PRESSURE
Better definition of eye to aortic valve distance in high acceleration cockpit /HAC/ seating geometries p0183 A79-33632

HYDROSTATICS
Effect of hydrostatic factor on orthostatic stability and physical fitness of man during 60-day antiorthostatic hypokinesia p0313 N79-33809

HYDROXIDES
NT LITHIUM HYDROXIDES

HYDROXYL COMPOUNDS
NT ALCOHOLS
NT ETHYL ALCOHOL

HYDROXYL RADICALS
Raman and infrared investigations of the nature of intracellular water [AD-A061254] p0120 N79-17522

HYGIENE
Physiologicohygienic and ergonomic aspects of Salyut 6 cosmonauts extravehicular activity /EVA/ p0303 A79-53486
Spacecraft utensil/hand cleansing fixture [NASA-CR-151845] p0032 N79-11731
Spacecraft utensil/hand cleansing fixture, addendum [NASA-CR-151846] p0032 N79-11732
Environment monitoring in the USSR and hygienic practice --- anthropogenic effects p0121 N79-17528

HYGRAL PROPERTIES
U MOISTURE CONTENT

HYOSCINE
Prevention and treatment of space sickness in Shuttle-Orbiter missions p0128 A79-24639

HYPERBARIC CHAMBERS
Capillary fragility during air exposure of man to 1-5 ATA and after decompression p0010 A79-12863
Effect of hyperbaric oxygen on peripheral blood neutrophil metabolism p0245 N79-27830
Immunobiological reactivity of the body under hyperbaric and hypobaric conditions p0310 N79-33790

HYPERCAPNIA
Exercise ventilation correlates positively with ventilatory chemoresponsiveness p0066 A79-18954
Responses of pial arterioles after prolonged hypercapnia and hypoxia in the awake rabbit p0101 A79-23075
Contribution of rib cage and abdomen-diaphragm to tidal volume during CO2 rebreathing p0185 A79-33805
Epiphysis of rats under the combined action of hypoxia, hypercapnia and cooling p0256 A79-46680
Responses of conscious rabbits to CO2 at ambient temperatures of 5, 20, and 35 C

p0277 A79-50904
Effect of combination of hypoxia and hypercapnia on survival of Japanese quail
p0194 N79-23641
Influence of pressure chamber conditions on adrenocortical function in man (according to results of assaying blood plasma 11-hydroxycorticosteroids)
p0311 N79-33798

HYPEROPIA
Visual acuity of the aging hyperopic eye in the intermediate range
p0037 A79-13198

HYPEROXIA
The comparative study of metabolism changes dynamics during hypoxia and hyperoxia in mice lungs
[IAF PAPER 78-51] p0002 A79-11221
Transient changes in arterial blood gases and heart rate during and after acutely induced hypoxia and hyperoxia to rabbits
p0134 A79-27120
Mechanisms of the effect of oxygen toxicity on the energy metabolism
p0160 A79-29275
Glucose metabolism in rat lung during exposure to hyperbaric O2
p0221 A79-36047
Circulatory response to arterial hyperoxia
p0221 A79-36048
The effect of hyperoxia on the oxygen tension of blood and cerebral tissue
p0208 A79-38146
Determination of cerebral and neck subcutaneous tissue PO2 with 3 and 4 +Gz in M. mulatta
p0234 A79-43205
Adaptation to chronic hyperoxia in the rat - A study of pulmonary surfactant, tissue levels of superoxide dismutases and histology
p0256 A79-46603
The effect of normobaric hyperoxia on brain and liver tissue respiration in albino rats with different resistances to hypoxia
p0296 A79-51113
Effect of oxygen poisoning on the spectrum of lactate dehydrogenase isozymes of rabbit blood plasma
p0017 N79-10721
Metabolic responses of ponies to treadmill exercise in hyperoxia
p0049 N79-12681
Combined effect of hyperoxia, low pressure and exercise on the rate of methylketone excretion from the human body

HYPERVENTILATION
Hyperventilation in aircrew - A review
p0235 A79-43212

HYPNOSIS
Stress management: A comparison of educational, aerobic and autosuggestive approaches
p0260 N79-28875

HYPOBARIC ATMOSPHERES
Changes in lung volume, lung density, and distribution of ventilation during hypobaric decompression
p0185 A79-33806
Medical barofunction testing of aviators with otorhinolaryngologic disease
p0298 A79-52285
Immunobiological reactivity of the body under hyperbaric and hypobaric conditions
p0310 N79-33790

HYPOCAPNIA
Hyperventilation in aircrew - A review
p0235 A79-43212

HYPODYNAMIA
Development of adaptation to hypodynamics on rat and its readaptability to ambulatory life
[IAF PAPER 79-76] p0301 A79-53285

HYPOKINESIA
Determination of muscle mass changes in legs from K-40 measurements
p0274 A79-49997
Clinical and morphological studies of people in the course of long-term hypokinesia and subsequent readaptation
p0015 N79-10709
State of blood clotting during prolonged hypokinesia
p0073 N79-14729
Antiorthostatic hypokinesia as an approximate model of weightlessness
p0108 N79-16520
Bioelectrical activity of the brain during 49-day antiorthostatic hypokinesia in individuals with early signs of vegetovascular dysfunction
p0108 N79-16521
Changes in properties of rat femur as a result of crural exarticulation and hypokinesia
p0108 N79-16522
Blood clotting factors of the vascular wall and myocardium of hypokinetic rabbits
p0108 N79-16523
Effect of hypokinesia on animal resistance to chemical agents
p0109 N79-16524
Rehabilitation measures used to restore physical fitness of man after long-term restriction of movement
p0110 N79-16534
Effects of physical conditioning and electric stimulation on metabolic processes in the soleus muscle and structure thereof in hypokinetic man
p0192 N79-23634
Distinctions referable to excretion of end products of protein metabolism in urine of man submitted to 182-day antiorthostatic hypokinesia
p0193 N79-23635
Sterols bound with blood plasma proteins and erythrocyte membranes during hypokinesia
p0193 N79-23636

Tissular blood clotting factors of vascular walls and myocardium during hypokinesia p0194 N79-23644

Effect of brief head-down hypokinesia on pressure in various parts of the healthy man's cardiovascular system p0285 N79-27831

Effects on lipid metabolism in man of some factors that simulate space flight conditions p0311 N79-33794

Effect of restricted activity on vestibular function p0312 N79-33802

Effect of hydrostatic factor on orthostatic stability and physical fitness of man during 60-day antiorthostatic hypokinesia p0313 N79-33809

Vertical orientation of man during 5-day antiorthostatic hypokinesia (-4, -8 and -12 deg head down position) p0313 N79-33810

Blood coagulation and tissular factors of blood clotting in heparinized rabbits submitted to hypokinesia p0313 N79-33813

HYPOTHALAMUS

Interaction between hypothalamic and bulbar levels of regulating blood circulation p0098 A79-21242

Effect of the blockade of hypothalamic adrenergic structures on thermoregulatory reactions p0167 A79-31950

Dynamics of the impulse activity of the neurons in the posterior hypothalamus upon exposure to microwaves p0188 A79-35918

Characteristics of EEG changes in rabbits in response to local cooling or heating of the central thermosensory area p0221 A79-36097

The role of the neurohormone system of the hypothalamus in physiology and pathology --- Russian book p0251 A79-43835

Synaptosomal uptake of hypothalamic monoamines and recovery of pituitary-adrenal activity following medial forebrain bundle lesions in rats p0275 A79-50232

Effect of cerebrocranial trauma on reactive distinctions of hypothalamic and hippocampal vessels in the presence of hypoxia p0074 N79-14733

Catecholamines and enzymes of metabolism thereof in the rat hypothalamus after flight aboard Cosmos-782 biosatellite p0244 N79-27822

HYPOTHERMIA

Systolic time intervals during combined hand cooling and head-up tilt p0135 A79-27554

Regional heat loss in resting man during immersion in 25.2 C water p0202 A79-37709

An improved method for inducing hypothermia and rewarming p0267 A79-47339

Temperature uniformity in hyperthermal tumor therapy p0018 N79-10730

The effect of moderate hypothermia on the circulatory and myocardial consequences of acute coronary ligation in dogs p0049 N79-12683

Coma recovery p0094 N79-15891

HYPOTHESES

False hypothesis and the pilot --- aircraft accidents due to decision making errors [SAE PAPER 780528] p0001 A79-10399

HYPOXEMIA

Developmental and hematological responses to low level exposure of carbon monoxide in mice p0048 A79-16099

Effects of chronic changes in hemoglobin-O2 affinity in rats p0185 A79-33808

The bloodflow in skeletal muscle capillaries in normoxia and arterial hypoxemia /Microcinematographic studies/ p0208 A79-38150

Lung oxygen diffusibility and permeability in dogs of various ages under normal conditions and in cases of acute hypoxic hypoxia p0296 A79-51114

HYPOXIA

The comparative study of metabolism changes dynamics during hypoxia and hyperoxia in mice lungs [IAF PAPER 78-51] p0002 A79-11221

Exercise ventilation correlates positively with ventilatory chemoresponsiveness p0066 A79-18954

3'5'-cyclic AMP content in rat tissues during hypoxic adaptation and gamma irradiation p0069 A79-19426

Norepinephrine uptake by the isolated heart of rats adapted and deadapted to hypoxia p0097 A79-20621

Cerebral gas exchange in rats adapted to hypoxia during inspiration of oxygen-poor mixtures p0097 A79-20623

Regional blood supply under hypoxic hypoxia p0097 A79-20652

Temperature effect of muscular work in the white rat during hypoxia p0097 A79-20654

Responses of pial arterioles after prolonged hypercapnia and hypoxia in the awake rabbit p0101 A79-23075

Thermal sweat rate response to an acute short exposure at a simulated altitude of 4,600 m p0102 A79-23474

Transient changes in arterial blood gases and heart rate during and after acutely induced hypoxia and hyperoxia to rabbits p0134 A79-27120

Individual differences in hypoxic responses at high altitudes p0159 A79-28738

Instrumentation for controlling and monitoring environmental control and life support systems
[ASME PAPER 78-ENAS-40] p0009 A79-12587
Extended duration Orbiter life support definition
[ASME PAPER 78-ENAS-42] p0009 A79-12588
Test evaluation of space station ECLSS maintenance concepts --- Environmental Control and Life Support System
[ASME PAPER 78-ENAS-43] p0009 A79-12589
Medical characteristics of the Spacelab life support system
[DGLR PAPER 78-130] p0041 A79-14082
USAF life support equipment costs
p0043 A79-14402
Development of integrated tubing fabric for liquid conditioning undergarments
p0044 A79-14415
A Canadian approach to high altitude protection --- fighter pilot garmentry and high pressure masks
p0045 A79-14435
Developing closed life support systems for large space habitats
[AAS PAPER 78-145] p0099 A79-21260
USAF life support system 412A - 1978 corporate report
p0183 A79-33602
Test and evaluation process for life support systems
p0184 A79-33643
Systems integration in the development of controlled ecological life support systems
[AIAA PAPER 79-1406] p0187 A79-34842
Waste treatment options for use in closed systems --- in space colonies
[AIAA PAPER 79-1409] p0187 A79-34843
Generalized environmental control and life support system computer program (G1894), phase 3
[NASA-CR-151836] p0019 N79-10741
Water system microbial check valve development
[NASA-CR-151843] p0032 N79-11733
Prospects of using Japanese quail in biological life support systems
p0109 N79-16531
Advanced life support equipment for nitrogen tetroxide environments
p0169 N79-20432
Utilization of the wastes of vital activity
[NASA-TM-75410] p0177 N79-21768
Microflora of water reclaimed in sealed compartments
p0193 N79-23638
Concept definition for an extended duration orbiter ECLSS
[NASA-CR-160164] p0197 N79-23666
Characteristics of proteins of some unicellular organisms as potential components of ecological life support systems
p0246 N79-27834
Electrochemically regenerable carbon dioxide absorber
[NASA-CR-152099] p0262 N79-29794

LIGAMENTS
Knee flail design limits: Background, experimentation and design criteria
[AD-A062384] p0220 N79-25746

LIGHT (VISIBLE RADIATION)
NT LIGHT BEAMS
NT SUNLIGHT
Origin of neuron responses of the superior colliculus to light flashes
p0233 A79-42294
Thermally induced retina injury due to high doses of optical radiation
p0278 A79-50974
The physiological significance of light for human beings
[RAE-LIB-TRANS-1976] p0077 N79-14757
A study of the effects of six light conditions on caloric induced nystagmus
p0195 N79-23652

LIGHT ABSORPTION
U ELECTROMAGNETIC ABSORPTION

LIGHT ADAPTATION
Primate cone sensitivity to flicker during light and dark adaptation as indicated by the foveal local electroretinogram
p0104 A79-24065
The influence of rapid prism adaptation upon fixation disparity
p0231 A79-42230
Light adaptation in a normal and a rod monochromat - Psychophysical and VEP increment threshold comparisons
p0232 A79-42234
Effect of adaptation level on certain visual functions in man
p0296 A79-51328
Restoration of color perception after deadapting flashes
p0193 N79-23640
Influence of light adaptation on dark adaptation time for pattern recognition tasks
[FB-31] p0316 N79-33835

LIGHT AIRBORNE MULTIPURPOSE SYSTEM
Human factor engineering test and evaluation of the US Navy LAMPS helicopter system
p0151 N79-19632

LIGHT BEAMS
Moving phase transitions in laser-irradiated biological tissue
p0228 A79-41478
Mechanisms of retinal damage from chronic laser radiation: Thresholds and mechanisms
[AD-A058449] p0056 N79-13698

LIGHT DURATION
U PULSE DURATION

LIGHT EMISSION
NT CHEMILUMINESCENCE
NT FLUORESCENCE

LIGHT EMITTING DIODES
Human factors considerations in the design and evaluation of a helmet mounted display using a light emitting diode matrix
p0063 A79-18214
No harmful effects through infrared light emitting diodes
p0184 A79-33650

LIGHT INTENSITY
U LUMINOUS INTENSITY

LIGHT MODULATION
Contributions of the retina and of the eye optical system to the modulation lowering of the aerial image
p0100 A79-22771

LIGHT PROBES
U LIGHT BEAMS

LIGHT SCATTERING
Accuracy of RGD approximation for computing light scattering properties of diffusing and motile bacteria --- Rayleigh-Gans-Debye
p0233 A79-42448

LIGHT TRANSMISSION
NT LIGHT SCATTERING
Measurements in the laser irradiated eye
[AD-A069842] p0315 N79-33825

LIGHTING
U ILLUMINATING

LIGHTING EQUIPMENT
Light and color on a manned spacecraft
p0059 N79-13996
A decision model applied to alcohol effects on driver signal light behavior
p0092 N79-15630

LIMBS (ANATOMY)
NT ARM (ANATOMY)
NT FOREARM
NT HAND (ANATOMY)

LISTS
Publications of the planetary biology program for 1977: A special bibliography
[NASA-TM-80338] p0179 N79-21777
LITERATURE
NT BIOGRAPHY
NT DOCUMENTATION
LITHIUM COMPOUNDS
NT LITHIUM HYDROXIDES
LITHIUM HYDROXIDES
The dependence of the CO2 removal efficiency of LiOH on humidity and mesh size --- in spacecraft life support systems
[ASME PAPER 78-ENAS-5] p0006 A79-12554
LIVER
The effect of normobaric hyperoxia on brain and liver tissue respiration in albino rats with different resistances to hypoxia
p0296 A79-51113
Radiation lesion to liver DNA of rats exposed to radiation during flight aboard the Kosmos-690 biosatellite
p0014 N79-10702
Histological and histochemical studies of the liver of rats flown aboard Kosmos-690 biosatellite
p0014 N79-10703
COSMOS 936, experiment K204: The effects of space flight on some liver enzymes concerned with carbohydrate and lipid metabolism in the rat
p0023 N79-11675
Diffraction-based characterization of biological tissue with ultrasound --- acoustic scattering from liver tissue
p0054 N79-13683
State of process of oxidation phosphorylation of liver mitochondria on exposure to an electric field
p0075 N79-14742
Effect of different doses of centimeter-band electromagnetic oscillations of biochemiluminescence of central nervous system and liver tissues
p0172 N79-20738
Cu-content of the liver of young mice in relation to a defect in the Cu-metabolism
[IRI-133-77-02] p0239 N79-26764
LOAD DISTRIBUTION (FORCES)
Influences of joystick spring resistance on the execution of simple and complex positioning movements
p0119 N79-17517
LOAD FACTORS
U LOADS (FORCES)
LOADING FORCES
U LOADS (FORCES)
LOADING OPERATIONS
Microbial load monitor
[NASA-CR-160274] p0243 N79-27815
LOADING WAVES
U LOADS (FORCES)
LOADS (FORCES)
NT AXIAL COMPRESSION LOADS
NT DYNAMIC LOADS
A study of the effect of forcing function characteristics on human operator dynamics in manual control
p0086 N79-15590
LOBES
Distribution of regional volumes and ventilation in excised canine lobes
p0236 A79-43703
LOCKHEED AIRCRAFT
NT C-141 AIRCRAFT
NT F-104 AIRCRAFT

LOCOMOTION
NT ASTRONAUT LOCOMOTION
NT WALKING
Adaptive locomotion of a multilegged robot over rough terrain
p0163 A79-30217
Process of search control of coordinated movement in man
p0166 A79-30701
Selecting the program of motions for a biped walking machine
p0166 A79-31490

LOGIC DESIGN
Control logic design criteria for multifunction switching devices --- in aircraft
p0064 A79-18223

LONG DURATION EXPOSURE FACILITY
The Biostack experiment in the U.S. long exposure duration test program
p0227 A79-41230

LONG TERM EFFECTS
Medical control in prolonged space flights
[IAF PAPER 78-63] p0003 A79-11226
Challenges to life support system's future
[ASME PAPER 78-ENAS-28] p0008 A79-12577
Serendipitous solution to the problem of culturing Arabidopsis plants in sealed containers for spaceflights of long duration
p0229 A79-41704
Changes in blood sugar content of dogs exposed to chronic gamma radiation for six years
p0014 N79-10706
Effects of long-term and chronic radiation on hemopoiesis
p0016 N79-10719
Dynamic medical monitoring of flight crews in the course of long-term flights
p0072 N79-14719
State of blood clotting during prolonged hypokinesia
p0073 N79-14729
Space biology and aerospace medicine, volume 13, no. 1, 1979
[JPRS-72826] p0107 N79-16514
Morphological study of adrenals of rats irradiated during flight aboard Kosmos-690 satellite
p0108 N79-16517
The facilitating effects of uncertainty in long-term manual control
p0115 N79-17485
Problems of human adaption to spaceflight
p0157 N79-19985
Distinctions referable to excretion of end products of protein metabolism in urine of man submitted to 182-day antiorthostatic hypokinesia
p0193 N79-23635
Effect of combination of hypoxia and hypercapnia on survival of Japanese quail
p0194 N79-23641
Effects of different values of urine pH during long-term storage on microflora composition
p0194 N79-23643
Morphological distinctions of the rat thyroid and parathyroid following long-term space flights
p0246 N79-27835

LOOP ANTENNAS
Electromagnetic power absorption in cylindrical tissue models excited by a loop antenna
p0136 A79-27959

LOUDNESS
Overall loudness of steady sounds according to theory and experiment
[NASA-RP-1001] N79-25753
The loudness of tinnitus
p0246 N79-27837

LOW ALTITUDE
The effects of ambient illumination, aircraft velocity and feedback on absolute distance judgments during simulated night nap-of-the-earth flight
p0038 A79-13204
Responses of high altitude natives to a standard cold test at sea level
p0164 A79-30658
The effect of Nap-of-the-Earth (NOE) helicopter flying on pilot blood and urine biochemicals
[AD-A055204] p0055 N79-13693

LOW FREQUENCIES
The influence of low frequency vibration on pilot performance /as measured in a fixed base simulator/
p0299 A79-52326
Frequency response of cardiovascular regulation in canines to sinusoidal acceleration at frequencies below 1 Hz (basis for biodynamic modeling)
p0286 N79-31915

LOW GRAVITY
U REDUCED GRAVITY

LOW PRESSURE
Combined effect of hyperoxia, low pressure and exercise on the rate of methylketone excretion from the human body
p0073 N79-14725

LOW TEMPERATURE
Effects of low temperature on in vivo and in vitro protein synthesis in Escherichia coli and Pseudomonas fluorescens
p0131 A79-26141

LOW TEMPERATURE ENVIRONMENTS
The effects of temperature, salinity, and other factors on the growth and formation of UV-absorbing substances by the fungus Aspergillus
p0005 A79-12512
Skin temperature changes in paradoxical sleep in man in the cold
p0201 A79-37706

LOW VISIBILITY
The effects of prediction, quickening, frequency separation, and percent of pursuit in perspective displays for low-visibility landing
p0063 A79-18210

LOWER ATMOSPHERE
NT BIOSPHERE

LOWER BODY NEGATIVE PRESSURE (LBNP)
U ACCELERATION STRESSES (PHYSIOLOGY)

LSI
U LARGE SCALE INTEGRATION

LUMBAR REGION
The effect of thermal stimulation of the skin on activity of lateral crescent interneurons of lumbar segments
p0208 A79-38147

LUMBERING AREAS
U FORESTS

LUMINANCE
The tilt illusion - Length and luminance changes of induction line and third /disinhibiting/ line
p0228 A79-41422
On the latency of human visually evoked response to sinusoidal gratings
p0232 A79-42236
Enchancement of luminance flicker by color-opponent mechanisms
p0252 A79-44582
Spatial summation in human vision - Simple reaction time measurements
p0265 A79-47115
Upper-velocity threshold for detection of movement
p0299 A79-52541
Contrast sensitivity of the human visual system at one luminance level while adapted to a stimulus at another luminance level
[AD-A064370] p0190 N79-22759

LUMINESCENCE
NT CHEMILUMINESCENCE
NT FLUORESCENCE

LUMINESCENT INTENSITY
U LUMINOUS INTENSITY

LUMINOUS FLUX DENSITY
U LUMINOUS INTENSITY

LUMINOUS INTENSITY
NT LUMINANCE
Human factors design criteria for transilluminated displays
p0036 A79-13187

LUNAR SCATTERING
U DIFFUSE RADIATION

LUNAR SOIL
The origin of life on earth - Recent studies
p0134 A79-27335

LUNG MORPHOLOGY
Growth of pulmonary circulation in normal pig - Structural analysis and cardiopulmonary function
p0067 A79-18961
Changes in lung volume, lung density, and distribution of ventilation during hypobaric decompression
p0185 A79-33806

Radiographic comparison of human lung shape during normal gravity and weightlessness
p0305 A79-54269

LUNGS
The comparative study of metabolism changes dynamics during hypoxia and hyperoxia in mice lungs
[IAF PAPER 78-51] p0002 A79-11221
Monitoring the state of the human airways by analysis of respiratory sound
[IAF PAPER 78-66] p0003 A79-11227
Improved measurements of shear modulus and pleural membrane tension of the lung
p0236 A79-43702
Distribution of regional volumes and ventilation in excised canine lobes
p0236 A79-43703
A revised model of gas transport in human lungs
p0253 A79-45768
Pulmonary functional tolerance to ionizing radiation - An experimental study
p0256 A79-46601
Adaptation to chronic hyperoxia in the rat - A study of pulmonary surfactant, tissue levels of superoxide dismutases and histology
p0256 A79-46603
Absence of effects of hypoxia on small airway function in humans
p0268 A79-47851
Cardiopulmonary readjustments in passive tilt

p0131 A79-26149
The human operator in the control system: Linear models --- German book
p0132 A79-26356
Adaptive estimation schemes for minimizing uncertainty in manual control tasks
p0269 A79-48013
Human operators in adversary tracking encounters
p0269 A79-48015
Computer augmented manual control of remote manipulators
p0269 A79-48019
An operator-aiding manipulator control system
p0269 A79-48020
Helicopter commands at the touch of a hand
[AHS 79-13] p0270 A79-49066
Mechanisms of the effects of vibration frequency, level and duration on continuous manual control performance
p0299 A79-52327
Development of recommendations to improve controls operability
[PB-284433/0] p0053 N79-12714
A formal model of the adaptive and discrete control behaviors of human operators
[AD-A059039] p0059 N79-13717
The 14th Annual Conference on Manual Control --- digital simulation of human operator dynamics
[NASA-CP-2060] p0086 N79-15588
A study of the effect of forcing function characteristics on human operator dynamics in manual control
p0086 N79-15590
An extension of the quickened display for manual control
p0086 N79-15591
Effects of uncertainty on manual tracking performance --- visual tasks
p0086 N79-15592
Modeling the human as a controller in a multitask environment
p0087 N79-15595
A comparison of motor submodels in the optimal control model
p0087 N79-15597
Flight experience with manually controlled unconventional aircraft motions
p0088 N79-15602
The determination of the operating range of a twin-grip control yoke through biomechanical means
p0089 N79-15609
Evaluation of display and control concepts for a terminal configured vehicle in final approach in a windshear environment
p0090 N79-15616
Proceedings, 13th Annual Conference on Manual Control
[NASA-CR-158107] p0114 N79-17475
A dual-loop model of the human controller
p0115 N79-17480
An approach to the multi-axis problem in manual control --- optimal pilot model
p0115 N79-17482
Error rate information in attention allocation pilot models
p0115 N79-17483
The facilitating effects of uncertainty in long-term manual control
p0115 N79-17485
Multi-attribute subjective evaluations of manual tracking tasks vs. objective performance of the human operator
p0116 N79-17486
The effects of participatory mode and task workload on the detection of dynamic system failures
p0116 N79-17487
A control theoretic model of driver steering behavior
p0116 N79-17491
Modelling the human operator of slowly responding systems using linear models
p0117 N79-17492
Driver steering dynamics measured in car simulator under a range of visibility and roadmaking conditions
p0117 N79-17493

A model of the human supervisor
p0117 N79-17495
Manual control of yaw motion with combined visual and vestibular cues
p0119 N79-17513
Motion cue effects on human pilot dynamics in manual control
p0119 N79-17514
Study of the use of a nonlinear, rate limited, filter on pilot control signals
p0119 N79-17515
Influences of joystick spring resistance on the execution of simple and complex positioning movements
p0119 N79-17517
Investigation on the effect of mechanical properties of control elements on human control performance under stochastic roll vibrations
[BMVG-FBWT-78-11] p0146 N79-18593
Steering behaviour and manual control actions. Part 1: An evaluation of the literature and a research plan
[IZF-1978-3] p0146 N79-18594
The application of control theory to the investigation of roll motion effects on human operator performance
p0288 N79-31931
A theoretical and experimental analysis of the outside world perception process
[NLR-MP-78020-U] p0309 N79-32835

MANUALS
NT USER MANUALS (COMPUTER PROGRAMS)

MANUFACTURING
NT SPACE MANUFACTURING

MAPPING
NT THERMAL MAPPING

MAPS
The application of remote sensors to a model for fish mapping
[INPE-1379-PE/176] p0071 N79-14712
Individual differences in knowledge acquisition from maps
[AD-A065040] p0196 N79-23663

MARIJUANA
Effect of alcohol and marijuana on eye movements
p0101 A79-23469

MARINE BIOLOGY
Experimental approach to the chemical evolution in the primeval sea. II - Formation of protocell-like structures 'marigranules' in a modified sea medium
p0204 A79-37964
Determination of bound water in biological materials from dielectric measurements
p0082 N79-15557
Nitrogen fixation with photosynthetic marine microorganisms
[PB-286000/5] p0083 N79-15570
Nitrogen fixation with photosynthetic marine microorganisms
[PB-287590/4] p0120 N79-17525
Citric acid enhancement of copper sulfate toxicity to blue-green algae and other nuisance organisms
[PB-289490/5] p0170 N79-20718
Effects of heavy metals especially selenium, vanadium and zirconium on movement, growth and survival of certain animal aquatic life
[PB-292563/4] p0197 N79-25706
Results of benthic studies at Calvert Cliffs
[PB-294261/3] p0261 N79-29788

MARINE CHEMISTRY
Organic geochemical studies on kerogen precursors in recently deposited algal mats and oozes
p0001 A79-10419

MARINE ENVIRONMENTS
Proceedings of the first and second USA-USSR Symposia on the Effects of Pollutants upon aquatic ecosystems. Volume 1: USA Symposium. Volume 2: USSR Symposium
[PB-287219/0] p0112 N79-16546

MARKET RESEARCH
Eye-ball control
p0270 A79-49225

MARKING
NT ISOTOPIC LABELING
Design of polymeric immunomicrospheres for cell labelling and cell separation
p0275 A79-50234

MARS (PLANET)
Biological implications of the Viking mission to Mars
p0045 A79-14595
Solar-driven chemical energy source for a Martian biota
p0254 A79-46464
Some comments on interpretations of Viking biological experiments
p0255 A79-46465

MARS ENVIRONMENT
The response of selected terrestrial organisms to the Martian environment - A modeling study
p0136 A79-27928

MARS PROBES
NT VIKING LANDER SPACECRAFT
NT VIKING MARS PROGRAM
NT VIKING SPACECRAFT

MARS SURFACE
Chemical fingerprints of life in terrestrial soils and their possible use for the detection of life on Mars and other planets
p0136 A79-27929

MARS SURFACE SAMPLES
Public health considerations associated with a Mars surface sample return mission
p0005 A79-12510

MARSHES
U MARSHLANDS

MARSHLANDS
Distribution of bluegreen algae in a Mississippi Gulf Coast salt marsh
[PB-288982/2] p0153 N79-19667

MASKING
Perceptual delay - A consequence of metacontrast and apparent motion
p0035 A79-13183

MASKS
NT OXYGEN MASKS
Development of a specialized head/face protective device for test parachuting operations
p0045 A79-14437
Visual and optical assessment of gas protective face masks
p0152 N79-19642
An interface evaluation of the XM-29 protective mask and the AH-1S telescopic sight unit
[AD-A064203] p0190 N79-22764
Field evaluation of experimental crash-crew firefighter's facepiece
[AD-A066544] p0223 N79-25765

MASS
NT STELLAR MASS

MASS DISTRIBUTION
The inertial properties of the body and its segments
p0033 N79-11738

MASS SPECTROMETRY
U MASS SPECTROSCOPY

MASS SPECTROSCOPY
Tissue gas and blood analyses of human subjects breathing 80% argon and 20% oxygen
p0164 A79-30655
Concentration of trace contaminants during gas chromatography and chromato-mass spectrometry in biomedical research
p0109 N79-16528

MASS TRANSFER
Mass transport in arteries
p0247 N79-27848

MATERIAL BALANCE

MATERIALS RECOVERY
NT WATER RECLAMATION
Utilization of the wastes of vital activity
[NASA-TM-75410] p0177 N79-21768

MATERIALS TESTS
Statistical studies of animal response data from USP toxicity screening test method
p0066 A79-18305

MATHEMATICAL LOGIC
NT ALGORITHMS
NT AXIOMS
NT EQUIVALENCE

Overall loudness of steady sounds according to theory and experiment
[NASA-RP-1001] N79-25753
Some of the problems involved in planning biological experiments
p0312 N79-33805

MATHEMATICAL MODELS
NT ANALOG SIMULATION
NT DIGITAL SIMULATION
Various modeling approaches in biomechanics --- analog simulation of impact events
p0005 A79-12407
Models for automated motor skills training --- computer controlled adaptive instruction
p0035 A79-13182
A prediction model of arm push strength in the transverse plane
p0037 A79-13195
Simulation and control of a human temperature regulation system
p0041 A79-13613
The multiloop concept of the pilot work load as a basis of future experiments and studies
[ONERA, TP NO. 1978-10] p0045 A79-14795
Biped stability considerations with vestibular models
p0066 A79-18287
Modeling the effect of axial bronchial tension on expiratory flow
p0067 A79-18957
Regulation and efficiency of sweating in man /Mathematical modeling/
p0097 A79-20622
Modeling heat transfer through human skin subjected to high external temperatures
p0102 A79-23782
Linearization and sensitivity analysis of model for human eye movements
p0102 A79-23783
A theoretical model to estimate some ergonomic parameters from age, height and weight
p0132 A79-26150
Mechanics of the regulation of the respiratory system in man
p0160 A79-29258
Deductive derivation of a mathematical model for spectral sensitivity of the human organ of sight. I, II
p0166 A79-31178
Evaluation of models describing human operator control of slowly responding complex systems --- Thesis
p0167 A79-31494
A simple analogical model for the selection of optical activity and of the most efficient catalysts in the course of molecular evolution
p0204 A79-37957
The eccentric spheres model as the basis for a study of the role of geometry and inhomogeneities in electrocardiography
p0226 A79-40649
Analysis of population mortality kinetics with application to the longevity followup of the Navy's '1,000 aviators'
p0234 A79-43207
A structural model of the adaptive human pilot
[AIAA 79-1784] p0252 A79-45411
Mathematical model of the respiration rhythm generation process
p0254 A79-46268
Modeling human tracking performance in a high G-stress environment
p0269 A79-48012
Fundamentals of electrical processes in the electrophysiology of the heart
p0304 A79-53532
Basic biomechanics equations for cardiovascular flow
p0304 A79-53534
A behavioral model of target acquisition in realistic terrain
[AD-A056760] p0019 N79-10742
Density dependence of maximum expiratory flow
p0050 N79-12691
Aerodynamic forces exerted on an articulated human body subjected to windblast
[AD-A059023] p0055 N79-13688
Some recent results on the deposition of electromagnetic energy in animals and models of man
p0083 N79-15563
Modeling the effects of high-G stress on pilots in a tracking task
p0087 N79-15593
AAA gunnermodel based on observer theory --- predicting a gunner's tracking response
p0087 N79-15594
Modeling the human as a controller in a multitask environment
p0087 N79-15595
A comparison of motor submodels in the optimal control model
p0087 N79-15597
Prospects of a mathematical theory of human behavior in complex man-machine systems tasks --- time sharing computer analogy of automobile driving
p0088 N79-15599
Petri nets as a modeling tool for discrete concurrent tasks of the human operator --- describing sequential and parallel demands on human operators
p0038 N79-15600
Discrete-time pilot model --- human dynamics and digital simulation
p0088 N79-15601
A model for dynamic allocation of human attention among multiple tasks
p0092 N79-15627
A model of human event detection in multiple process monitoring situations
p0092 N79-15632
Mathematical simulation of the human circulatory system
p0110 N79-16535
Modelling the human operator of slowly responding systems using linear models
p0117 N79-17492
A model for the pilot's use of motion cues in roll-axis tracking tasks
p0118 N79-17512
Image processing program completion report
[AD-A061597] p0123 N79-17549
Cell response to chronic irradiation-modeling and simulation studies
p0142 N79-18562
A model for predicting human discomfort response to combined noise and vertical vibration
p0156 N79-19685
The role of computer technology mathematical models in treatment of patients following heart surgery
p0170 N79-20721
Modeling and analysis of man-machine interface information
[AD-A063515] p0178 N79-21772
Some problems involved in using mathematical methods for evaluation of pathophysiological changes in the body
p0192 N79-23628
Use of a mathematical model of erythropoiesis for evaluation of effects of space flight factors
p0192 N79-23630
A two level model of human steering behavior in a motor vehicle
[PB-27] p0197 N79-24657
User's instructions for the erythropoiesis regulatory model
[NASA-CR-160193] p0216 N79-25711
Development of an hypothesis for simulating anti-orthostatic bed rest
[NASA-CR-160200] p0217 N79-25717
Dynamic regulation of erythropoiesis: A computer model of general applicability
[NASA-CR-160203] p0217 N79-25720
A simple model of fluid flow and electrolyte balance in the body
[NASA-CR-160205] p0217 N79-25722
Improvements and validation of the erythropoiesis control model for bed rest simulation
[NASA-CR-160187] p0218 N79-25728
The development of a whole-body algorithm
[NASA-CR-160214] p0218 N79-25730
User's instructions for the GE cardiovascular model to simulate LBNP and tilt experiments, with graphic capabilities
[NASA-CR-160216] p0219 N79-25732
Study report on guidelines and test procedures for investigating stability of nonlinear

cardiovascular control system models
[NASA-CR-160229] p0219 N79-25734
User's instructions for the whole-body algorithms
[NASA-CR-160233] p0219 N79-25735
The application of systems analysis and mathematical models to the study of erythropoiesis during space flight
[NASA-CR-160218] p0219 N79-25739
Tolerance of the neck to indirect impact
[AD-A066971] N79-25749
A comparison of three models for determining test fairness
[AD-A066586] N79-25751
The application of MINIQUASI to thermal program boundary and initial value problems
[NASA-CR-160227] p0222 N79-25759
Mathematical models of skin burns induced by simulated postcrash fires as aids in thermal protective clothing design and selection
[AD-A066946] p0223 N79-25766
Refinement and validation of a mathematical model of the human torso
p0247 N79-27841
A stochastic model of muscle fatigue in frequent strenuous work cycles
p0261 N79-29789
Simulation of head and neck response to -G sub x and +G sub z impacts
p0285 N79-31908
A three dimensional discrete element dynamic model of the spine, head and torso
p0285 N79-31910
Mathematical modeling of arterial oxygen saturation and eye-level blood pressure during +G sub z stress
p0286 N79-31916
A head injury model
p0286 N79-31918
The use of mathematical modeling in crashworthy helicopter seating systems
p0287 N79-31923
Estimation of rate constants in the Michaelis-Menten model
[AD-A070360] p0307 N79-32824
A theoretical and experimental analysis of the outside world perception process
[NLR-MP-78020-U] p0309 N79-32835
Analytical modelling of load-deflection behavior of intervertebral discs subjected to axial compression
[AD-A071019] p0316 N79-33830
A general model for the transfer of vapour through clothed skin from liquid on and in clothing
[AD-A071577] p0319 N79-33853

MATHEMATICAL PROGRAMMING
NT DYNAMIC PROGRAMMING
Evaluation of exercise-respiratory system modifications and integration schemes for physiological systems
[NASA-CR-160223] p0219 N79-25733

The selection of air traffic control specialists: Two studies demonstrating methods to insure an accurate validity coefficient for selection devices [AD-A068581] p0281 N79-30932
MONTMORILLONITE
Synthesis of amino acids under primitive earth conditions in the presence of clay p0203 A79-37930
MOODS
Changes in the circadian rhythm of performance and mood in healthy young men exposed to prolonged, heavy physical work, sleep deprivation, and caloric deficit p0234 A79-43202
MORPHOLOGY
NT LUNG MORPHOLOGY
Temperature-dependent morphological changes in membranes of Bacillus stearothermophilus p0005 A79-12475
The physical appearance of intelligent aliens p0105 A79-24519
Morphological and biochemical effects of oxygen toxicity [AD-A056778] p0018 N79-10734
The morphogenetic responses of cultured totipotent cells of carrot (Daucus carota L.) at zero gravity --- cosmos 782 p0021 N79-11657
The effects of the pollutant, sodium cyanide, on the morphology and physiology of oedogonium cardiacum p0147 N79-19028
A study of the mechanism of thigmomorphogenesis in plants, with special reference to the role of ethylene and its significance to research with plants in space [NASA-CR-158506] p0190 N79-23625
MORTALITY
Analysis of population mortality kinetics with application to the longevity followup of the Navy's '1,000 aviators' p0234 A79-43207
MOSS (SPACE STATIONS)
U ORBITAL SPACE STATIONS
MOTILITY
U LOCOMOTION
MOTION
Short-range movement of major agricultural pests p0148 N79-19594

Graphic display of human motion
[AD-A064344] p0190 N79-22763
Helmet weight simulator
[NASA-CASE-LAR-12320-1] p0223 N79-25761

MOTION AFTEREFFECTS
Space Sled - A multipurpose apparatus for vestibular research aboard Spacelab
[DGLR PAPER 78-132] p0042 A79-14083
Effects of target motion and image on AAA tracking --- Anti-Aircraft Artillery
p0046 A79-14969

MOTION EQUATIONS
U EQUATIONS OF MOTION

MOTION PERCEPTION
Factors controlling the competing sensations produced by a bistable stroboscopic motion display
p0108 A79-24067
Hyper-resolution in human perception of movement in visual displays
p0132 A79-26240
Optokinetic motion sickness - Attenuation of visually-induced apparent self-rotation by passive head movements
p0135 A79-27558
Omnidirectional increase in threshold for image shifts during saccadic eye movements
p0139 A79-28198
Smooth pursuit eye movements - Is perceived motion necessary
p0139 A79-28375
Changes in apparent body orientation and sensory localization induced by vibration of postural muscles - Vibratory myesthetic illusions
p0163 A79-30653
Perception of continuity in stroboscopic motion - A temporal frequency analysis
p0186 A79-34375
The interpretation of visual motion --- Book
p0186 A79-34424
The visual perception of motion in depth
p0210 A79-39087
The role of perceived motion in smooth pursuit eye movements
p0225 A79-40184
The effect of expectations on slow oculomotor control. I - Periodic target steps. II - Single target displacements
p0225 A79-40185
Form information is necessary for the perception of motion
p0232 A79-42235
Direction-selective adaptation with very slow motion
p0265 A79-47118
Mutual repulsion between moving visual targets
p0275 A79-50473
Motion and vision. I - Stabilized images of stationary gratings
p0278 A79-50986
Visual motion perception by intelligent systems
p0300 A79-52691
A theoretical and experimental analysis of the outside world perception process
p0091 N79-15625
Perpetual factors involved in performance of air traffic controllers using a microwave landing system
p0092 N79-15628
Use of the optimal control model in the design of motion cue experiments
p0118 N79-17510
A model for the pilot's use of motion cues in roll-axis tracking tasks
p0118 N79-17512
Motion cue effects on human pilot dynamics in manual control
p0119 N79-17514
Motion cue models for pilot-vehicle analysis
[AD-A061477] p0125 N79-17561

MOTION SICKNESS
Vestibular Function Research aboard Spacelab
[ASME PAPER 78-ENAS-25] p0007 A79-12574
Voluntary movement control and adaptation to cross-coupled stimulation --- motion sickness avoidance
p0009 A79-12860
Motion sickness susceptibility - A retrospective comparison of laboratory tests
p0010 A79-12861
Optokinetic motion sickness - Attenuation of visually-induced apparent self-rotation by passive head movements
p0135 A79-27558
Rotation at 30 RPM about the Z axis after 6 hours in the 10-deg head-down position - Effect on susceptibility to motion sickness
p0165 A79-30662
Motion sickness in cats - A symptom rating scale used in laboratory and flight tests
p0202 A79-37711
+Gz tolerance correlation with clinical parameters
p0235 A79-43213
Estimated body rotation as a predictor of motion sickness susceptibility
p0273 A79-49990
Third Symposium on Motion Sickness
p0313 N79-33814

MOTION SICKNESS DRUGS
Prevention and treatment of space sickness in Shuttle-Orbiter missions
p0128 A79-24639
Motion sickness in cats - A symptom rating scale used in laboratory and flight tests
p0202 A79-37711

MOTION SIMULATORS
Application of control theory to the investigation of roll motion effects on pilot control behavior
[AD-A054921] p0046 A79-14972
The relationship between flight simulator motion and training requirements
p0267 A79-47766
A method motion simulator design based on modeling characteristics of the human operator
p0091 N79-15623
Investigation of nonlinear motion simulator washout schemes
p0091 N79-15624
The effect of a visual/motion display mismatch in a single axis compensatory tracking task
p0118 N79-17511
The driving simulator developed by the Institute for Perception TNO. A validation study in straight road driving
[IZF-1978-16-PR-1] p0145 N79-18588

MOTION STABILITY
NT AERODYNAMIC STABILITY
NT AIRCRAFT STABILITY
NT FLOW STABILITY
NT HOVERING STABILITY
Selecting the program of motions for a biped walking machine
p0166 A79-31490
Stabilization of a biped walking machine with incomplete information on its phase coordinates
p0273 A79-49879
Roll tracking effects of G-vector tilt and various types of motion washout
p0091 N79-15622

MOTOR SYSTEMS (BIOLOGY)
U EFFERENT NERVOUS SYSTEMS

MOTOR VEHICLES
NT AUTOMOBILES
NT TRACTORS
NT TRUCKS
The driving simulator developed by the Institute for Perception TNO. A validation study in straight road driving
[IZF-1978-16-PR-1] p0145 N79-18588
Impact tests on crash helmets for motor cyclists
[AD-A065966] p0197 N79-24655

MOUNTAIN INHABITANTS
Investigation of the content of hemoglobin and its fractions in permanent inhabitants of the Tien Shan and Pamir
p0188 A79-35124
Oxygen affinity of blood in altitude Sherpas
p0268 A79-47854

MOVEMENT
U MOTION

MOVING TARGET INDICATORS
Line criteria in target acquisition with television --- visibility of target image on TV screen
p0068 A79-18997
Visual cues in manual tracking of simulated targets
p0103 A79-23792
Estimation of aircraft target motion using pattern recognition orientation measurements
p0177 N79-21764

MTI RADAR

U MOVING TARGET INDICATORS

MULTISPECTRAL PHOTOGRAPHY

Diagnosis of cutaneous thermal burn injuries by multispectral imaging analysis [NASA-CR-162103] p0279 N79-30922

MULTIVARIATE STATISTICAL ANALYSIS

NT DISCRETE FUNCTIONS

NT REGRESSION ANALYSIS

The prediction of the existence or nonexistence of coronary artery disease using routine clinical laboratory measurement p0028 N79-11703

Multi-attribute subjective evaluations of manual tracking tasks vs. objective performance of the human operator p0116 N79-17486

The selection of air traffic control specialists: Two studies demonstrating methods to insure an accurate validity coefficient for selection devices [AD-A068581] p0281 N79-30932

MUSCLES

NT MYOCARDIUM

Phosphorylase a in human skeletal muscle during exercise and electrical stimulation p0067 A79-18962

The bloodflow in skeletal muscle capillaries in normoxia and arterial hypoxemia /Microcinematographic studies/ p0208 A79-38150

Ultrasonic investigations of the soleus muscle after space flight on the Biosputnik 936 p0274 A79-49992

Determination of muscle mass changes in legs from K-40 measurements p0274 A79-49997

Tremometry as a method of evaluating the functional state of the nervous system of a pilot p0300 A79-53065

COSMOS 936, experiment K-208: Spaceflight effects on muscle fibers p0024 N79-11679

Calcium regulation in smooth muscle: Isolation and characterization of the myosin light chain kinase p0024 N79-11680

Changes in metabolism of soleus muscle tissue in rats following the flight aboard the Kosmos-690 biosatellite p0108 N79-16518

Effects of space flight factors on electrolyte composition of rat skeletal muscles p0109 N79-16530

Electrolyte composition of rat blood plasma and skeletal muscles after flight aboard the Cosmos-690 biosatellite p0311 N79-33795

MUSCULAR FATIGUE

A simple technique for evaluation of vitality loss in aging mice, by testing their muscular coordination and vigor p0274 A79-50205

Frequency and amplitude analysis of the EMG during exercise on the bicycle ergometer p0297 A79-52022

Electrophysiological correlates of local muscular fatigue effects upon human visual reaction time p0297 A79-52025

Operator performance and localized muscle fatigue in a simulated space vehicle control p0214 N79-24653

A stochastic model of muscle fatigue in frequent strenuous work cycles p0261 N79-29789

MUSCULAR FUNCTION

Models for automated motor skills training --- computer controlled adaptive instruction p0035 A79-13182

A composite view of task performance in hot environments p0036 A79-13186

Special tests for astronaut selection - Muscular exercise test p0047 A79-15492

Temperature effect of muscular work in the white rat during hypoxia p0097 A79-20654

Mechanical efficiency of fast- and slow-twitch muscle fibers in man during cycling p0268 A79-47852

Recovery of skeletal muscle after 3 mo of hindlimb immobilization in rats p0268 A79-47856

Mechanism for the regulation of human posture during movements of the foot p0276 A79-50651

Characteristics of somatic and autonomic regulation during work of small muscle groups as a function of loading regime p0276 A79-50653

Effect of hypoxia on mechanical properties of hyperthyroid cat papillary muscle p0296 A79-51111

The effect of microwave fields on muscle oxygen pressure and temperature in animals previously adapted to hypoxia p0296 A79-51116

Development of adaptation to hypodynamics on rat and its readaptability to ambulatory life [IAF PAPER 79-76] p0301 A79-53285

Carbohydrate metabolism of the stimulated diaphragm muscle p0050 N79-12689

Nonshivering thermogenesis in normal and dystrophic muscle p0054 N79-13680

Changes in properties of rat femur as a result of crural exarticulation and hypokinesia p0108 N79-16522

The pulmonary circulation: Studies on alveolar hypoxia and vascular smooth muscle metabolism p0195 N79-23650

Recruitment and discharge properties of motor units in human brachial biceps and adductor pollicis during isometric contractions p0216 N79-25708

Multifunctional transducer [NASA-CASE-NPO-14329-1] p0219 N79-25737

MUSCULAR STRENGTH

A prediction model of arm push strength in the transverse plane p0037 A79-13195

Biomechanical properties of muscles and the efficiency of movement p0276 A79-50652

Human muscular strength p0033 N79-11741

Instrumentation and techniques for the measurement of muscular strength and endurance in the human body [AD-A061023] p0155 N79-19681

Isometric strength testing in selecting workers for strenuous jobs p0262 N79-29790

MUSCULAR TONUS

Effects of vestibular stimuli on the electrical activity of muscles p0187 A79-35121

The bloodflow in skeletal muscle capillaries in normoxia and arterial hypoxemia /Microcinematographic studies/ p0208 A79-38150

Studies of amino acid metabolism in the muscles of rats flown aboard the biosatellite Cosmos 782 p0230 A79-41714

Recovery of skeletal muscle after 3 mo of hindlimb immobilization in rats p0268 A79-47856

The inertial properties of the body and its segments p0033 N79-11738

Changes in amount and composition of phospholipids in rat skeletal muscle microsomal fraction under the influence of a flight aboard the Kosmos-690 biosatellite
p0108 N79-16519
Effects of hypodynamic simulations on the skeletal system of monkeys
p0146 N79-19021
The influence of exercise on bone atrophy
[NASA-CR-160196] p0216 N79-25714
The combined effect of space flight factors and radiation on rat skeletal muscles
p0244 N79-27821
Tissular metabolism in mixed type fibers of rat skeletal muscles after flight aboard Cosmos-690 biosatellite
p0244 N79-27823
The validation of biodynamic models
p0286 N79-31914

MUTATIONS
Possible contribution of transferable exogenous DNA in prokaryotic evolution
p0205 A79-37971
The point mutation process in proteins
p0205 A79-37972
Genetic effects of cosmic radiation on bacteriophage T4Br/+/ /On materials of biological experiment Soyuz-Apollo/
p0229 A79-41708
On investigating the statistical properties of the populous path algorithm by computer simulation - Counterconclusions to those of Tateno and Nei --- for mutational change in protein evolution
p0253 A79-45640
Effect of accelerations combined with radiation on occurrence of gene mutations in the drosophila
p0016 N79-10720
Mutagenic components of alternate energy sources
[CONF-780636-8] p0280 N79-30923

MYOCARDIAL INFARCTION
ST isopotential precordial surface maps in patients with acute myocardial infarction
p0098 A79-21245
Electrocardiographic abnormalities in Air Force personnel
p0182 A79-33191
Myocardial infarction in young men
p0188 A79-35137
A catheter flow probe for measurement of left ventricular source parameters
p0274 A79-50108
Computerized positron emission tomography /PET/ for the assessment of myocardial integrity
p0293 A79-51031
The effect of moderate hypothermia on the circulatory and myocardial consequences of acute coronary ligation in dogs
p0049 N79-12683

MYOCARDIUM
Single frequency RF powered ECG telemetry system
p0131 A79-26074
Effect of adaptation to high-altitude hypoxia on cardiac adrenoreactivity and the state of the adenylcyclase and phosphodiesterase systems in the myocardium
p0255 A79-46500
Effect of hypoxia on mechanical properties of hyperthyroid cat papillary muscle
p0296 A79-51111
Temporal relation between onset of cell anoxia and ischemic contractile failure
p0300 A79-52895
Protein fractions and enzymatic activity thereof in the rat myocardium after the flight on Kosmos-690 biosatellite
p0014 N79-10700
Blood clotting factors of the vascular wall and myocardium of hypokinetic rabbits
p0108 N79-16523
A correlation of the effects of cationic uncouplers on intact cardiac muscle and on calcium bound to isolated cardiac muscle plasma membranes
p0111 N79-16540
A study of some of the factors influencing the left ventricular diastolic pressure-volume relationship and myocardial metabolism
p0154 N79-19674
Tissular blood clotting factors of vascular walls and myocardium during hypokinesia
p0194 N79-23644
Oxygen delivery in the hypoxic perfused heart: Relation to functional and metabolic changes
p0307 N79-32825

MYOELECTRIC POTENTIALS

NOISE INJURIES
Effects of acute noise traumata on whole-nerve and single-unit activity [IZF-1978-23] p0308 N79-32829
NOISE INTENSITY
The effective acoustic environment of helicopter crewmen p0152 N79-19645
NOISE MEASUREMENT
Responses of teachers to aircraft noise p0103 A79-23881
Temporary threshold shift from transportation noise p0254 A79-46286
The loudness of tinnitus p0246 N79-27837
NOISE POLLUTION
Conjoint effect of physical stress and noise stress on information processing performance and cardiac response p0161 A79-29715
Temporary threshold shift from transportation noise p0254 A79-46286
The influence of intermittent aircraft noise on sleep. I p0255 A79-46599
A real-world assessment of noise exposure [AD-A061692] p0155 N79-19680
Tentative evaluation of annoyance caused by noise from gunfire [IZF-1978-21] p0310 N79-32843
NOISE REDUCTION
In-flight measures of stress reduction due to wearing expandable foam earplugs p0273 A79-49986
A trade-off analysis design tool: Aircraft interior noise-motion/passenger satisfaction model p0112 N79-16549
NOISE SUPPRESSORS
U NOISE REDUCTION
NOISE TOLERANCE
Startle reactions to simulated sonic booms - Influence of habituation, boom level and background noise p0097 A79-20502
Aircraft noise and its effect on man: Methods and results of research, consequences for environmental protection --- German book p0162 A79-29763
Sources of noise stress on flying personnel p0227 A79-41169
Effects of vibration and noise on some indices of efficiency of MI-4 helicopter crews

p0015 N79-10711
A model for predicting human discomfort response to combined noise and vertical vibration
p0156 N79-19685
Human discomfort response to noise combined with vertical vibration
[NASA-TP-1374] p0190 N79-22761
Stress and fatigue in the driving environment --- physiological and psychological effects of heat and noise experienced inside automobiles
p0211 N79-24629

NONADIABATIC PROCESSES
U HEAT TRANSFER

NONDESTRUCTIVE TESTS
Noninvasive techniques in the evaluation of the peripheral circulation
p0154 N79-19675

NONFLAMMABLE MATERIALS
Aluminized firemen's (fire proximity) handwear: Redesign of experimental prototype
[AD-A069895] p0290 N79-31940

NONLINEAR FILTERS
Investigation of nonlinear motion simulator washout schemes
p0091 N79-15624
Study of the use of a nonlinear, rate limited, filter on pilot control signals
p0119 N79-17515

NONLINEAR OPTICS
Nonlinear optical susceptibility of the human eye to IR radiation in the 800 to 1355 micron range
p0188 A79-35363
Nonlinear perception of infrared radiation in the 800-1355 nm range with human eye
p0301 A79-53163

NONPARAMETRIC STATISTICS
Estimating percentiles of nonnormal anthropometric populations - Final report
p0065 A79-18226
Nonparametric measures of sensory efficiency for sustained monitoring tasks
p0161 A79-29719

NORADRENALINE
Norepinephrine action on smooth muscle cells of coronary arteries
p0208 A79-38149

NOREPINEPHRINE
Norepinephrine uptake by the isolated heart of rats adapted and deadapted to hypoxia
p0097 A79-20621
Synaptosomal uptake of hypothalamic monoamines and recovery of pituitary-adrenal activity following medial forebrain bundle lesions in rats
p0275 A79-50232

NORMAL DENSITY FUNCTIONS
Estimation of the operating characteristics of item response categories, 3: The normal approach method and the Pearson system
[AD-A056747] p0145 N79-18587

NORMAL DISTRIBUTIONS
U NORMAL DENSITY FUNCTIONS

NUMERICAL ANALYSIS
NT ERROR ANALYSIS
NT MONTE CARLO METHOD
Numerical studies of absorption of electro-magnetic energy by man
p0110 N79-16538

NUMERICAL CONTROL
Advanced teleoperators --- remote manipulation system
p0187 A79-34982
Robotic vision --- process control applications
p0187 A79-34988
Pilot decision making in a computer-aided flight management situation
p0093 N79-15633

NUTRIENTS
Algal growth under multiple nutrient limiting conditions
p0013 N79-10692

Mechanisms of deterioration of nutrients --- improved quality of freeze-dried foods
[NASA-CR-160128] p0156 N79-19686

NUTRITION
Effects of dietary composition on nutritional state in rats during exposure to high altitude
p0134 A79-27118
A technology assessment of vegetable substitutes for animal protein in human food. Volume 1: The study
[PB-284681/4] p0059 N79-13719
A technology assessment of vegetable substitutes for animal protein in human food. Volume 2: Appendices
[PB-284682/2] p0059 N79-13720
Orthomolecular enhancement of human development
p0095 N79-15895

NUTRITIONAL REQUIREMENTS
NT CALORIC REQUIREMENTS
Exercise performance and hemodynamics during dietary potassium depletion in dogs
p0067 A79-18959

NYSTAGMUS
NT VESTIBULAR NYSTAGMUS
A fast-reacting and versatile optokinetic stimulus pattern by computer graphics with application examples
p0160 A79-28993
Changes in optokinetic, postoptokinetic, and reverse postoptokinetic nystagmus after bilateral labyrinthectomy
p0255 A79-46499
Pursuit after-nystagmus
p0271 A79-49484
A study of the effects of six light conditions on caloric induced nystagmus
p0195 N79-23652

O

OBESITY
Obesity and flying fitness
p0182 A79-33188

OBSERVATION
NT VISUAL OBSERVATION

OCEAN SURFACE
The application of remote sensors to a model for fish mapping
[INPE-1379-PE/176] p0071 N79-14712
Minimum sea surface temperatures and associated survival times
[AD-A070162] p0315 N79-33824

OCEANS
Human/computer control of undersea teleoperators
p0089 N79-15612

OCULOGRAVIC ILLUSIONS
Oculogravic illusion in response to straight-ahead acceleration of a CF-104 aircraft
p0164 A79-30660

OCULOMETERS
Flight management research utilizing an oculometer --- pilot scanning behavior during simulated approach and landing
p0001 A79-10389

OCULOMOTOR NERVES
Perceptual localization, feature identification and ocular motor factors in scanning a visual display
p0068 A79-18218
Oculomotor factors in visual perceptual response efficiency
p0209 A79-38361
The effect of expectations on slow oculomotor control. I - Periodic target steps. II - Single target displacements
p0225 A79-40185
Quality of retinal image stabilization during small natural and artificial body rotations in man
p0225 A79-40187
Texture contours can facilitate stereopsis by initiating vergence eye movements
p0270 A79-48816
Forms of oculomotor activity under conditions of positive visual feedback
p0276 A79-50657

ON-LINE PROGRAMMING
Biomedical data validation through an on-line computer system
[PB-285249/9] p0057 N79-13700

ONBOARD COMPUTERS

Multi-axis hand controller for the shuttle remote manipulator system
p0117 N79-17503
US Navy development of an On-Board Oxygen Generation (OBOG) system
[AD-A063958] p0197 N79-24656

OPENINGS
NT APERTURES

OPERATIONAL HAZARDS
Health maintenance and health surveillance considerations for an SPS space construction base community
[AAS PAPER 78-176] p0099 A79-21273

OPERATIONS RESEARCH
NT MATHEMATICAL PROGRAMMING
Operational Helicopter Aviation Medicine
[AGARD-CP-255] p0148 N79-19605
A methodology for conducting human factors evaluations of vehicles in operational field tests
[AD-A061808] p0157 N79-19691
Methodological and operational aspects of programmed environment research
[AD-A068587] p0289 N79-31936

OPERATOR PERFORMANCE
On the man's adaptation to the operator's work under stressful conditions of space flight
[IAF PAPER 78-A-56] p0003 A79-11345
Psychophysiological forecasting of efficiency
p0010 A79-12867
Development and transfer of timesharing skills --- for human multiple task performance
p0035 A79-13184
Effects of vibration on humans - Performance decrements and limits
p0035 A79-13185
A composite view of task performance in hot environments
p0036 A79-13186
Seating, console and workplace design - Seated operator reach profiles
p0036 A79-13188
Seating, console, and workplace design - Integration of literature and accommodation model
p0036 A79-13189
Imagery interpreter performance in the comparison of subjective estimates of photographic image quality
p0036 A79-13191
Discrimination of density and clustering on four versions of a stochastic display --- human performance of pattern recognition
p0036 A79-13192
Tracking in two dimensions as a function of dimension priorities and tracking difficulty
p0036 A79-13193
Lateral orientation and cerebral activation - Considerations for information display
p0037 A79-13194
A prediction model of arm push strength in the transverse plane
p0037 A79-13195
Synthetic aperture radar operator tactical target acquisition research
p0037 A79-13202
Target acquisition in realistic terrain
p0037 A79-13203
Depth perception and manual control
p0038 A79-13207
The event related cortical potential as an index of task workload
p0038 A79-13208
Task functional demands as factors in dual-task performance
p0039 A79-13214
Observer performance using a video display --- in simulated air to ground target acquisition tasks
p0039 A79-13217
Experimental designs for investigating complex human operator/machine systems

p0040 A79-13225
Adaptive supervisory control of remote manipulation
p0046 A79-14987
Computer-graphic design for human performance
[AD-A055132] p0046 A79-15399
Man-machine reliability - A practical engineering tool
p0047 A79-15400
Cross-validation of regression equations to predict performance in a pursuit tracking task
p0064 A79-18222
Man/terminal interaction evaluation of computer operating system command and control service concepts --- in Spacelab
p0064 A79-18224
Target-terrain classification and detection performance --- to assess aerial photos for tanks
p0065 A79-18225
Line criteria in target acquisition with television --- visibility of target image on TV screen
p0068 A79-18997
Speed and load stress as determinants of performance in a time sharing task
p0068 A79-18999
Visual target acquisition and ocular scanning performance
p0069 A79-19000
Morbidity experience of air traffic control personnel - 1967-77
p0101 A79-23466
Army Aviation Training - Research now and then
[SAE PAPER 781008] p0130 A79-25890
Digital man-machine control systems - The effects of preview lag
p0131 A79-26149
The human operator in the control system: Linear models --- German book
p0132 A79-26356
Nonparametric model for the detection of signals observed by a human operator on a CRT screen on a noise background --- cathode-ray tube
p0159 A79-28565
Functional changes in the cardiovascular system of machine-tool operators under physical and neurologically stressful loads
p0160 A79-29270
Nonparametric measures of sensory efficiency for sustained monitoring tasks
p0161 A79-29719
A model of human decisionmaking in fault diagnosis tasks that include feedback and redundancy
p0163 A79-30222
A comparison of control modes for time-delayed remote manipulation
p0163 A79-30223
Measurement and scaling of workload in complex performance
p0164 A79-30659
Evaluation of models describing human operator control of slowly responding complex systems --- Thesis
p0167 A79-31494
Application of computer animation for dynamic display in complex energy systems --- for human operator performance improvement
p0186 A79-34172
A rationale for human operator pulsive control behavior
p0186 A79-34520
Separation of the effects of raised skin and core temperature on performance of a pursuit rotor task
p0234 A79-43204
Psychophysical assessment of angular vibration - Comparison of vertical and roll vibrations
p0234 A79-43206
Adaptive estimation schemes for minimizing uncertainty in manual control tasks
p0269 A79-48013
Human operators in adversary tracking encounters
p0269 A79-48015
An operator-aiding manipulator control system
p0269 A79-48020
Survey of human operator modeling techniques for measurement applications
[AD-A058327] p0058 N79-13713
A formal model of the adaptive and discrete control behaviors of human operators
[AD-A059039] p0059 N79-13717
Psychological aspects of the human-operator's activity while tracking
[RAE-LIB-TRANS-1979] p0079 N79-14768
Information-handling capacity of a human operator in detection of signals against a noisy background
p0081 N79-14989
The behavior of observers in detecting unbriefed targets at different aircraft speeds with side-looking radar
[AD-A060908] p0085 N79-15586
The 14th Annual Conference on Manual Control --- digital simulation of human operator dynamics
[NASA-CP-2060] p0086 N79-15588
A study of the effect of forcing function characteristics on human operator dynamics in manual control
p0086 N79-15590
Effects of uncertainty on manual tracking performance --- visual tasks
p0086 N79-15592
Modeling the human as a controller in a multitask environment
p0087 N79-15595
The internal model: A study of the relative contribution of proprioception and visual information to failure detection in dynamic systems --- sensitivity of operators versus monitors to failures
p0087 N79-15596
Closed loop models for analyzing the effects of simulator characteristics --- digital simulation of human operators
p0087 N79-15598
Petri nets as a modeling tool for discrete concurrent tasks of the human operator --- describing sequential and parallel demands on human operators
p0088 N79-15600
Human operator identification model and related computer programs
[NASA-CR-152237] p0112 N79-16551
The application of integral performance criteria to the analysis of discrete maneuvers in a driving simulator
[RS-GMR-2394] p0115 N79-17484
Multi-attribute subjective evaluations of manual tracking tasks vs. objective performance of the human operator
p0116 N79-17486
A control theoretic model of driver steering behavior
p0116 N79-17491
Modelling the human operator of slowly responding systems using linear models
p0117 N79-17492
Driver steering dynamics measured in car simulator under a range of visibility and roadmaking conditions
p0117 N79-17493
Sunglasses for drivers?
[IZF-1977-24] p0122 N79-17539
The impact of a Learn-Forget-Learn (LFL) curve and learning curves on a system effectiveness model
[AD-A061622] p0124 N79-17550
An adaptive controller which displays human operator limitations for a fighter type aircraft
p0177 N79-21767
Operator performance and localized muscle fatigue in a simulated space vehicle control
p0214 N79-24653
Selective attention: The influences of subject sex and degree of prior habituation on performance of an attention task with distraction
p0260 N79-28876
Combined discrete network-continuous control modeling of man-machine systems
p0260 N79-28879
Visual search performance during simulated radar observation with and without a sweepline
[AD-A068020] p0281 N79-30938
The application of control theory to the investigation of roll motion effects on human operator performance
p0288 N79-31931
Models of human operators in vision dependent tasks
[NASA-CP-2103] p0317 N79-33838
A survey of Applied Psychological Services' models of the human operator
p0317 N79-33839

Visual performance modeling in the human operator simulator
p0317 N79-33840
A brief overview of the theory and application of the optimal control model of the human operator
p0317 N79-33841
Analysis of visual estimation of system state from arbitrary displays
p0317 N79-33843

NT OZONE
Application of an isolated heart model to investigate blood-oxygen delivery
p0296 A79-51112
Morphological and biochemical effects of oxygen toxicity
[AD-A056778] p0018 N79-10734
The organism and the habitation atmosphere
[NASA-TM-75536] p0049 N79-12685
Environmental test and evaluation of a molecular sieve on-board oxygen generation system
[AD-A061531] p0125 N79-17559
Helium-oxygen mixture and the organism hyperbaric aspect
p0243 N79-27818
Toxicity of oxygen mixed with helium
p0245 N79-27829

OXYGEN BREATHING
Reproductive adaptation in Drosophila exposed to oxygen-enriched atmospheres
p0164 A79-30657
Glucose metabolism in rat lung during exposure to hyperbaric O2
p0221 A79-36047

OXYGEN CONSUMPTION
Blood volume and cardiorespiratory responses to lower body negative pressure
p0010 A79-12864
Effects of ozone inhalation on work performance and maximal oxygen uptake
p0133 A79-27103
Physical performance and peak aerobic power at different body temperatures
p0221 A79-36046
Circulatory response to arterial hyperoxia
p0221 A79-36048
Effects of glycogen depletion and work load on postexercise O2 consumption and blood lactate
p0277 A79-50903
The effect of normobaric hyperoxia on brain and liver tissue respiration in albino rats with different resistances to hypoxia
p0296 A79-51113
Lung oxygen diffusibility and permeability in dogs of various ages under normal conditions and in cases of acute hypoxic hypoxia
p0296 A79-51114
Frequency and amplitude analysis of the EMG during exercise on the bicycle ergometer
p0297 A79-52022
Time course of O2-pulse during various tests of aerobic power
p0297 A79-52024
Metabolic responses of ponies to treadmill exercise in hyperoxia
p0049 N79-12681
Computer program for calculation of oxygen uptake
[NASA-TM-78585] p0174 N79-21741
Oxygen delivery in the hypoxic perfused heart: Relation to functional and metabolic changes
p0307 N79-32825

OXYGEN DEFICIENCY
U HYPOXIA

OXYGEN MASKS
Oral/nasal breathing systems in the year 2000
p0183 A79-33621
The objective evaluation of aircrew protective breathing equipment. III - Improved types of mask/goggles combinations. IV - Fullface masks and hoods suitable for flight attendant use
p0184 A79-33638
Improved headgear for fixed wing Navy aircrewmen
p0184 A79-33641
Oxygen equipment and rapid decompression studies
[AD-A070285] p0289 N79-31937

OXYGEN METABOLISM
Mechanisms of the effect of oxygen toxicity on the energy metabolism
p0160 A79-29275
The metabolic demand and oxygen supply of the heart - Physiologic and clinical considerations
p0300 A79-52894
Effects of intermittent magnetic field on activity of carbohydrate metabolism enzymes and oxygen uptake in testicular tissue
p0075 N79-14738
Compatibility test of oxygen exposures in the range of 2.2 to 2.8 bar absolute
[DLR-FB-78-10] p0280 N79-30925
Oxygen delivery in the hypoxic perfused heart: Relation to functional and metabolic changes
p0307 N79-32825

OXYGEN PRODUCTION
Human compatibility testing of a 2-man molecular sieve oxygen generator
[AD-A058248] p0053 N79-12710
Medical science in Siberia: Oxygen exchange in the Far North
[NASA-TM-75391] p0211 N79-24630

OXYGEN REGULATORS
The dynamic oxygen-regulator test stand

OXYGEN SUPPLY EQUIPMENT
NT OXYGEN MASKS
Oxygen systems for Army helicopters
p0044 A79-14421
U.S. Navy development of an on-board oxygen generation /OBOG/ system
p0183 A79-33634
Molecular sieve oxygen generating system - The argon question /A brief review/ --- effects of 5 percent Ar in breathing gas
p0274 A79-49994
Human compatibility testing of a 2-man molecular sieve oxygen generator
[AD-A058248] p0053 N79-12710
US Navy development of an On-Board Oxygen Generation (OBOG) system
[AD-A063958] p0197 N79-24656
OXYGEN SYSTEMS
U OXYGEN SUPPLY EQUIPMENT
OXYGEN TENSION
NT HYPOXEMIA
Cerebral gas exchange in rats adapted to hypoxia during inspiration of oxygen-poor mixtures
p0097 A79-20623
Organ blood flow, cardiac output, arterial blood pressure, and vascular resistance in rats exposed to various oxygen pressures
p0135 A79-27557
Effects of chronic changes in hemoglobin-O_2 affinity in rats
p0185 A79-33808
The effect of hyperoxia on the oxygen tension of blood and cerebral tissue
p0208 A79-38146
Determination of cerebral and neck subcutaneous tissue PO_2 with 3 and 4 +Gz in M. mulatta
p0234 A79-43205
Oxygen affinity of blood in altitude Sherpas
p0268 A79-47854
The effect of microwave fields on muscle oxygen pressure and temperature in animals previously adapted to hypoxia
p0296 A79-51116
Noninvasive estimation of bilirubin and hemoglobin oxygen saturation in the skin by reflection spectrophotometry
p0054 N79-13684
OXYGEN TOXICITY
U HYPEROXIA
OXYGENATION
Evaluation of fluoropolymer membranes in oxygenators
[PB-286698/6] p0112 N79-16547
Thermodynamic studies on the oxygenation and subunit association of human hemoglobin
p0142 N79-18576
Mathematical studies of oxygen transport to tissue
p0170 N79-20723
Increased hemoglobin and content of rat blood serum as a result of decreased resistance of erythrocyte membranes to hyperbaric oxygenation, and the protective effect of urea
p0193 N79-23637
Evaluation of oxidizability of air in closed areas
p0313 N79-33808
OXYHEMOGLOBIN
Oxygen affinity of blood in altitude Sherpas
p0268 A79-47854
Application of an isolated heart model to investigate blood-oxygen delivery
p0296 A79-51112
A molecular description of oxygen binding to hemoglobin
p0194 N79-23646
Mathematical modeling of arterial oxygen saturation and eye-level blood pressure during +G sub Z stress
p0286 N79-31916
OZONE
Response of the rat erythrocyte to ozone exposure
p0067 A79-18963
Effects of exercise, vitamin E, and ozone on pulmonary function and lipid peroxidation
p0067 A79-18965
Effects of ozone inhalation on work performance and maximal oxygen uptake
p0133 A79-27103
Pulmonary function and maximum exercise responses following acute ozone exposure
p0273 A79-49987
Auditory and visual sustained attention during ozone exposure
p0273 A79-49988
The impact of sulfur dioxide on vegetation: A sulfur dioxide-ozone response model
[PB-283604/7] p0049 N79-12686
The effects of ozone on human erythrocytes and phospholipid vesicles
p0049 N79-12687
The toxicology of ozone. A bibliography with abstracts
[NTIS/PS-78/1120/1] p0057 N79-13705
The effects of H_2SO_4 on men and H_2SO_4 and O_3 on laboratory animals
p0141 N79-18354
Effects of oxides on nitrogen, Carbon monoxide and photochemical oxidants on the ECG during exercise and on cardiopulmonary function
[PB-291595/7] p0177 N79-21763

PERSONALITY
Vibration, performance, and personality --- vibration effects on human performance and psychological factors p0040 A79-13224
Masculinity, femininity, androgyny. What really works at work [AD-A061177] p0156 N79-19683
The psychologist in aircraft accident investigation --- pilot personality and performance p0291 N79-31946

PERSONALITY TESTS
Personality characteristics of pilots on EPPS, MPI and DOSEFU test. II - Comparison among pilots, non-pilot officers and aviation students p0210 A79-38822

PERSONNEL
NT AIR TRAFFIC CONTROLLERS (PERSONNEL)
NT AIRCRAFT PILOTS
NT ASTRONAUTS
NT COSMONAUTS
NT FLIGHT CREWS
NT FLIGHT SURGEONS
NT FLYING PERSONNEL
NT GROUND CREWS
NT NAVIGATORS
NT OPERATORS (PERSONNEL)
NT PILOTS (PERSONNEL)
NT SCIENTISTS
NT SPACECREWS
Subjective data in human reliability estimates p0046 A79-15398

PERSONNEL DEVELOPMENT
Ergonomics laboratory studies pilots' stability for command --- psychophysiological characteristics p0121 N79-17529

PERSONNEL MANAGEMENT
Coordinated crew performance in commercial aircraft operations p0040 A79-13219
The next decade - Development, training, supervision p0102 A79-23584
Aeromedical aspects of flying training with special reference to instructor pupil relationship p0201 A79-37139
Initial training and retraining of technical agricultural flight personnel p0227 A79-41166

PERSONNEL SELECTION
NT PILOT SELECTION
Psychological selection of payload astronauts p0047 A79-15488
Selection of astronaut candidates - Contribution of the exercise ECG and spirography p0047 A79-15489
Special tests for astronaut selection - Study of cardiovascular reactions by the orthostatism test p0047 A79-15490
Special test for astronaut selection - Tests of tolerance in the centrifuge and in flight p0047 A79-15491
Special tests for astronaut selection - Muscular exercise test p0047 A79-15492
Male and female characteristics in vestibular testing - A step toward the selection of the best participants for space flight [IAF PAPER 79-80] p0301 A79-53288
Preliminary selection of candidates for space flights [IAF PAPER 79-83] p0302 A79-53289
Selection, training, and health care of working specialists for Shuttle/Spacelab and future

space station missions
[IAF PAPER 79-99] p0303 A79-53297
Development of a performance criterion for air traffic personnel research through air traffic control simulation
[AD-A058082] p0031 N79-11727
Some variations on derivations by Primoff and their extensions
[PB-287298/4] p0112 N79-16548
A comparison of three models for determining test fairness
[AD-A066586] N79-25751
The development of the ATC selection battery: A new procedure to make maximum use of available information when correcting correlations for restriction in range due to selection
[FAA-AM-78-36] N79-25752
The selection of air traffic control specialists: Two studies demonstrating methods to insure an accurate validity coefficient for selection devices
[AD-A068581] p0281 N79-30932

PERSPIRATION
Regulation and efficiency of sweating in man /Mathematical modeling/
p0097 A79-20622
Thermal sweat rate response to an acute short exposure at a simulated altitude of 4,600 m
p0102 A79-23474
Thermoregulation in Macaca mulatta - A thermal balance study
p0133 A79-27101
Human skin wettedness and evaporative efficiency of sweating
p0162 A79-29726
Sweating responses during heat acclimation and moderate conditioning
p0185 A79-33803
Effect of rate of change in skin temperature on local sweating rate
p0268 A79-47853
Role of skin temperature in the control of sweating
p0277 A79-50907
Influence of skin temperature on sweating and aerobic performance during severe work
p0305 A79-54268
Mechanisms of activated carbon degradation by perspiration
[AD-A059872] p0080 N79-14777
A comparison of sweating responses in men and women before and after acclimation to humid heat
p0175 N79-21752

PESTICIDES
Comparative study of acetylcholinesterase inactivation in warm-blooded animals and insects with substituted vinyl phosphates
p0121 N79-17527

PETROLEUM PRODUCTS
NT DIESEL FUELS

PH
Quality of water reclaimed from urine as related to pH of initial product
p0313 N79-33807

PH FACTOR
Characterization of a novel extremely alkalophilic bacterium
p0004 A79-11950
Polyglutaraldehyde - A new reagent for coupling proteins to microspheres and for labeling cell-surface receptors
p0274 A79-50230
Effects of different values of urine pH during long-term storage on microflora composition
p0194 N79-23643

PHANTOM AIRCRAFT
NT F-4 AIRCRAFT

PHARMACOLOGY
Effects of fenfluramine administration on activity of the pituitary-adrenal system in the rat
p0005 A79-12474
Norepinephrine action on smooth muscle cells of coronary arteries
p0208 A79-38149
Study of pharmaceutical industrial problems
[NASA-CR-160267] p0248 N79-27852

PHASE TRANSFORMATIONS
NT FREEZING
Moving phase transitions in laser-irradiated biological tissue
p0228 A79-41478
Study of model membrane fusion using photon correlation spectroscopy --- lipid bilayer phase transition in cell membranes
p0147 N79-19591

PHONOCARDIOGRAMS
U PHONOCARDIOGRAPHY

PHONOCARDIOGRAPHY
NT ECHOCARDIOGRAPHY
A continuous wave, frequency modulated, ultrasonic device with auditory output for observing the heart
p0045 A79-14602

PHOSPHATES
NT ADENOSINES
NT NUCLEOTIDES
NT POLYNUCLEOTIDES
Interaction between inositol hexaphosphate and carbobenzoxy peptide - A model for nucleic acid - Nonhistone chromosomal protein interaction
p0100 A79-22082
Heat- and exercise-induced hyperthermia - Effects on high-energy phosphates
p0266 A79-47332
Comparative study of acetylcholinesterase inactivation in warm-blooded animals and insects with substituted vinyl phosphates
p0121 N79-17527

PHOSPHENES
Mechanism of the formation of phosphenes by X-rays
p0006 A79-12516

PHOSPHORUS
Effect of phosphorus supply on algal biomass in a turbid Missouri Reservoir
[PB-293183/0] p0243 N79-27816

PHOSPHORUS COMPOUNDS
NT ADENOSINES
NT NUCLEOTIDES
NT ORGANIC PHOSPHORUS COMPOUNDS
NT PHOSPHATES
NT POLYNUCLEOTIDES
A literature review-problem definition studies on selected toxic chemicals. Volume 2: Occupational health and safety aspects of phosphorus smoke compounds
[AD-A056019] p0025 N79-11685

PHOSPHORYLATION
Dependence of the functional activity of liver mitochondria on microwave radiation --- oxidative phosphorylation
p0075 N79-14741
State of process of oxidation phosphorylation of liver mitochondria on exposure to an electric field
p0075 N79-14742

PHOTOCHEMICAL REACTIONS
NT PHOTOLYSIS
NT PHOTOSYNTHESIS
Photochemical synthesis of amino acids from aqueous solutions of ethyl alcohol, ammonia/nitrogen under varied conditions
p0105 A79-24520
Abundance of organic compounds photochemically produced in the atmospheres of the Outer Planets
p0210 A79-39075
Photochemistry and enzymology of photosynthesis
[COO-3326-70] p0239 N79-26763
Energy transfer mechanisms in photobiological reactions
[COO-875-180] p0283 N79-31898

PHOTOCHEMISTRY
U PHOTOCHEMICAL REACTIONS

PHOTODETECTORS
U PHOTOMETERS

PHOTOGRAPH INTERPRETATION
U PHOTOINTERPRETATION

PHOTOGRAPHIC EQUIPMENT
NT TELEVISION CAMERAS

PHOTOGRAPHIC FILM
A numerical method of film analysis with differentiation --- curve fitting with harmonic analysis
p0061 A79-17585

PHOTOGRAPHY
NT AUTORADIOGRAPHY
NT CINEMATOGRAPHY
NT HOLOGRAPHY
NT MULTISPECTRAL PHOTOGRAPHY
NT STEREOPHOTOGRAPHY

PHOTOINTERPRETATION
Imagery interpreter performance in the comparison of subjective estimates of photographic image quality
p0036 A79-13191
Target-terrain classification and detection performance --- to assess aerial photos for tanks
p0065 A79-18225
Peripheral acuity and photointerpretation performance
p0068 A79-18996
The interpretation of visual motion --- Book
p0186 A79-34424
Evaluation of four target-identification training techniques
[AD-A061175] p0123 N79-17548

PHOTOLYSIS
Synthesis of organic compounds from carbon monoxide and water by UV photolysis
p0099 A79-22077
Photochemical transformations of the visual pigment rhodopsin
p0181 A79-32319

PHOTOMETERS
Aphotometer for determining the biomass of microorgan from the ATP content
[BLL-RTS-11456] p0141 N79-18555

PHOTOMETRY
NT SPECTROPHOTOMETRY
Photometric methods for the analysis of human kinematic responses to impact environments
[AD-A062006] p0157 N79-19690

PHOTON ABSORPTION
U ELECTROMAGNETIC ABSORPTION

PHOTON BEAMS
NT LIGHT BEAMS

PHOTONS
NT LIGHT BEAMS

PHOTOOXIDATION
Inverse assimilation - A general principle of evolution of planetary surfaces
p0207 A79-37989
Energy transfer mechanisms in photobiological reactions
[COO-875-180] p0283 N79-31898

PHOTOPEAK
Reciprocal interaction between the photopic and scotopic systems of the visual analyzer in man
p0296 A79-51327

PHOTORECEPTORS
Apparent saturation of blue-sensitive cones occurs at a color-opponent stage
p0002 A79-10474
Intrinsic noise, threshold sensitivity, and adaptation of the retina
p0043 A79-14373
Photochemical transformations of the visual pigment rhodopsin
p0181 A79-32319
Thermal activation of the visual transduction mechanism in retinal rods
p0230 A79-41746
Suprathreshold retinal damage due to single 6 picosecond 1060 nm laser light pulses
p0266 A79-47330

PHOTOREDUCTION
U PHOTOCHEMICAL REACTIONS

PHOTOSENSITIVITY
NT LIGHT ADAPTATION
Deductive derivation of a mathematical model for spectral sensitivity of the human organ of sight. I, II
p0166 A79-31178
Nonlinear optical susceptibility of the human eye to IR radiation in the 800 to 1355 micron range
p0188 A79-35363
Origin of neuron responses of the superior colliculus to light flashes
p0233 A79-42294
Light-driven solute transport in Halobacterium halobium
p0270 A79-49194
Nonlinear perception of infrared radiation in the 800-1355 nm range with human eye
p0301 A79-53163
Cerebral hemodynamics and visual analyzer function following exposure to bright light
p0109 N79-16525

PHOTOSYNTHESIS
In vitro duplication of the primary light-induced charge separation in purple photosynthetic bacteria
p0131 A79-26100
The response of selected terrestrial organisms to the Martian environment - A modeling study
p0136 A79-27928
Metal porphyrins in pre-Cambrian deposits as a probable evidence for early photosynthesis
p0165 A79-30695
Evolution of early life inferred from protein and ribonucleic acid sequences
p0206 A79-37980
Inverse assimilation - A general principle of evolution of planetary surfaces
p0207 A79-37989
A proposal concerning the origin of life on the planet earth
p0253 A79-45641
Photosynthethic carbon reduction by seagrasses exposed to ultraviolet B radiation
[NASA-CR-160144] p0175 N79-21742
Photochemistry and enzymology of photosynthesis
[COO-3326-70] p0239 N79-26763
Applications of chlorophyll fluorescence transient measurements to the functional analysis of photosynthetic processes
p0243 N79-27813
Adaptive optimization of exchange of gases in plants in a sealed phytotron
p0313 N79-33806

PHOTOTHERMOTROPISM
U TEMPERATURE EFFECTS

PHUGOID OSCILLATIONS
U OSCILLATORS
U PITCH (INCLINATION)

PHYSICAL ENDURANCE
U PHYSICAL FITNESS

PHYSICAL EXAMINATIONS
Aviation-medicine appraisal as part of the fitness regulations in transportation
p0129 A79-25373
Automatic audiometry in the practice of flight-personnel examination
p0295 A79-51084
The role of physical examinations and education in prospective medicine
p0026 N79-11694
Difficulties posed by left axis deviation in the evaluation of fliers, and their relations to the concept of left anterior hemiblock
p0029 N79-11714
Cardiac conduction and aptitude problem of fliers. The benefits of endocavital recording of the His bundles
p0030 N79-11716
The advantages of ultrasonic echocardiography in the cardiological evaluation of fliers
p0030 N79-11718
Prospective medicine opportunities in aerospace medicine
p0171 N79-20730
Specific findings in cardiology and pulmonary function with special emphasis on assessment criteria for flying
p0171 N79-20731

PHYSICAL EXERCISE
Measurement of skin temperatures of active subjects by wireless telemetry
p0011 A79-12872
Selection of astronaut candidates - Contribution of the exercise ECG and spirography
p0047 A79-15489
Special tests for astronaut selection - Muscular exercise test
p0047 A79-15492
Exercise ventilation correlates positively with ventilatory chemoresponsiveness
p0066 A79-18954
Exercise performance and hemodynamics during dietary potassium depletion in dogs
p0067 A79-18959
Effect of exercise on collateral development in dogs with normal coronary arteries
p0067 A79-18960
Phosphorylase a in human skeletal muscle during exercise and electrical stimulation
p0067 A79-18962

Effects of exercise, vitamin E, and ozone on pulmonary function and lipid peroxidation p0067 A79-18965

Effect of physical conditioning on cardiac mitochondrial function p0068 A79-18966

Effect of water and electrolyte replacement during exercise in the heat on biochemical indices of stress and performance p0127 A79-24629

Caloric and exercise requirements of space flight - Biostereometric results from Skylab p0128 A79-24637

The effects of different levels of heat production induced by diathermy and eccentric work on thermoregulation during exercise at a given skin temperature p0128 A79-24698

CO2 and exercise tidal volume p0133 A79-27104

Mechanics of the regulation of the respiratory system in man p0160 A79-29258

Plasma volume and electrolyte shifts with heavy exercise in sitting and supine positions p0161 A79-29336

Effect of sodium and calcium ingestion on thermoregulation during exercise in man p0163 A79-30624

Sweating responses during heat acclimation and moderate conditioning p0185 A79-33803

Control of skin blood flow during exercise - Thermal and nonthermal factors p0185 A79-33807

Physical performance and peak aerobic power at different body temperatures p0221 A79-36046

Anaerobic threshold alterations caused by endurance training in middle-aged men p0227 A79-41184

Response of women mountaineers to maximal exercise during hypoxia p0234 A79-43201

Limb blood flow - Rest and heavy exercise in sitting and supine positions in man p0235 A79-43208

Temperature changes during exercise measured by thermography p0235 A79-43209

Effect of physical training at moderate altitude /1850 m/ on hypoxic tolerance p0235 A79-43210

Influence of exercise and CO2 on breathing pattern of normal man p0237 A79-43704

Effects of endurance training on left ventricular dimensions in healthy men p0237 A79-43706

The evolutionary pattern of exercise-induced ST segment depression p0251 A79-44166

Hyperthermia and exercise --- plasma fluid and electrolyte effects on human thermoregulation p0252 A79-44775

Mechanical efficiency of fast- and slow-twitch muscle fibers in man during cycling p0268 A79-47852

Cross-adaptive effects of cold, hypoxia, or physical training on decompression sickness in mice p0268 A79-47855

Deconditioning-induced exercise responses as influenced by heat acclimation p0273 A79-49985

Pulmonary function and maximum exercise responses following acute ozone exposure p0273 A79-49987

Prediction of body temperatures during exercise in flying clothing p0273 A79-49989

Effects of glycogen depletion and work load on postexercise O2 consumption and blood lactate p0277 A79-50903

Frequency and amplitude analysis of the EMG during exercise on the bicycle ergometer p0297 A79-52022

Metabolic adrenergic changes during submaximal exercise and in the recovery period in man p0305 A79-54267

Effects of endogenous factors on the process of gas bubble formation in the body related to decompression p0015 N79-10713

Mechanics of breathing during graded exercise measured with the bodyplethysmograph p0029 N79-11709

Measuring systolic time intervals at rest and under stress by external methods. Advantages in the evaluation of fliers p0030 N79-11717

Metabolic responses of ponies to treadmill exercise in hyperoxia p0049 N79-12681

Isokinetic exercise: A review of the literature [NASA-CR-151841] p0051 N79-12695

Combined effect of hyperoxia, low pressure and exercise on the rate of methylketone excretion from the human body p0073 N79-14725

Evidence for the neural regulation of respiration During low intensity exercise in man p0144 N79-18578

Effects of physical conditioning and electric stimulation on metabolic processes in the soleus muscle and structure thereof in hypokinetic man p0192 N79-23634

External respiration and gas exchange reactions to exercise during rotation of man on a short-radius centrifuge p0193 N79-23639

The influence of various physiological responses on ratings of perceived exertion before and after training p0194 N79-23649

Evaluation of exercise-respiratory system modifications and preliminary respiratory-circulatory system integration scheme [NASA-CR-160221] p0212 N79-24639

Aortic blood flow velocity during exercise in man p0216 N79-25710

The influence of exercise on bone atrophy [NASA-CR-160196] p0216 N79-25714

User's instructions for the high speed version of the cardiovascular exercise model [NASA-CR-160211] p0218 N79-25724

Evaluation of exercise-respiratory system modifications and integration schemes for physiological systems [NASA-CR-160223] p0219 N79-25733

The effects of dehydration on peripheral cooling [AD-A065332] p0220 N79-25745

Stress management: A comparison of educational, aerobic and autosuggestive approaches p0260 N79-28875

Possibility of improving assessment of cardio-pulmonary function by submaximal exercise on a bicycle ergometer [BLL RTS-11657] p0279 N79-30918

PHYSICAL FACTORS

Effect of impermeable clothing and respirator on work performance. Part 1: Laboratory studies [SAND-77-2132] p0034 N79-11748

PHYSICAL FITNESS

Influences of physical conditioning and deconditioning on coronary vasculature of dogs p0067 A79-18955

Pulmonary blood volume and interventricular circulation time in physically trained and untrained subjects p0128 A79-24700

Effects of endurance training on left ventricular dimensions in healthy men p0237 A79-43706

Follow-up and transversal study of vital capacity and FEV sub values among personnel of the Belgian Army forces p0028 N79-11706

Coronary atherosclerosis and fitness for flying p0029 N79-11711

Cardiological findings in 115 pilots: Diagnoses and assessment of their flying fitness p0030 N79-11721

Cardiovascular fitness of pilots of transport aircraft p0031 N79-11726

Rehabilitation measures used to restore physical fitness of man after long-term restriction of

movement
p0110 N79-16534

An investigation to determine the effect of physical conditioning upon fibrinolytic reactivity in normal young men
p0110 N79-16536

Cardiac adaptation to endurance training: Determined by echocardiography and electrocardiography
p0194 N79-23648

Effect of hydrostatic factor on orthostatic stability and physical fitness of man during 60-day antiorthostatic hypokinesia
p0313 N79-33809

The relationship between aerobic fitness and cardiovascular risk factors in the Canadian forces
[AD-A069865] p0316 N79-33829

PHYSICAL WORK

Temperature effect of muscular work in the white rat during hypoxia
p0097 A79-20654

The effects of different levels of heat production induced by diathermy and eccentric work on thermoregulation during exercise at a given skin temperature
p0128 A79-24698

Changes in the circadian rhythm of performance and mood in healthy young men exposed to prolonged, heavy physical work, sleep deprivation, and caloric deficit
p0234 A79-43202

Mechanical efficiency of fast- and slow-twitch muscle fibers in man during cycling
p0268 A79-47852

Effects of glycogen depletion and work load on postexercise O2 consumption and blood lactate
p0277 A79-50903

Influence of skin temperature on sweating and aerobic performance during severe work
p0305 A79-54268

The influence of various physiological responses on ratings of perceived exertion before and after training
p0194 N79-23649

A stochastic model of muscle fatigue in frequent strenuous work cycles
p0261 N79-29789

PHYSIOCHEMISTRY

Metabolic adrenergic changes during submaximal exercise and in the recovery period in man
p0305 A79-54267

PHYSIOLOGICAL ACCELERATION

Positive pressure breathing as a protective technique in +Gz acceleration
p0201 A79-37132

PHYSIOLOGICAL DEFENSES

Cyclic nucleotides and adaptation of the organism --- Russian Book
p0133 A79-26500

Increased survival in experimental dog heatstroke after reduction of gut flora
p0266 A79-47335

PHYSIOLOGICAL EFFECTS

NT HEMODYNAMIC RESPONSES

NT PHYSIOLOGICAL RESPONSES

The European life sciences experiments onboard the first Spacelab mission
[ASME PAPER 78-ENAS-24] p0007 A79-12573

Effect of decompression per se on nitrogen elimination
p0067 A79-18964

Effect of physical conditioning on cardiac mitochondrial function
p0068 A79-18966

Effect of alcohol and marijuana on eye movements
p0101 A79-23469

Modeling heat transfer through human skin subjected to high external temperatures
p0102 A79-23782

Effects of brief exposure of domestic fowl to very intense acceleration fields
p0127 A79-24631

Effects of altitude and two decongestant-antihistamine preparations on physiological functions and performance
p0127 A79-24635

Physiological aspects of flight --- Book
p0134 A79-27298

Laser safety bioeffects research - Histopathology of retinal effects
p0138 A79-28169

Mechanisms of the effect of oxygen toxicity on the energy metabolism
p0160 A79-29275

Conjoint effect of physical stress and noise stress on information processing performance and cardiac response
p0161 A79-29715

Biodynamic effects of canopy loss in the TF-15 aircraft
p0163 A79-30651

Spaceflight and bone turnover - Correlation with a new rat model of weightlessness
p0182 A79-33049

Cardiac changes during behavioral stress in dogs
p0200 A79-36575

Physiological effect of high, sustained +Gz forces on man
p0229 A79-41711

Prophylactic effects of intermittent acceleration against physiological deconditioning in simulated weightlessness
p0229 A79-41712

Influence of the ambient acceleration field upon acute acceleration tolerance in chickens
p0230 A79-41715

Thermal bounds to the time of stay of human beings in enclosures
p0231 A79-41770

Retinal site of transient tritanopia
p0256 A79-46623

The importance of light, postural and social cues in the regulation of the plasma cortisol rhythm in man
p0267 A79-47398

Comparison of physiological effects of head-down tilting and immersion on the human body
p0298 A79-52279

Space biology and aerospace medicine, vol. 12, no. 5, 1978
[JPRS-72115] p0013 N79-10698

Cardiac arrhythmia following postimmersion +G sub z accelerations
p0015 N79-10710

The effects of carbon monoxide and cyanide on the brain
p0024 N79-11682

Anthropometric changes in weightlessness

p0015 N79-10711

Experience with periodic aviation medical examinations
p0026 N79-11696

A prospective medicine approach to the problem of ischemic vascular disease in the USAF
p0027 N79-11697

The significance of rhythm disturbances in asymptomatic persons
p0027 N79-11698

Cardiovascular diseases as a cause of unfitness for flying service in aircrews of Italian Air Force: Etiopathogenesis, influence of performance in flight, and prevention
p0031 N79-11725

Psychophysiological effects of aging: Developing a functional age index for pilots. 2: Taxonomy of psychological factors
[FAA-AM-78-16] p0054 N79-13685

Honest 1: Personality, heart rate, urinary catecholamine, and subjective fatigue measures related to night nap-of-the-earth flying
[AD-A054888] p0055 N79-13692

The interaction of carbon monoxide and altitude on aviator performance: Pathophysiology of exposure to carbon monoxide
[AD-A055212] p0056 N79-13694

Dynamics of impairment of pilot performance in the presence of hypoxia
p0073 N79-14724

A simulator study of the interaction of pilot workload with errors, vigilance, and decisions
[NASA-TM-78482] p0079 N79-14769

Comparative experiments on performance and fatigue effects on pilots using tracking tests and physiological measurement parameters
[RAE-LIB-TRANS-1971] p0080 N79-14774

The development and evaluation of objective frequency domain based pilot performance measures in ASUPT
[AD-A059477] p0080 N79-14776

A study of the effect of forcing function characteristics on human operator dynamics in manual control
p0086 N79-15590

Modeling the effects of high-G stress on pilots in a tracking task
p0087 N79-15593

Discrete-time pilot model --- human dynamics and digital simulation
p0088 N79-15601

Pilot-optimal augmentation synthesis
p0088 N79-15603

Prediction, evaluation, and specification of flying qualities by means of step target tracking
p0088 N79-15604

Analysis of a VTOL hover task with predictor displays using an optimal control model of the human operator
p0088 N79-15605

A method motion simulator design based on modeling characteristics of the human operator
p0091 N79-15623

Pilot decision making in a computer-aided flight management situation
p0093 N79-15633

Pilot workload qualification for avionics design
p0114 N79-16564

Training implications
p0114 N79-16565

An approach to the multi-axis problem in manual control --- optimal pilot model
p0115 N79-17482

Error rate information in attention allocation pilot models
p0115 N79-17483

The effects of participatory mode and task workload on the detection of dynamic system failures
p0116 N79-17487

Prediction of pilot reserve attention capacity during air-to-air target tracking
p0116 N79-17488

Prediction of pilot-aircraft stability boundaries and performance contours
p0118 N79-17507

Discrete time modeling of heavy transport plane pilot behavior p0118 N79-17508

A model for the pilot's use of motion cues in roll-axis tracking tasks p0118 N79-17512

Motion cue effects on human pilot dynamics in manual control p0119 N79-17514

Study of the use of a nonlinear, rate limited, filter on pilot control signals p0119 N79-17515

Ergonomics laboratory studies pilots' stability for command --- psychophysiological characteristics p0121 N79-17529

Psychophysiological effects of aging: Developing a functional age index for pilots. 3: Measurement of pilot performance [FAA-AM-78-27] p0123 N79-17546

An analysis of helicopter pilot control behaviour and workload during instrument flying tasks [NLR-MP-78003-U] p0124 N79-17553

Influence of motion wash-out filters on pilot tracking performance [NLR-MP-78005-U] p0124 N79-17554

Quantification and validation of percept-genetic defense mechanism. A hierarchical analysis of behavior of pilots under stress [FOA-C-55020-H6] p0124 N79-17555

Motion cue models for pilot-vehicle analysis [AD-A061477] p0125 N79-17561

Characteristics of medically disqualified airman applicants in calendar years 1975 and 1976 [FAA-AM-78-25] p0144 N79-18582

Stress factors on pilot performance. A bibliography with abstracts [NTIS/PS-78/1289/4] p0145 N79-18589

An evaluation of the effects of a stability augmentation system upon aviator performance/workload during a MEDEVAC high hover operation p0148 N79-19612

Changes in the rotary wing aviator's ability to perform an uncommon low altitude rearward hover maneuver as a function of extended flight requirements and aviator fatigue p0150 N79-19623

An analysis of helicopter pilot control behavior and workload during instrument flying tasks p0150 N79-19630

SEA GRASSES
Photosynthethic carbon reduction by seagrasses exposed to ultraviolet B radiation
[NASA-CR-160144] p0175 N79-21742
SEA WATER
Experimental approach to the chemical evolution in the primeval sea. I - Formation of amino acids and amino acid polymers in modified sea mediums
p0203 A79-37935

Experimental approach to the chemical evolution in the primeval sea. II - Formation of protocell-like structures 'marigranules' in a modified sea medium
p0204 A79-37964

Membranous evolution in the primitive cell
p0206 A79-37977

Polymers produced by heating an amino acid mixture in sea water enriched with transition elements
p0254 A79-46461

SEASAT PROGRAM
Aerospace highlights and potential medical applications --- in manned space flight
p0293 A79-51027

SEATS
NT EJECTION SEATS
Effects of deceleration and rate of deceleration on live seated human subjects
[PB-284653/3] p0057 N79-13702
The use of mathematical modeling in crashworthy helicopter seating systems
p0287 N79-31923

SECRETIONS
NT ADRENOCORTICOTROPIN (ACTH)
NT HORMONES
NT INSULIN
NT PITUITARY HORMONES
NT SWEAT
The influence of SHF electromagnetic fields on the secretory function of the stomach
p0173 N79-20740

SECULAR PERTURBATION
U LONG TERM EFFECTS
SEDIMENTS
Bacteria in a North Carolina salt marsh. Standing crop and importance in the decomposition of Spartina alterniflora
[PB-288816/2] p0153 N79-19668
SEGREGATION
U SEPARATION

SEISMOCARDIOGRAPHY
Possibility of quantitative evaluation of the heart's mechanical activity from seismocardiosignals
p0276 A79-50658

SELECTION
NT PERSONNEL SELECTION
NT PILOT SELECTION
Visual information processing
p0076 N79-14747

Magnitude estimation as a hearing aid selection procedure
p0246 N79-27838

SELENIUM
Effects of heavy metals especially selenium, vanadium and zirconium on movement, growth and survival of certain animal aquatic life
[PB-292563/4] p0197 N79-25706
SELF DEPLOYING SPACE STATIONS
U SPACE STATIONS
SELF REGULATING
U AUTOMATIC CONTROL
SELF STIMULATION
Effect of psychophysiological self-regulation on emotional stability of aviation cadets in flight and on effectiveness of assimilation of flight training program
p0074 N79-14735

SEMICIRCULAR CANALS
Results of tests of the equilibrium organ of candidates for payload expert for the first Spacelab mission
[DGLR PAPER 78-134] p0042 A79-14084
Biped stability considerations with vestibular models
p0066 A79-18287

SITTING POSITION
Seating, console and workplace design - Seated operator reach profiles
p0036 A79-13188
Seating, console, and workplace design - Integration of literature and accommodation model
p0036 A79-13189
Plasma volume and electrolyte shifts with heavy exercise in sitting and supine positions
p0161 A79-29336
Limb blood flow - Rest and heavy exercise in sitting and supine positions in man
p0235 A79-43208
Possibilities of preventing adverse reactions in simulating the acute period of adaptation to weightlessness
p0244 N79-27825
The effect of a reclined sitting position on psychomotor performance during exposure to high, sustained +Gsub z acceleration
[FPRC-1362] p0248 N79-27856
The effect of acceleration and seat back angle on performance of a reaction time task
[FPRC-1364] p0248 N79-27857
The influence of seat back angle on acceleration tolerance
[FPRC-1365] p0248 N79-27858
A lower body negative pressure box for +Gz simulation in the upright seated position
[AD-A069326] p0259 N79-28868
The response of a realistic computer model for sitting humans to different types of shocks
p0288 N79-31927
Some human responses to repeated +G sub z pulses
p0288 N79-31928
Effect of brief head-down position on parameters of carbohydrate metabolism and beta lipoprotein content of blood
p0311 N79-33797
Vertical orientation of man during 5-day antiorthostatic hypokinesia (-4, -8 and -12 deg head down position)
p0313 N79-33810

SIZE DETERMINATION
The common occurrence of errors of perceived distance
p0100 A79-22775

SKELETON

SKIN (ANATOMY)
Neurophysiology of thermal reception
p0083 A79-14374
Human skin wettedness and evaporative efficiency of sweating
p0162 A79-29726
Control of skin blood flow during exercise - Thermal and nonthermal factors
p0185 A79-33807
Application of similarity transformation to unsteady state heat migration problems in human skin and subcutaneous tissues
p0233 A79-42932
Noninvasive estimation of bilirubin and hemoglobin oxygen saturation in the skin by reflection spectrophotometry
p0054 N79-13684
Percutaneous absorption of toxic agents. Part 2: The nerve bases and some other toxic organophosphates. A survey of the literature.
[PML-1978-9] p0123 N79-17542
Official method for determining ocular irritation
[BLL-RTS-11221] p0142 N79-18571
The dangerous relation between sunburn and skin cancer
[BLL-RTS-11310] p0142 N79-18573
Solar radiation, light protection and tanning of human skin
[BLL-RTS-11580] p0142 N79-18574
Thermal conduction effects in human skin. 1: Experimental data acquisition
[AD-A068479] p0259 N79-28871
Thermal conduction effects in human skin. 3: Influence of epidermal thickness and exposure time
[AD-A068481] p0259 N79-28872
Uncommon hypersensitivity to contacting cold water and cold air with propagated reflex-like erythema development
[BLL-RTS-11648] p0279 N79-30917

SKIN TEMPERATURE (BIOLOGY)
Measurement of skin temperatures of active subjects by wireless telemetry
p0011 A79-12872
Modeling heat transfer through human skin subjected to high external temperatures
p0102 A79-23782
Skin temperature changes in paradoxical sleep in man in the cold
p0201 A79-37706
Regional heat loss in resting man during immersion in 25.2 C water
p0202 A79-37709
The effect of thermal stimulation of the skin on activity of lateral crescent interneurons of lumbar segments
p0208 A79-38147
Separation of the effects of raised skin and core temperature on performance of a pursuit rotor task
p0234 A79-43204
Temperature changes during exercise measured by thermography
p0235 A79-43209
Thermal conduction effects in human skin
p0265 A79-47329
An improved method for inducing hypothermia and rewarming
p0267 A79-47339
Effect of rate of change in skin temperature on local sweating rate
p0268 A79-47853
Role of skin temperature in the control of sweating
p0277 A79-50907
Influence of skin temperature on sweating and aerobic performance during severe work
p0305 A79-54268

SKYLAB PROGRAM
User's guide for the Skylab integrated medical data analysis system
[NASA-CR-160189] p0220 N79-25780
Skylab medical data evaluation program (SMEDEP)
[NASA-CR-160279] p0259 N79-28869

SLEDS
NT ROCKET PROPELLED SLEDS
Space Sled - A multipurpose apparatus for vestibular research aboard Spacelab
[DGLR PAPER 78-132] p0042 A79-14083

SLEEP
NT HYPNOSIS
Skin temperature changes in paradoxical sleep in man in the cold
p0201 A79-37706
The influence of intermittent aircraft noise on sleep. I
p0255 A79-46599
Electrophysiological investigation of sleep during work-shift regime and production-induced emotional stress

p0276 A79-50655

Effects of prolonged unidirectional shift of sleeping-waking cycle on physiological functions, mental productivity and sleep of man
p0109 N79-16526

Effects of sleep at altered ambient temperatures on electrophysiological sleep and thermoregulatory mechanisms in human subjects and in the ground squirrel (Citellus lateralis)
p0216 N79-25709

A nonlinear mapping approach to discrimination of sleep stages from the human electroencephalogram
p0316 N79-33817

SLEEP DEPRIVATION

Sustained operations and sleep deprivation - Effects on indices of stress
p0009 A79-12859

Effect of paradoxical sleep deprivation on the acquisition of sound discrimination
p0167 A79-31988

Effects of partial sleep deprivation on psychological performance and behaviour
p0200 A79-37130

Changes in the circadian rhythm of performance and mood in healthy young men exposed to prolonged, heavy physical work, sleep deprivation, and caloric deficit
p0238 A79-43202

Arousal from sleep by emergency alarms: Implications from the scientific literature
[PB-284044/5] p0051 N79-12700

Minuteman missile crew fatigue and 24-hour alerts
[AD-A056561] p0056 N79-13696

Task complexity and 24-hr performance patterns in morning and evening active subjects
[FOA-C-52001-H6] p0122 N79-17537

SLEEVES

Prosthesis coupling
[NASA-CASE-KSC-11069-1] p0240 N79-26772

SMOKE

A literature review-problem definition studies on selected toxic chemicals. Volume 2: Occupational health and safety aspects of phosphorus smoke compounds
[AD-A056019] p0025 N79-11685

A literature review-problem definition studies on selected toxic chemicals. Volume 8: Environmental aspects of diesel fuel and fog oils SGF number 1 and SGF number 2 and smoke screens generated from them
[AD-A056021] p0025 N79-11688

The optical properties of smoke-protective devices
[FAA-AM-78-41] p0242 N79-26784

SODIUM

NT SODIUM ISOTOPES

SPEECH DISCRIMINATION
U SPEECH RECOGNITION
SPEECH RECOGNITION
Effects of phase manipulation on speech intelligibility through communication headsets --- light aircraft radio communication
p0164 A79-30654
Automatic recognition of spoken words using a functional model of the auditory system
p0235 A79-43464
Human factors. Speech communication
[PS-5/78] p0113 N79-16555
Speech as a pilot input medium
p0119 N79-17519
A preliminary investigation of aural input/output systems for in-flight information retrieval
[AD-A063174] p0178 N79-21770
SPEED INDICATORS
NT HOT-FILM ANEMOMETERS
SPERMATOGENESIS
State of spermatogenesis in rats flown aboard Kosmos-690 biosatellite
p0014 N79-10704
Spermatogenesis in dogs during many years of chronic exposure to gamma radiation and in the aftereffect period
p0073 N79-14727
SPHEROIDS
NT PROLATE SPHEROIDS
SPHYGMOGRAPHY
Analyses for noninvasive monitoring of arterial blood pressure by /I/ phono cuff-sphygmomanometry, for discrete measurements and /II/ arterial ultrasonic imaging, for continuous measurements
p0294 A79-51037
SPINAL CORD
NT SPINE
Dynamic response of vertebral elements related to USAF injury
[AD-A059489] p0071 N79-14713
Tolerance of the neck to indirect impact
[AD-A066971] N79-25749
Simulation of head and neck response to -G sub x and +G sub z impacts
p0285 N79-31908
A three-dimensional mathematical analogue of the spine structure: A comprehensive approach
p0285 N79-31909
A three dimensional discrete element dynamic model of the spine, head and torso
p0285 N79-31910
Analytical modelling of load-deflection behavior of intervertebral discs subjected to axial compression
[AD-A071019] p0316 N79-33830
SPINE
Incidence of spinal disability amongst IAF pilots - Follow up of 38 cases
p0201 A79-37133
Vertebral fractures in Gnat ejections
p0201 A79-37134
Spinal injury pattern due to ejections
p0272 A79-49734
Radiological diagnosis of spinal injuries and deformities
p0272 A79-49735
Assessment of spinal disabilities in relation to flying
p0272 A79-49736
Radiological examination of the Rachis and fitness for employment as a helicopter pilot
p0151 N79-19634
Spine immobilization method and apparatus --- rigid bladder
[NASA-CASE-ARC-11167-1] p0279 N79-30921
The use of spinal analogue to compare human tolerance of repeated shocks with tolerance of vibration, part 1
p0288 N79-31926
SPIROMETERS
Selection of astronaut candidates - Contribution of the exercise ECG and spirography
p0047 A79-15489
SPORES
Thermal resistance of naturally occurring airborne bacterial spores --- Viking spacecraft dry heat decontamination simulation
p0131 A79-26147
SPRAYED PROTECTIVE COATINGS
U PROTECTIVE COATINGS
SPRAYING
Risks from various products used in paint spraying
[BLL-RTS-11499] p0142 N79-18569
SPRINGS (ELASTIC)
Influences of joystick spring resistance on the execution of simple and complex positioning movements
p0119 N79-17517
SPRINGS (WATER)
Amino acids in southern Kamchatka hot springs
p0182 A79-33122
STABILITY
NT AERODYNAMIC STABILITY

Carbohydrate metabolism of the stimulated diaphragm muscle
p0050 N79-12689
Selective attention: The influences of subject sex and degree of prior habituation on performance of an attention task with distraction
p0260 N79-28876
STOCHASTIC PROCESSES
NT RANDOM PROCESSES
Discrimination of density and clustering on four versions of a stochastic display --- human performance of pattern recognition
p0036 A79-13192
Are evolutionary rates really variable --- in vertebrate protein chemistry
p0232 A79-42273
Investigation on the effect of mechanical properties of control elements on human control performance under stochastic roll vibrations
[BMVG-FBWT-78-11] p0146 N79-18593
A stochastic model of muscle fatigue in frequent strenuous work cycles
p0261 N79-29789
STOICHIOMETRY
Coupling of aspartate and serine transport to the transmembrane electrochemical gradient for

sodium ions in Halobacterium halobium - Translocation stoichiometries and apparent cooperativity
p0002 A79-10425

STOMACH
Indomethacin-antihistamine combination for gastric ulceration control
[NASA-CASE-ARC-11118-2] p0077 N79-14755
The influence of SHF electromagnetic fields on the secretory function of the stomach
p0173 N79-20740

STORAGE STABILITY
Gas diffusion liquid storage bag and method of use for storing blood
[NASA-CASE-NPO-13930-1] p0076 N79-14749
Maximizing storage stability of foods to be used for resupply in a controlled ecological life supply system: Evaluation of research
[NASA-CR-158846] p0260 N79-28880

STORAGE TANKS
A system for sterilizing objects --- such as water systems on the space shuttle using ethylene oxide
[NASA-CASE-KSC-11085-1] p0318 N79-33848

STRAIN GAGES
In-vivo bone strain telemetry in monkeys /M. nemestrina/
p0002 A79-10608
Single frequency RF powered ECG telemetry system
p0131 A79-26074

STRATA
NT SUBSTRATES

STRESS (PHYSIOLOGY)
NT ACCELERATION STRESSES (PHYSIOLOGY)
NT CENTRIFUGING STRESS
Heat transfer and temperature distribution in the human body
p0041 A79-13612
Effect of water and electrolyte replacement during exercise in the heat on biochemical indices of stress and performance
p0127 A79-24629
Functional changes in the cardiovascular system of machine-tool operators under physical and neurologically stressful loads
p0160 A79-29270
Conjoint effect of physical stress and noise stress on information processing performance and cardiac response
p0161 A79-29715
Cardiac response to whole-body heating
p0165 A79-30661
Energetic aspects of adaptation --- Russian book on metabolic responses to stress
p0167 A79-31906
Predicting coronary artery disease with treadmill stress testing Changes in R-wave amplitude compared with ST segment depression
p0186 A79-34284
Pathophysiology of overloads: Bibliography of Soviet publications --- Russian book
p0200 A79-36385
Predictive accuracy of Q-X/Q-T ratio, Q-Tc interval, S-T depression and R wave amplitude during stress testing --- heart pathology
p0225 A79-40464
Response of women mountaineers to maximal exercise during hypoxia
p0234 A79-43201
Inhibition of the pituitary-adrenal response to stress during deprivation-induced feeding
p0235 A79-43605
Comparative study of hypoxia and other non-invasive stress tests for evaluation of ischaemic heart disease
p0272 A79-49731
Electrophysiological investigation of sleep during work-shift regime and production-induced emotional stress
p0276 A79-50655
Medical qualification procedures for hazardous-duty aeromedical research
p0026 N79-11695
Gas exchange under environmental stress
[AD-A058242] p0056 N79-13697
Fighter index of thermal stress: Development of interim guidance for hot-weather USAF operations
[AD-A053471] p0056 N79-13699
Stress in air traffic controllers: A restudy of 32 controllers 5 to 9 years later
[FAA-AM-78-40] p0144 N79-18581
Criteria for maximum tolerable heat stress. A proposal
[IZF-1978-13] p0144 N79-18583
Stress factors on pilot performance. A bibliography with abstracts
[NTIS/PS-78/1289/4] p0145 N79-18589
Human exposure to mechanical vibration at lying posture in the ambulance helicopter UH-1D
p0149 N79-19617
Implementation of a divisional aviation program to decrease flight crew fatigue
p0150 N79-19624
Fighter index of thermal stress: Relation to weather conditions at ATC and TAC bases
[AD-A062713] p0174 N79-20748
Effects of fatigue on human behavior and performance. A bibliography with abstracts
[NTIS/PS-79/0071/5] p0177 N79-21762
Cardiac adaptation to endurance training: Determined by echocardiography and electrocardiography
p0194 N79-23648
Stress and fatigue in the driving environment --- physiological and psychological effects of heat and noise experienced inside automobiles
p0211 N79-24629
Design specification for the whole-body algorithm
[NASA-CR-160226] p0212 N79-24641
Stress and simulation in pilot training
[AD-A066670] p0222 N79-25757
Effects of vibration on the human organism
p0249 N79-27862
Stress management: A comparison of educational, aerobic and autosuggestive approaches
p0260 N79-28875
Stress factors on pilot performance. Citations from the International Aerospace Abstracts data base
[NTIS/PS-79/0506/0] p0260 N79-28878
Medical and operational factors of accidents in advanced fighter aircraft
p0290 N79-31944
The causes of decrements in aircrew performance physiological changes produced by vibration and other environmental stresses and response of the cardiovascular system to vibration and combined stress
[AD-A069952] p0318 N79-33845

STRESS (PSYCHOLOGY)
Mental work and emotions --- Russian book
p0002 A79-10847
Sustained operations and sleep deprivation - Effects on indices of stress
p0009 A79-12859
Functional changes in the cardiovascular system of machine-tool operators under physical and neurologically stressful loads
p0160 A79-29270
Conjoint effect of physical stress and noise stress on information processing performance and cardiac response
p0161 A79-29715
Saccadic velocity characteristics - Intrinsic variability and fatigue

TARGET ACQUISITION
Synthetic aperture radar operator tactical target acquisition research p0037 A79-13202
Target acquisition in realistic terrain p0037 A79-13203
Observer performance using a video display --- in simulated air to ground target acquisition tasks p0039 A79-13217
Effects of target motion and image on AAA tracking --- Anti-Aircraft Artillery p0046 A79-14969
Target-terrain classification and detection performance --- to assess aerial photos for tanks p0065 A79-18225
Line criteria in target acquisition with television --- visibility of target image on TV screen p0068 A79-18997
Visual target acquisition and ocular scanning performance p0069 A79-19000
Real-time reconnaissance systems simulator p0139 A79-28175
The role of perceived motion in smooth pursuit eye movements p0225 A79-40184
The effect of expectations on slow oculomotor control. I - Periodic target steps. II - Single target displacements p0225 A79-40185
The relative effects of multiple factors on target acquisition --- by combat pilots p0267 A79-47765
A behavioral model of target acquisition in realistic terrain

[AD-A056760] p0019 N79-10742
Effects of uncertainty on manual tracking performance --- visual tasks
p0086 N79-15592
Prediction, evaluation, and specification of flying qualities by means of step target tracking
p0088 N79-15604
Head aiming/tracking accuracy in a helicopter environment
p0153 N79-19651
The relationship between Air Combat Maneuvering Range (ACMR) output measures and initial visual acquisition performance
[AD-A062134] p0173 N79-20744
A study of pilot/observed interaction in aligning a helicopter with a target
[DLR-FB-79-04] p0283 N79-30945

TARGET RECOGNITION
Target-terrain classification and detection performance --- to assess aerial photos for tanks
p0065 A79-18225
Peripheral acuity and photointerpretation performance
p0068 A79-18996
Dynamics of an image viewed through a rotating mirror
p0221 A79-36365
Effects of stimulus onset and image motion on contrast sensitivity
p0231 A79-42231
The effect of increased monitoring load on vigilance performance using a simulated radar display
p0236 A79-43674
Pursuit after-nystagmus
p0271 A79-49484
Mutual repulsion between moving visual targets
p0275 A79-50473
Latency of peripheral saccades
p0278 A79-50987
Target redundancy in visual search - Do repetitions of the target within the display impair processing
p0299 A79-52540
The behavior of observers in detecting unbriefed targets at different aircraft speeds with side-looking radar
[AD-A060908] p0085 N79-15586
Evaluation of four target-identification training techniques
[AD-A061175] p0123 N79-17548
A review of individual performance in air-to-ground target detection and identification studies
[AD-A061580] p0124 N79-17551
Estimation of aircraft target motion using pattern recognition orientation measurements
p0177 N79-21764

TARGET SIMULATORS
Visual search for complex targets
p0208 A79-38357
Predicting aircraft detectability
p0208 A79-38358

TARGETS
The relationship between Air Combat Maneuvering Range (ACMR) output measures and initial visual acquisition performance
[AD-A062134] p0173 N79-20744

TASK COMPLEXITY
Development and transfer of timesharing skills --- for human multiple task performance
p0035 A79-13184
The application of computer aided evaluative techniques to system test and evaluation --- of fighter aircraft pilot performance
p0036 A79-13190
Tracking in two dimensions as a function of dimension priorities and tracking difficulty
p0036 A79-13193
The event related cortical potential as an index of task workload
p0038 A79-13208
Response surface methodology as a manipulator of complex task difficulty --- for computer generated aircraft area navigation control-display systems evaluation
p0039 A79-13211
Task taxonomy - Two ignored issues --- criteria for task evaluation with respect to empirical data
p0039 A79-13212
Task functional demands as factors in dual-task performance
p0039 A79-13214
The man-computer division of tasks in the case of the control of complex technical systems --- applied to aircraft
p0061 A79-17683
An algorithm to ascertain critical regions of human tracking ability
p0163 A79-30218
Measurement and scaling of workload in complex performance
p0164 A79-30659
A preliminary study of the air traffic controller's 'picture'
p0221 A79-36227
Visual search for complex targets
p0208 A79-38357
Pilot workload in the aircraft of the future
p0226 A79-40646
Pilot workload during final approach in congested airspace
p0269 A79-48014
Modeling the human as a controller in a multitask environment
p0087 N79-15595
Prospects of a mathematical theory of human behavior in complex man-machine systems tasks --- time sharing computer analogy of automobile driving
p0088 N79-15599
Petri nets as a modeling tool for discrete concurrent tasks of the human operator --- describing sequential and parallel demands on human operators
p0088 N79-15600
A model for dynamic allocation of human attention among multiple tasks
p0092 N79-15627
A model of human event detection in multiple process monitoring situations
p0092 N79-15632
A quasi-linear control theory analysis of timesharing skills
p0115 N79-17479
Two measures of performance in a peg-in-hole manipulation task with force feedback
p0118 N79-17506
Task complexity and 24-hr performance patterns in morning and evening active subjects
[FOA-C-52001-H6] p0122 N79-17537

TEMPERATURE CONTROL
Physiological requirements for design of
environmental control systems - Control of heat
stress in high-performance aircraft
[ASME PAPER 78-ENAS-22] p0007 A79-12571
Simulation and control of a human temperature
regulation system
p0041 A79-13613
Importance of temperature control for HEPLEX, a
biological experiment for Spacelab 1 --- plant
gravitational physiology study
p0230 A79-41716
TEMPERATURE DIFFERENCES
U TEMPERATURE GRADIENTS
TEMPERATURE DISTRIBUTION
The local and time-dependent temperature field in
the body of a homeothermic organism in case of
sudden changes of quantity and local

distribution of internal heat production
p0120 A79-24699
Apparatus for supplying conditioned air at a substantially constant temperature and humidity
[NASA-CASE-GSC-12191-1] p0156 N79-19688

TEMPERATURE EFFECTS
A composite view of task performance in hot environments
p0036 A79-13186
Temperature effect of muscular work in the white rat during hypoxia
p0097 A79-20654
Discrimination, temperature, and time of day --- human performance variances
p0161 A79-29718
Characteristics of EEG changes in rabbits in response to local cooling or heating of the central thermosensory area
p0221 A79-36097
Thermal activation of the visual transduction mechanism in retinal rods
p0230 A79-41746
Separation of the effects of raised skin and core temperature on performance of a pursuit rotor task
p0234 A79-43204
Relationship between thermogenic drinking and plasma renin activity in the rat
p0235 A79-43211
Tracking-task performance during heat stress simulating cockpit conditions in high-performance aircraft
p0236 A79-43675
Temperature effects on shape and function of human granulocytes
[AD-A063750] p0189 N79-22757
Effects of sleep at altered ambient temperatures on electrophysiological sleep and thermoregulatory mechanisms in human subjects and in the ground squirrel (Citellus lateralis)
p0216 N79-25709

TEMPERATURE FIELDS
U TEMPERATURE DISTRIBUTION

TEMPERATURE GRADIENTS
Effect of cockpit temperature gradients on the validity of single-point measurements

TEMPERATURE MEASUREMENT
Core temperature measurement in man
p0010 A79-12862
Measurement of skin temperatures of active subjects by wireless telemetry
p0011 A79-12872
Effect of cockpit temperature gradients on the validity of single-point measurements
p0234 A79-43203
Pattern of heat loss from a subject wearing CF temperate-climate combat clothing
[AD-A057746] p0093 N79-15636

TEMPERATURE MEASURING INSTRUMENTS
Temperature changes during exercise measured by thermography
p0235 A79-43209
Microwave thermography: Physical principles and diagnostic applications
p0083 N79-15567

TENSILE STRESS
Investigation of blood subjected to volume tension
p0275 A79-50261

TERMINAL CONFIGURED VEHICLE PROGRAM
Advanced transport operation effects on pilot scan patterns
p0295 A79-51098
Evaluation of display and control concepts for a terminal configured vehicle in final approach in a windshear environment
p0090 N79-15616

TERMINAL GUIDANCE
Adaptive control of a robotic manipulator
p0046 A79-15001
Terminal guidance sensor system
[NASA-CASE-NPO-14521-1] p0174 N79-20746

TERMINOLOGY
Anthropometry
p0032 N79-11737

TERNARY SYSTEMS (DIGITAL)
U DIGITAL SYSTEMS

TERRAIN
Adaptive locomotion of a multilegged robot over rough terrain
p0163 A79-30217

TERRAIN ANALYSIS
Target acquisition in realistic terrain
p0037 A79-13203
Target-terrain classification and detection performance --- to assess aerial photos for tanks
p0065 A79-18225

TERRAIN FOLLOWING AIRCRAFT
Visual workload of the copilot/navigator during terrain flight
p0038 A79-13206
Visual workload of the copilot/navigator during terrain flight
p0209 A79-38364

TERRESTRIAL PLANETS

U DISPLAY DEVICES

VISUAL FIELDS
Apparent saturation of blue-sensitive cones occurs at a color-opponent stage p0002 A79-10474
Human factors considerations in the design and evaluation of a helmet mounted display using a light emitting diode matrix p0063 A79-18214
Eye movements and symmetry - Foundations for a quantitative analysis of eye movements as they depend on the structure of the perception field --- German thesis p0098 A79-20756
The common occurrence of errors of perceived distance p0100 A79-22775
The equivalent background and retinal eccentricity p0104 A79-24066
Useful visual field size for pattern perception p0129 A79-25098
Stereo 3-D perception for a robot p0019 N79-10740

VISUAL FLIGHT
Flight management research utilizing an oculometer --- pilot scanning behavior during simulated approach and landing p0001 A79-10389
Choice and techniques of analysis of indices for the perception of visual information. III --- by pilots p0103 A79-23954
Visual workload of the copilot/navigator during terrain flight p0209 A79-38364
Oculomotor performance of aviators during an autorotation maneuver in a helicopter simulator p0151 N79-19638
Visual performance/workload of helicopter pilots during instrument flight p0152 N79-19640

VISUAL OBSERVATION
Locus of the effect of specific practice in continuous visual search p0129 A79-25099
A two-stage model of visual search p0186 A79-33948
Advanced transport operation effects on pilot scan patterns p0295 A79-51098
Two dimensional eye tracking: Sampling rate of forcing function p0090 N79-15617
Head tracking at large angles from the straight ahead position p0090 N79-15618
Airline pilot scan patterns during simulated ILS approaches [NASA-TP-1250] p0155 N79-19682
Visual search performance during simulated radar observation with and without a sweepline [AD-A068020] p0281 N79-30938

VISUAL PERCEPTION
NT CRITICAL FLICKER FUSION
NT SPACE PERCEPTION
NT VISUAL DISCRIMINATION
Apparent saturation of blue-sensitive cones occurs at a color-opponent stage p0002 A79-10474
Perceptual delay - A consequence of metacontrast and apparent motion p0035 A79-13183
Role of the frontal associative region of the cortex in the activity of the auditory and visual sensory systems p0043 A79-14371
Selection and techniques for analysis of indices of visual data reception. II --- aircraft pilot eye movements p0047 A79-15494
Perceptual localization, feature identification and ocular motor factors in scanning a visual display p0064 A79-18218
Human engineering study of information processing applicable to helmet-mounted displays p0068 A79-18994
Evoked potential correlates of display image quality p0068 A79-18998
Light flashes in space --- cosmic ray interaction with astronaut visual system p0100 A79-22261
Choice and techniques of analysis of indices for the perception of visual information. III --- by pilots p0103 A79-23954
Factors controlling the competing sensations produced by a bistable stroboscopic motion display p0104 A79-24067
The perceived direction of the binocular image p0104 A79-24069
Useful visual field size for pattern perception p0129 A79-25098
Hyper-resolution in human perception of movement in visual displays p0132 A79-26240
Elements of the theory of biological analyzers --- Russian book p0132 A79-26450
Aeromedical implications of the X-Chrom lens for improving color vision deficiencies p0135 A79-27556
Object, illusion and frame of reference as design criteria for computer-generated displays p0137 A79-28157
Omnidirectional increase in threshold for image shifts during saccadic eye movements p0139 A79-28198
Piecewise Fourier analysis of images and the role of occipital, temporal and parietal cortex in visual perception p0160 A79-29248
Experimental investigation of the visual system using one-dimensional Walsh gratings p0160 A79-29249
Training of visual recognition p0160 A79-29250
Role of the visual system in the compensation of vestibular dysfunction p0162 A79-29971
Deductive derivation of a mathematical model for spectral sensitivity of the human organ of sight. I, II p0166 A79-31178
A bioengineering simulator of the human visual apparatus

p0166 A79-31180

Visual contrast sensitivity functions obtained with colored and achromatic gratings
p0181 A79-32628

Perception of continuity in stroboscopic motion - A temporal frequency analysis
p0186 A79-34375

The interpretation of visual motion --- Book
p0186 A79-34424

The development of integrated multidimensional displays
p0187 A79-34990

Nonlinear optical susceptibility of the human eye to IR radiation in the 800 to 1355 micron range
p0188 A79-35363

Correlation of binocular vision test results with synaptophore evaluation
p0201 A79-37136

Predicting aircraft detectability
p0208 A79-38358

Oculomotor factors in visual perceptual response efficiency
p0209 A79-38361

The visual perception of motion in depth
p0210 A79-39087

The role of perceived motion in smooth pursuit eye movements
p0225 A79-40184

The relationship between the apparent vertical and the vertical horopter --- visual perception of luminous line
p0225 A79-40186

Axiomatic summary and deductions from Hering's principles of visual direction
p0228 A79-41421

The tilt illusion - Length and luminance changes of induction line and third /disinhibiting/ line
p0228 A79-41422

Objective determination of human visual acuity from the visual evoked potential
p0228 A79-41423

Effects of stimulus onset and image motion on contrast sensitivity
p0231 A79-42231

Light adaptation in a normal and a rod monochromat - Psychophysical and VEP increment threshold comparisons
p0232 A79-42234

Form information is necessary for the perception of motion
p0232 A79-42235

On the latency of human visually evoked response to sinusoidal gratings
p0232 A79-42236

Changes in optokinetic, postoptokinetic, and reverse postoptokinetic nystagmus after bilateral labyrinthectomy
p0255 A79-46499

Sensory illusions - The ophthalmologist's point of view
p0255 A79-46595

Retinal site of transient tritanopia
p0256 A79-46623

Eye torsion and visual tilt are mediated by different binocular processes
p0256 A79-46651

Eye movements and visual perception --- Russian book
p0267 A79-47429

Stereopsis in monkeys using random dot stereograms - The effect of viewing duration
p0271 A79-49481

Contrast sensation - A linear function of stimulus contrast
p0271 A79-49483

Forms of oculomotor activity under conditions of positive visual feedback
p0276 A79-50657

Latency of peripheral saccades
p0278 A79-50987

Reciprocal interaction between the photopic and scotopic systems of the visual analyzer in man
p0296 A79-51327

Effect of adaptation level on certain visual functions in man
p0296 A79-51328

Orientation relative to the retina determines perceptual organization
p0299 A79-52539

Target redundancy in visual search - Do repetitions of the target within the display impair processing
p0299 A79-52540

Visual motion perception by intelligent systems
p0300 A79-52691

A cinematographic technique for investigating some aspects of visual recognition
p0300 A79-53067

Nonlinear perception of infrared radiation in the 800-1355 nm range with human eye
p0301 A79-53163

Stereo 3-D perception for a robot
p0019 N79-10740

A behavioral model of target acquisition in realistic terrain
[AD-A056760] p0019 N79-10742

Visual performance assessment through clear and sunscreen-treated windows
[AD-A059750] p0080 N79-14775

Experiments in texture perception
[AD-A059630] p0086 N79-15587

The internal model: A study of the relative contribution of proprioception and visual information to failure detection in dynamic systems --- sensitivity of operators versus monitors to failures
p0087 N79-15596

Vision
p0095 N79-15894

General methods to enable robots with vision to acquire, orient, and transport workpieces
[PB-287199/4] p0113 N79-16556

Image processing program completion report
[AD-A061597] p0123 N79-17549

Visual effects of helicopter maneuvre on weapon aiming performance
p0150 N79-19626

Visual requirements for the helicopter pilot
p0151 N79-19636

Observation of night shipboard helicopter operations from a 210 foot US Coast Guard cutter
p0151 N79-19637

Oculomotor performance of aviators during an autorotation maneuver in a helicopter simulator
p0151 N79-19638

Visual performance/workload of helicopter pilots during instrument flight
p0152 N79-19640

Sensorial aspects of helicopter operations
p0152 N79-19644

Aviator visual performance: A comparative study of a helicopter simulator and the UH-1 helicopter
p0153 N79-19652

Bandpass channels, zero-crossings, and early visual information processing
[AD-A062338] p0170 N79-20724

Restoration of color perception after deadapting flashes
p0193 N79-23640

Effect of optical magnification on the perception of displayed orientation
[AD-A065949] p0196 N79-23660

The effects of pilot age, lighting, and head-down time on visual accomodation
[AD-A064912] N79-25747

The limited range of the human eye for optical aircraft acquisition
p0291 N79-31948

A theoretical and experimental analysis of the outside world perception process
[NLR-MP-78020-U] p0309 N79-32835

Analysis of visual estimation of system state from arbitrary displays
p0317 N79-33843

VISUAL PIGMENTS

Light flashes in space --- cosmic ray interaction with astronaut visual system
p0100 A79-22261

VISUAL SIGNALS

Applications of two-parameter decision theories in psychology
[AD-A059010] p0052 N79-12705

Use of the tilt cue in a simulated heading tracking task
p0091 N79-15621

Manual control of yaw motion with combined visual and vestibular cues
p0119 N79-17513

Human factors analysis of visual distress signaling devices --- used by boaters
[AD-A064174] p0190 N79-22765

VISUAL STIMULI

The responses of frogs to vestibular and visual stimulation in weightlessness
p0006 A79-12513

Perceptual delay - A consequence of metacontrast and apparent motion
p0035 A79-13183

Eye movements and symmetry - Foundations for a quantitative analysis of eye movements as they depend on the structure of the perception field --- German thesis
p0098 A79-20756

Locus of the effect of specific practice in continuous visual search
p0129 A79-25099

Optokinetic motion sickness - Attenuation of visually-induced apparent self-rotation by passive head movements
p0135 A79-27558

A fast-reacting and versatile optokinetic stimulus pattern by computer graphics with application examples
p0160 A79-28993

A further investigation of visual dominance
p0186 A79-33949

Visual search for complex targets
p0208 A79-38357

Detection of coloured stimuli by independent linear systems
p0231 A79-42229

Effects of stimulus onset and image motion on contrast sensitivity
p0231 A79-42231

Visual angle constancy for the subjective checkerboard pattern, as an indication of cortical origination of size constancy
p0231 A79-42232

Spatial frequency masking in human vision - Binocular interactions
p0232 A79-42284

Spatial summation in human vision - Simple reaction time measurements
p0265 A79-47115

Using color substitution pupil response to expose chromatic mechanisms
p0265 A79-47116

Direction-selective adaptation with very slow motion
p0265 A79-47118

An analysis of the saccadic system by means of double step stimuli
p0270 A79-49480

The peripheral critical flicker frequency
p0271 A79-49482

Contrast sensation - A linear function of stimulus contrast
p0271 A79-49483

Orientation relative to the retina determines perceptual organization
p0299 A79-52539

Optokinetic reactions in man elicited by localized retinal motion stimuli
p0304 A79-54251

A comparison of oculomotor and motion parallax cues of egocentric distance
p0305 A79-54253

Eye torsion in response to a tilted visual stimulus
p0305 A79-54254

Cerebral hemodynamics and visual analyzer function following exposure to bright light
p0109 N79-16525

Training effect of recognition of different alphabets of visual stimuli
p0175 N79-21747

Contrast sensitivity of the human visual system at one luminance level while adapted to a stimulus at another luminance level
[AD-A064370] p0190 N79-22759

Methods for localization of electrical sources in the human brain and applications to the visual system
p0314 N79-33815

VISUAL TASKS

Imagery interpreter performance in the comparison of subjective estimates of photographic image quality
p0036 A79-13191

Lateral orientation and cerebral activation - Considerations for information display
p0037 A79-13194

Visual workload of the copilot/navigator during terrain flight
p0038 A79-13206

Observer performance using a video display --- in simulated air to ground target acquisition tasks
p0039 A79-13217

AWAVS, a research facility for defining flight trainer visual system requirements
p0062 A79-18207

Effects of information processing requirements on reaction time of the eye
p0064 A79-18219

Secondary visual workload capability with primary visual and kinesthetic-tactual displays
p0064 A79-18220

Peripheral acuity and photointerpretation performance
p0068 A79-18996

Line criteria in target acquisition with television --- visibility of target image on TV screen
p0068 A79-18997

Speed and load stress as determinants of performance in a time sharing task
p0068 A79-18999

Visual target acquisition and ocular scanning performance
p0069 A79-19000

Visual cues in manual tracking of simulated targets
p0103 A79-23792

Comparative evaluation of the effectiveness of visual and aural tracking of a sinusoidal signal
p0159 A79-28736

The effects of carbon monoxide on dual-task performance
p0161 A79-29716

A rationale for human operator pulsive control behavior
p0186 A79-34520

Visual search for complex targets
p0208 A79-38357

Regression models of search time for color-coded information displays

A new application of LBNP to measure orthostatic tolerance before and after 0-G simulation /water immersion/ [IAF PAPER 79-87] p0302 A79-53290
Equipment for surgical interventions and childbirth in weightlessness [IAF PAPER 79-97] p0302 A79-53296
The biomedical implications of extended duration zero-g extravehicular activities [IAF PAPER 79-ST-06] p0303 A79-53447
Radiographic comparison of human lung shape during normal gravity and weightlessness p0305 A79-54269
Protein fractions and enzymatic activity thereof in the rat myocardium after the flight on Kosmos-690 biosatellite p0014 N79-10700
State of spermatogenesis in rats flown aboard Kosmos-690 biosatellite p0014 N79-10704
Response of crown gall tissue to the space environment: Residual carbohydrates in supporting tissue --- COSMOS 782 p0020 N79-11653
Responses of crown gall tissue to the space environment: Tumor development and anatomy --- cosmos 782 p0020 N79-11654
Responses of crown gall tissue to the space environment: Glutamine synthetase activity --- cosmos 782 p0020 N79-11655
Responses to crown gall tissue to the space environment: Isozyme patterns --- cosmos 782 p0020 N79-11656
The morphogenetic responses of cultured totipotent cells of carrot (Daucus carota L.) at zero gravity --- cosmos 782 p0021 N79-11657
Killfish development in zero-G on COSMOS 782: Fundulus experiment K-104 p0021 N79-11659
Effects of weightlessness on the embryonic development and aging of Drosophila p0022 N79-11670
Effects of weightlessness on the genetics and aging process of drosophila melanogaster p0023 N79-11673
Effect of weightlessness and centrifugation (LXG) on erythrocyte survival in rats subjected to prolonged space flight

p0023 N79-11674
Quantitative analysis of selected bone parameters
p0023 N79-11676
Anthropometric changes in weightlessness
p0032 N79-11735
Materials of the final reports on the joint
Soviet-American experiment on the Kosmos-936
biosatellite
[NASA-TM-75582] p0071 N79-14711
Changes in amount and composition of phospholipids
in rat skeletal muscle microsomal fraction under
the influence of a flight aboard the Kosmos-690
biosatellite
p0108 N79-16519
Man-machine analysis of translation and work tasks
of Skylab films
[NASA-CR-151879] p0146 N79-18592
Problems of human adaption to spaceflight
p0157 N79-19985
The adrenosympathetic system in the presence of
traumatic shock during simulation of effects of
weightlessness on the human body
p0192 N79-23633
Distinctions referable to excretion of end
products of protein metabolism in urine of man
submitted to 182-day antiorthostatic hypokinesia
p0193 N79-23635
Validation of a model for investigating red cell
mass changes during weightlessness
[NASA-CR-160188] p0211 N79-24634
Development of an hypothesis for simulating
anti-orthostatic bed rest
[NASA-CR-160200] p0217 N79-25717
Possibilities of preventing adverse reactions in
simulating the acute period of adaptation to
weightlessness
p0244 N79-27825
Studies of venous circulation in the crew of the
Salyut-5 orbital station
p0310 N79-33791
Effects on lipid metabolism in man of some factors
that simulate space flight conditions
p0311 N79-33794

WEIGHTLESSNESS SIMULATION
Distribution of pulmonary ventilation and
perfusion during short periods of weightlessness
p0068 A79-18967
A model for vestibular function in altered
gravitational states
p0229 A79-41710
Prophylactic effects of intermittent acceleration
against physiological deconditioning in
simulated weightlessness
p0229 A79-41712
Comparison of physiological effects of head-down
tilting and immersion on the human body
p0298 A79-52279
Ultrastructural development of the vestibular
system under conditions of simulated
weightlessness
p0298 A79-52284
Early cardiovascular adaptation to zero gravity
simulated by head-down tilt
[IAF PAPER 79-77] p0301 A79-53286
Ultrastructural development of the vestibular
system of frog larvae in 0g simulation
[IAF PAPER 79-78] p0301 A79-53287
Cardiac arrhythmia following postimmersion +G sub
z accelerations
p0015 N79-10710
Physiological responses of women to simulated
weightlessness: A review of the first female
bed-rest study
[NASA-SP-430] p0054 N79-13686
Role of vestibular system in behavior of animals
submitted to prolonged slow rotation
p0074 N79-14734
Antiorthostatic hypokinesia as an approximate
model of weightlessness
p0108 N79-16520
Correction of transcapillary exchange in man under
the influence of rotation on a centrifuge while
immersed in water
p0110 N79-16533
*Effects of hypodynamic simulations on the skeletal
system of monkeys*
p0146 N79-19021

WEST GERMANY
U GERMANY

WETNESS
U MOISTURE CONTENT

WHALES
Radio tracking of a fin whale /Balaenoptera
physalus/
p0061 A79-18008

WHIPLASH INJURIES
Head acceleration and psychomotor performance ---
related to crash accident survival rates
p0135 A79-27559

U FEMALES

WORDS (LANGUAGE)
Attempt to describe a class of man-machine
dialogue systems based on a natural language
p0251 A79-44057

WORK
NT PHYSICAL WORK

WORK CAPACITY
Time estimation as a technique to measure workload
--- of aircraft pilot in flight simulation
p0062 A79-18203
Characteristics of somatic and autonomic
regulation during work of small muscle groups as
a function of loading regime
p0276 A79-50653
Human work measurement. A bibliography with
abstracts
[NTIS/PS-78/1197/9] p0081 N79-14781
Prediction of pilot reserve attention capacity
during air-to-air target tracking
p0116 N79-17488

WORK-REST CYCLE
Simulation study on time series of heart responses
p0037 A79-13197
Characteristics of somatic and autonomic
regulation during work of small muscle groups as
a function of loading regime
p0276 A79-50653
Electrophysiological investigation of sleep during
work-shift regime and production-induced
emotional stress
p0276 A79-50655

WORKLOADS (PSYCHOPHYSIOLOGY)
Visual workload of the copilot/navigator during
terrain flight
p0038 A79-13206
The event related cortical potential as an index
of task workload
p0038 A79-13208
The multiloop concept of the pilot work load as a
basis of future experiments and studies
[ONERA, TP NO. 1978-10] p0085 A79-14795

Secondary visual workload capability with primary visual and kinesthetic-tactual displays
p0064 A79-18220
The effects of participatory mode and task workload on the detection of dynamic system failures
p0098 A79-21156
Morbidity experience of air traffic control personnel - 1967-77
p0101 A79-23466
Functional changes in the cardiovascular system of machine-tool operators under physical and neurologically stressful loads
p0160 A79-29270
Measurement and scaling of workload in complex performance
p0164 A79-30659
A preliminary study of the air traffic controller's 'picture'
p0221 A79-36227
Methodological considerations of visual workloads of helicopter pilots
p0209 A79-38363
Visual workload of the copilot/navigator during terrain flight
p0209 A79-38364
Measurements of pilot workload during low altitude and high speed maneuvers of F-1 supersonic jet fighter
p0209 A79-38821
Pilot workload during final approach in congested airspace
p0269 A79-48014
Electrophysiological investigation of sleep during work-shift regime and production-induced emotional stress
p0276 A79-50655
Bioinstrumentation for evaluation of workload in payload specialists - Results of ASSESS II
[IAF PAPER 79-88] p0302 A79-53291
Life stress, organizational stress, and job satisfaction
[AD-A055153] p0057 N79-13706
A survey of existing computer programs for aircrew workload assessment
[AD-A058518] p0059 N79-13718
Psychological experiment on components of the meaning of work
p0071 N79-14709
A simulator study of the interaction of pilot workload with errors, vigilance, and decisions
[NASA-TM-78482] p0079 N79-14769
Time estimation as a secondary task to measure workload: Summary of research
p0093 N79-15634
Pilot workload qualification for avionics design
p0114 N79-16564
The facilitating effects of uncertainty in long-term manual control
p0115 N79-17485
The effects of participatory mode and task workload on the detection of dynamic system failures
p0116 N79-17487
Reduced mental capacity and behavior of a rider of a bicycle simulator under alcohol stress or under dual task load
p0116 N79-17489
An analysis of helicopter pilot control behaviour and workload during instrument flying tasks
[NLR-MP-78003-U] p0124 N79-17553
The measurement and scaling of workload in complex performance
[FAA-AM-78-34] p0125 N79-17558
An evaluation of the effects of a stability augmentation system upon aviator performance/workload during a MEDEVAC high hover operation
p0148 N79-19612
TADRAP: A computer-aided technique for reducing aircrew task analysis data --- helicopter design considering human factors
p0150 N79-19628
An analysis of helicopter pilot control behavior and workload during instrument flying tasks
p0150 N79-19630
Visual performance/workload of helicopter pilots during instrument flight
p0152 N79-19640
Sensorial aspects of helicopter operations
p0152 N79-19644
Crew workload assessment. Development of a measure of operator workload
[AD-A068616] p0261 N79-28884
A comparison of the job attitudes and interest patterns of air traffic and airway facility personnel
[AD-A067826] p0281 N79-30933
Performance and workload analysis of inflight helicopter missions
[NLR-MP-77013-U] p0308 N79-32834

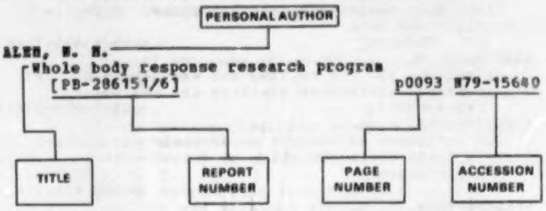
PERSONAL AUTHOR INDEX

AEROSPACE MEDICINE AND BIOLOGY / *a continuing bibliography* JANUARY 1980

1979 Cumulative Index

Typical Personal Author Index Listing



Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g., NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the title, e.g. p0093 N79-15640. Under any one author's name the accession numbers are arranged in sequence with the *IAA* accession numbers appearing first.

A

ABAIDOO, K. J. R.
A literature review-problem definition studies on selected toxic chemicals. Volume 2: Occupational health and safety aspects of phosphorus smoke compounds
[AD-A056019] p0025 N79-11685

ABBATUCCI, J.-S.
Pulmonary functional tolerance to ionizing radiation - An experimental study
p0256 A79-46601

ABDELWAHAB, F. E.
The effects of active and passive heat acclimatization procedures on the cardiovascular, thermoregulatory, and sweat rate responses to work in the heat in male humans
p0195 N79-23651

ABE, N.
Development of adaptation to hypodynamics on rat and its readaptability to ambulatory life
[IAF PAPER 79-76] p0301 A79-53285

ABEL, L. A.
Saccadic velocity characteristics - Intrinsic variability and fatigue
p0165 A79-30663

ABELES, F.
Firefighters Integrated Response Equipment System
[ASME PAPER 78-ENAS-39] p0009 A79-12586

ABERNETHY, C. N.
Effects of deceleration and rate of deceleration on live seated human subjects
[PB-284653/3] p0057 N79-13702

ABIDIN, B. I.
The combined effect of carbon monoxide and normobaric hyperoxia on animals
p0073 N79-14730

ABRAHAM, S.
COSMOS 936, experiment K204: The effects of space flight on some liver enzymes concerned with carbohydrate and lipid metabolism in the rat
p0023 N79-11675

ABRAMS, M. L.
Relating performance in basic electricity and electronics and A schools
[AD-A060914] p0085 N79-15584

ABRAMS, S. G.
Characterization of cardiovascular function by automated monitoring of cardiac contractility and left ventricular wall motion activity
p0247 N79-27842

ACCOMAZZO, E.
In-flight measures of stress reduction due to wearing expandable foam earplugs
p0273 A79-49986

ACKLES, K. N.
A Canadian approach to high altitude protection
p0085 A79-14435

ADAMS, J. D.
Molecular sieve oxygen generating system - The argon question /A brief review/
p0274 A79-49994

ADAMS, J. J.
Study of the use of a nonlinear, rate limited, filter on pilot control signals
p0119 N79-17515

ADAMS, T. D.
Cardiac adaptation to endurance training: Determined by echocardiography and electrocardiography
p0194 N79-23648

ADAMS, W. C.
Effects of ozone inhalation on work performance and maximal oxygen uptake
p0133 A79-27103
Temperature changes during exercise measured by thermography
p0235 A79-43209

ADAVAL, S. K.
Assessment of burns in accident fatalities
p0272 A79-49729
Delayed effects of alcohol ingestion on + Gz tolerance
p0272 A79-49730

ADEY, W. R.
Possible mechanisms of weak electromagnetic field coupling in brain tissue
p0082 N79-15555

AGADZHANYAN, N. A.
The organism and the habitation atmosphere
[NASA-TM-75536] p0049 N79-12685
Prospects of using Japanese quail in biological life support systems
p0109 N79-16531
Effect of combination of hypoxia and hypercapnia on survival of Japanese quail
p0194 N79-23641
Energy expenditures of man during long exposure to a periodically changing atmosphere
p0312 N79-33799

AGANEZOV, S. A.
The role of lesser circulation hemodynamic changes in pulmonary gas exchange
p0300 A79-53066

AGARWAL, G. C.
Directional errors of movements and their correction in a discrete tracking task
p0086 N79-15589
A quasi-linear control theory analysis of timesharing skills
p0120 N79-17520

AGARWAL, S. K.
Cases of probable Aero Otitis interna
p0183 A79-33194

AGIN, A. K.
A behavioral model of target acquisition in realistic terrain
[AD-A056760] p0019 N79-10742

AHLUWALIA, J. N.
Abolition of a viscerosomatic reflex during oxygen deprivation
p0227 A79-41187

AHLUWALIA, K. J. S.
Cases of probable Aero Otitis interna
p0183 A79-33194

AISEN, S.
Intelligence
p0095 N79-15896

AKERMAN, A., III
Predicting aircraft detectability
p0208 A79-38358
AKERS, L. A.
Left Anterior Hemiblock (LAH): Diagnosis and aeromedical risk
p0029 N79-11715
AKESENOV, V. A.
Investigation of composition of trace contaminants in the air environment of the Soyuz-22 spacecraft
p0072 N79-14720
AKHMADIEVA, A. KH.
Genetic effects of cosmic radiation on bacteriophage T4Br/+/ /On materials of biological experiment Soyuz-Apollo/
p0229 A79-41708
AKHTAR, M.
Electrocardiographic abnormalities in Air Force personnel
p0182 A79-33191
Comparative study of hypoxia and other non-invasive stress tests for evaluation of ischaemic heart disease
p0272 A79-49731
AKHUNOV, A. A.
Changes in blood sugar content of dogs exposed to chronic gamma radiation for six years
p0014 N79-10706
AKIMOV, G. A.
Paroxysmal disorders of consciousness due to flight factors
p0161 A79-29300
AKIYAMA, M.
Epimerization of L-isoleucine on Na-montmorillonite and its implication to Precambrian chemical fossils
p0206 A79-37979
AKOEV, I. G.
Genetic effects of cosmic radiation on bacteriophage T4Br/+/ /On materials of biological experiment Soyuz-Apollo/
p0229 A79-41708
AKSENOV, S. I.
Some comments on interpretations of Viking biological experiments
p0255 A79-46465
ALARIE, Y. C.
Renal damage in mice following exposure to the pyrolysis products of polytetrafluoroethylene
p0066 A79-18306
ALAVERDIAN, A. M.
Norepinephrine uptake by the isolated heart of rats adapted and deadapted to hypoxia
p0097 A79-20621
ALBANESE, R. A.
Human operators in adversary tracking encounters
p0269 A79-48015
ALBUS, J. S.
Proximity-vision system for protoflight manipulator arm
[NASA-CR-158652] p0197 N79-24658
ALEKSANDROVA, E. A.
Prophylactic effects of intermittent acceleration against physiological deconditioning in simulated weightlessness
p0229 A79-41712
Comparison of physiological effects of head-down tilting and immersion on the human body
p0298 A79-52279
ALEKSEENKO, N. IU.
Significance of motor activity for spatial hearing
p0043 A79-14372
ALEKSEEV, M. A.
Mechanism for the regulation of human posture during movements of the foot
p0276 A79-50651
ALEKSENKO, A. S.
Blood lipid changes in hypoxic rats
p0074 N79-14731
ALEKSEYA, V. P.
Antiorthostatic hypokinesia as an approximate model of weightlessness
p0108 N79-16520
ALEKSEYEV, D. A.
Bioelectrical activity of the brain during 49-day antiorthostatic hypokinesia in individuals with early signs of vegetovascular dysfunction
p0108 N79-16521
ALEKSEYEV, Y. I.
Morphological study of adrenals of rats irradiated during flight aboard Kosmos-690 satellite
p0108 N79-16517
ALEM, N. M.
Whole body response research program
[PB-286151/6] p0093 N79-15640
Whole body response research program. Appendix A: Methodology
[PB-286152/4] p0094 N79-15641
Whole body response research program. Appendix B: Raw data
[PB-286153/2] p0094 N79-15642
Whole body response research program. Appendix C: Processed data
[PB-286154/0] p0094 N79-15643
ALEXANDER, M.
Guidelines for fit testing and evaluation of USAF personal-protective clothing and equipment
[AD-A065901] p0197 N79-23668
ALEXANDRIDIS, A. A.
The influence of vehicle aerodynamic and control response characteristics on driver-vehicle performance
p0089 N79-15608
ALLAKHVERDOV, B. L.
Coacervate drops - Primitive forms of precells
p0204 A79-37962
ALLAN, J. R.
Effect of induced cyclic changes of deep body temperature on task performances
p0202 A79-37708
Effect of cockpit temperature gradients on the validity of single-point measurements
p0234 A79-43203
Separation of the effects of raised skin and core temperature on performance of a pursuit rotor task
p0234 A79-43204
Effect on performance of cycling deep body temperature between 37.0 and 37.6 C
p0274 A79-49993
ALLEN, C. L.
The relationship between aerobic fitness and cardiovascular risk factors in the Canadian forces
[AD-A069865] p0316 N79-33829
ALLEN, G.
The use of spinal analogue to compare human tolerance of repeated shocks with tolerance of vibration, part 1
p0288 N79-31926
ALLEN, R. W.
Use of reward-penalty structures in human experimentation
p0089 N79-15607
The effects of alcohol on driver performance in a decision making situation
p0092 N79-15629
A decision model applied to alcohol effects on driver signal light behavior
p0092 N79-15630
Driver steering dynamics measured in car simulator under a range of visibility and roadmaking conditions
p0117 N79-17493
ALLER, C.
Chemicals identified in human biological media, a pilot literature survey
[PB-290690/7] p0214 N79-24649
ALLUISI, E. A.
Measurement and scaling of workload in complex performance
p0164 A79-30659
The measurement and scaling of workload in complex performance
[FAA-AM-78-34] p0125 N79-17558
ALPEROVITCH, Y.
Adaptive estimation of information values in continuous decision making and control of advanced aircraft

WAGNER-BARTAK, C. G.
Manned simulations of the SRMS in SIMFAC
p0089 N79-15611
WALKER, C. F.
Multi-channel stimulation of peripheral nerve trunks
p0176 N79-21753
WALKER, G. W. R.
Nucleotide-binding site data and the origin of the genetic code
p0206 A79-37974
WALKER, S.
Development of space biology experiments for the Space Shuttle - A student's perspective
[AAS PAPER 78-134] p0099 A79-21252
WALL, R. J.
Automated clinical system for chromosome analysis
[NASA-CASE-NPO-13913-1] p0050 N79-12694
WALLER, M. C.
Models of human operators in vision dependent tasks
[NASA-CP-2103] p0317 N79-33838
WALRAFEN, G. E.
Raman and infrared investigations of the nature of intracellular water
[AD-A061254] p0120 N79-17522
WALSH, A. B.
Cell response to chronic irradiation-modeling and simulation studies
p0142 N79-18562
WALTER, J.
The significance of rhythm disturbances in asymptomatic persons

p0027 N79-11698

WALTER, P. V.
Skin-resistance measuring device with higher resolution
p0252 A79-45476

WALTHER, U.
Helicopter night operations - Feasibility and impact on the overall system
p0048 A79-16235

WANG, T. C.
Mathematical studies of oxygen transport to tissue
p0170 N79-20723

WANNER, J.-C.
The multiloop concept of the pilot work load as a basis of future experiments and studies
[ONERA, TP NO. 1978-10] p0045 A79-14795
Pilot workload in the aircraft of the future
p0226 A79-40646
The vestibule and flying
p0255 A79-46598

WANZEK, S. J.
Aircrew inflight physiological data acquisition system 2
[AD-A055638] p0055 N79-13690

WARD, C.
A head injury model
p0286 N79-31918

WARD, S. L.
An algorithm to ascertain critical regions of human tracking ability
p0163 A79-30218
Determination of cerebral and neck subcutaneous tissue PO2 with 3 and 4 +Gz in M. mulatta
p0234 A79-43205

WARNKE, C. T.
A study of noninvasive blood pressure measurement techniques
p0294 A79-51036

WARTZOK, D.
Radio tracking of a fin whale /Balaenoptera physalus/
p0061 A79-18008

WASHIZU, K.
A study of the effect of forcing function characteristics on human operator dynamics in manual control
p0086 N79-15590
Motion cue effects on human pilot dynamics in manual control
p0119 N79-17514

WASIELEWSKI, M. R.
In vitro duplication of the primary light-induced charge separation in purple photosynthetic bacteria
p0131 A79-26100

WASSERMAN, J. F.
Development and evaluation of instrument systems for noninvasive detection, characterization and quantification of atherosclerotic lesions
[PB-286851/1] p0085 N79-15582

WASSERMAN, K.
Anaerobic threshold alterations caused by endurance training in middle-aged men
p0227 A79-41184

WASTI, K.
A literature review-problem definition studies on selected toxic chemicals. Volume 2: Occupational health and safety aspects of phosphorus smoke compounds
[AD-A056019] p0025 N79-11685
A literature review-problem definition studies on selected toxic chemicals. Volume 5: Occupational health and safety and environmental aspects of zinc chloride
[AD-A056020] p0025 N79-11687

WATANABE, K.
Structure-stability relationship of thermophile tRNA - A model for biological adaptation and limit of life at high temperature
p0206 A79-37976

WATANABE, Y.
Simulation study on time series of heart responses
p0037 A79-13197

WATT, D. G.
Doppler detection of thresholds for decompression-induced venous gas emboli in the awake rat
p0202 A79-37707

WATTERS, H. H.
Construction in space - Toward a fresh definition of the man/machine relation
p0187 A79-34985

WATTS, C. D.
A biogeochemical study of the Abu Dhabi algal mats - A simplified ecosystem
p0132 A79-26373

WEAVER, C. S.
A study of noninvasive blood pressure measurement techniques
p0294 A79-51036

WEBBER, C.
Changes in lung volume, lung density, and distribution of ventilation during hypobaric decompression
p0185 A79-33806

WEBBER, K. T.
The metabolic demand and oxygen supply of the heart - Physiologic and clinical considerations
p0300 A79-52894

WEBER, O.
Analyses of midair collisions in German airspace: Methodology and results
p0291 N79-31949
